Analytical Ability

Instructions

A question is followed by data in the form of two statements labelled as I and II. You must decide whether the data given in the statements are sufficient to answer the questions.

Question 1

What are the numbers a and b ?

I. a and b are relatively prime.

II. L.C.M of a , b is 2550

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

Free Banking Study Material (15,000 Solved Questions)

Question 2

What is the rate of simple interest on a loan of ₹ 20,000 ?

I. ₹ 23,000 is to be paid at the end of the first year.

II. There is a penal interest of 10% if the loan is not paid at the end of the first year.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Question 3

Suppose $f(x)$ is a polynomial. Is $x - 1$ a factor of $f(x^2 + 7)$?

I. $(x - 7) \mid f(x)$

II. $(x - 11) \mid f(x - 3)$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

Question 4

What is the value of xy ?

I. $x^2 = 9$

II. $y = 0$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

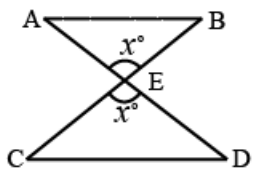

Answer: B

Daily Free Banking Online Tests

Question 5

Are the triangles $\triangle ABE$ and $\triangle CDE$ given below congruent ?

- I. $AB \parallel CD$
- II. $\angle AEB = \angle CED$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

Question 6

If $0 \in \{x, y\}$, then what is the value of $x + y$?

- I. $x \neq y$
- II. $x^8 + y = y^8 + x$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

Question 7

Is $525 \times k$ a perfect square?

- I. $21 \mid k$
- II. $k = 21$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question

- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

SSC CHSL Previous Question papers (download pdf)

Question 8

If $n(A)$ denotes the number of elements in the set A , then what is $n(A \cup B)$?

I. $n(A) = 35$

II. $n(B) = 28$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

Question 9

What is the value of the integer $n \geq 0$?

I. 25^n is odd.

II. 30^n is odd.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

Question 10

For the integers a , b and c with $a = bc$, is $a > b$?

I. $|a| = |b|$

II. $c^2 = 9$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

SSC CHSL Free Mock Test

Question 11

What is $x_1 + x_2 + x_3 + x_4 + x_5$?

I. $x_3 = 20$

II. x_1, x_2, x_3, x_4, x_5 are in arithmetic progression.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Question 12

What is the average of $a - 3$, $b + 4$, $c - 5$ and 6?

I. a, b, c are positive integers.

II. $a + b + c = 100$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

Question 13

Is ${}^{18}_n$ an integer?

I. $6 \mid n$

II. $9 \mid n$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

SSC CGL Free Mock Test

Question 14

Is $\triangle ABC$ scalene?

I. $AB \neq BC$

II. $\angle BAC \neq \angle BCA$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.

D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

Question 15

With how many zeroes does the number $a = 16!$ end ?

I. $5^3 \mid a \cdot 5^4 \mid a$

II. a is an even number.

A If the statement I alone is sufficient to answer the question

B If the statement II alone is sufficient to answer the question

C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.

D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Question 16

Is the quadrilateral ABCD a rectangle ?

I. $AB = CD, AD = BC$

II. $AC = BD$

A If the statement I alone is sufficient to answer the question

B If the statement II alone is sufficient to answer the question

C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.

D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Daily Free SSC Practice Set

Question 17

If P, A, B are three points on a circle, what is $\angle APB$?

I. AB is the diameter of the circle.

II. The sum of the angles of $\triangle APB$ is 180°

A If the statement I alone is sufficient to answer the question

B If the statement II alone is sufficient to answer the question

C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.

D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Question 18

Is the number n divisible by 2 ?

I. The sum of the digits is divisible by 2.

II. The digit in the units place is divisible by 2.

A If the statement I alone is sufficient to answer the question

- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

Question 19

Are the roots of $ax^2 + bx + c = 0 (a \neq 0)$ real ?

I. $4a + b = 0$

II. $c = 5a$

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

SSC CGL Free Online Coaching

Question 20

What is the area of the rectangle ABCD ?

I. E is the midpoint of AB

II. Area of the $\triangle CDE$ is 50 cm^2

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Instructions

A sequence of numbers or letters that follow a definite pattern is given. Each question has a blank space. This has to be filled by the correct answer from the four given options to complete the sequence without breaking the pattern.

