Choose the correct answer from the options given below:

- A A-III, B-I, C-IV, D-II
- B A-II, B-I, C-III, D-IV
- C A-I, B-IV, C-III, D-II
- D A-III, B-IV, C-II, D-I

CUET PG Syllabus

Instructions [11 - 14]

Read the given passage and answer the questions that follows:

Crypto detectives are cleaning up by cracking down

Before a new breed of cryptocurrency detectives helped bring him down, Ryan Felton marketed his crypto scheme with a grandiose promise: He was creating "Netflix on the blockchain."

He called the crypto-themed streaming service FLiK. For a small amount of the popular digital currency ether, customers could purchase a FLiK token, which would give them access to shows and movies broadcast on the new platform. Felton described the project as an "entertainment revolution-"; crypto enthusiasts bought more than \$2 million worth of FLiK coins. But the streaming business never materialized. Instead, Felton bought a \$1.5 million house, along with \$32,000 in diamonds. He spent \$180,000 more for a red Ferrari.

When cryptocurrencies hit the mainstream in the 2010s, the technology was widely viewed as a perfect vehicle for crime. A drug dealer or scamster could transfer large quantities of money without having a bank to validate the transaction. To early advocates, crypto was appealing because it promised the secrecy and anonymity of cash, without the inconvenience of face-to-face exchanges.

That secrecy was an illusion. Crypto transactions are inscribed on a publicly viewable ledger called a blockchain. To the untrained observer, blockchain records are unintelligible - a jumble of meaningless letters and numbers. But a growth industry is dedicated to deciphering them. At the centre is the New York analytics startup Chainalysis, valued at \$8.6 billion after its latest funding. With tens of millions of dollars in federal contracts, Chainalysis has built a reputation as one of the crypto industry's leading detectives-a team of blockchain nlysts that helps the government track transactions.

As US federal agencies orchestrate an aggressive crack-down on crypto fraud, Chainalysis has come to occupy an increasingly important position in the industry. The company markets itself to the government and private companies as a force for good in a badly behaved sector - a firm whose business is solving crimes and cooperating with public officials. After the FTX xchang3e imploded, its bankruptcy lawyers hired Chainalysis to disentangle the web of entities at the center of Sam Bankman-Fried's empire and track the \$400 million in crypto that a baker stole from FTX. Chainalysis has also been conducting some light diplomacy: In April, it hosted a conference to bring together government officials and the newly chastened crypto executives who are trying to win back trust. Guests received socks stitched with the Chainalysis logo.

But the ambassadorial role has put Chainalysis at odds with some of crypto's passionate advocates, who envisioned digital money as a private, anonymous financial network. That dash also reflects a battle for crypto's future.

From the government's perspective, Chainalysis is arguably the most trusted company in the industry-but only because it sells powerful tools aimed at penetrating the veil of secrecy that made crypto attractive in the first place.

The blockchain is "often-times the key to unlocking a case," said Jonathan of Chainalysis. "It's more traceable and more conclusive."

In late 2020, Felton was indicted on charges that he had used investor's funds to finance his extravagant life-style. He went on trial in Atlanta last summer. Testifying for the prosecution was Beth Bisbee, a Chainalysis investigator who once worked for the Drug Enforcement Administration. In 2014, her analysis of blockchain records helped the DEA track down an internet drug dealer in Arizona.

11. Which project did Felton describe as an "entertainment revolution"?

Choose your answer from the options given below:

- (A) The business of streaming
- (B) Felton bought a dollar 1.5 million house
- (C) For a small amount of digital currency customers could access shows and movies broadcast on the new platform.
- (D) The creation of Netflix on the blockchain

Choose the correct answer from the options given below :

- A** (A), (B), (C) only
- B** (A), (B) only
- C** (C), (D) only
- D** (B), (D) only

12. Match the phrases in List I with meanings of List II :

List I	List II
A. Business never materialized	I. Reach more people
B. Hit the mainstream	II. Gain the confidence of others once again
C. Win back trust	III. Unravelling the real story behind it
D. Penetrating the veil of secrecy	IV. Not to be successful

Choose the correct answer from the options given below:

- A** A-IV, B-I, C-II, D-III
- B** A-III, B-II, C-I, D-IV
- C** A-I, B-III, C-IV, D-II
- D** A-II, B-III, C-I, D-IV

13. Match the names with their List I with List II :

List I	List II
A. Ryan Felton	I. New York analytics startup
B. Chainalysis	II. The man who marketed the crypto scheme
C. Sam Bankman Frier	III. One of the founder's of Chainalysis
D. Jonathan Levin	IV. The head whose firm lost 400 million dollars

Choose the correct answer from the options given below:

