General MBA English

Instructions [1 - 5]

Read the following passage and answer the required questions:

I walked into a popular restaurant recently and heard someone talking in a very loud voice. I was intrigued because this is a good restaurant which most people enjoy eating at very much. The staff are helpful and courteous, the food is delicious, and the people who come there are, for the most part, regulars. You can thus imagine my surprise when I heard a loud, angry voice booming from a table nearby. Now, I'm a curious person by nature, so I walked over to the nearest table I could get to. I walked over to the nearest table I could get to. I saw a guest frantically, gesticulating both at the server as well as his food. His body language was screaming anger and indignation, as were his facial expressions. He was very loudly telling the server how he was paying for good food and therefore he demanded nothing but the best, as well as the highest order of respect. He mentioned that he was a food critic on an online forum and that he would write an honest review of the restaurant. I zoned out of his tirade and looked around at the other people there to grab a (usually) happy lunch. Nearly everyone was staring at the guest, some with a look of disbelief. Would you like dealing with someone as aggressive as him? There is an important difference between being aggressive and being assertive. While aggressive communication makes people withdraw from you and want to avoid you assertiveness makes people want to follow you. Add to this the art of persuasion and you have a winning combination.

1. Choose the word similar in meaning to the word, "tirade."

- A Threatening speech
- B Criticism and accusation
- C Energetic oration
- D Assertive conversation
- E Tirade

CUET PG Crash Course

2. The story narrated in the passage teaches us to be:

- A Polite
- B Aggressive
- C Demanding
- D Persuasive

3. Which of the following is /are correct as per the passage:

- A. The guest in the restaurant was treating the waiter.
- B. The guest in the restaurant was demanding only good food.
- C. Everyone present in the restaurant considered the guest as an aggressive person.
- D. The guest was aggressive as well as assertive.

Choose the correct answer from the options given below:

- A A and C are correct
- B B and D are correct
- C D is correct

D C is correct

4. Match List I with List II

List I		List II	
A.	Aggressiveness	I.	People follow you
B.	Assertiveness	II.	A winning element
C.	Persuasiveness	III.	Refined
D.	Politeness	IV.	People withdraw from you

Choose the correct answer from the options given below.

- A A-IV, B-I, C-II, D-III
B A-III, B-IV, C-I, D-IV
C A-II, B-III, C-IV, D-II
D A-I, B-II, C-III, D-IV

CUET PG Mock Tests (COQP12)

5. What does 'winning combination' in the story include?

- A Aggressive and Assertive
B Polite and Persuasive
C Assertive and Persuasive
D Aggressive and Persuasive

Instructions [6 - 10]

Read the passage below and answer the questions that follow:

Did you know that your daily habits can turn genes on or off. It's known as gene expression or epigenetics. Gene expression is a process in which certain genes are turned on or off during one's lifetime. The human body contains approximately 100 trillion cells. Within each cell is the nucleus. Inside every nucleus of every cell are our genes. Experts estimate that the average human has over 20,000 genes. Some of these genes came from our mothers and some from our fathers. Believe it or not, your daily habits can turn genes on or off. Bad habits can turn off good genes and turn on bad genes. This could mean opening the door to cancer, diabetes, various addictions, brain damage, heart diseases, etc. Bad habits can create long-term stress in the form of financial problems, job loss, health issues, etc. Long - term stress increases the production of cortisol, a stress hormone. Like a domino effect, cortisol switches on a series of bad genes that can lead to heart disease, cancer and immunological disorders.

Some of the bad habits that turn bad genes on include:

- Excessive alcohol consumption.
- Drug use.
- Not eating healthy or eating too much junk food can change your DNA.
- Lack off daily aerobic exercise.
- Consuming too much much sugar.
- Not exercising our brains by reading or learning new skills.
- Negative emotions and negative thinking.

Conversely, good habits can turn bad genes off and turn good genes on. The by product of good habits is reduced stress resulting from financial independence, happiness, good health, etc. Some of these good habits include:

- Daily reading or learning new skills, which can turn on genes that increase your IQ.
- Daily aerobic exercise, which can turn on genes that prevent heart disease, asthma and other immunological disorder.
- Meditation, which can turn off bad genes that contribute to the onset of various types of diseases and turn on good genes that prevent such disease.
- Positive thinking and positive emotions alter the brain's chemistry which increases or decreases gene expression.

Habits are not harmless. They can alter your DNA by changing your genome. This is important but not just for

6. Match List I with List II

List I		List II	
A.	Gene Expression	I.	Changing of genome
B.	Cortisol	II.	Turns on a series of bad genes
C.	Reduced stress	III.	A process of lifetime
D.	DNA	IV.	A by product of good habits

Choose the correct answer from the options given below:

- A** A-III, B-II, C-IV, D-I
- B** A-IV, B-III, C-I, D-II
- C** A-I, B-II, C-III, D-IV
- D** A-II, B-I, C-II, D-III

7. Choose the statement that are true with regard to your DNA.

- A. It results into immunological disorder.
- B. The altered DNA gets passed on the our children.
- C. Habits are harmful.
- D. The DNA has the ability to change the genome.
- E. The DNA can make you children better or worse.

Choose the correct answer from the options given below:

- A** A, B, C, D only
- B** B, C, E, D only
- C** A, B, C, E only
- D** A, B, D, E only

Free CUET PG Mock Test (COQP12)

8. Epileptics is a process:

- A** in which certain genes are turned on during one's lifetime.
- B** in which certain genes remain unchanged.

- C in which daily habits do not play a part.
- D in which certain genes are turned on or off.

9. Financial problems, job loss, health issues etc. are caused by:

- A turning on the good genes.
- B decreasing the production of cortisol, a stress hormone.
- C bad habits which can create long-term stress.
- D immunological disorders.

10. Consuming too much sugar implies:

- A a bad habit that turns bad gene on.
- B a bad that turns good gene on.
- C a bad habit develops negative thinking.
- D reduced stress levels.

CUET PG Syllabus

Instructions [11 - 15]

Read the passage below and answer the questions that follow:

The wise old Wazir was famous for his judgement and people came to him for justice from all parts of the country. One day two men came to his court and claimed ownership of an extraordinarily good-looking horse. It was a black beauty indeed. One of the men was tall, very well-dressed and soft-spoken. The Wazir heard them patiently and asked them to leave the horse and come to him next morning. Both the men came the next morning. The Wazir asked his soldiers to give the horse to the tall man and to arrest the other man. The tall man wanted to know how the Wazir had learnt the truth. "Very simple", said he, "Firstly, a man of your appearance and manners could not have been the thief. Still, I wanted to be sure, just after you had left the court. I asked one of my soldiers to leave the horse free and to see whom it followed. It went after you. This hint was enough for me."