Question 21

3Z2A, 5X5C, 7V8E, -----

- A** 9S10G
- B** 10T12G
- C** 10S12G
- D** 9T11G

Answer: D

Question 22

Z7A, Y6B, X5C, -----, U3E

- A V3C
- B V4C

Answer: C

Question 45

$\frac{15}{3}, \frac{24}{5}, \frac{35}{7}, - - - - -$, $\frac{63}{11}$

- A $\frac{48}{9}$
- B $\frac{46}{9}$
- C $\frac{44}{9}$
- D $\frac{42}{9}$

Answer: A

Instructions

A Mobile manufacturing company makes three models I, II and III of mobile phones. The production (in thousands) during the years 2009 through 2013 is given below :

Year →	2009	2010	2011	2012	2013
Model ↓					
I	17	22	26	29	32
II	22	20	24	28	30
III	25	27	30	32	35

Question 46

If the cost of production of mobiles of I, II and III models during the year 2011 are respectively ₹ 2,250, ₹ 2,750 and ₹ 5,250 per unit, then the total cost of production (in crores of rupees) during that year is

- A 2.82
- B 28.2
- C 282
- D 0.282

Answer: B

SSC CHSL Free Mock Test

Question 47

If the profits per unit of three models I, II and III of mobiles during the year 2013 are ₹ 550, ₹ 650 and ₹ 1,000 respectively, then the total profit (in lacs of rupees) during the year 2013 is

- A 721
- B 7210
- C 72.1
- D 7.21

Answer: A

Question 48

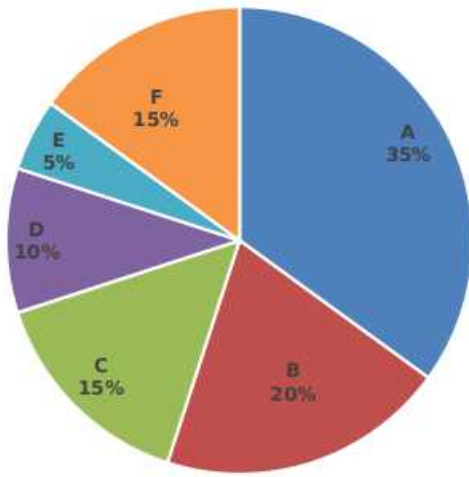

What is the percentage increase in the production of Model II mobiles in the year 2013 when compared to the year 2010 ?

- A 10%
- B 15%
- C 30%
- D 50%

Answer: D

Instructions

The following Pie diagram illustrates the yearly expenditure of an educational institution towards six heads : A-Staff salaries, B-Maintenance, C-Laboratories, D-Learner activities, E-Examinations and F-Miscellaneous. Using the data given answer the questions.

Question 49

The total sectorial angle corresponding the heads C, D and E is

- A 125°
- B 108°
- C 120°
- D 90°

Answer: B

SSC CGL Free Mock Test

Question 50

If in a year the expenditure under B is 30 lac more than the expenditure under E, then the total expenditure (in lacs) for that year is

- A 200
- B 185
- C 175
- D 150

Answer: A

Question 51

If the annual expenditure is 200 lacs, then the expenditure towards F (in lacs) is

- A 25
- B 30
- C 32
- D 35

Answer: B

Question 52

In a year total expenditure incurred towards E is 20 lacs of rupees. Then the expenditure towards (in lacs) is

- A 30
- B 35
- C 45
- D 40

Answer: D

Daily Free SSC Practice Set

Question 53

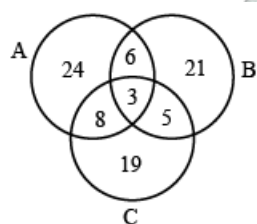

The sectorial angle corresponding to A is

- A 105°
- B 120°
- C 126°
- D 145°

Answer: C

Instructions

Using the data given in the below Venn diagram answer:

Question 54

The number of elements in $C - (A \cup B) =$

- A 27
- B 24
- C 19
- D 18

Answer: C

Question 55

The number of elements in $A \cup (B \cap C)$ is

- A 46
- B 41
- C 32

D 25

Answer: A

Question 68

As per the time table the local train leaves the station at regular intervals of 45 minutes. Reaching the station a person learnt that the train left 10 minutes ago and the next train is at 10.15 a.m. What time did the person arrive at the station ?

A 9.25 a.m.

B 9.30 a.m.

C 9.35 a.m.

D 9.40 a.m.

Answer: D

Question 69

A car travels from A to B at a speed of 24 kmph and returns from B to A at a speed of 40 kmph. What is the average speed of the car for the whole journey (in kmph) ?

A 36

B 34

C 32

D 30

Answer: D

Question 70

In a Queue of 51, the positions of A and B are tenth and thirty fifth respectively. If C is in between A and B and equidistant from them, how many are there (without counting C) in front of C in the queue ?

