Analytical Ability

Instructions

A question is followed by data in the form of two statements labelled as I and II. You must decide whether the data given in the statements are sufficient to answer the questions.

Question 1

What is the positive integer n not exceeding 180?

I. n is divisible by 7.

II. n is divisible by 13.

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Free Banking Study Material (15,000 Solved Questions)

Question 2

If ABCD is a square and E is a point on BC, then what is the area (in square units) of AECD ?

I. $BE = 6$

II. $BE : EC = 1 : 2$

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Question 3

What is the shape of the play ground ?

I. The perimeter of the play ground is 440 m

II. The area of the ground is 15400 sq. m.

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

Question 4

What is the remainder when n is divided by 8 ?

I. The digit in units place of n is 8.

II. n is the product of eight consecutive positive integers.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

Daily Free Banking Online Tests

Question 5

What is the greatest common divisor of numbers a and b ?

I. The least common multiple of a and b is ab.

II. $a + b = 15$.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Question 6

What is the average of a, b, c and 5?

I. $5(a + b + c) + 4 = 45$.

II. $a + b = c + d$.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Question 7

What is the value of $\frac{x^2}{y^2} + \frac{y^2}{z^2}$?

I. $\left(\frac{x}{y} + \frac{y}{z}\right)^2 = 100$

II. $x = 2z$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

SSC CHSL Previous Question papers (download pdf)

Question 8

Is $xy < 0$?

I. $5|x| + 3|y| = 0$

II. $5|x| + 3|y|$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Question 9

How much time did A take to reach the destination ?

I. The ratio between the speeds of A and B is 3 : 4.

II. B takes 36 minutes to reach the same destination.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Question 10

What is the slope of straight line ?

I. The straight line passes through the origin.

II. The straight line makes an angle 30° with the positive direction of the X-axis.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

SSC CHSL Free Mock Test

Question 11

In the matrix $A = \begin{bmatrix} -5 & 20 \\ 2 & -x \end{bmatrix}$, what is the value of x ?

I. A is singular

II. A is symmetric

- A If the statement I alone is sufficient to answer the question

- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Question 12

What is the value of $a + b$?

- I.** $a \neq b$
- II.** $a^2 - b^2 = a - b$

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Question 13

Is the quadrilateral a square ?

- I.** All the sides of the quadrilateral are of equal length.
- II.** The diagonals of the quadrilateral are of equal length.

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

SSC CGL Free Mock Test

Question 14

For positive integers x , y and z , is the product xyz even ?

- I.** $x + y$ is odd.
- II.** $x + y + z$ is divisible by 7.

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Question 15

What is the monthly salary of A ?

- I. A gets 15% more than B and B gets 10% less than C.**
II. C's monthly salary is ₹ 2,500.

- A** If the statement I alone is sufficient to answer the question
B If the statement II alone is sufficient to answer the question
C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Question 16

Among the real numbers a and b, is b a rational number ?

- I. $a + b$ is a rational number.**
II. $a - b$ is a rational number.

- A** If the statement I alone is sufficient to answer the question
B If the statement II alone is sufficient to answer the question
C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Daily Free SSC Practice Set

Question 17

How many persons are there in the library ?

- I. If 3 persons leave the library, then the library has less than 8 persons.**
II. If 3 persons enter the library, then it has more than 12 persons.

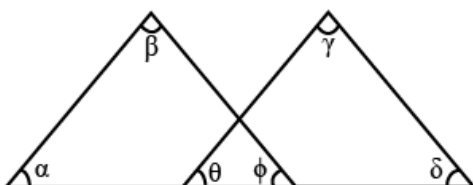

- A** If the statement I alone is sufficient to answer the question
B If the statement II alone is sufficient to answer the question
C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Question 18

In the figure given below, what is the value of $\alpha + \beta + \gamma + \delta$?

- I. $\alpha + \beta = \gamma + \delta$**
II. $\theta + \phi = 90^\circ$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

Question 19

How much is $(x + y) : (x - y)$?

I. $x : y = 3 : 2$

II. $x > 0, y > 0$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

SSC CGL Free Online Coaching

Question 20

If $p(x)$ is a polynomial, is $(x - 2)$ a factor of $p(2x^2 - 1)$?

I. $x - 1$ is a factor of $p(x)$.

II. $x - 7$ is a factor of $p(x)$.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

Instructions

A sequence of numbers or letters that follow a definite pattern is given. Each question has a blank space. This has to be filled by the correct answer from the four given options to complete the sequence without breaking the pattern.