11. Which of the following is/are correct as per the given statement:

People came to him from all places because he was _____.

- A. very famous
- B. an old judge
- C. an old Wazir
- D. a very patient listener
- E. a wise judge

Choose the correct answer from the options given below:

- A A and E
- B B, C and D
- C E only
- D A and D only

12. This story proves that:

- A. the court was quite were very smart
- B. the judge was very clever
- C. the horse was very clever
- D. the horse was a real beauty
- E. the judge was indeed quite wise and intelligent

Choose the correct answer from the options given below:

- A** A, E, D
- B** B, C, E and D
- C** D only
- D** E only

13. With the Wazir's wisdom, the tall man was -

- A. consoled
- B. impressed
- C. embarrassed
- D. undecided
- E. confused

Choose the correct answer from the options given below:

- A** A and B
- B** C and D
- C** D and E
- D** B only

CUET PG Previous Year Question Papers PDF

14. Choose the correct option:

The Wazir discovered the real owner of the horse

- A. by arresting the other man
- B. from the appearance and good manners of the tall man
- C. by patiently listening to the case of theft
- D. by knowing whom the horse followed
- E. by leaving the horse free

- A** A, B, and C
- B** D only
- C** D and E only
- D** A and E only

15. Which of the following best describes the other man?

- A** Ill-dressed, short-statured, loud-voiced
- B** Tall, ill-dressed, courteous

C Not well-dressed, short but good mannered

D Thin, poorly built, harsh in expression

16. Match List I with List II

List I		List II	
A.	Retreat	I.	Languid
B.	Vivacious	II.	Advance
C.	Evidence	III.	Confutation
D.	Exult	IV.	Lament

Choose the correct answer from the options given below:

A A-I, B-III, C-II, D-IV

B A-III, B-II, C-III, D-IV

C A-II, B-I, C-III, D-IV

D A-IV, B-II, C-I, D-III

CUET PG Crash Course

17. Match List I with List II

List I		List II	
A.	Schism	I.	Demote
B.	Quixotic	II.	Secretly
C.	Relegate	III.	Unrealistic
D.	Incognito	IV.	Split

Choose the correct answer from the options given below:

A A-I, B-III, C-II, D-IV

B A-IV, B-III, C-I, D-II

C A-II, B-III, C-IV, D-I

D A-II, B-IV, C-III, D-I

18. Choose the option which can substitute the underlined group of words correctly, without changing the meaning of the sentence.

'Holding the fatal telegram in her closed fist, the distraught mother fell back on the couch.'

A fell back

B fell on

C fell back for

D no change

19. Pick out the incorrect statement(s) and choose the option given below.

- A. It is very difficult to break through the layers surrounding a mystery
- B. You achieve a break through
- C. If something breaks through, it appears in a place where it was previously hidden
- D. It was a cloudy day but the sun broke through in the afternoon

Choose the correct answer from the options given below:

- A A, B, C only
- B C only
- C B, D only
- D A, B, C, D only

CUET PG Mock Tests (COQP12)

20. Read the given sentence to find out whether there is any error in it. The number of that part is the answer. (ignore the errors of punctuation, if any)

- 1. The principal was
- 2. convinced with
- 3. his innocence
- 4. in the act.

- A 1
- B 2
- C 3
- D 4

21. Match the List I with the one word substitution in List II

List I		List II	
A.	Beneath the skin	I.	Trog lodyte
B.	Too old for work	II.	Sub cutaneous
C.	Wise and full of deep knowledge	III.	Super annuated
D.	One who lives in a cave	IV.	Sapient

Choose the correct answer from the options given below:

- A A-II, B-IV, C-III, D-I
- B A-II, B-III, C-IV, D-I
- C A-II, B-I, C-IV, D-III
- D A-II, B-III, C-I, D-IV

22. Pick out the correct statements from the sentences given below:

- A. She despised none of her lovers
- B. She did not despise any of her lovers
- C. She seldom or ever has sweet talks with her son
- D. She seldom or never has sweet talks with her son
- E. He ran fast tremendously

Choose the most appropriate answer from the options given below:

- A A, B, E only
- B E only
- C A, B, D only
- D C, E only

Free CUET PG Mock Test (COQP12)

23. Choose the right option of indirect speech:

He said, "The country passed through a crisis ten years ago."

- A He said that the country passed through a crisis ten years before.
- B He said that the country had passed through a crisis ten years before.
- C He said that country had been passing through a crisis ten years before.
- D He said that the country had passed through a crisis ten years ago.

24. Match List I with List II

List I		List II	
A.	Tut !	I.	Express doubts
B.	Ahem !	II.	Cry of greeting
C.	Preto !	III.	Slight disapproval
D.	Ahoy !	IV.	While performing a magic trick

Choose the correct answer from the options given below:

- A A-II, B-I, C-III, D-IV
- B A-III, B-I, C-IV, D-II
- C A-II, B-III, C-I, D-IV
- D A-I, B-II, C-IV, D-III

25. A number of sentences are given below which, when properly sequenced, form a coherent paragraph. Each sentence is labelled with a letter. Choose the most logical order of sentences from among the given choices to construct a coherent paragraph.

- A. It was with this invincible spirit that Netaji opposed Wavell's offer
- B. "Japan's surrender is not India's surrender" he said.
- C. The revolutionary spirit of Netaji was never dampened ever after the surrender of Japan
- D. He knew that a war of liberation demanded great spirit sacrifice, courage and patience

- A** D, A, B, C
- B** C, B, D, A
- C** B, A, D, C
- D** C, A, B, D

CUET PG Syllabus

26. A number of sentences are given below which, when properly sequenced, form a coherent paragraph. Each sentence is labelled with a letter. Choose the most logical order of sentence from among the given choices to construct a coherent paragraph.

- A. India has a near-unique record of strategic matters.
- B. But India's four wars all indecisive that is to say, they led to no political objective despite the lives lost.
- C. After world War II, it is one of the two countries that has fought four wars.
- D. The other, of course, is China.

- A** A, C, D, B
- B** C, A, D, B
- C** B, D, C, A
- D** A, B, C, D

27. In the following question, the first and the last part of the sentence are numbered as 1 and 6. The rest of sentences is split into four parts and named P, Q, R and S. These four parts are not given in their proper order. Read the sentences and find out which combination is connect.