A 26

B 27

C 28

D 29

Answer: E

Question 71

A, B, C, D and E sit on a bench in a row such that C sits between D and E; D sits between A and C while E sits between C and B. Their seating arrangement is

A A - C - D - E - B

- B A - D - C - E - B
- C A - D - E - C - B
- D A - E - C - D - B

Answer: B

Question 72

If $ab \neq 0$ and $a * b = \frac{1}{ab} - 1$, then $\sum_{k=1}^{2015} \left(\frac{1}{k^2} * k \right) =$

- A 1008×2015
- B 1007×2015
- C 1006×2015
- D 0

Answer: B

Question 73

If $a \odot b = \sqrt{ab} + \frac{1}{\sqrt{ab}}$ and $a \triangle b = \sqrt{ab} - \frac{1}{\sqrt{ab}}$, then $\frac{4 \odot 9 + 4 \triangle 9}{4 \odot 9 - 4 \triangle 9} =$

- A $\frac{1}{36}$
- B $\frac{1}{18}$
- C 18
- D 36

Answer: D

Free Banking Study Material (15,000 Solved Questions)

Question 74

If today is Sunday what day of the week will it be 63 days later ?

- A Sunday
- B Monday
- C Tuesday
- D Wednesday

Answer: A

Question 75

A clock is set at 10.00 a.m. If clock loses 3 minutes every two hours, what is the correct time when the clock shows 4.00 p.m. on the same day ?

- A 4.03 p.m.

- B 4.06 p.m.
C 4.09 p.m.
D 4.12 p.m.

Answer: C

Question 77

If 25% of a number is 25 more than 25% of 500, then the number is

- A 500
B 550
C 600
D 650

Answer: C

Question 78

By selling an item for ₹ 189, a trader gets a profit of $12\frac{1}{2}\%$. The cost price (in rupees) of the item is

- A 148
B 158
C 168
D 178

Answer: C

Question 79

The cost price of an item is ₹ 250. Its marked price is ₹ 360. The maximum possible discount that can be given so that a profit of 20% is made is

- A ₹ 30
- B ₹ 40
- C ₹ 50
- D ₹ 60

Answer: D

SSC CHSL Free Mock Test

Question 80

In a partnership, A invests $\frac{1}{4}$ of the capital for $\frac{1}{4}$ of the time; B invests $\frac{1}{5}$ of the capital for $\frac{1}{2}$ of the time while C invests the rest of the capital for the whole time. The share of A (in thousands of rupees) in the profit of ₹ 2.28 lakhs is

- A 26
- B 24
- C 22
- D 20

Answer: D

Question 81

In a joint business, A invests ₹ 20,000 for six months while B invested certain amount for the whole year. In the year—end profit of ₹ 9,000 the share of A is ₹ 6,000. The amount(in rupees) invested by is

- A 8,000
- B 6,000
- C 5,000
- D 4,000

Answer: C

Question 82

Pipes A, B, C canfill a tank individually in 2 hours, 3 hours and 4 hours respectively. All the three are opened for 15 minutes and pipe C is closed. The time (in minutes) required furtherto fill the tank is

- A 48
- B $52\frac{1}{2}$
- C 54
- D 70

Answer: B

SSC CGL Free Mock Test

Question 83

Pipes A and B can fill a tank in 9 minutes and 12 minutes respectively. A is opened and after some time B is opened; and the tank is full in 4 minutes. The time difference (in minutes) between the opening of A and B is

- A 4
- B 3
- C 2
- D $1\frac{1}{2}$

Answer: C

Question 84

Three trains A, B and C moving at speeds s_1 , s_2 and s_3 respectively take times t_1 , t_2 and t_3 respectively to cover a distance of x kms. If $t_1 : t_2 : t_3 = 20 : 15 : 12$, then $s_1 : s_2 : s_3 = \dots\dots\dots$

- A 2 : 3 : 4
- B 3 : 4 : 5
- C 4 : 5 : 6
- D 5 : 6 : 7

Answer: B

Question 85

The time (in seconds) taken by a train of 240 metres long travelling at 70 kmph to cross another train of length 110 metres standing on a parallel track is

- A 20
- B 18
- C 17
- D 16

Answer: B

Daily Free SSC Practice Set

Question 86

10 men and 15 women can complete a work in 6 days; and 12 men and 27 women can complete the same work in 4 days. The number of days required for 2 men and 12 women to complete the same work is

- A 8
- B 9
- C 10

D 12

Answer: D

Question 87

A and B can do a work in 8 hours; B and C can complete the same work in 6 hours while C and A require 12 hours to complete that work. The time required by C alone to complete that work is

A 16 hours

B 9 hours 36 minutes

C 48 hours

D 10 hours 30 minutes

Answer: A

Question 88

The area of a square S is equal to the area of the rectangle of sides 56 metres and 14 metres. The length (in metres) of diagonal of S is

A 42

B $28\sqrt{2}$

C $14\sqrt{2}$

D $12\sqrt{2}$

Answer: B

SSC CGL Free Online Coaching

Question 89

The area of a rhombus is 144 square units. If one of its diagonals is 18 units then the length of the other diagonal (in units) is

