Analytical Ability

Instructions

A question is followed by data in the form of two statements labelled as I and II. You must decide whether the data given in the Statements are sufficient to answer the questions.

Question 1

Is m a divisor of n ?

I. m is the smallest prime such that $9m > 8$.

II. n is an odd integer

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Free Banking Study Material (15,000 Solved Questions)

Question 2

Do P, Q and R lie on a circle?

I. P, Q lie on the circle and PQ passes through its centre.

II. $\triangle PQR$ is right-angled.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Question 3

If $p(x)$ is a polynomial, is $x + 3$ a factor of $p(x^2 + 2)$?

I. $p(-3) = 0$

II. $p(11) = 0$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Question 4

If x is an integer, is $9^x + 9^{-x} = b$

I. $3^x + 3^{-x} = \sqrt{b+2}$

II. $x > 0$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

Daily Free Banking Online Tests

Question 5

In $\triangle ABC$, if D is the foot of the perpendicular drawn from B onto AC, then what is the area of $\triangle ABC$?

- I. $BD \cdot AC = 20$
- II. $\angle BAD = 45^\circ$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Question 6

What is the value of k with $56 < k < 66$?

- I. k leaves remainder 1 when divided by 2.
- II. $k + 1$ is divisible by 8.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

Question 7

Is n a prime?

- I. n leaves remainder 1 when divided by 6.
- II. n leaves remainder 7 when divided by 91.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

SSC CHSL Previous Question papers (download pdf)

Question 8

Can we construct the $\triangle ABC$ with sides a, b and c ?

I. $a = 3, b = 4$

II. The perimeter of $\triangle ABC$ is 18.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Question 9

What is the average of the numbers $a_1, a_2, \dots, a_{10}$?

I. $a_1 + a_2 + \dots + a_9 = 810$

II. $a_2 + a_3 + \dots + a_{10} = 900$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Question 10

If $a \neq b$ and $c \neq d$, what is the value of $\frac{a^2+d^2}{b^2+c^2}$?

I. $\frac{a+b}{c-d} = \frac{c+d}{a-b}$

II. $ad \neq bc$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

SSC CHSL Free Mock Test

Question 11

Can we find the orthocentre of $\triangle ABC$?

I. $AB^2 = AC^2 - BC^2$

II. $AB + BC + CA = 100$ cms

- A If the statement I alone is sufficient to answer the question

- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

Question 12

If $p(x)$ is a polynomial is 2 a root of $p(x) = 0$?

I. $p(1) = 0$

II. $p(p(1)) \neq 0$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Question 13

What is the value of $\frac{x^2 + y^2 - z^2}{xy}$?

I. $x : y = 1 : 2$

II. $y : z = 2 : 3$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

SSC CGL Free Mock Test

Question 14

What is the volume of the cylinder ?

I. The height of the cylinder is 3 units more than its radius.

II. Two identical spheres of radius 3 units fit into the cylinder.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Question 15

For real numbers a and b , what is the value of $7a + 4b$?

I. $ab \neq 0$

II. $a^2 + b^2 = 0$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

Question 16

What is the value of $\sin 2\theta$?

I. $\sec \theta + \operatorname{cosec} \theta = 4$

II. $\tan \theta + \cot \theta = 4$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Daily Free SSC Practice Set

Question 17

For non-zero integers a, b, c, d and p , is the product $(ap) \times (bp)^2 \times (cp)^3 \times (dp)^4$ a positive integer?

I. $a < c < p < 0$

II. $b < d < p < 0$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

Question 18

For positive integers x and y with $xy = 30$, what is the value of $x + y$?

I. $1 < \frac{x}{y} < 2$

II. $x > y$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question

- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Question 19

Is the matrix A singular?

I. A is a 2×2 matrix

II. The sum of the elements of the matrix A is zero.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Question 20

What is the number of zero at the end of the number n?

I. 2^8 divides n.

II. 5^3 divides n but 5^4 does not divide n.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Instructions

A sequence of numbers or letters that follow a definite pattern is given. Each question has a blank space. This has to be filled by the correct answer from the four given options to complete the sequence without breaking the pattern.

Question 21

C : X :: ----- : U

- A B
- B D

Instructions

The following table gives the profits(in lakhs of rupees)on four items A, B, C and D manufactured by a company during the financial years 2010-11 to 2014-15. Using the table answer the questions.

Financial Year → Items ↓	2010-11	2011-12	2012-13	2013-14	2014-15
A	375	400	450	425	450
B	525	500	550	575	550
C	225	275	325	350	375
D	475	525	475	550	625

Question 46

On which item the profit are increasing year by year?