Question 21

7 : 49 :: ----- : 63

- A 5
- B 6
- C 9
- D 11

Answer: C

- D** BLACK BOARDS

Answer: C

Question 30

If the letters D and E are removed from the English alphabet, then the fourth letter is

- A F
- B C
- C G
- D H

Answer: A

Instructions

Pick the odd thing out :

Question 31

- A 147
- B 125
- C 103
- D 84

Answer: B

Free Banking Study Material (15000 Solved Questions)

Question 32

- A (3, 4, 5)
- B (5, 12, 13)
- C (6, 8, 10)
- D (10, 12, 15)

Answer: D

Question 33

- A April
- B May
- C November
- D September

Answer: B

Question 34

- A $\frac{19}{15}$
- B $\frac{13}{11}$
- C $\frac{7}{5}$
- D $\frac{3}{2}$

Answer: A

Question 35

A C 4 E

B G 8 I

C L 15 N

D T 21 V

Answer: C

Instructions

Each of the questions follow a definite pattern. Observe the same and fill in the blanks with suitable answers.

Question 36

$111\frac{1}{9}, 125, 142\frac{6}{7}, \text{---}, 200, 250$

A $166\frac{2}{3}$

B $178\frac{4}{7}$

C $181\frac{2}{5}$

D $192\frac{3}{7}$

Answer: A

Question 37

0, 2, 3, 5, 8, 10, 15, ----, 24, 26, 35

A 19

B 18

Question 44

If $\{a_n\}_{n=1}^{\infty}$ is such that $a_1 = a_2 = 1$ and $a_k = a_1 + a_2 + \dots + a_{k-1}$ for $k \geq 3$, then $a_7 =$

- A 16
- B 32
- C 64
- D 128

Answer: B

Question 45

The n^{th} term in the sequence
1, -2, 3, -4, 5, -6, 7, -8, is

- A $(-1)^n n$
- B $-n$
- C n
- D $(-1)^{n-1} n$

Answer: D

Instructions

An automobile company produces four types of vehicles (Cars, Motor bikes, Scooters and Mopeds) at different branches in the country. The production at these units from 2007 to 2012 are given in the table below. Answer the questions using the table.

	2007	2008	2009	2010	2011	2012
Cars	3600	6300	8100	10800	16200	19800
Motor bikes	7000	12250	15750	21000	31500	38500
Scooters	8000	14000	18000	24000	36000	44000
Mopeds	9000	15750	20250	27000	40500	49500

Question 46

The ratio of the number of Cars produced in 2008 to the number of Scooters produced in 2011 is

- A 37 : 40

B 27 : 40

C 17 : 40

D 7 : 40

Answer: D

SSC CHSL Free Mock Test

Question 47

In which year the total number of the four types of vehicles produced was 62100 ?

A 2007

B 2008

C 2009

D 2010

Answer: C

Question 48

If $k : 1$ is the ratio of the number of Scooters produced in the year 2011 to the number of Scooters produced in 2007, then $k =$

A 3

B 4

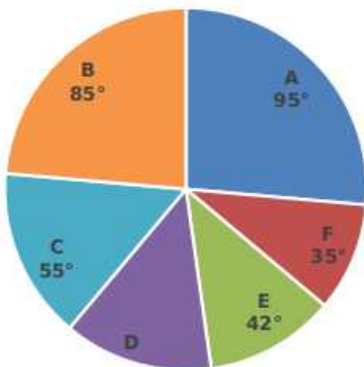

C $\frac{9}{2}$

D $\frac{2}{9}$

Answer: C

Instructions

The expenditure under six heads A, B, C, D, E and F in an year are as given in the following Pie diagram. Answer the questions using the diagram.

Question 49

If the total expenditure in an year is ₹ 54,00,000, then the expenditure (in rupees) under the head E in that year is

A 3,60,000

- B 4,20,000
- C 6,30,000
- D 7,20,000

Answer: C

SSC CGL Free Mock Test

Question 50

If the expenditure under the heads A and B together is ₹ 18,00,000 in an year, then the expenditure under the head D in that year is

- A ₹ 4,20,000
- B ₹ 4,80,000
- C ₹ 5,50,000
- D ₹ 8,50,000

Answer: B

Question 51

If the difference in the expenditure under the heads A and B in an year is ₹ 2.5 lakhs, then the total expenditure (in lakhs of rupees) in that year is

- A 90
- B 81
- C 72
- D 63

Answer: A

Question 52

If the expenditure under the head E in an year is ₹ 3.5 lakhs, then the expenditure (in lakhs of rupees) under the head D in that year is

- A 3
- B 3.5
- C 4
- D 4.5

Answer: C

Daily Free SSC Practice Set

Question 53

In any year the expenditure under the heads C and F together is equal to

- A half of the expenditure on B and F together.

- B double the expenditure on C.
- C the expenditure on D and E.
- D the expenditure on A.