A 9

B 12

C 14

D 16

Answer: D

Question 90

A brick measures 20 cms x 10 cms x 7.5 cms. The number of bricks required to build a wall of dimensions 25 m x 2 m x 0.75 m is

A 24000

B 25000

C 26000

D 27000

Answer: B

Question 91

The volume of a cone is 108π cubic cms and its height is 9 cms. The base radius (in cms) of the cone is

- A 4
- B 5
- C 6
- D 8

Answer: C

Free SSC Study Material (18,000 Solved Questions)

Question 92

A rectangular plot R of perimeter 46 metres has area 120 square metres. The area of the square whose side is equal to the diagonal of R, is

- A 361 sq. m
- B 289 sq. m
- C 225 sq. m
- D 169 sq. m

Answer: B

Question 93

A wheel makes 50 revolutions in covering a distance of 440 metres. The radius (in metres) of the wheel is

- A 4.2
- B 2.8
- C 1.4
- D 0.7

Answer: C

Question 94

The ratio of the curved surface area to the total surface area of a right circular cylinder is 1 : 2. If its total surface area is 616 sq. cms., then the volume of the cylinder (in cubic cms) is

- A 1120
- B 1080
- C 1078
- D 1000

Answer: C

SSC CGL Previous Papers (DOWNLOAD PDF)

Question 95

If $x > 0$ and $|1 - 3x| > 4 - x$, then

- A $x > \frac{5}{4}$
- B $x > \frac{4}{5}$
- C $x > \frac{3}{5}$
- D $x > \frac{2}{5}$

Answer: A

Question 96

$(1100101)_2 - (1011011)_2$

- A $(1010)_2$
- B $(1100)_2$
- C $(1001)_2$
- D $(1101)_2$

Answer: A

Question 97

If $m = 7^1 \cdot 5^2 \cdot 3^4 \cdot 2^8$, then the greatest integer value of k such that 21^k divides m is

- A 1
- B 2
- C 4
- D 8

Answer: A

1500+ Very Important Free SSC Solved Questions

Question 98

If $a^x = b^y = c^z \neq 0$ and $b^2 = ac$, then the progression in which x, y, z are is

- A an arithmetic progression
- B a geometric progression
- C a harmonic progression
- D an arithmetico-geometric progression

Answer: C

Question 99

Three numbers are in the ratio $1 : 2 : 3$ and the sum of the cubes of them is 36. The smallest number among them is

- A 1
- B 2
- C 3
- D 4

Answer: A

Question 100

The earnings of A, B, C are in the ratio $7 : 9 : 12$ and their expenditures are in the ratio $8 : 9 : 15$. If A saves 25% of his earnings, then the ratio of their savings is

- A $46 : 99 : 59$
- B $56 : 99 : 69$
- C $69 : 56 : 99$
- D $59 : 46 : 99$

Answer: B

Free Banking Study Material (15000 Solved Questions)

Question 101

If $x = \frac{\sqrt{5} + \sqrt{3}}{\sqrt{5} - \sqrt{3}}$ and $xy = 1$ then $x + y =$

- A 6
- B 7
- C 8
- D 9

Answer: C

Question 102

If $a \neq b, a^2 + b^2 \neq 0$, then $\frac{(a-b)(\sqrt{a}-\sqrt{b})}{(a+b)(\sqrt{a}+\sqrt{b})} =$

- A $1 - \frac{2\sqrt{ab}}{a+b}$
- B $1 + \frac{2\sqrt{ab}}{a+b}$
- C $1 + 2\sqrt{\frac{1}{a} + \frac{1}{b}}$
- D $1 - 2\sqrt{\frac{1}{a} + \frac{1}{b}}$

Answer: A

Question 103

The least positive integer m to be added to 3096 so that their sum is divisible by 39 is

- A 2
- B 12
- C 24
- D 32

Answer: C

AP SI Free Solved Previous Papers PDF

Question 104

If a number k is of the form $18m + 7$ for some integer m then the remainder when k is divided by 6 is

- A 5
- B 3
- C 2
- D 1

Answer: D

Question 105

The largest number m such that the numbers 947, 639 and 1051 leave the same remainder when divided by m is

- A 3
- B 4
- C 7
- D 11

Answer: B

Question 106

The number of pairs of positive integers a and b such that $a + b = 594$ and $\gcd(a, b) = 27$ is

- A 4
- B 5
- C 6
- D 7

Answer: B

Question 107

Taking $6.\overset{1}{198} = 0.16134$, the value of $\overset{1}{0.0006198}$ is

- A 0.016134
- B 0.16134
- C 16134
- D 1613.4

Answer: D

Question 108

The rational number r that becomes $\frac{1}{2}$ when 1 is subtracted from the numerator and becomes $\frac{3}{5}$ when 1 is subtracted from the denominator is