- A A
B B

C C

D D

Answer: A

SSC CHSL Free Mock Test

Question 47

Taking the total profit during the financial year 2012-13 of the company what percentage of profit is earned on the item A?

A 20%

B 25%

C 30%

D 35%

Answer: C

Question 48

What is the percentage increase of profit on item B during 2012-2013 over the previous year?

A 30%

B 25%

C 15%

D 10%

Answer: C

Question 49

Which item has given maximum profit in all the years put together?

A A

B B

C C

D D

Answer: B

SSC CGL Free Mock Test

Question 50

Which item has the reduced profit compared to previous year twice during the five years?

A A

B B

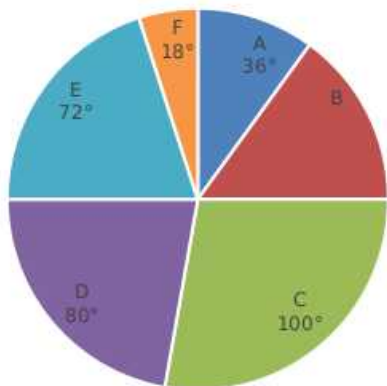

C C

D D

Answer: A

Instructions

The families in a colony are categorized into six groups A, B, C, D, E and F based on the income of the family. Their distribution is as given in the Pie chart below. Use this to answer Questions.

Question 51

What is the percentage of E category families in the colony?

- A 36%
- B 25%
- C 20%
- D 15%

Answer: B

Question 52

If there are 108 families in category B, then what is the number of families in category F?

- A 18
- B 36
- C 54
- D 72

Answer: C

Daily Free SSC Practice Set

Question 53

If the total number of families in the colony is 720, what is the number of families in category A?

- A 120
- B 108
- C 96
- D 72

Answer: D

Question 54

If d and e respectively denote the number of families in the categories D and E, and if $d = ke$, then $k =$

- A $\frac{10}{9}$
- B $\frac{8}{7}$
- C $\frac{7}{8}$
- D $\frac{9}{10}$

Answer: C

Question 55

If the category F has 10 families, then the total number of families in the colony is

- A 360
- B 240
- C 200
- D 80

Answer: D

SSC CGL Free Online Coaching

Instructions

In a code the n^{th} letter in the English alphabet is coded as the r^{th} letter of it, where r is the remainder when $3n + 2$ is divided by 26. For example, the 7^{th} letter G is coded as W since $3 \cdot 7 + 2 = 23$ and W is the 23^{rd} letter; the 8^{th} letter H is coded as Z since $3 \cdot 8 + 2 = 26$ and Z is the 26^{th} letter in the alphabet. The reverse is used for decoding. Based on this coding and decoding answer Questions.

Question 56

The code word for TELANGANA is

- A JQLREWERE
- B JQLEWRERE
- C JQLEWERER
- D JQLERWERE

Answer: C

Question 57

The code word for NAVYSHIP is

- A REPYGZCX
- B REPYZGCX
- C REYPZGXC

D RPEYZGCX

Answer: C

Question 58

The number of letters in the alphabet that are coded to themselves is

A 0

B 1

C 2

D 3

Answer: C

Question 71

Three doctors A, B and C have consultation schedule as follows :

- (i) A - Tuesday and Thursday - 12.00 noon 4.00 pm.
- (ii) B - Monday, Thursday, Friday - 10.00 am to 2.00 pm.
- (iii) C - Monday, Wednesday, Thursday - 9.00 am to 2.00 pm.

The day and the time slot at which all of A, B, C are available is

- A Monday, 12.00 noon to 2.00 pm
- B Monday, 10.00 am to 12.00 noon
- C Thursday, 2.00 pm to 4.00 pm
- D Thursday, 12.00 noon to 2.00 pm

Answer: D

Question 72

Five persons A, B, C, D and E sit in a row on a bench such that D sits between B and E. If C and D are not together, the persons sitting on either end of the bench are

- A A, B
- B B, C
- C C, A
- D D, E

Answer: C

Question 73

For real numbers x and y , if $xoy = x + y - xy$, then the number of distinct real values of x for which $xox = 1$ holds is

- A 0
- B 1
- C 2
- D 3

Answer: B

Free Banking Study Material (15,000 Solved Questions)

Question 74

If $E \downarrow F = (E + F) + (E - F)^2$ and $E \uparrow F = (E + F)^3 - (E - F)^3$, then $(3 \downarrow 5) \uparrow (2 \downarrow 3) =$