- 1. Those that have seen the Hindus
- P. have naturally no more doubt
- Q. of the existence of other person
- R. among them in their own country
- S. of their existence than own country
- 6. whom they have met

- A** P, S, Q, R
- B** P, S, R, Q
- C** R, P, S, Q
- D** R, Q, P, S

28. The exact meaning of the underlined phrasal verb is:

'Mahendra doesn't phone me any more.
He was cottoned on to the fact that
I am not interested in his ideas'

- A. Understand
- B. Realise
- C. Chagrined
- D. Pacified

Choose the correct answer from the options given below:

- A** A, B only

- B A, C only
- C C, D only
- D A, C, D only

CUET PG Previous Year Question Papers PDF

29. In the given sentence, a group of words has been underlined. Pick out the one which can substitute the underlined group of words correctly, without changing the meaning of the sentence.

All of the candidates except Manindra and I intends on choosing cricket as hobby.

- A Me intends on choosing
- B Me intends on choose
- C Me intend to choose
- D I intend on choose

30. Match the statements in List I with their one word substitution in List II

List I		List II	
A.	The central part of a wheel	I.	Incorporeal
B.	Without a body	II.	Hub
C.	A great work of art	III.	Perjury
D.	A lie told on purpose	IV.	Magnum opus

Choose the correct answer from the options given below:

- A A-II, B-I, C-IV, D-III
- B A-I, B-II, C-III, D-IV
- C A-III, B-IV, C-I, D-II
- D A-IV, B-III, C-II, D-I

31. The ratio of investments of two partners P and Q is 9 : 10 and the ratio of their profits is 4 : 5. If P invested the money for 8 months, then for how much time Q invested his money.

- A 8 months
- B 9 months
- C 10 months
- D 11 months

CUET PG Crash Course

32. If the compound interest on a certain sum at 10% per annum for 3 years is ₹33,100, find the simple interest on the same sum at the same rate and for the same period ?

- A ₹25,000

- B ₹28,000
- C ₹30,000
- D ₹32,000

33. A sum of money becomes ₹13,380 after 3 years and ₹20,070 after 6 years on compound Interest. Find the sum?

- A ₹8,120
- B ₹8,420
- C ₹8,520
- D ₹8,920

34. A vendor bought Apples at 8 for ₹12 and sold them at 6 for ₹10. Find his gain or loss percent?

- A 10% gain
- B 10% loss
- C 11.11% gain
- D 11.11% loss

CUET PG Mock Tests (COQP12)

35. After getting two successive discounts, a trouser with a list price of ₹300 is available at ₹210. If the second discount is 12.5% find the first discount?

- A 10%
- B 15%
- C 20%
- D 25%

36. P scored 30% marks and failed by 30 marks, Q scored 40% marks and obtained 40 marks more than those required to pass. The pass percentage is:

- A 32%
- B 34.2%
- C 36%
- D 38%

37. Aman spends 50% of his income. If income increases by 20% and expenses increases by 10%, his saving will increase by:

- A 25%
- B 30%

C 35%

D 40%

Free CUET PG Mock Test (COQP12)

38. A pump can fill a tank with water in 2 hours. Because of a leak, it took 2 hours and 20 minutes to fill the tank. The leak can drain all the water of the tank in:

A 14 hours

B 12 hours

C 10 hours

D 8 hours

39. By walking at $\frac{3}{4}$ of her usual speed, a lady reaches her office 30 minutes later than her usual time. Find the usual time taken by her to reach her office?

A 60 min

B 80 min

C 90 min

D 100 min

40. The average speed of a car is one-third of the speed of a bus. The bus covers 1125 km 15 hours. How much distance will the car cover in 30 minutes?

A 12 km

B 12.5 km

C 15 km

D 17 km

CUET PG Syllabus

41. A 200 m long train is running with a speed of 50 km/h. In what time will it pass a man who is running at 5 km/h in the direction opposite to that in which the train is going ?

A $\frac{140}{11}$ sec

B $\frac{142}{11}$ sec

C $\frac{144}{11}$ sec

D 15 sec

42. P can do a piece of work in 10 days; B in 15 days. They work for 5 days. The rest of the work finished by R in 2 days. If they get ₹1,500 for the whole work, the daily wages of B and R are:

A ₹125

B ₹150

C ₹200

D ₹225

43. P and Q working separately can do a piece of work in 9 and 12 days respectively. If they work for a day alternately, P beginning, in how many days. the work will be completed ?

A 8

B 10

C $10\frac{1}{4}$

D 12

CUET PG Previous Year Question Papers PDF

44. A and B can do a piece of work in 10 days. B and C together can do it in 15 days. If A is twice as good a workman as C. Find what time B alone can do it?

A 20 days

B 25 days

C 30 days

D 35 days

45. The average of ten numbers is 8. If each numbers is multiplied by 15, then average of the set of numbers is:

A 8

B 120

C 100

D 110

46. The average weight of 10 men is increased by 1.5 kg when one of them, who weighs 70 kg is replaced by a new man. The weight of the new man is:

A 85 kg

B 90 kg

C 80 kg

D 87 kg

CUET PG Crash Course

47. A, B, C and D are four consecutive even numbers respectively and their average is 61. What is the product of A and D ?

A 3612

B 3512

C 3712

D 3812

48. In what ratio must water be mixed with milk to gain $16\frac{2}{3}\%$ on selling the mixture at cost price?

A 2 : 3

B 1 : 3

C 1 : 5

D 1 : 6

49. Four unbiased coins are tossed. What is the probability of getting almost three heads?

A $\frac{1}{16}$

B $\frac{15}{16}$

C $\frac{3}{16}$

D $\frac{8}{16}$

CUET PG Mock Tests (COQP12)

50. In how many ways can the letters of the word 'DETAIL' be arranged so that the vowels occupy only the odd positions ?

A 24

B 28

C 32

D 36

51. Which of the following statements is true based on the following diagram?

A $BC < AB$

B $BC > AB$

C $AC < AB$

D $AC < BC$

52. The heights of two right circular cones are in the ratio 1 : 2 and the perimeters of their bases are in the ratio 3 : 4. Find the ratio of their volumes?