- A $\frac{17}{32}$
- B $\frac{15}{26}$
- C $\frac{13}{24}$
- D $\frac{9}{16}$

Answer: D

Question 109

The descending order of the fractions $\frac{8}{13}$, $\frac{5}{12}$, $\frac{9}{11}$ and $\frac{7}{15}$ is

- A $\frac{9}{11}$, $\frac{8}{13}$, $\frac{7}{15}$, $\frac{5}{12}$
- B $\frac{9}{11}$, $\frac{7}{15}$, $\frac{8}{13}$, $\frac{5}{12}$
- C $\frac{5}{12}$, $\frac{7}{15}$, $\frac{8}{13}$, $\frac{9}{11}$
- D $\frac{5}{12}$, $\frac{8}{13}$, $\frac{7}{15}$, $\frac{9}{11}$

Answer: A

Daily Free Banking Online Tests

Question 110

$1.57777 \dots =$

- A $\frac{69}{45}$
- B $\frac{71}{45}$
- C $\frac{74}{45}$
- D $\frac{77}{45}$

Answer: B

Question 111

$$\left(\frac{\sin 45^\circ + \cos 45^\circ + \tan 45^\circ}{\sin 45^\circ - \cos 45^\circ - \tan 45^\circ} \right)^2 =$$

- A $\frac{1}{2} (2 + \sqrt{2})$
- B $\frac{1}{2} (2 - \sqrt{2})$
- C $3 + 2\sqrt{2}$
- D $6 + 4\sqrt{2}$

Answer: C

Question 112

$$\frac{1 - \cos \theta}{\sin \theta} + 1 - \cos \theta =$$

- A $2 \sin \theta$
- B $2 \cos \theta$
- C $2 \sec \theta$
- D $2 \operatorname{cosec} \theta$

Answer: D

SSC CHSL Previous Question papers (download pdf)

Question 113

In $\triangle ABC$, $\angle ABC = 45^\circ$, $\angle CAB = 30^\circ$ and CD is perpendicular to AB. If CD = 100, then AB =

- A $100 (\sqrt{3} + 1)$
- B $100 (\sqrt{3} - 1)$
- C $50 (\sqrt{3} + 1)$
- D $50 (\sqrt{3} - 1)$

Answer: A

Question 114

If $7 + 10x - 5x^2$ has maximum at $x = \alpha \in R$, then $\alpha =$

- A 0
- B 1
- C 2
- D 3

Answer: B

Question 115

The progression in which the roots of the equation $6x^3 - 11x^2 + 6x - 1 = 0$ lie is

- A an arithmetic progression
- B a geometric progression
- C a harmonic progression
- D a arithmetico-geometric progression

Answer: C

SSC CHSL Free Mock Test

Question 116

The quadratic expression that leaves remainders 1, 2 and 4 respectively when divided by $(x - 1)$, $(x - 2)$ and $(x - 3)$ is

- A $\frac{1}{2}(x^2 + x + 1)$
- B $\frac{1}{2}(x^2 - x + 1)$
- C $\frac{1}{2}(x^2 + x + 2)$
- D $\frac{1}{2}(x^2 - x + 2)$

Answer: D

Question 117

If $p(x)$ is a polynomial divisible by $(x - 5)$, then a factor of $p(x^3 - 3)$ is

- A $x + 2$
- B $x + 1$
- C $x - 1$
- D $x - 2$

Answer: D

Question 118

If $\frac{xy}{x+y} = \frac{6}{5}$ and $\frac{xy}{x-y} = 6$, then $(x, y) =$

- A (2, 3)
- B (3, 2)
- C (1, 2)
- D (2, 1)

Answer: B

SSC CGL Free Mock Test

Question 119

The number of solutions of the system $x - y + z = -6$, $x + y - z = 3$, $-x + y - z = 6$ is

- A 0
- B 1
- C 3
- D Infinite

Answer: D

Question 120

The sum of all the natural numbers between | and 100 which are divisible by 7 is

- A 735
- B 730
- C 725
- D 715

Answer: A

Question 121

$$\sum_{k=0}^{\infty} \frac{2^k}{3^{k+1}} =$$

- A 0
- B $\frac{1}{3}$
- C $\frac{2}{3}$
- D 1

Answer: D

Daily Free SSC Practice Set

Question 122

If the fourth term in the binomial expansion of $\left(2^x \cdot x^2 + \frac{1}{x^2}\right)^6$ is 160, then $x =$

- A 8
- B -8
- C 1
- D -1

Answer: C

Question 123

The middle term in the expansion of $\left(x^2 - \frac{1}{x}\right)^8$ is

- A $-56x$
- B $70x^3$
- C $70x^4$
- D $-56x^4$

Answer: C

Question 124

$$A = \begin{bmatrix} 1 & 2 & 2 \\ 2 & 1 & 2 \\ 2 & 2 & 1 \end{bmatrix} \Rightarrow A^2 - 4A =$$