- A 5616
- B 5876
- C 5926
- D 5986

Answer: A

Question 75

If $p = 1 + \frac{1}{2} + \frac{1}{2^2} + \dots \infty$ and $q = 1 + \frac{1}{3} + \frac{1}{3^2} + \dots \infty$, then $\frac{p+q}{pq} =$

- A $\frac{7}{2}$
- B $\frac{7}{6}$
- C $\frac{21}{2}$
- D $\frac{25}{6}$

Answer: A

Question 80

$$\sqrt{10 + 2\sqrt{6} + 2\sqrt{10} + 2\sqrt{15}} =$$

- A $\sqrt{2} + 3 + \sqrt{5}$
- B $\sqrt{2} + \sqrt{3} + \sqrt{5}$
- C $\sqrt{3} + \sqrt{5} + \sqrt{6}$
- D $2 + \sqrt{3} + \sqrt{5}$

Answer: D

Question 81

$$\sqrt{\frac{1}{12-2\sqrt{35}}} - \sqrt{\frac{1}{8-2\sqrt{15}}} - \sqrt{\frac{2}{10+2\sqrt{21}}} =$$

A $2\sqrt{3}$

B $2\sqrt{5}$

C $2\sqrt{7}$

D 0

Answer: A

Question 82

The greatest integer having five digits and is divisible by 137 is

A 99873

B 99862

C 99877

D 99973

Answer: D

SSC CGL Free Mock Test

Question 83

The largest three digit number, which when divided by 3 and 8 leave remainders 1 and 3 respectively, is

A 993

B 931

C 979

D 955

Answer: A

Question 84

Traffic lights at 3 junctions A, B and C change every 15, 25 and 30 seconds respectively. If all the lights change simultaneously at 10. a.m., when will they change together again?"

A 2 min 30 sec past 10 a.m.

B 2 min 20 sec past 10 a.m.

C 5 min 10 sec past 10 a.m.

D 5 min 20 sec past 10 a.m.

Answer: E

Question 85

The gcd of two numbers is 23 and their sum is 184, Then the two such numbers among the following are

A 69, 112

B 46, 138

C 69, 115

D 46, 124

Answer: C

Daily Free SSC Practice Set

Question 86

In the decimal representation of $\frac{3}{22}$ the digit in the 25^{th} decimal place is

A 3

B 6

C 7

D 4

Answer: B

Question 87

$$\left[1 - \left\{ 1 - \left(1 + \frac{3}{7} \right)^{-1} \right\}^{-1} \right]^{-1} =$$

A $\frac{3}{10}$

B $\frac{3}{7}$

C $-\frac{3}{7}$

D $-\frac{3}{10}$

Answer: A

Question 88

If $x = \sqrt{3 + \sqrt{3 + \sqrt{3 + \dots}}}$, then a true inequality among the following is

A $1 < x < 2$

B $2 < x < 2.5$

C $2.5 < x < 3$

D $3 < x < 4$

Answer: D

SSC CGL Free Online Coaching

Question 89

The cost price of an article is ₹ 800. Its marked price is ₹ 1,060. If the shopkeeper suffers a loss of 12% on its sale, then the discount allowed on the article (approximately) is

- A $30\frac{1}{2}\%$
- B $32\frac{1}{3}\%$
- C $33\frac{1}{2}\%$
- D 35%

Answer: B

Question 90

The present population of a city is 9075 thousands. If the annual increase of population is 10%, then what was the population of the city (in thousands) 2 years ago ?

- A 7800
- B 7500
- C 8500
- D 8200

Answer: B

Question 91

If 16% of a property is worth ₹ 3.52 lac, then 50% of the property is worth (in lacs of rupees) is

- A 22
- B 18
- C 16
- D 11

Answer: C

Free SSC Study Material (18,000 Solved Questions)

Question 92

The cost price of 10 articles is equal to the sale price of 12 of the same articles, Then the outcome of the transaction is

- A $16\frac{2}{3}\%$ gain
- B $16\frac{2}{3}\%$ loss
- C $8\frac{2}{3}\%$ gain
- D $8\frac{2}{3}\%$ loss

Answer: D

Question 93

By selling two articles each at ₹ 480, a merchant gets a profit of 20% on one and loss of 20% on the other. In the total transaction the merchant gets a

- A 4% loss
- B no loss no gain
- C 5% loss
- D 5% gain

Answer: C

Question 94

Two persons A and B started a business investing ₹ 3.5 lacs and ₹ 6.5 lacs each respectively. After 6 months A has withdrawn from the business while C joined by investing ₹ 7.5 lacs. The share of A in the year-end profit of ₹ 2.4 lacs is .