- A 8 : 35
- B 7 : 32
- C 9 : 32
- D 1 : 32

Free CUET PG Mock Test (COQP12)

53. If the surface areas of two spheres are in the ratio of 4 : 25, then the ratio of their volumes is:

- A 1 : 120
- B 8 : 123
- C 8 : 127
- D 8 : 125

54. If $a^2 + b^2 + \frac{1}{a^2} + \frac{1}{b^2} = 4$ then the value of $a^2 + b^2$

- A 3
- B 2
- C 5
- D 6

55. $a + b + c = 6$, $a^2 + b^2 + c^2 = 14$ and $a^3 + b^3 + c^3 = 36$, then the value of abc is:

- A 6
- B 8
- C 16
- D 18

CUET PG Syllabus

56. Below question contains two equations as I and II. You have to solve both equations and determine the relationship between them and choose correct option:

I. $2x^2 + 3x - 35 = 0$

II. $4y^2 + 10y - 104 = 0$

- A If $x > y$
- B If $x \leq y$
- C If $x \geq y$
- D If $x = y$ or relationship between x and y cannot be established

57. A square is inscribed in a circle of diameter $2a$ and another square is circumscribing circle. The difference between the areas of outer and inner squares is:

- A a^2
- B $2a^2$
- C $3a^2$
- D $4a^2$

58. If PQ and RS are two diameters of a circle of radius r and they are mutually perpendicular, then what is the ratio of the area of the circle to the area of the $\triangle PRS$?

- A $\pi : 2$
- B $\pi : 1$
- C $\pi : 4$
- D $2\pi : 1$

CUET PG Previous Year Question Papers PDF

59. Find the value of $\frac{1}{4 \times 5} + \frac{1}{5 \times 6} + \frac{1}{6 \times 7} + \dots + \frac{1}{10 \times 11}$:

- A $\frac{7}{43}$
- B $\frac{7}{40}$
- C $\frac{7}{44}$
- D $\frac{3}{40}$

60. If x is an integer such that $x + \frac{1}{x} = \frac{17}{4}$, then the value of $x - \frac{1}{x}$:

- A $\frac{13}{4}$
- B $\frac{15}{4}$
- C $\frac{17}{4}$
- D $\frac{19}{4}$

61. A bag contains one-rupee, 50-paise and 25-paise coins in the ratio 5 : 6 : 8. If the total amount of money in the bag is ₹250, find the numbers of 50 p coins in a bag?

- A 120
- B 130
- C 140
- D 150

CUET PG Crash Course

62. A sum of money is divided among P, Q, R and S in the ratio of 3 : 4 : 9 : 10 respectively. If the share of R is ₹2,580 more than the share of Q, then what is the total amount of Q and S together?
- A ₹7,220
B ₹7,222
C ₹7,224
D ₹7,324
63. A bag contains 6 blue, 4 red, 3 yellow and 2 green marbles. If 4 marbles are picked up at random, what is the probability that atleast one of them is red?
- A $\frac{67}{91}$
B $\frac{68}{91}$
C $\frac{69}{91}$
D $\frac{71}{91}$
64. A merchant has 500 kg of sugar, some part of which he sells at 8% profit and rest at 18% profit. He gains 14% on the whole. The quantity sold at 18% profit is:
- A 200 kg
B 300 kg
C 400 kg
D 500 kg

CUET PG Mock Tests (COQP12)

65. In how many ways a committee of 5 members be selected from 7 men and 5 ladies, consisting of 3 men and 2 ladies?
- A 310
B 320
C 340
D 350
66. Choose the odd group in the following :
- A 2, 3, 5, 7
B 17, 19, 23, 29
C 53, 59, 61, 67

D 37, 41, 43, 49

67. Choose the number which is different from others in the group :

13. 17, 23, 63, 71

A 13

B 23

C 63

D 71

Free CUET PG Mock Test (COQP12)

68. Which of the following best represented by the figure below.

- A. Furniture, Table, Chair
- B. Polygon, Rectangle, Square
- C. Year, Week, Day
- D. Bouquet, Flowers, Petals
- E. Vehicle, Bus, Car

Choose the most appropriate answer from the options given below:

A A, B, C only

B B, C, D only

C C, D, E only

D A, C, E only

69. A walks 15 m front and 15 m to the right then every time turning to his left. he walks 10, 20 and 30 m respectively. How far is he now from his starting point?

A 5 m

B $5\sqrt{2}$ m

C 10 m

D $10\sqrt{2}$ m

70. P, Q, R, S, T, U, V, W are sitting around a round table in the same order, at equal distances. Their positions are clockwise. If V sits in the north, then what will be the position of S?

A East

B South-east

C South

D South-west

CUET PG Syllabus

71. Who is the grand mother of D?

Given:

- A. A is the mother of B
- B. C is the son of A
- C. D is the brother of E
- D. E is the daughter of B

Choose the correct answer from the options given below:

- A a
- B b
- C c
- D d

72. If in certain code:

'bir le nac' means 'green and tasty'

'pic nac hor' means 'tomato is green'

'coc bir hor' means 'food is tasty'

Which of the following means 'tomato is testy' in that code?

- A bir le hor
- B pic hor nac
- C hor bir pic
- D mac le coc

73. Choose a number to replace question mark which can establish the relationship between the number on either side of::

Given $9 : 80 :: 100 : ?$

- A 901
- B 1009
- C 9889
- D 9999

CUET PG Previous Year Question Papers PDF

74. Given set: (21, 51, 15)

Select the pair from following in which the numbers are similarly related as in the given set.

- A (21, 30, 51)

- B (21, 35, 41)
- C (21, 51, 42)
- D (21, 91, 35)

75. Choose pair of words that will fill blanks so that the sentence becomes true and sensible _____ is to Cork as Box is to _____.

- A Wine-Hat
- B Bottle-Lid
- C Wood-Fight
- D Spout-Crate

76. Choose a word for I from (A), (B), (C), (D) as well as a word for II from (P), (Q), (R), (S) to establish the similar relationship between the words on either side of :: in "I : Gum :: Worm : II"

- I. (A) Bottle (B) Brand (C) Loaf (D) Tree
- II. (P) Silk (Q) Insect (R) Cocoon (S) Thread

Choose the correct combination from the following:

- A AQ
- B BR
- C CS
- D DP

CUET PG Crash Course

77. Statement: Should the consumption of aerated drinks be banned in India?

Arguments: I. Yes, this is the only way to reduce the risk of exposing people to some diseases

II. No, there is no confirmed evidence that such products have adverse effects on human body

Which of the above argument(s) hold strong for the statement ?