- A 21
- B 31
- C 41
- D 51

Answer: D

SSC CGL Free Online Coaching

Question 125

If $\det A = 5$ for a 3×3 matrix A, then $\det(5A) =$

- A 5
- B 5^2
- C 5^3
- D 5^4

Answer: D

Question 126

$$\lim_{x \rightarrow 3} \frac{x - 3}{\sqrt{x - 2} - \sqrt{4 - x}} =$$

- A 0
- B 1
- C 2
- D 4

Answer: B

Question 127

$$\lim_{x \rightarrow \frac{\pi}{2}} \frac{1 - \sin^3 x}{\cos^2 x} =$$

- A $\frac{3}{2}$

- B 1
C $\frac{2}{3}$
D -1

Answer: A

Free SSC Study Material (18,000 Solved Questions)

Question 128

In $\triangle ABC$, $\angle BAC = 90^\circ$, $AD \perp BC$, $AD = 6$ cm and $BD = 4$ cm. Then $DC =$

- A 4 cm
B 6 cm
C 9 cm
D $\sqrt{52}$ cm

Answer: C

Question 129

The vertices A, B, C, D in that order of a quadrilateral lie on a circle. Then $\angle ABC + \angle ADC =$

- A 90°
B 120°
C 135°
D 180°

Answer: D

Question 130

If a square is inscribed in a circle of radius $\sqrt{\frac{2015}{2}}$ then area of the square is

- A 2014
B 2015
C 2016
D 2017

Answer: B

SSC CGL Previous Papers (DOWNLOAD PDF)

Question 131

For $\triangle ABC$ with vertices A(4, 2), B(6, 5) and C(1, 4) the length of the median through A is

- A 4

B $\frac{1}{2}\sqrt{15}$

C $\frac{1}{2}\sqrt{13}$

D $\sqrt{\frac{13}{2}}$

Answer: D

Question 132

If A (k, -3), B (2, -5) and C (-1, -8) lie on a line, then AB : BC =

A 2 : 3

B $\sqrt{2} : \sqrt{3}$

C $2\sqrt{2} : 3\sqrt{3}$

D 4 : 9

Answer: A

Question 133

For statements p and q, the tautology among the following is

A $(p \vee q) \rightarrow p$

B $(p \wedge q) \rightarrow p$

C $\sim(p \wedge q) \rightarrow p$

D $\sim(p \vee q) \rightarrow p$

Answer: B

1500+ Very Important Free SSC Solved Questions

Question 134

If p and q are statements, then the inverse of $p \rightarrow q$ is

A $q \rightarrow p$

B $\sim q \rightarrow \sim p$

C $\sim p \rightarrow \sim q$

D $\sim p \rightarrow q$

Answer: C

Question 135

If $I_k = \left\{x \in \mathbb{R} : 0 < x < \frac{1}{k}\right\}$ for $k = 1, 2, 3, \dots$ then $\bigcap_{k=1}^{\infty} I_k =$

A $\left\{0\right\}$

B ϕ

C $\left\{1\right\}$

D $\left\{x \in \mathbb{R} : 0 < x < 1\right\}$

Answer: B

Question 136

For sets A, B and C, $A - (B \cup C) =$

A $(A - B) \cup (A - C)$

B $(A \cup B) - C$

C $(A - B) \cap (A - C)$

D $A \cup (B - C)$

Answer: C

Free Banking Study Material (15000 Solved Questions)

Question 137

If $f: \mathbb{R} \rightarrow \mathbb{R}$ and $g: \mathbb{R} \rightarrow \mathbb{R}$ are defined by $f(x) = 2^x$ and $g(x) = x^2$ for each $x \in \mathbb{R}$, then

$\left\{x \in \mathbb{R} : (f \circ g)(x) = (g \circ f)(x)\right\} =$

A $\mathbb{R}$

B ϕ

C $\{0, 2\}$

D $\{0\}$

Answer: C

Question 138

The length of the line segment intercepted between the axes by the line joining (6, -4) and (-3, 8) is

A 3

B 4

C 5

D 6

Answer: C

Question 139

The angle between the lines $2x + 3y = 5$ and $2(x - 1) + 3(2 + y) = 6$ is

A 0°

B 45°

C 60°

D 90°

Answer: A

AP SI Free Solved Previous Papers PDF

Question 140

$$\frac{2 \tan 30^\circ}{1 + \tan^2 30^\circ} =$$

- A $\sqrt{3}$
- B $\frac{\sqrt{3}}{2}$
- C $-\sqrt{3}$
- D $-\frac{\sqrt{3}}{2}$

Answer: B

Question 141

For $n \geq 1$, let $a_n = k$ where k is the remainder when n is divided by 5. Then the mode of the observations $a_1, a_3, a_8, a_{12}, a_{13}, a_{17}, a_{23}$ is