- A ₹ 35,000
- B ₹ 45,000
- C ₹ 55,000
- D ₹ 75,000

Answer: A

SSC CGL Previous Papers (DOWNLOAD PDF)

Question 95

A person A starts a business with some capital. After four months B joins with a capital 60% more than that of A. The share of A (in ₹) in the year- end profit of ₹ 6,20,000 is

- A 3,10,000
- B 2,70,000
- C 3,00,000
- D 3,20,000

Answer: B

Question 96

Two pipes X and Y can fill an empty tank in 18 min and 24 min respectively. Both the pipes are opened. After some time X is closed while Y is continued till the tank is filled. If the tank is filled in 12 minutes, then X is stopped after

- A 6 min
- B 9 min
- C 8 min
- D 10 min

Answer: C

Question 97

Taps A and B can fill a tank in 3 hrs. and 4 hrs. respectively. Tap C can empty the full tank in 6 hrs. If A, B and C are opened simultaneously, then the tank will be filled in

- A 120 min
- B 140 min
- C 144 min
- D 160 min

Answer: A

1500+ Very Important Free SSC Solved Questions

Question 98

The speed of the train(in kmph) of 180 m long which crosses a bridge of length 120 m in 15 seconds is

- A 36
- B 72
- C 45
- D 63

Answer: D

Question 99

A starts from P at 6a.m. and reaches Q in 4 hours. B starts from Q at 8 a.m. and reaches P at 10 a.m. At what time A and B meet?

- A 8.40 a.m.
- B 8.30 a.m.
- C 9.00 a.m.
- D 9.30 a.m.

Answer: B

Question 100

A can do a piece of work in 12days and B in 16 days. After working for 4 days with A, B leaves the work. The number of days required to finish the remaining work by A alone is

- A 2
- B 3
- C 4
- D 5

Answer: A

Free Banking Study Material (15000 Solved Questions)

Question 101

A, B and C together can complete a piece of work in 30 days. A takes twice as long as B and C together take to complete the work while B takes twice as long as A and C together to complete the same work. The number of days C alone needs to complete the work is

- A 90
- B 85
- C 82
- D 78

Answer: C

Question 102

If the area of a sector in a circle is $\frac{77}{3} \text{ cm}^2$ and if the radius of the circle is 7 cm, then the sectorial angle is

- A 45°
- B 30°
- C 60°
- D 90°

Answer: A

Question 103

The perimeter of a rhombus is 40 cm and one of its diagonals is 16 cm. Then the area (in cm^2) of the rhombus is

- A 48
- B 192
- C 96
- D 64

Answer: A

AP SI Free Solved Previous Papers PDF

Question 104

A hollow road-roller 63 cm wide with circumference of 440 cm is made up of iron, If its thickness is 4 cm, then the volume (in cm^3) of the metal used is

- A 97712
- B 107712
- C 107714
- D 106612

Answer: D

Question 105

The dimensions of a rectangular solid S are $4 \times 9 \times k$. If the volume of S is the same as the volume of a cube of side 6, then the value of k is

- A 6
- B 12
- C 18
- D 36

Answer: B

Question 106

A door is in the shape of rectangle surmounted by a semicircle on its breadth. If the rectangle dimensions are 10 ft $\times$ 7 ft. then the area of the cross-section of the door (in sq. ft.) is

- A 89
- B $87\frac{1}{4}$
- C $89\frac{1}{4}$
- D 87

Answer: B

Free Banking Study Material (15,000 Solved Questions)

Question 107

A solid cylinder of height 6 cm and base radius 2 cm is melted and cast into a cone of the same base radius as that of the cylinder. Then the height of the cone (in cm) is

- A 9
- B 18
- C 21
- D 24

Answer: B

Question 108

A cylinder is of height h and base radius r. If t denotes the total surface area and v its volume, then $\frac{t}{2v} =$

- A $\frac{2}{r} + \frac{2}{h}$
- B $\frac{3}{r} + \frac{3}{h}$
- C $\frac{1}{2r} + \frac{1}{2h}$
- D $\frac{1}{r} + \frac{1}{h}$

Answer: A

Question 109

The binary equivalent of the decimal number 245 is

- A 1110101
- B 11110101
- C 11101011
- D 11110110

Answer: B

Daily Free Banking Online Tests

Question 110

The remainder when 17^{271} is divided by 29 is

- A 11
- B 10
- C 12
- D 13

Answer: A

Question 111

If p, q are statements, then $(\sim p) \vee (\sim q)$ is equivalent to

- A $p \Rightarrow \sim q$
- B $\sim p \Rightarrow q$
- C $\sim \Rightarrow \sim q$
- D $p \Rightarrow q$