- A** A-I, B-III, C-IV, D-I
- B** A-II, B-I, C-II, D-IV
- C** A-II, B-I, C-IV, D-III

- A 22 Kg
B 25 Kg
C 15 Kg
D 20 Kg
63. A tin of oil was $\frac{4}{5}$ full, when 10 bottles of oil were taken out and 6 bottles of oil were poured into it, it was $\frac{2}{3}$ full. How many bottles of oil can the tin contain?
- A 20
B 24
C 30
D 28
64. One pipe can fill a tank four times as fast as another pipe. If together the two pipes can fill the tank in 48 minutes, then the shower pipe a lone will be able to fill the tank in

- A 3 hour
- B 4 hour
- C 5 hour
- D 2 hour

CUET PG Mock Tests (COQP12)

65. A man running at 8 Km/hr, along side a railway track is 320m ahead of the engine of a 130 meter long train running at 62 Km/hr, in the same direction. In how much time will the train pass that running man?
- A 32 seconds
 - B 30 seconds
 - C 50 seconds
 - D 31 seconds
66. The sum of the ages of a daughter and her Mother is 64 years. After six years the age of the Mother will be three times that of the Daughter. The ages of Mother & Daughter at present are
- A 46 years, 12 years
 - B 54 years, 11 years
 - C 51 years, 13 years
 - D 58 years, 13 years
67. Rani lent Rs.8000 to Seeta for 2 years and Rs.5000 to Tina for 4 years on simple Interest at the same rate of interest and received Rs.3600 in all from both of them an interest. The rate of interest per annum is:
- A 5%
 - B 8%
 - C 9%
 - D 10%

Free CUET PG Mock Test (COQP12)

68. PQRS is a parallelogram and M is any point with in it. If the area of the parallelogram PQRS is 40 Units, then what is the sum of the areas of the $\triangle SMR$ and $\triangle PMQ$?
- A 15
 - B 20
 - C 25
 - D 30
69. In a class of 60 students, 70% students pass in maths and 60% pass in English. What is the minimum percentage of students who pass in both the papers:

- A 50%
- B 40%
- C 30%
- D 20%

70. The shaded region represents: (Given A, B, C circles represents lawyers, doctor and judges respectively).

- A Lawyers and Doctors
- B Doctors and Judges
- C Lawyers and Judges
- D Judges who are lawyers as well as Doctors

CUET PG Syllabus

71. Set A represents girls of class eight, set B represents boys of class eight, set C represents students of class eight, The diagram which correctly represents A, B and C as:

- A $A \cup B = C$
- B $A \cap B = C$
- C $A \cup (B \cap C) = C$
- D $A \cup B \cup C \neq C$

72. There are 12 intermediate bus stops between two places A and B. In how many ways can a bus be made to stop at 4 of these 12 intermediate bus stops provided no two of them are consecutive?

- A 108
- B 63
- C 126
- D 252

73. Ten points are marked on a straight line and 11 points are marked on another parallel straight line. How many triangles can be constructed with vertices among the above points?

- A 9900

- B 1100
- C 1045
- D 1054

CUET PG Previous Year Question Papers PDF

74. Area of a circular pond is 616 m^2 . At the centre of the pond a circular stage is made whose radius is equal to half of the radius of the pond. The area where in water in present is:

- A 562 Sq. m
- B 458 Sq. m
- C 231 Sq. m
- D 462 Sq. m

75. In what ratio must water be mixed with milk to gain 30% by selling the mixture at cost price:

- A 2 : 5
- B 1 : 5
- C 3 : 10
- D 2 : 9

76. B, D, E, F and L have different weights. E is heavier than D but lighter than B. L is heavier than F but lighter than D. The heaviest one is:

- A L
- B B
- C D
- D F

CUET PG Crash Course

77. In the following Diagram, Boys who are not athletes but are disciplined are indicated by which number?

- A Both 1 and 10
- B 2 only

- C 1 only
- D Both 1 and 2

Explanations

General English

7. D

Option D is the correct answer because it correctly conveys the conditional aspect of the situation described in the sentence.

In the original sentence, "Had he worked hard for the tournament, he had aced the match," the use of "had aced" is incorrect. The structure "had aced" is typically used for past perfect tense, indicating an action that was completed before another past action. However, in this context, the intent is to express a hypothetical or conditional scenario - if he had worked hard for the tournament, then he would have aced the match.

The correct construction for expressing this conditional scenario is "would have aced." The modal verb "would" indicates a hypothetical or conditional action in the past. So, "He would have aced" properly conveys the idea that if he had worked hard for the tournament, he would have aced the match.

29. B

Santosh Yadav (born 10 October 1967) is an Indian mountaineer. She is the first woman in the world to climb Mount Everest twice and the first woman to successfully climb Mount Everest from Kangshung Face. As a youth she criticized traditional societal beliefs including standards of dress for women.