- A 1
- B 2
- C 3
- D 4

Answer: C

Question 142

The standard deviation of 1, 2, 3, ..., 25 is

- A $13\sqrt{2}$
- B $2\sqrt{13}$
- C 52
- D 26

Answer: B

Free Banking Study Material (15,000 Solved Questions)

Question 143

If σ^2 is the variance of $x_1, x_2, \dots, x_n$ then $9\sigma^2$ is the variance of

- A $4 - 3x_1, 4 - 3x_2, \dots, 4 - 3x_n$
- B $4 + 9x_1, 4 + 9x_2, \dots, 4 + 9x_n$
- C $4 - 9x_1, 4 - 9x_2, \dots, 4 - 9x_n$
- D $4 + 81x_1, 4 + 81x_2, \dots, 4 + 81x_n$

Answer: A

Question 144

The correlation coefficient r satisfies the inequality

- A $|\mid r \mid| > 1$
- B $|\mid r \mid| < 1$
- C $|\mid r \mid| \leq 1$
- D $-2 < r < 2$

Answer: C

Question 145

A ball is drawn at random from a bag containing 5 green, 6 black and 7 white balls, all of identical size. The probability that the chosen ball is either green or black is

- A $\frac{6}{70}$
- B $\frac{13}{18}$
- C $\frac{2}{3}$
- D $\frac{11}{18}$

Answer: D

Daily Free Banking Online Tests

Question 146

Three numbers are chosen at random from the set $\{1, 2, 3, \dots, 8\}$. The probability that they are consecutive numbers is

- A $\frac{9}{28}$
- B $\frac{7}{28}$
- C $\frac{5}{28}$
- D $\frac{3}{28}$

Answer: D

Question 147

The probability that a number chosen at random from $\{1, 2, 3, 4, \dots, 14\}$ is a prime number solution of the equation $f(x) = 0$ where $f(x) = (x - 2)(x^2 - 9)(x - 6)(x - 8)$ is

- A $\frac{5}{14}$
- B $\frac{3}{14}$
- C $\frac{2}{14}$
- D $\frac{1}{14}$

Answer: C

Question 148

If A and B are events such that $P(A) = \alpha$, $P(B) = \beta$ and $P(A \cap B) = \gamma$, then $P(\overline{A} \cup B) =$

- A $1 - (\alpha + \beta + \gamma)$
- B $1 - \alpha - \beta$
- C $1 - \alpha - \gamma$
- D $1 - \alpha + \gamma$

Answer: D

Question 167

Who, among the following, is deemed to be the founder of Scientific Management ?

- A Louis Denbitz Brandies
- B O. Sheldon

- C Peter Drucker
- D Frederick W. Taylor

Answer: D

Question 168

M.B.O. stands for

- A Management By Objections
- B Management By Objectives
- C Management By Organizations
- D Management Business Objectives

Answer: B

Question 169

One of the most common network setups where each of the devices and computers on a network connect to a central hub is called

- A Mesh Topology
- B Tree Topology
- C Star Topology
- D Hybrid Topology

Answer: C

Free Banking Study Material (15000 Solved Questions)

Question 170

A non-volatile computer storage that can be electrically erased and reprogrammed is called

- A Cache Memory
- B Flash Memory
- C Random Access Memory
- D Read Only Memory

Answer: B

Question 171

A: "Why doesn't she see through him?"

B: "Why, what do you expect to happen?"

In this conversation, 'B' is

- A concerned
- B indifferent
- C feels that A's concern is unjustified

D makeslight of A's concern

Answer: D

Question 172

A: "Why don't you cook the dinner today?"

B: "I wish you'd let me be."

'B' implies

A he is willing

B he wants to be left alone

C he cannot cook

D he may cook later

Answer: B

AP SI Free Solved Previous Papers PDF

Question 173

A: "They are talking ill of me, although they are not ignorant of my merit and hard work."

B: "Be it so, dogs bark while the caravan passes on."

'B' means that

A it is natural for dogs to bark

B one should take into account popular gossip

C popular gossip is the foundation of true judgement

D one should not bother about popular gossip

Answer: D

Question 174

Change the following into passive voice :

All desire wealth and some acquire it.

A Wealth is desired by all and it is acquired by some.

B Wealth is desired by all and some have acquired it.

C Some have acquired wealth.

D Some desire wealth, and all acquire it.