Answer: B

Question 112

If p, q are any two statements, then $\sim (p \vee (\sim p \wedge q))$ is equivalent to

- A $\sim (p \wedge q)$
- B $\sim p \vee q$
- C $(\sim p) \wedge (\sim q)$
- D $p \rightarrow q$

Answer: A

SSC CHSL Previous Question papers (download pdf)

Question 113

If A is the set of all primes not exceeding 20 and B is the set of odd positive integers not exceeding 20, then $(A - B) \cup (B - A) =$

- A {1, 9, 15, 19}
- B {2, 9, 15}
- C {1, 2, 9, 15}
- D {9, 15}

Answer: C

Question 114

If $f(x) = \log_{1-x}^{1+x}$ and $g(x) = \frac{3x+x^3}{1+3x^2}$, then $f(g(x)) =$

- A $f(x)$
- B $g(x)$
- C $3g(x)$
- D $3f(x)$

Answer: C

Question 115

If a set A has 4 elements, another set B has 7 elements, then the number of injective mappings from A into B is

- A 920
- B 840
- C 120
- D 720

Answer: C

SSC CHSL Free Mock Test

Question 116

The equation of the line passing through (-4, 3) and is perpendicular to the line segment joining the points (1, -3) and (-5, 1) is

- A $3x - 2y + 18 = 0$
- B $3x + 2y + 18 = 0$
- C $2x - 3y + 14 = 0$
- D $2x + 3y + 8 = 0$

Answer: C

Question 117

The equation of a line passing through the point (2, 3) and making intercepts in the ratio of 2 : 3 on the x and y axes is

- A $3x - 2y + 12 = 0$
- B $3x + 2y - 12 = 0$
- C $2x + 3y + 12 = 0$
- D $2x - 3y - 12 = 0$

Answer: E

Question 118

$$\sin^2 \frac{\pi}{4} + \sin^2 \frac{3\pi}{4} + \sin^2 \frac{5\pi}{4} + \sin^2 \frac{7\pi}{4} =$$

- A 0
- B 1
- C 2
- D 4

Answer: B

SSC CGL Free Mock Test

Question 119

$$\frac{\tan 40^\circ + \tan 20^\circ}{\cot 45^\circ - \cot 50^\circ \cot 70^\circ}$$

- A 3
- B $\sqrt{3}$
- C $\frac{1}{\sqrt{3}}$
- D $\frac{1}{3}$

Answer: C

Question 120

$$\tan A + \sin A = p; \tan A - \sin A = q \Rightarrow p^2 - q^2 =$$

- A $2(\tan^2 A + \sin^2 A)$
- B $2(\tan^2 A - \sin^2 A)$
- C $4 \tan^2 A \sin^2 A$
- D $4 \tan A \sin A$

Answer: D

Question 121

Observed from the top and foot of a tower 10 metres high the angles of elevation of the top of a second tower are 30° and 60° respectively. The height of the second tower (in metres) is

- A 15
- B 17.5
- C 20
- D 22.5

Answer: A

Daily Free SSC Practice Set

Question 122

$$x + y + z \Rightarrow x^3 + y^3 + 3xyz =$$

- A 0
- B $-3xyz$
- C $3x^2y^2z^2$
- D z^3

Answer: C

Question 123

How much is to be added to $(x + 2)(x + 4)(x + 6)(x + 8)$ to make it a perfect square ?

- A 4
- B 8
- C 16
- D 20

Answer: A

Question 124

$f(x)$ is a polynomial that leaves remainders 6 and 4 respectively when divided by $(x - 2)$ and $(x - 3)$. The remainder of $f(x)$ when divided by $x^2 - 5x + 6$ will be

- A $2(x + 3)$
- B $2(-x - 5)$
- C $2(-x + 5)$
- D $2(x + 5)$

Answer: B

SSC CGL Free Online Coaching

Question 125

If $x^5 - 7x^4 + 9x^3 + 7x^2 - 10x = (x^2 - 1)g(x)$, then one of the values of a such that $g(a) = 0$ is

- A -5
- B 5
- C 4
- D -4

Answer: C

Question 126

$$\frac{10}{x+y} - \frac{9}{x-y} = 2; \frac{6}{x+y} + \frac{15}{x-y} = 8 \Rightarrow 2x + 3y =$$