Answer: C

Instructions

Given that $A = \{n : n \text{ prime}, 1 \leq n \leq 20\}$

$B = \{n : n \text{ odd}, 1 \leq n \leq 20\}$

$C = \{n : n \text{ square}, 1 \leq n \leq 20\}$

Using this answer the questions:

Question 54

$B \cap C =$

- A $\{1, 4, 9, 16\}$
- B $\{1, 3, 5, 7, 9, 11, 13, 15, 17, 19\}$
- C ϕ
- D $\{1, 9\}$

Answer: D

Question 55

The number of integers between 1 and 20 which do not lie in $A \cup B \cup C$ is

- A 8
- B 7
- C 6
- D 5

Answer: B

SSC CGL Free Online Coaching

Instructions

The letters A, B, C,, Z of English alphabet are numbered 1, 2, 3,, 26 respectively. A code is designed by shifting r^{th} letter to $(14 - r)^{th}$ letter $1 \leq r \leq 13$ and s^{th} letter to $(40 - s)^{th}$ letter if $14 \leq s \leq 26$. Then reverse process is used for decoding. Using this answer questions given below.

Question 56

The code word for HYDERABAD is

- A FOJIVMLMJ
- B FJOIVMJML
- C FIJOVMLMJ
- D FIOJMVLMJ

Answer: A

Question 57

The code word for WARANGAL is

- A QMUMZBGM
- B QVMZGMB
- C QVMZMBGM
- D QVMZMGBM

Answer: B

Question 58

Which word is coded as IPKFMZGI ?

- A ENTRANCE
- B ELEGANCE
- C EXCHANGE
- D EMPATHIE

Answer: C

Question 65

If TRIANGLE is coded as USJBOHMF, then the code word for SQUARE is

- A TRUBSF
- B TRVSBF
- C TRUSBF
- D TRVBSF

Answer: D

Question 66

If 26th January of a non-leap year falls on a Sunday, the day on which 15th August of that year falls is

- A Sunday
- B Wednesday
- C Friday
- D Saturday

Answer: C

Question 67

What is the angle between the two hands of a clock when the time is 5.15 a.m. ?

- A $72\frac{1}{2}^{\circ}$
- B $67\frac{1}{2}^{\circ}$
- C 64°
- D $58\frac{1}{2}^{\circ}$

Answer: B

Free Banking Study Material (15000 Solved Questions)

Question 68

A clock strikes once at 1 O'clock, twice at 2 O'clock and so on. The total number of strikes it makes in a day is

- A 78
- B 112
- C 132
- D 156

Answer: D

Question 69

D is the only son of his father C. A is B's brother and B is C's sister. How is D related to A ?

- A Sister
- B Brother
- C Niece
- D Brother's son

Answer: D

Question 70

A meeting is scheduled at 11.00 am for which a person P who is away at 100 kms from the venue has to attend. If P starts at 9.45 a.m. in a car which moves with a speed of 60 kmph, then the P is late to the meeting by how many minutes ?

- A 5
- B 15
- C 25
- D 35

Answer: C

AP SI Free Solved Previous Papers PDF

Question 71

If t_1 is the time elapsed between 11.10 am to 3.50 pm; and if t_2 is the time elapsed between 10.15 am to 4.05 pm, then $t_1 : t_2 =$

- A 5 : 4
- B 2 : 3
- C 4 : 5
- D 3 : 2

Answer: C

Question 72

A, B, C, D and E sit around a table such that A is between B and C and is left to B; D is to the right of B; and E is between C and D. Then the person to the immediate left of C is

- A D
- B B
- C A
- D E

Answer: D

Question 73

Given that $a * b = \frac{a^2 + b^2}{ab}$ and $a \triangle b = \frac{a^2}{b}$ for any real numbers a and b. If $x * y = 2 \triangle 2$, then x =

- A y
- B $\frac{y}{2}$
- C $2y$
- D $3\frac{y}{2}$

Answer: A

Free Banking Study Material (15,000 Solved Questions)

Question 74

For real numbers a and b , if $a \circ b = (ab)^{\frac{1}{5}}$, then $(243) \circ (16807) =$

- A 31
- B 29
- C 22
- D 21

Answer: D

Question 75

If $a \circ b = (a + b - 1)^2 - 1$, then $(1 \circ 2) \circ (3 \circ 3) =$

- A 576
- B 625
- C 675
- D 676

Answer: C

Question 77

If $\left(\sqrt{\frac{3}{5}}\right)^a = \left(\sqrt{\frac{625}{81}}\right)^{\frac{a+3}{2}}$, then $a =$

- A 2
- B 1
- C -1
- D -2

Answer: D

Question 78

In a mixture of 35 litres the ratio of milk and water is 4: 1. If one litre of water is added to the mixture the ratio of milk and water in the new mixture is