Answer: A

Question 175

Read the following passage and answer questions:

Passage:

Computers have brought a revolution in human life. To begin with, computers took over different human activities. Now even thinking and problem-solving are being done by computers. This has culminated into automation of offices and manufacturing processes resulting in drastic reduction of manpower in administration, business and industry. So much is the human reliance on computers that they are being used on a large scale even in fields like music, sculpture and architecture. The growing use of computers in teaching might one day render teachers, classrooms and libraries redundant. This situation makes many of us believe that computers are likely to replace human beings in every walk of life. But every coin has two sides. However useful they may be, computers cannot replace human beings. A compliment by an elderly person restores the confidence of a depressed person. A simple touch of a mother silences a crying baby. Can a computer perform these and many such other miracles? Now-a-days, teaching is being done by computers. Computer lovers claim that they can learn everything with the help of a computer. But imagine the difference between the two situations, i.e.: sitting before a computer and sitting in a classroom with dozens of students around and in the presence of a teacher. The pains and pleasures of companionship, the repudiating as well as encouraging expressions on the teacher's face, the direct interaction, and abundant sharing and understanding, set this living situation a world apart from the lonely, computer controlled suffocating room.

Question 186

What is the meaning of 'automation of offices and manufacturing processes' ?

- A Replacing manual labour with automatic equipment
- B To become automatic
- C To become remote controlled
- D To work faster

Answer: A

Question 187

What makes one believe that computers will one day replace human beings ?

- A Computers will replace teachers
- B Increasing human dependence on computers
- C Computers will replace libraries
- D Computers will replace classrooms

Answer: B

SSC CGL Free Mock Test

Question 188

Why cannot computers replace human beings ?

- A Computers have to be bought
- B Human beings are not machines
- C Computers are expensive
- D Computers are difficult to handle

Answer: B

Question 189

What does a 'lonely, computer-controlled suffocating room' imply ?

- A Lack of air
- B Lack of friends
- C A stifling cheerless world of scientific technology
- D Computers controlling human life

Answer: C

Question 190

How have computers brought about a revolution in human life ?

- A They are sophisticated machines

- B They have taken over every aspect of human life.
- C They provide information
- D They are user-friendly

Answer: B

Read the following passage and answer questions

Passage:

How many times have you asked, “Why did he do that ? Why did she say that ? Why does nothing ever work out for me ? Why didn't I get what I wanted ? Why does this keep happening in my life ?” “Whyology” is the obsessive need to know why things happen as they do, which results in emotional paralysis, keeping you stuck. Why do you need to know why things happen ? If you did know, would it make that much difference ? Many people will say, “Yes, it would make a difference, because then I would be able to move on and let go.” The truth is that the letting-go experience has nothing to do with knowing why things happen as they do. In fact the more you need to know why, the less likely you are to let go and move on. Unless you release this cycle, you will be robbed of your ability to appreciate and enjoy the moment you are living in right now. Think of all the energy that you could use to create in life if you left the practice of keeping vigil on tombstones. Internal stress comes when you resist what is in life. When you release your need to know why, an amazing thing starts to happen. You begin to connect with your inner creativity, which helps you find creative solutions to your situation.

Question 191

What does ‘Whyology’ lead to ?

- A Happiness
- B Success
- C A positive attitude
- D Emotional stagnation

Answer: D

Question 192

What happens when this cycle of ‘whyology’ is released ?

- A Appreciation and enjoyment of life follows
- B Negative thoughts enter one's mind
- C One becomes critical
- D Life is filled with unhappy moments

Answer: A

Question 193

What does the ‘practice of keeping vigil to tombstones’ mean ?

- A Going to the cemetery
- B Keeping a watch on tombstones

- C Brooding over the past
- D Worrying over the future

Answer: C

SSC CGL Free Online Coaching

Question 194

When does 'internal stress' occur ?

- A When one is creative
- B When one does not accept what is in life
- C When one accepts what is in life
- D When one helps others

Answer: B

Question 195

What is 'Whyology' ?

- A It is a philosophy of life.
- B It the compulsive need to know the reason behind an act.
- C It is a branch of literature.
- D It is a scientific approach to life.

Answer: B

Read the following passage and answer questions:

Passage:

Tea has always been an integral part of our beverage culture. Its origins are the stuff of legend. A Chinese story says that when an Emperor was purifying water in the shelter of a tea tree, some leaves fell into the pot. The liquid that emerged after boiling was of a wonderful fragrance, colour and taste, and the first tea to be brewed. In India, we are told of a Prince, who left his homeland to preach Buddhism and decided not to sleep during his nine-year mission. At the end of his third year, overtaken by exhaustion, he chewed a few leaves of a tea shrub, which apparently enabled him to stay awake for the remaining six years. Over the years, tea drinking was refined into an art and indeed has even been elevated into an elaborate, almost sacred rite as in the Japanese tea ceremony. But if there was one culture that adopted tea drinking and made it an iconic ritual and time of day in itself, it was the English.

Question 196

According to legend, how were the first tea leaves discovered ?

- A By accident
- B By experimentation
- C By official order
- D By simple practices

Answer: A