- A Only argument I
- B Only argument II
- C Argument I and argument II
- D Neither argument I and argument II

78. In a certain code, DESK is written as # \$ 52, RIDE is written as % 7 # \$. How is RISK written in that code?

- A %752
- B %725
- C %7\$#
- D %7#2

79. If in a certain code, O is written as E, A as C, M as I, S as O, N as P, E as M, I as A, P as N and C as S, then how will COMPANIES be written in that code?

- A SMINCPAMO
- B SEIACPAMO
- C SEINCPAMO
- D SIMNCPMAO

CUET PG Mock Tests (COQP12)

80. Statement: A tells B that, "In my absence, I request you to look after the affairs of our company."

Assumptions: I. B may not accept the request of A.

II. B has expertise to handle the affairs of the company.

Which of the above assumption(s) is/are implicit in the statement?

- A Only assumption I
- B Only assumption II
- C Assumption I and assumption II
- D Neither assumption I nor assumption II

81. Which of the following month pair starts on some day in a year?

- A June October
- B April, November
- C April, July
- D October, December

82. Two positions of a dice are shown below. What number will be at the bottom, when number 1 is on the top?

- A 2
- B 3
- C 4
- D 5

Free CUET PG Mock Test (COQP12)

83. How many triangles and square are there in the given figure?

- A 28 triangles, 3 squares
- B 24 triangles, 5 squares
- C 28 triangles, 5 squares
- D 24 triangles, 3 squares

84. Identify the mirror of the given word with respect to XX'

TARAIN1014A

- A A4I0IINIARAJ
- B A10I4NIARAT
- C A10I4TARAIN
- D A4I0IINIARAT

85. A class stands in a single line. One student is seventeenth in order from both the ends. What is the strength of the class?

- A 35
- B 33
- C 34
- D 32

Explanations

General MBA English

1. B

A tirade is a long, angry speech of criticism or accusation. Therefore, Option is the correct answer.

2. D

Option D is the correct answer.

The last sentence in the passage, 'Add to this the art of persuasion, and you have a winning combination.' implies that we need to be persuasive.

The sentence 'While aggressive communication makes people withdraw from you' implies that we should not be assertive. Hence, Option B is incorrect.

Options A and C could not be inferred from the passage.

Note: The passage has certain grammatical errors and typos in the original CUET paper.

3. D

Note: The question options have errors in the original CUET paper.

The correct answer is Option D

The passage mentions that nearly everyone in the restaurant stared at the guests, some in disbelief. This indicates that the guest's behaviour was noticeable and perceived as aggressive by others present. Therefore, Statement C is correct.

Statement A. The passage does not explicitly state whether the guest was treating the waiter. It only describes the guest's behaviour and interaction with the waiter, focusing on the guest's demands and demeanour. Therefore, option A cannot be considered correct.

Statement B. While it's true that the guest demanded good food, the passage also emphasizes that he demanded the highest order of respect from the waiter. The focus is not solely on the quality of the food but also on the guest's insistence on being treated with respect. Thus, statement B is not entirely accurate.

Statement D. The passage describes the guest's behaviour as loud, angry, and demanding, which aligns with aggression. However, it also mentions that there's an important difference between being aggressive and being assertive. While the guest's behaviour may be perceived as aggressive, there's no indication that he was exhibiting assertiveness in a positive manner. Therefore, statement D, stating that the guest was both aggressive and assertive, is not entirely accurate.

4. A

From the passage, we can infer that:

Aggressive behaviour can cause people to withdraw, while assertiveness can inspire people to follow. Persuasiveness can be a winning element in communication, and politeness is often seen as a refined quality.

Therefore,

- **Aggressiveness** matches with **People withdraw from you**
- **Assertiveness** matches with **People follow you**
- **Persuasiveness** matches with **A winning element**
- **Politeness** matches with **Refined**

Hence, Option A is the correct answer.

5. C

The 'winning combination' mentioned in the passage is inferred from the sentence: *"While aggressive communication makes people withdraw from you and want to avoid you, assertiveness makes people want to follow you. Add to this the art of persuasion, and you have a winning combination."*

So, based on the passage's statement, the winning combination includes being assertive and persuasive, making option c) Assertive and Persuasive the correct answer.

CUET PG Previous Year Question Papers PDF

6. A

Option A is the correct answer.

- **Gene Expression (A)** matches with **A process of lifetime (III)**. This could be inferred from the sentence, *'Gene expression is a process in which certain genes are turned on or off during one's lifetime.'*
- **Cortisol (B)** matches with **Turns on a series of bad genes (II)**. This could be inferred from the sentence, *'Long-term stress increases the production of cortisol, a stress hormone. Like a domino effect, cortisol switches on a series of bad genes that can lead to heart disease, cancer and immunological disorders.'*
- **Reduced stress** matches with **A by product of good habits (IV)**. This could be inferred from the sentence, *'The by product of good habits is reduced stress resulting from financial independence, happiness, good health, etc.'*
- **DNA (D)** matches with **Changing of genome (I)**. This could be inferred from the sentence, *'Habits are not harmless. They can alter your DNA by changing your genome.'*

7. D

Statement A is true, as the passage mentions that bad habits can lead to immunological disorders.

Statement B states: *"The altered DNA gets passed on to our children."* While the passage does not directly state this, it discusses the concept of gene expression or epigenetics, which involves changes in gene activity that do not involve alterations to the genetic code but still get passed down to at least one successive generation.

Statement C is partially true. The passage mentions that bad habits can be harmful, but it also states that good habits can have positive effects. So, saying "habits are harmful" is too broad and not entirely accurate according to the passage.

Statement D is true. The passage mentions that habits can alter your DNA by changing your genome.

Statement E, "The DNA can make your children better or worse", is true. While the passage does not directly state this, it does discuss how our habits can alter our DNA and potentially lead to various health issues. If we consider the broader context of genetics, it is known that parents pass on their genes to their offspring. Therefore, if our habits have altered our DNA for better (through good habits) or for worse (through bad habits), these changes could potentially influence the genetic makeup of our children.

So, the statements A, B, D, and E are consistent with the information provided in the passage, making option D the correct answer.

8. D

Note: The question should have been 'epigenetics' instead of 'epileptics' to find the correct answer

Option A is the correct answer.

We can infer this from the sentence, *'Did you know that your daily habits can turn genes on or off? It's known as gene expression or epigenetics.'*

9. C

The correct answer is option C.

We can infer this from the sentence, *'Bad habits can create long-term stress in the form of financial problems, job loss, health issues, etc.'*

Note: The answer options had typographical errors in the original CUET question paper.