- A 2 : 7
- B 7 : 2
- C 4 : 3
- D 2 : 1

Answer: B

Question 79

The salaries of two persons are in the ratio 4: 7. Both spend 80% of their salaries and save the rest. The ratio of their savings is

- A 8 : 2
- B 7 : 5
- C 5 : 3
- D 4 : 7

Answer: D

SSC CHSL Free Mock Test

Question 80

If $(\sqrt{2})^{x+5} = (\sqrt[4]{2})^{2x^2-2}$, then a value of $(x^2 - 1)$ is

- A 2
- B 4
- C 6
- D 8

Answer: D

Question 81

$\frac{\sqrt{10 + 2\sqrt{6}} + 2\sqrt{10} + 2\sqrt{15}}{\sqrt{10 - 2\sqrt{6}} - 2\sqrt{10} + 2\sqrt{15}} =$

- A $2(\sqrt{3} + \sqrt{5})$
- B $2\sqrt{3}$
- C $2\sqrt{5}$
- D $2\sqrt{10}$

Answer: A

Question 82

The least value of k such that $315 \times k$ is a perfect square is

- A 35
- B 31
- C 21
- D 15

Answer: A

SSC CGL Free Mock Test

Question 83

Which among the following numbers leaves remainders 1, 2 and 2 respectively when divided by 2, 3 and 7?

- A 130
- B 68
- C 65
- D 57

Answer: C

Question 84

The L.C.M. of two integers is 144 and their G.C.D is 12. If one of the integers is 36, then the other integer is

- A 18
- B 24
- C 48
- D 432

Answer: C

Question 85

The least number that is to be subtracted from 2580 so that it leaves a remainder 4 when divided by 9, 11 and 13 is

- A 1
- B 2
- C 3
- D 4

Answer: B

Daily Free SSC Practice Set

Question 86

Three numbers are in the ratio 1 : 2 : 3 and the sum of their squares is 504. The largest of the numbers is

- A 6
- B 12
- C 18
- D 24

Answer: C

Question 87

The ascending order of the fractions: $\frac{5}{7}$, $\frac{6}{8}$, $\frac{9}{11}$, $\frac{11}{14}$ is

- A $\frac{5}{7}$, $\frac{6}{8}$, $\frac{9}{11}$, $\frac{11}{14}$
- B $\frac{5}{7}$, $\frac{9}{11}$, $\frac{6}{8}$, $\frac{11}{14}$
- C $\frac{5}{7}$, $\frac{11}{14}$, $\frac{9}{11}$, $\frac{6}{8}$
- D $\frac{5}{7}$, $\frac{6}{8}$, $\frac{11}{14}$, $\frac{9}{11}$

Answer: D

Question 88

The persons A, B, C share a property in such a way that A and B get $\frac{3}{7}$ and $\frac{5}{14}$ and C getting the rest. The person or persons who get the least property

- A C
- B B
- C A and B
- D A and C

Answer: A

SSC CGL Free Online Coaching

Question 89

The descending order of $\sqrt[4]{10}$, $\sqrt[3]{6}$, $\sqrt{3}$ is

- A $\sqrt[4]{10}, \sqrt{3}, \sqrt[3]{6}$
- B $\sqrt[4]{10}, \sqrt[3]{6}, \sqrt{3}$
- C $\sqrt{3}, \sqrt[3]{6}, \sqrt[4]{10}$
- D $\sqrt[3]{6}, \sqrt[4]{10}, \sqrt{3}$

Answer: D

Question 90

In a face to face election the winner got 65% of votes and won by a margin of 12000 votes. The total votes polled (in lakhs) is

- A 4
- B 0.4
- C 0.04
- D 0.004

Answer: B

Question 91

In a library 23% of the books are in Arts. 30% in Commerce, 35% in Science and the rest are in Telugu language. If there are 1440 books in Telugu language, the number of books in Arts is

- A 2760
- B 3000
- C 3600
- D 4200

Answer: A

Free SSC Study Material (18,000 Solved Questions)

Question 92

A person bought a pen and sold it for a loss of 10%. If he had bought it for 20% less and sold it for ₹ 44 more than earlier sale price he would have made a profit of 40%. The cost price of the pen is (in ₹)

- A 200
- B 225
- C 250
- D 280

Answer: A

Question 93

If an article is sold at a profit of 15% instead of a profit of 9% the person gets ₹ 60 more. The cost price of the article (in rupees) is

- A 1200

- B 1050
C 1000
D 800

Answer: C

Question 94

A and B started a business investing ₹ 10 lakhs and ₹ 15 lakhs respectively. After 6 months C joined them by investing ₹ 20 lakhs. If the profit at the end of the year is ₹ 5.6 lakhs, then the share of A in the profit (in lakhs of rupees) is