- A $-\frac{5}{2}$
- B $\frac{5}{2}$
- C $\frac{7}{2}$
- D $-\frac{7}{2}$

Answer: D

Question 127

$$\frac{xy}{x+y} = \frac{6}{5}, \frac{xy}{y-x} = 6 \Rightarrow (x, y) =$$

- A (-2, -3)
- B $(-\frac{1}{2}, -\frac{1}{3})$
- C $(\frac{1}{2}, \frac{1}{3})$
- D (2, 3)

Answer: D

Free SSC Study Material (18,000 Solved Questions)

Question 128

The sum of the integers between 1 and 200 which are divisible by both 3 and 7 is

- A 945
- B 999
- C 1327
- D 1594

Answer: A

Question 129

The third and the fifth terms of a geometric progression are respectively the second and the eighth terms of an arithmetic progression whose first term and the common difference are both equal to 16. The first term of the geometric progression is

- A 8
- B 6
- C 4
- D 2

Answer: C

Question 130

If ${}^{14}C_{r-1}, {}^{14}C_r, {}^{14}C_{r+1}$ are in Arithmetic Progression, the possible value of r are

- A 4, 8
- B 5, 9
- C 6, 10
- D 7, 11

Answer: C

SSC CGL Previous Papers (DOWNLOAD PDF)

Question 131

If the coefficients of x^7 and x^8 are equal in the binomial expansion of $(3 + \frac{x}{2})^n$, then n =

- A 42
- B 48
- C 55
- D 58

Answer: B

Question 132

Let $A = \begin{bmatrix} 0 & \alpha \\ \beta & 0 \end{bmatrix}$, $\alpha \neq 0, \beta \neq 0$. If $A^3 + A = 0$, then $\alpha\beta =$

- A 1
- B $\frac{1}{2}$
- C $-\frac{1}{2}$
- D -1

Answer: C

Question 133

$$f(\theta) = \begin{bmatrix} \sin \theta & -\cos \theta \\ \cos \theta & \sin \theta \end{bmatrix} \Rightarrow f^{-1}(\theta) =$$

A $-f(-\theta)$

B $f\left(\frac{\pi}{2} + \theta\right)$

C $f\left(\frac{\pi}{2} - \theta\right)$

D $f(\theta)$

Answer: D

1500+ Very Important Free SSC Solved Questions

Question 134

$$\lim_{x \rightarrow \infty} \frac{(1+x)^{10} + (2+x)^{10} + \dots + (5+x)^{10}}{100+x^{10}} =$$

A 0

B 1

C 3

D 5

Answer: C

Question 135

$$y = \tan^{-1} \left(\frac{\cos x + \sin x}{\cos x - \sin x} \right) \Rightarrow \frac{dy}{dx} =$$

A $\tan \frac{x}{2}$

B $\tan x$

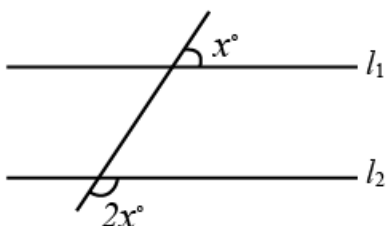

C x

D 1

Answer: B

Question 136

If l_1 and l_2 are parallel lines, then $x =$

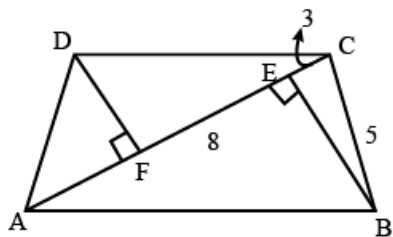

- A 30
- B 45
- C 60
- D 75

Answer: C

Free Banking Study Material (15000 Solved Questions)

Question 137

In the adjacent diagram ABCD is a quadrilateral; E and F are the foot of the perpendiculars drawn from B and D on AC. If AC = 8, EC = 3, BC = 5 and area of ABCD = 20, then DF =

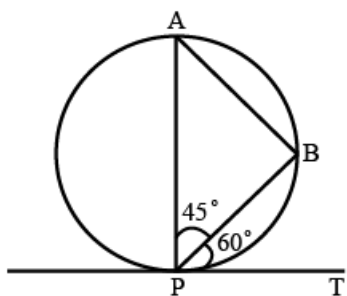

- A 1
- B 2
- C 3
- D 4

Answer: C

Question 138

P, A, B are three points on a circle and PT is a tangent to the circle. If $\angle APB = 45^\circ$ and $\angle TPB = 60^\circ$, then $\angle ABP =$

- A 45°
- B 60°
- C 75°
- D 90°

Answer: B

Question 139

The radius of the circumcircle of the triangle with vertices (0, 0); (4, 4) and (0, 8) is