10. **A**

Option A is the correct answer.

The passage mentioned that '*Bad habits can turn off good genes and turn on bad genes*'. Consuming too much sugar is an example of such a bad habit.

Option B is incomplete and wrong.

Options C and D are not inferred directly from the passage.

CUET PG Crash Course

11. **C**

Option C is the correct answer.

In the given context of the passage, it is mentioned that people came from all places to seek the Wazir's judgement. The Wazir was known for his wisdom and fair judgement, which is why he was sought after by people from various regions. This implies that he was a 'wise judge' (Statement E). The other characteristics such as being 'very famous' (Statement A), an 'old judge' (Statement B), an 'old Wazir' (Statement C), or a 'very patient listener' (Statement D) are not explicitly stated in the context. Therefore, these statements do not form the basis for people seeking his judgment. Hence, the correct answer is 'E only' (Option C). This is because people were drawn to him due to his reputation as a wise judge and not necessarily because of the other characteristics mentioned in the statements.

12. **D**

The correct answer is option D.

The story demonstrates the wisdom and intelligence of the judge, who used a clever method to determine the true owner of the horse.

The other statements do not directly relate to the main point of the story. The beauty of the horse (Statement D) is mentioned, but it's not what the story proves. The cleverness of the court (Statement A) or the horse (Statement C) is not demonstrated in the story. While the judge (Statement B) used a clever method, the emphasis of the story is more on his wisdom and intelligence (Statement E). Therefore, the answer is E only.

13. **D**

The correct answer is Option D.

The story suggests that the tall man was impressed by the Wazir's wisdom in determining the horse's true owner.

The other options (A, C, D, E) are not supported by the details of the story. The tall man was not consoled, embarrassed, undecided, or confused, according to the information provided. Therefore, the answer is Option D, which states B only.

14. **B**

Option B is the correct answer.

Arresting the Other Man (Statement A): The other man's arrest was a consequence of the Wazir's discovery, not the method of discovery itself. Therefore, statement A is incorrect.

From the Appearance and Good Manners of the Tall Man (Statement B): While the Wazir did note the tall man's appearance and manners, he did not base his decision solely on these observations. He used them as initial impressions but sought further evidence to make his judgement. Therefore, statement B is incorrect.

By Patiently Listening to the Case of Theft (Statement C): Although the Wazir patiently listened to the case, the listening itself did not reveal the true owner. The discovery was made by observing whom the horse followed. Therefore, statement C is incorrect.

Knowing Whom the Horse Followed (Statement D): This is the key piece of evidence that led the Wazir to the real owner. The horse chose to follow the tall man, indicating a familiarity and bond that typically exists between a pet and its owner.

Leaving the Horse Free (Statement E): The Wazir left the horse free, but this action alone didn't reveal the true owner. It was a method of gathering more information.

While both actions (D and E) were part of Wazir's process, the actual discovery of the real owner came from knowing whom the horse followed (Statement D). Therefore, the correct answer is Option **b) D only**.

15. **A**

Option A is the correct answer.

Although the passage doesn't explicitly describe the other man, it could be inferred from the story that the tall man was described as well-dressed and soft-spoken, implying that the other man had contrasting characteristics.

The story does not provide information about the other man's build or manners, so options b), c), and d) are less likely.

CUET PG Mock Tests (COQP12)

16. **C**

The correct answer is option C.

- **A. Retreat** matches with **II. Advance**. These are antonyms; 'retreat' means to move back or withdraw, while 'advance' means to move forward.
- **B. Vivacious** matches with **I. Languid**. These are antonyms; 'vivacious' means lively and energetic, while 'languid' refers to displaying a disinclination for physical exertion or effort; slow and relaxed.
- **C. Evidence** matches with **III. Confutation**. 'Evidence' supports a claim or argument, while 'confutation' refers to the action of proving a statement or theory to be wrong or false.
- **D. Exult** matches with **IV. Lament**. These are antonyms; 'exult' means showing elation or jubilation, especially as the result of a success, while 'lament' is an expression of grief or sorrow.

17. **B**

Option B is the correct answer.

1. **Schism—Split**: The term 'Schism' refers to a division or split, especially one into two groups, caused by a disagreement about ideas, particularly in a religious organization. This is why it matches 'Split' from List II.
2. **Quixotic—Unrealistic**: 'Quixotic' is an adjective that describes someone who is overly idealistic, unrealistic, or impractical. It's often used to describe people who pursue noble ideals but in an infeasible or unrealistic way. Hence, it matches 'Unrealistic' from List II.
3. **Relegate—Demote**: 'Relegate' is a verb that means to assign an inferior rank or position to someone or something. It involves lowering someone or something in rank or position. Therefore, it matches with 'Demote' from List II.
4. **Incognito—Secretly**: 'Incognito' is an adjective that describes someone who avoids recognition, usually by changing their name or appearance. It's often used when someone wants to remain anonymous or secret. Therefore, it matches 'Secretly' from List II.

18. **B**

Option B is the correct answer.

The original sentence is: "Holding the fatal telegram in her closed fist, the distraught mother fell back on the couch."

Option b) suggests: "The distraught mother fell on the couch."

"Fell on" means to collapse or drop onto a surface, which accurately reflects what the mother did in the context of the sentence. The telegram caused her distress, leading her to collapse onto the couch. This option effectively conveys the same meaning as the original sentence without altering it significantly. Thus, option b) is the appropriate substitution.

Note: There is typographical error in the question in the original CUET question paper

20. **B**

Option B is the correct answer.

The error in part 2 should be corrected. "Convinced with" is incorrect and should be "convinced of." Therefore, the correct sentence is "The principal was convinced of his innocence in the act." The answer is 2.

21. **B**

Option B is the correct answer.

A. Beneath the skin: The one-word substitution for this is "**Subcutaneous**." The term "subcutaneous" refers to something located or occurring under the skin.

B. Too old for work: The appropriate word here is "**Superannuated**". The word "superannuated" is used to describe someone who is **retired or no longer fit for work due to old age**.

C. Wise and full of deep knowledge: The single word that fits is "**Sapient**". The term "sapient" refers to someone who is **wise, knowledgeable, and possessing great wisdom**.

D. One who lives in a cave: The term for this is "**Troglodyte**". It describes a person who **dwells in a cave or a dark, secluded place**. In a broader sense, it can also refer to someone who is reclusive or prefers solitude.

Free CUET PG Mock Test (COQP12)

22. **C**

Option C is the correct answer.