- A 1.6
B 2.4
C 3.2
D 4.8

Answer: A

SSC CGL Previous Papers (DOWNLOAD PDF)

Question 95

In a joint business A, B and C invested capital in the ratio 5 : 6 : 8. At the end of the business they shared profits in the ratio 4 : 3 : 12. The ratio of the number of months in which A, B and C kept their capital is

- A 2 : 1 : 3
B 5 : 3 : 12
C 8 : 5 : 15
D 25 : 18 : 16

Answer: C

Question 96

Pipe A fills a tank in 8 hours while pipe B empties the full tank in 10 hours. If both the pipes A and B are opened simultaneously the time taken (in hours) to fill the tank is

- A $\frac{1}{2}$
B $\frac{1}{2}$
C 40
D 42

Answer: C

Question 97

Two pipes A and B can fill a tank in 10 hours and 15 hours respectively. If they are opened alternately for one hour each and if A is opened first, the time (in hours) required to fill the tank is

- A 10

- B 11
- C 12
- D 13

Answer: C

1500+ Very Important Free SSC Solved Questions

Question 98

If a man starts at A and walks at 5 kmph he will reach B late by 7 minutes. But if walks at 6 kmph he will reach B early by 5 minutes. The distance between A and B (in km) is

- A 4
- B 5
- C 6
- D 7

Answer: C

Question 99

A train of 270 metres long crosses a platform of 390 metres length in 33 seconds. The speed of the train (in kmph) is

- A 66
- B 68
- C 72
- D 75

Answer: C

Question 100

Three persons A, B, C together can complete a work in 8 days where as A alone requires 24 days to complete the same work. The number of days-required for B and C together to complete the same work is

- A 18
- B 16
- C 12
- D 10

Answer: C

Free Banking Study Material (15000 Solved Questions)

Question 101

A man completes $\frac{4}{5}$ of the work in $1\frac{1}{2}$ days. The number of hours required to complete the remaining work by him is

- A 6
- B 9
- C 7
- D 8

Answer: B

Question 102

A circle is inscribed in an equilateral triangle. If the area of the circle is 462 cm^2 , then the perimeter (in cm) of the triangle is

- A 72
- B 84
- C 96
- D 126

Answer: D

Question 103

The area of a rectangular metal sheet is 60 sq.m. The sum of its length and diagonal is equal to 5 times its breadth, Then the difference (in metres) between length and breadth is

- A 4
- B 5
- C 6
- D 7

Answer: D

AP SI Free Solved Previous Papers PDF

Question 104

A cone of height 24 cm and radius of its base 6 cm is made up of clay. If that clay is reshaped in the form of a sphere, then the diameter of that sphere (in cms) is

- A 6
- B 8
- C 12
- D 14

Answer: C

Question 105

The surface area of a sphere is same as the curved surface area of a right circular cylinder whose height and diameter are 12 cm each. Then the radius of the sphere (in cm) is

- A 3
- B 4
- C 5
- D 6

Answer: D

Question 106

Let 's' be the surface area of a cube of edge 9 cm. This cube is cut into smaller cubes of edge 3 cm each, If 'S' is the sum of the surface areas of all the smaller cubes, then s : S =

- A 3 : 1
- B 1 : 3
- C 3 : 2
- D 2 : 3

Answer: B

Free Banking Study Material (15,000 Solved Questions)

Question 107

The number of revolutions made by a wheel of 42 cm diameter in travelling a distance of 1320 metres is

- A 300
- B 400
- C 500
- D 1000

Answer: D

Question 108

The radius r of a right circular cylinder is the same as that of a sphere. If the volume of the sphere is twice that of the cylinder, then the height of the cylinder is

- A $\frac{r}{3}$
- B $\frac{2r}{3}$
- C $\frac{4r}{3}$
- D $2r$

Answer: B

Question 109

The digit in the units place of the number 13^{400} is

- A 4
- B 3
- C 2
- D 1

Answer: D

Daily Free Banking Online Tests

Question 110

If $a * = k$ denotes that k is the remainder when $8a$ is divided by 7, then $100 * =$

- A 1
- B 2
- C 5
- D 6

Answer: B

Question 111

For two statements p, q , it is given that $p \rightarrow ((\sim p) \vee q)$ is false, then the truth values of p and q are respectively

- A F, T
- B F, F
- C T, T
- D T, F

Answer: D

Question 112

Let p, q be two statements. Then the statement $(\sim p) \vee (p \wedge q)$ is equivalent to

- A $q \rightarrow p$
- B $p \rightarrow q$
- C $q \rightarrow p$
- D $p \rightarrow \sim q$

Answer: B

SSC CHSL Previous Question papers (download pdf)