- A $\sqrt{2}$
- B $2\sqrt{2}$
- C 3
- D 4

Answer: D

AP SI Free Solved Previous Papers PDF

Question 140

The coordinates of the point on the y-axis which is equidistant from the points (7, 6) and (-3, 4) is

- A (0, 0)
- B (0, -25)
- C (0, -15)
- D (0, 15)

Answer: B

Question 141

The Arithmetic Mean of the following data is

x	1	2	3		25
f	1	2	3		25

- A 17
- B 21
- C 23
- D 27

Answer: E

Question 142

The median of the following frequency distribution is

x	15	17	20	22	25	30
f	1	5	10	12	8	4

- A 17
- B 20
- C 22
- D 25

Answer: B

Free Banking Study Material (15,000 Solved Questions)

Question 143

In a frequency distribution the Arithmetic mean is 50 and the median is 52. Its mode is

- A 51
- B 53
- C 54
- D 56

Answer: B

Question 144

If the Standard Deviation of n observations $x_1, x_2, \dots, x_n$ is 17, then the Standard Deviation of $2x_1 - 15, 2x_2 - 15, \dots, 2x_n - 15$ is

- A 34
- B 49
- C 54
- D 59

Answer: B

Question 145

The sum of 5 observations is 25 and the sum of their squares is 145. The standard deviation of these observations is

- A $2\sqrt{2}$
- B 2
- C $\frac{29}{5}$
- D $\sqrt{\frac{29}{5}}$

Answer: A

Daily Free Banking Online Tests

Question 146

The rank correlation coefficient of the following data:

x	3	2	4	7	6	1
y	2	3	5	6	3	5

- A $\frac{5}{23}$

B $\frac{6}{41}$

C $\frac{6}{35}$

D $\frac{5}{49}$

Answer: E

Question 147

Out of 100 consecutive positive integers two are chosen at random. The probability that their sum is odd is

A $\frac{1}{50}$

B $\frac{49}{50}$

C $\frac{51}{99}$

D $\frac{50}{99}$

Answer: C

Question 148

Three vertices out of six vertices of a regular hexagon are chosen at random. The probability that these vertices form an equilateral triangle is

A $\frac{1}{6}$

B $\frac{1}{10}$

C $\frac{1}{15}$

D $\frac{1}{20}$

Answer: D

Question 185

It's time you ----- to some work.

- A got in
- B got off
- C got down
- D get up

Answer: B

Instructions

Read the following passage and answer questions:

Passage:

There was silence. The rush of water so constant that the sound receded into the deep recesses of the mind and so faded from the conscious. Birds chirped in different octaves. The rain came in a downpour adding to the music of nature. The orchestral composition was completed as the wind ruffled through trees.

What is remarkable in this sequence is that the sounds were not man-made. The comforting murmurs of nature lulled the mind into deep meditation. Then I opened my eyes. The mountain of Machchu Picchu was behind me. Wyna Picchu was to my side, and Puttucursi right in front shaped like Mt. Kailash. Of course there was no snow. A long fold of mountain was like Ganesha's trunk. The sacred river Urubamba sped along in its long journey — embracing the mountain at the foot, following its contour, then on around Wyna Picchu, racing to join the Amazon river — tumbling down 8000 feet, saddling South America and then merging with the Atlantic Ocean on the East coast.

Cusco was the heart of the Inca empire. It retains its pristine charm in spite of a stream of tourists. The tiled roof tops, narrow streets and little balconies dotting the buildings add to the charm. We stayed at the Monesteria Hotel, which is an original old 'Spanish Monastery'. The feeling of belonging to a bygone era continued even as we left the hotel and stepped into the small square where colourfully dressed Inca women awaited us with a child and a llama to be photographed.

Question 186

Which mountain specifically referred to by the author did not have snow ?

- A Mt. Kailash
- B Puttucursi
- C Machchu Picchu
- D Wyna Picchu

Answer: C

Question 187

Which river is described as sacred in the passage?

- A Amazon
- B Ganga
- C Missisipi
- D Urubamba

Answer: D

SSC CGL Free Mock Test

Question 188

Which four sounds constituted Nature's orchestra according to the passage?

- A Roar of Atlantic, snow fall at mountain, sound of waterfall and chanting at monastery
- B Wind through mountain, flight of birds, water stream and falling of leaves.
- C River crashing at mountain foot, confluence of river into ocean, rustling of dress and clicking of camera.
- D The sound of water, chirping of birds, rains and the wind ruffling through trees.

Answer: A

Question 189

What does the expression, 'it retains its pristine charm' mean ?