A. She despised none of her lovers: This means that she didn't dislike any of her lovers.

B. She did not despise any of her lovers: This is another way of expressing the same idea as in A.

C. She seldom or ever has sweet talks with her son: This sentence is a bit confusing. The word "ever" seems redundant here. It would make more sense without it: "She seldom has sweet talks with her son."

D. She seldom or never has sweet talks with her son: This sentence means that she rarely or almost never engages in sweet conversations with her son.

E. He ran fast tremendously: This sentence is grammatically incorrect. The correct form would be: "He ran tremendously fast."

Therefore, The correct statements are A,B and D

23. **B**

Option B is the correct answer.

When transforming direct speech to indirect speech, you typically shift the verb tenses back one step in time, especially when reporting something that occurred in the past.

In the original direct speech, "passed" is in the past tense. When converting it to indirect speech, we shift the tense of the verb "passed" to its past perfect form "had passed" to indicate that the crisis occurred before the time of the reporting.

So, "ten years ago" becomes "ten years before" to maintain the same relative time frame. Therefore, the correct indirect speech version is:

b) He said that the country had passed through a crisis ten years before.

24. **B**

Option B is the correct answer.

1. **Tut!** - III. *Slight disapproval*: Tut is an exclamation used to express mild disapproval or annoyance.

2. **Ahem!** - I. *Express doubts*: "Ahem!" is often used to get someone's attention or to subtly express doubt or hesitation before making a statement.

3. **Preto!** - IV. *While performing a magic trick*: This mysterious-sounding word could be uttered by a magician during a performance to add an element of intrigue.

4. **Ahoy!** - II. *Cry of greeting*: Sailors and seafarers traditionally use "Ahoy!" as a friendly greeting or to attract attention across distances.

25. **B**

Option B is the correct answer.

The most logical order of sentences to construct a coherent paragraph is:

C. *The revolutionary spirit of Netaji was never dampened ever after the surrender of Japan.* This sentence sets the stage by highlighting Netaji's unwavering commitment to India's cause, even in challenging circumstances.

B. *"Japan" surrender is not India's surrender," he said.* This statement reinforces Netaji's perspective that India's fight for independence was distinct from Japan's surrender. It connects to the introduction by emphasizing the need to separate the two events.

D. *He knew that a war of liberation demanded great spirit, sacrifice, courage, and patience.* This sentence builds on the previous one by explaining Netaji's understanding of the essential qualities required for a successful struggle for freedom. It connects to the introduction by reinforcing Netaji's unwavering determination.

A. *It was with this invincible spirit that Netaji opposed Wavell's offer.* This final sentence ties everything together by illustrating how Netaji's refusal to accept Lord Wavell's proposal exemplified his unyielding commitment to India's cause.

Therefore, the correct order is **C, B, D, A**.

26. **A**

Option A is the correct answer.

Sentence C introduces the context that India has been involved in multiple wars. Sentence A highlights India's strategic significance. Sentence D specifies the second country involved in multiple wars, and sentence B explains that despite the wars, India did not achieve clear political objectives.

Therefore, the correct sequence is **A, C, D, B**

CUET PG Syllabus

27. **A**

Option A is the correct answer.

Option A arranges the sentence parts as follows:

1. Those that have seen the Hindus
2. P. have naturally no more doubt
3. S. of their existence than own country
4. Q. of the existence of other person
5. R. among them in their own country
6. whom they have met

When we put these together, the sentence reads:

"Those that have seen the Hindus have naturally no more doubt of their existence than own country of the existence of other person among them in their own country whom they have met."

This sentence means that people who have seen Hindus in their own country have as much certainty of their existence as they do of the existence of any other person they have met in their own country. This makes logical sense and is grammatically correct, which is why option A is the correct answer. The other options do not form a coherent sentence when arranged in the given order.

28. **A**

The correct answer is Option A.

"Cottoned on to": This informal expression means to **realize** or **become aware of** something. It implies that someone has understood a situation, fact, or idea. In the context provided, Mahendra has grasped the fact that the speaker is not interested in his ideas.

29. **C**

Option C is the correct option.

The original sentence contains an error in the subject-verb agreement. The correct form should be "intend" (plural) instead of "intends" (singular) because the subject "candidates" is plural.

Additionally, the pronoun "I" should be replaced with the objective form "me" in this context.

So the revised sentence would be: "All of the candidates except Manindra and **me intend to choose** cricket as a hobby."

30. **A**

Option A is the correct answer.

- **A:** The central part of a wheel → **II: Hub**
- **B:** Without a body → **I: Incorporeal**
- **C:** A great work of art → **IV: Magnum opus**
- **D:** A lie told on purpose → **III: Perjury**

35. **C**

We are given that the list price of the trouser is ₹300, and after two successive discounts, the final price is ₹210. The second discount is 12.5%.

Let the first discount be $x\%$

After the first discount, the price becomes $300 \times \left(1 - \frac{x}{100}\right)$

After applying the second discount of 12.5%, the price becomes $300 \times \left(1 - \frac{x}{100}\right) \times 0.875 = 210$

Upon solving, we get $x = 20$

CUET PG Previous Year Question Papers PDF

37. **B**

Let the income of the person be $2S$; if he spends 50% of it, then he is saving $2S - S = S$.

If his income increases by 20%, then the income becomes $2S + \frac{20}{100}(2S) = \frac{12}{5}S$

Initially, his expenses were S , and if they increase by 10%, the expenses become $S + \frac{10}{100}(S) = \frac{11}{10}S$

So, his savings in the second case $= \frac{12}{5}S - \frac{11}{10}S = \frac{(24 - 11)}{10}S = \frac{13}{10}S$

The savings increased by a percentage of $\frac{\left(\frac{13}{10}S - S\right)}{S} \times 100 = \frac{3}{10} \times 100 = 30\%$

Hence, the correct answer is option B.

38. **A**

Let the volume of the tank be $6V$ litres.

If the pump takes 2 hours to fill the tank, then the capacity of the pump is $\frac{6V}{2} = 3V$ litres/hour.

In 2 hours 20 minutes $= 2 + \frac{20}{60} = \frac{7}{3}$ hours, the water produced by the pump is $3V \times \frac{7}{3} = 7V$.

We know that the tank has a volume of $6V$ litres. So, the leak in $\frac{7}{3}$ hours removed $7V - 6V = V$ litres of water. So, in 1 hour, the leak removes $\frac{3V}{7}$ litres.