Question 113

If $1 \leq a \leq 100$ and $A = \{a \mid \gcd(a, 100) = 1\}$, then the number of elements in A is

- A 25
- B 16
- C 40
- D 20

Answer: C

Question 114

Let $f(x) = \begin{cases} x & \text{if } x \in Q \\ 1-x & \text{if } x \in R-Q \end{cases}$ Where Q is the set of all rational numbers. Then f is

- A one-one only
- B onto only
- C one-one and onto
- D neither one-one nor onto

Answer: C

Question 115

Suppose A and B are two sets. Then a set, among the following, which is not equal to $A \cup B$, in general, is

- A $(A - B) \cup (B - A) \cup (A \cap B)$
- B $A^c \cap B^c$
- C $(A - B) \cup B$
- D $A \cup (B - A)$

Answer: B

SSC CHSL Free Mock Test

Question 116

If the lines $3x - ky + 4 = 0$ and $4x + y + 2 = 0$ are perpendicular to each other, then $k^2 - 12k + 4 =$

- A 0
- B 4
- C 8
- D 12

Answer: B

Question 117

The length of the line segment intercepted between the axes by the line joining $(6, -4)$ and $(-3, 8)$ is

- A 4

B 5

C 6

D 7

Answer: B

Question 118

$$\sin 120^\circ \cos 60^\circ \cot 30^\circ \operatorname{cosec}^2 30^\circ = ?$$

A 0

B 3

C -1

D $\frac{1}{2}$

Answer: B

SSC CGL Free Mock Test

Question 119

$$\tan \theta = \frac{5}{12} \Rightarrow \frac{5 \sin \theta + 4 \cos \theta}{4 \sin \theta + 5 \cos \theta} = ?$$

A $\frac{73}{80}$

B $\frac{80}{73}$

C $\frac{7}{80}$

D $\frac{3}{80}$

Answer: A

Question 120

$$4 \cos \theta \sin^3 \theta - 4 \sin \theta \cos^3 \theta = ?$$

A 0

B 1

C $\sin 4\theta$

D $-\sin 4\theta$

Answer: D

Question 121

A pole subtends angles 30° , 45° , 60° respectively at points A, B and C all lying on a horizontal line through the foot of the pole. Then $\frac{AB}{BC} = ?$

A $\frac{1}{\sqrt{3}}$

B $\sqrt{3} + 1$

C $\sqrt{3}$

D $\sqrt{3} - 1$

Answer: C

Daily Free SSC Practice Set

Question 122

$$x^4 - 4x^3 + 6x^2 - 4x + 1 = 0 \quad (x \neq 0)$$
$$\Rightarrow x + \frac{1}{x} =$$

A $\frac{1}{2}$

B 2

C $\frac{5}{2}$

D $\frac{3}{2}$

Answer: B

Question 123

If $x - 7$ is a factor of the polynomial $f(x)$, then a factor of $f(2x^2 - 1)$ among the following is

A $x - 1$

B $x - 2$

C $x + 1$

D $x + 2$

Answer: B

Question 124

The remainder obtained when $1! + 2! + 3! + \dots + (2014)!$ is divided by 7 is

A 3

B 4

C 5

D 6

Answer: C

SSC CGL Free Online Coaching

Question 125

$$\sqrt{(x+1)(x+2)(x+3)(x+4)+1} =$$

A $\pm(x^2 + 5x + 4)$

B $\pm(x^2 + 5x + 5)$

C $\pm(x^2 + 5x + 6)$

D $\pm(x^2 + 6x + 5)$

Answer: B

Question 126

The sum of seven consecutive even integers is s . Then, in terms of s , the greatest of these integers is

A $\frac{s + 20}{5}$

B $\frac{s + 72}{9}$

C $\frac{s + 42}{7}$

D $\frac{s + 30}{6}$

Answer: C

Question 127

The maximum value of the expression $2 + 8x - x^2$ is

A 16

B 17

C 18

D 19

Answer: C

Free SSC Study Material (18,000 Solved Questions)

Question 128

$\frac{b}{a} = \frac{c}{b} = \frac{d}{c} \Rightarrow (a - c)^2 + (c - b)^2 + (b - d)^2 - (d - a)^2 =$

A 1

B 0

C -1

D 2

Answer: B

Question 129

The sum of first fifty odd natural numbers is

A 2500

B 625

C 10000

D 1600

Answer: A

Question 130

The coefficient of x^3 in the expansion of $\left(x^2 - \frac{1}{x^3}\right)^9$ is

- A 9C_3
- B $-{}^9C_3$
- C 9C_5
- D $-{}^9C_4$

Answer: B

SSC CGL Previous Papers (DOWNLOAD PDF)