- A It retains its entertainment value.
- B It retains its beautiful charm.
- C It retains its unspoiled old charm,
- D It retains its modern charm.

Answer: A

Question 190

What does the expression. 'Birds chirped in different octave' mean?

- A Birds voices pierced the silence of the valley.
- B Birds voices could be heard at various frequencies.
- C Birds voices sounded like cacophony
- D Birds tweeted to each other aimlessly.

Answer: B

Read the following passage and answer questions:

Passage:

My childhood was, on the whole, happy and straight forward, and I felt affection for most of the grown-ups with whom I was brought in contact. I remember a very definite change when I reached what in modern child psychology is called the 'latency period'. At this stage, I began to enjoy using slang, pretending to have no feelings, and being generally 'manly'. I began to despise my people, chiefly because of their extreme horror of slang and their absurd notion that it was dangerous to climb trees. So many things were forbidden to me that I acquired the habit of deceit in which I persisted up to the age of twenty one. It became second nature to me to think that whatever I was doing had better be kept to myself and I have never quite overcome the impulse to concealment which was thus generated. I still have an impulse to hide what I am reading when anybody came into the room, and to hold my tongue generally as to where I have been, and what I have done. It is only by a certain effort of will that I have overcome the impulse, which was generated by the years during which I had to find my way among a set of foolish prohibitions.

The years of adolescence were to me very lonely and very unhappy. Both in the life of the emotions and in the life of the intellect, I was obliged to preserve an impenetrable secrecy towards my people. My interests were divided between sex, religion and mathematics.

Question 191

What did the author acquire in his adolescence?

- A Good habits
- B The bad habit of drinking
- C The habit of deceiving people
- D The bad habit of smoking

Answer: A

Question 192

From where is the expression 'Latencyperiod' borrowed ?

- A Adult psychology
- B Child psychology
- C Educational psychology
- D Abnormal psychology

Answer: B

Question 193

How did the author acquire the 'habit of deceit'?

- A People hated him
- B Because he was not permitted to do many things which he wanted to do.
- C He was lonely.
- D No one sympathized with him.

Answer: A

SSC CGL Free Online Coaching

Question 194

How was the author during the period of adolescence ?

- A Lonely but not unhappy.
- B Lonely and unhappy.
- C Unhappy but by no means lonely.
- D Very friendly and very open.

Answer: A

Question 195

Where did the author maintain secrecy?

- A In emotional but not intellectual life.
- B In intellectual but not emotional life.
- C In emotional and intellectual life.
- D Neither in intellectual nor in emotional life.

Answer: B

Instructions

Read the following passage and answer questions:

Passage:

When you first arrive in a new culture, there is a period of confusion that comes from the new situation and from lack of information. It leaves you quite dependent and in need of help in the form of information and advice. The second state begins as you start to interact with the new culture. It is called the stage of small victories. Each new encounter with the culture is fraught with peril. It is preceded by anxiety and information collection and rehearsal. Then the event occurs and you return home either triumphant or defeated. When successful, the feelings are very much as though a major victory has been won. A heightened roller coaster effect is particularly characteristic of this stage. Once some of the fundamentals of life are mastered, there is time to explore the new culture. This is the honeymoon stage of wonder and infatuation. In it there is heightened appreciation for the new, the different, the aesthetic. Depending on the degree of cultural immersion and exploration, it may continue for a considerable period of time.

After a while, a self-correction takes place. No honeymoon can last forever. Why in the world would anyone do it that way? Can't these people get their act together? Now the deficits seem glaringly apparent. Finally, if you are lucky enough to chart a course through these stages and not get stuck, there is a rebalance of reality. There is the capacity to understand and enjoy the new culture without ignoring these features that are less desirable.

Question 196

When does one acquire the capacity to understand and enjoy new culture?

- A When one is willing to accept the new culture uncritically.
- B When one goes through various stages of assimilation.
- C When one is infatuated with the new culture.
- D When one gives up old culture.

Answer: D

Question 197

How many stages of adaptation are described before moving on to the new culture finally?

- A Four
- B Three
- C Two
- D Five

Answer: B

Question 198

When does one go through a critical questioning phase before moving on to the new culture?

- A At the honeymoon stage
- B At the initial stage
- C At the final stage
- D At the second stage

Answer: C

Question 199

Which stage of cultural adoption is comparable to a roller coaster ride?

- A When you interact with the new culture,
- B While experiencing the honeymoon stage of the new culture.
- C While being critical of the new culture.
- D When you first arrive in a new culture.

Answer: B