The capacity of the leak is $\frac{3V}{7}$ litres/hour. So, the time taken for the leak to empty the whole tank is

$6V \times \frac{7}{3V} = 14$ hours.

Hence, the correct answer is option A.

39. **C**

Let the speed of the lady be $4S$ and the time taken to reach the office be T .

So, the distance can be calculated as $4S \times T = 4ST$.

In the second case, when she walks at $\frac{3}{4}$ of her speed, the speed of the lady becomes $3S$. The time taken is given as $T + 30$.

So, the distance covered in this case is $3S * (T + 30) = 3ST + 90S$.

We know that the distance to the office remains constant and must be the same in both cases.

Equating them, we get,

$$4ST = 3ST + 90S$$

$$ST = 90S$$

$$T = 90 \text{ minutes.}$$

So, the usual time taken by the lady is 90 minutes.

Hence, the correct answer is option C.

45. B

The average of ten numbers is 8. If each number is multiplied by 15, then the average of the set of numbers is:

Let us assume the numbers are $x_1, x_2, \dots, x_{10}$

$$\text{Thus, } \frac{x_1 + x_2 + x_3 + \dots + x_{10}}{10} = 8$$

Each number is multiplied by 15, So the average will also be 15 times.

$$\frac{15(x_1 + x_2 + x_3 + \dots + x_{10})}{10} = 15 \times 8 = 120$$

47. C

Let the four consecutive even numbers be A, B, C and D.

Since they are consecutive even numbers, we can express them in terms of A as:

$$B = A + 2$$

$$C = A + 4$$

$$D = A + 6$$

We are given that their average is 61.

$$\text{Hence, } (A + B + C + D)/4 = 61$$

$$\text{Or, } A + B + C + D = 244$$

Replacing B, C and D

$$A + A + 2 + A + 4 + A + 6 = 244$$

$$4A = 232$$

$$A = 58$$

Hence, B, C and D are respectively 60, 62 and 64.

We need to find $A * D$

$$\text{Hence, } 58 * 64 = 3712$$

CUET PG Crash Course

48. D

Let the cost price of 1 litre of milk be C

Now, assume that we mix x litres of milk with y litres of water.

The total cost price of the mixture = $C \times x$ (water is free).

The selling price must be 16.67% more than the cost price, i.e. $\frac{7}{6}$ of the cost price

For the mixture to sell at the cost price per liter, the selling price should be equal to the cost price per liter.

Solving the equation, we get, $x : y = 6 : 1$

56. **D**

$$2x^2 + 3x - 35 = 0$$

This can be written as

$$2x^2 + 10x - 7x - 35 = 0$$

$$2x(x + 5) - 7(x + 5) = 0$$

$$(2x - 7)(x + 5) = 0$$

Thus, $x = 7/2$ or -5

$$\text{Similarly, for } 4y^2 + 10y - 104 = 0$$

This can be written as

$$4y^2 - 16y + 26y - 104 = 0$$

$$4y(y - 4) + 26(y - 4) = 0$$

$y = 4$ or $-26/4$

Therefore, x and y are unequal, and no relation can be established between them.

57. **B**

The given information can be shown in an image as follows,

We can see that for the outer square, the length of the side is equal to the diameter of the circle. So, the side of the outer square is $2a$, and the area of the outer square is $2a \times 2a = 4a^2$

We can see that for the inner square, the length of the diagonal is equal to the diameter of the circle. So, the area of the inner square is $\frac{1}{2} \times 2a \times 2a = 2a^2$.

So, the difference between the areas of the outer and the inner squares $= 4a^2 - 2a^2 = 2a^2$

Hence, the correct answer is option B.

59. **C**

The value of $\frac{1}{4 \times 5} + \frac{1}{5 \times 6} + \frac{1}{6 \times 7} + \dots + \frac{1}{10 \times 11}$:

The terms can be written as

$$\sum \frac{1}{(n+3)(n+4)}$$

=> Where sigma means the summation of all terms where $n = 1$ to $n = 7$

$$\sum \frac{1}{(n+3)(n+4)}$$

$$\Rightarrow \sum \frac{(n+4) - (n+3)}{(n+3)(n+4)}$$

$$\Rightarrow \sum \left[\frac{1}{(n+3)} - \frac{1}{(n+4)} \right]$$

$$\Rightarrow \frac{1}{4} - \frac{1}{5} + \frac{1}{5} - \frac{1}{6} + \dots + \frac{1}{10} - \frac{1}{11}$$

$\Rightarrow$ All other terms will get cancelled, and only $1/4$ and $-1/11$ will left.

Thus, $\frac{1}{4} - \frac{1}{11} = \frac{7}{44}$

61. **D**

Let the number of 1-rupee coins, 50-paise coins, and 25-paise coins in the bag be $5x$, $6x$, and $8x$ respectively, where x is a common factor.

The total value of the coins is ₹250.

The value of 1-rupee coins = $5x \times 1 = 5x$ rupees.

The value of 50-paise coins = $6x \times 0.50 = 3x$ rupees.

The value of 25-paise coins = $8x \times 0.25 = 2x$ rupees.

The total value is the sum of all these values:

$$5x + 3x + 2x = 250$$

$$10x = 250$$

$$x = 25$$

$$\text{Number of 50-paise coins} = 6 \times 25 = 150$$

CUET PG Mock Tests (COQP12)

62. **C**

Assume the money with P, Q, R and S to be $3x$, $4x$, $9x$ and $10x$ respectively.

So, the difference between R and Q is $9x - 4x = 5x = 2580$

or, $x = 516$.

So, the total amount with Q and S together is $4x + 10x = 14x = 7224$

Hence, the answer is 7224.

63. **C**

Given that the total number of marbles is 15 and we have to select 4 of them

Probability of Selecting atleast one red marble = $1 - \text{Probability of selecting no red marble}$

$$P(\text{No red marble}) = \frac{{}^{11}C_4}{{}^{15}C_4} = \frac{330}{1365}$$

$$\text{So, } P(\text{Atleast one red marble}) = 1 - \frac{330}{1365} = \frac{1035}{1365} = \frac{69}{91}$$

Hence, the answer is $\frac{69}{91}$

65. **D**

The number of ways to select a committee of 5 members consisting 3 men and 2 women are,

Selecting 3 men out of the 7 men in ${}^7C_3 = 35$ ways

Selecting 2 women out of the 5 women in ${}^5C_2 = 10$ ways

Total number of ways = $35 * 10 = 350$ ways.

Hence, the correct answer is option D.