Question 131

The coefficient of middle term in the expansion of $(1 + x)^{40}$ is

- A $\frac{1.3.5 \dots 39}{20!} 2^{20}$
- B $\frac{1.3.5 \dots 39}{20!}$
- C $\frac{21.22 \dots 40}{20!}$
- D $40! 2^{20}$

Answer: C

Question 132

$\begin{pmatrix} 2 & 16 \\ -8 & 0 \end{pmatrix} = \begin{pmatrix} a & b^2 \\ c^3 & 0 \end{pmatrix}$, $c < 0$, $b < 0$
 $\Rightarrow 3a + b + c =$

- A 2
- B -2
- C 4
- D 0

Answer: D

Question 133

If A, B are two matrices such that $AB = A$, $BA = B$, then $A^2 + B^2 =$

- A $A + B$
- B $A - B$
- C $2A + B$
- D $A + 2B$

Answer: A

1500+ Very Important Free SSC Solved Questions

Question 134

$$\lim_{x \rightarrow 0} \frac{\tan x}{x^\circ} = ?$$

- A $\frac{180}{\pi}$
- B $\frac{\pi}{180}$
- C 1
- D -1

Answer: A

Question 135

$$x = \sqrt{x+y} \Rightarrow \frac{dy}{dx} = ?$$

- A $1-x$
- B $1+x$
- C $1-2x$
- D $2x-1$

Answer: D

Question 136

In a $\triangle ABC$, D, E, F are the mid points of the sides AB, BC and CA respectively. If AB = 8 cm, BC = 15 cm and AC = 12 cm, then DE + EF + FD =

- A 16.5 cm
- B 17.5 cm
- C 25 cm
- D 35 cm

Answer: B

Free Banking Study Material (15000 Solved Questions)

Question 137

A, B, C are three points on the circumference of a circle with centre O. If, in $\triangle ABC$, $\angle B = 60^\circ$ and $\angle C = 70^\circ$, then $\angle BOC =$

- A 100°
- B 120°
- C 90°
- D 80°

Answer: A

Question 138

If P, Q, R, S are the mid points of the sides of a quadrilateral ABCD, then the quadrilateral PQRS is a

- A Square
- B Parallelogram
- C Rectangle
- D Rhombus

Answer: B

Question 139

The points A(3, -5) and B(-5, 4) are given. If C is a point such that $\frac{AC}{CB} = 2$, then the coordinates of C are

- A $\left(\frac{7}{3}, 1\right)$
- B $\left(\frac{-7}{3}, 1\right)$
- C $\left(\frac{7}{3}, -1\right)$
- D $\left(\frac{-7}{3}, -1\right)$

Answer: B

AP SI Free Solved Previous Papers PDF

Question 140

A (4, 2), B(6, 5) and C (1, 4) are the vertices of a $\triangle ABC$. The median from A meets the side BC at D. Then $2AD^2 =$

- A 13
- B 14
- C 15
- D 16

Answer: A

Question 141

The mean of the distribution given below is

x	10-20	20-30	30-40	40-50
Frequency	5	10	7	8

- A 30
- B 31
- C 32
- D 33

Answer: B

Question 142

For a given data, if the mean is 60 and the mode is 66, then the median is

- A 63
- B 64
- C 60
- D 62

Answer: D

Free Banking Study Material (15,000 Solved Questions)

Question 143

The mode of the following data is

6, 9, 13, 10, 16, 13, 13, 14, 15, 11, 13, 12, 14

- A 11
- B 12
- C 13
- D 14

Answer: C

Question 144

If σ is the standard deviation of $x_1, x_2, \dots, x_n$, then the standard deviation of $9 + 3x_1, 9 + 3x_2, \dots, 9 + 3x_n$ is

- A $3\sigma - 3$
- B $\sqrt{9\sigma^2 + 3}$
- C 3σ
- D $3\sigma + 9$

Answer: C

Question 145

The variance of first n even natural numbers is

- A $\frac{n^2 - 1}{3}$
- B $\frac{n^2 - 1}{6}$
- C $\frac{n^2 - 1}{12}$
- D $\frac{n^2 + 1}{3}$

Answer: A

Daily Free Banking Online Tests

Question 146

The mean of first n odd natural numbers is

- A $n - 1$
- B $n + 1$
- C $n + 2$
- D n

Answer: D

Question 147

A number is selected at random from the first 80 natural numbers. The probability that it is divisible by 4 or 6 is

- A $\frac{23}{80}$
- B $\frac{29}{80}$
- C $\frac{27}{80}$
- D $\frac{33}{80}$

Answer: C

Question 148

Two fair dice are rolled. The probability that the sum of the numbers on the faces shown is 8 is

- A $\frac{5}{36}$
- B $\frac{1}{6}$
- C $\frac{7}{36}$
- D $\frac{1}{9}$

Answer: A

Question 149

The probability that either of the events A and B to happen is 0.6 and the probability that both of them to happen is 0.2. Then $P(A) + P(B) =$

(Here A' is the complementary event of A.)

- A 0.4
- B 0.75
- C 0.8
- D 1.2

Answer: D

Question 150

Suppose $f(x) = (x - 2)(x - 5)(x - 7)$.

If a number α is chosen from $\{1, 3, 4, 5, 6, 7, 8, 9, 10\}$ randomly, the probability that it satisfies the equation $f(\alpha) = 0$, is

- A $\frac{1}{3}$
- B $\frac{2}{5}$
- C $\frac{3}{7}$
- D $\frac{2}{9}$

Answer: D

Read the following passage and answer questions

Passage:

After two decades of growing student enrollments and economic prosperity, business schools in the USA have started to face harder

times. Only Harvard's MBA

school has shown a substantial increase in enrollment in recent years. Both Princeton and Stanford have seen decreases in their enrollments. Since 1990, the number of people receiving MBA degrees has dropped about 3 percent to 75,000 and the trend of lower enrollment rate is expected to continue.

There are two factors causing this decrease in students seeking MBA degree. The first one is that many graduates of four year colleges are finding that an MBA degree does not guarantee a plush job on Wall Street or in other financial districts of major American cities. Many of the entry level management jobs are going to students graduating with Master of Arts degrees in English and the humanities as well as those holding MBA degrees. Students have asked the question, "Is an MBA degree really what I need to be best prepared for getting a good job?" The second major factor has been the cutting of American payrolls and the lower number of entry-level jobs being offered. Business needs are changing, and MBA schools are struggling to meet the new demands.

Question 186

Which of the following business schools has not shown a decrease in enrollment ?

- A Princeton
- B Harvard
- C Stanford
- D Yale

Answer: B

Question 187

What is the duration of an MBA degree ?

- A 4 years
- B 3 years
- C 2 years
- D not mentioned in the text

Answer: D

Read the following passage and answer questions:

Passage:

More businesses are addressing social issues through philanthropy. Companies donate a portion of their revenues to charities or a specific social cause. Education is known to be the favourite object for philanthropy in which 75 percent of companies are participating. Although the donations will help a good cause, many companies use philanthropy primarily to improve their reputation or get a tax deduction. Philanthropy is not limited to the mature markets in the West. In emerging markets philanthropy is even more popular. Asia's millionaires committed 12 percent of their wealth for social causes. While millionaires in North America only contribute 9 percent and those in Europe 5 percent.

Although philanthropy helps society, we should never over estimate its sociocultural impact. Recent growth in philanthropy is driven by the changes in the society. Even in a recession, 75 percent of Americans still donate to a social cause.

But philanthropy does not stimulate transformation in the society. Transformation in the society drives philanthropy. That is why addressing social issues with philanthropic activities will have a rather short-term impact,

A more advanced form of addressing social challenges is cause marketing — a practice where companies support a specific cause through their marketing activities.

Question 191

Why do companies set aside money in their budget for charities ?

- A It helps to reduce their tax liabilities.
- B People want to help others.
- C Companies do not want to attract attention.
- D It makes people in the company happy.

Answer: A

Question 192

What is the change that is coming about now ?

- A Marketing has become easier.

- B Companies have started earning more.
- C There are more advertising companies.

Read the following passage and answer questions:

Passage:

To many people growing old seems like the end game in chess : life winding down in a series of small moves with lesser pieces. As I age, I have discovered this is not true. I am not an elderly king stripped of my powers, reduced to a ragtail army of pawns. My life is not a defensive struggle of restricted options. Growing old is a game of verve and imagination and excitement. The outcome is not now a matter of strength, although that still remains, but of faith and courage, hope and wisdom. The aging game is a sport for which childhood and youth and maturity are no more than a preparation. Its scope comes a surprise. It expands my life at a time when I expected it to diminish. It demands an excellence that no longer seemed necessary. It asks me to surpass what I did at the peak of my

powers. Age will not accept second best. In the aging game I must be all ever I was and am yet to be. What has gone before is no more than a learning period. A beginning. Age is the combat for which I was trained. Now I must take this person I have become and make each new day special, I must make good on the promise of every dawn I am privileged to see. Life goes from a minor to a major key. The game builds to a climax. Every move assumes importance. One feels like a virtuoso, the gifts we have been given, the powers that empower us, the marvels that make us marvellous, are evident as never before. The truth is that we have lost nothing. The problem is not that I am less than I was when young, it is that I am not more. It is past time to become my own person.

Question 196

What does growing old mean to many people ?

- A the end of the challenges
- B mental degeneration
- C lack of activity
- D boredom

Answer: A
