Analytical Ability

Instructions

The question is followed by data in the form of two statements labelled as I and II. You must decide whether the data given in the Statements are sufficient to answer the questions.

Question 1

What is the cost of fencing a rectangular field?

I. The dimensions of the field are 100 m $\times$ 75 m.

II. The cost of fencing is Rs. 50 per meter.

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Free Banking Study Material (15,000 Solved Questions)

Question 2

What is the height of the mountain?

I. Seen from a point A on level with the foot of the mountain the angle of the elevation of the top is 30° .

II. The mountain is surrounded by a forest.

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

Question 3

What is the cost of the table?

I. 2 tables and 3 chairs cost Rs. 5000

II. 3 tables and 2 chairs cost Rs. 6500

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Question 4

How many bricks are needed to construct a wall?

I. The dimensions of the wall are 30m $\times$ 2m $\times$ 0.5m.

II. The dimensions of the brick are 30 cm $\times$ 10 cm $\times$ 5 cm.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Daily Free Banking Online Tests

Question 5

What is the average wage of the worker in the factory?

I. The total monthly wage bill of the factory is Rs. 25 lakhs.

II. The monthly salary of the supervisor is Rs. 20000.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

Question 6

When the value of the two digit number pq is greater than 9, what is that number?

I. The sum of the digits $p + q = 11$.

II. The number is a multiple of 29.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Question 7

What is the value of the odd integer p?

I. $28 < 7p < 49$

II. $27 < 3p < 72$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

SSC CHSL Previous Question papers (download pdf)

Question 8

What is the sum of the terms in the arithmetic progression?

I. The first term of the progression is 5.

II. The number of terms in the progression is 50.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

Question 9

How many students in the class could not pass in Hindi and Telugu?

I. 12 passed in both Hindi and Telugu

II. The number of passes in Hindi exceed that in Telugu by 15.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

Question 10

Are two triangles $\triangle ABC$ and $\triangle DEF$ similar?

I. $\angle A = \angle D, \angle B = \angle E$

II. $\angle A + \angle B + \angle C = \angle D + \angle E + \angle F = 180^\circ$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

SSC CHSL Free Mock Test

Question 11

What is the least common multiple of two positive integers a and b?

I. a and b are distinct prime numbers.

II. $a + b = 28$.

- A If the statement I alone is sufficient to answer the question

- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Question 12

What is the product of the 7 terms which are in geometric progression?

- I. The first and last terms are $\frac{1}{2}$ and 32 respectively.
- II. The common ratio of the geometric progression is 2.

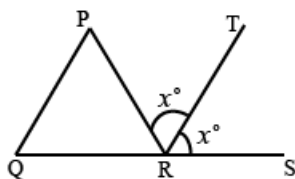

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Question 13

In the adjacent figure. $\angle PRT = \angle TRS$. Is PQ parallel to TR?

- I. $PR = QR$
- II. $PR = PQ$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

SSC CGL Free Mock Test

Question 14

In an election contested by three candidates A, B and C, how many votes are polled by each A, B and C?

- I. A got 1000 votes more than B and B got 1500 votes more than C.
- II. A total valid votes polled is 19000.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

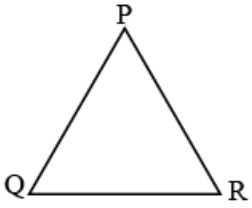

Answer: C

Question 15

What is $\angle Q$ in the given triangle?

I. $PQ = 8\text{cm}$, $PR = 10\text{cm}$, $\angle R = 75^\circ$.

II. $\angle P = 60^\circ$, $QR = 9\text{ cm}$.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Question 16

Is n a prime number?

I. n is of the form $k^4 + 4$, $k > 1$

II. n is of the form $4k + 1$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Daily Free SSC Practice Set

Question 17

If a , b , c are integers, is $3(a + c) + b$ divisible by 3?

I. b is divisible by 3.

II. $a + b$ is divisible by 3.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Question 18

Is the triangle $\triangle ABC$ equilateral? (a, b, c are lengths of the sides of the triangle).

I. $a^2 + b^2 + c^2 > 0$

II. $a^2 + b^2 + c^2 = (ab + bc + ca)$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

Question 19

How much time will it take for two pipes A and B to fill a tank which is half full?

I. A can fill the empty tank in 12 minutes.

II. B can empty the full tank in 8 minutes.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

SSC CGL Free Online Coaching

Question 20

n and m are real numbers. Is $n^2 < m^2$?

I. $m > 0$

II. $n < m$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

Instructions

The following question has a sequence of numbers or letters that follow a definite pattern is given. Each question has a blank space. This has to be filled by the correct answer from the four given options to complete the sequence without breaking the pattern.

Question 21

Mouse : Cat :: ----- : Tiger

- A Deer
- B Lion

C Grass

D Forest

Answer: A

Answer: D

Instructions

The following graph summarizes production and export details of an industry over the past 6 years 2011 to 2016. Based on the data given in the graph answer the following question.

Question 46

For the years 2011 to 2016 what was the approximate percent of the total export in total production?

- A 56
- B 55
- C 54
- D 53

Answer: A

SSC CHSL Free Mock Test

Question 47

What was the percent increase in exports from 2011 to 2014?

- A 200
- B 220
- C 250
- D 270

Answer: C

Question 48

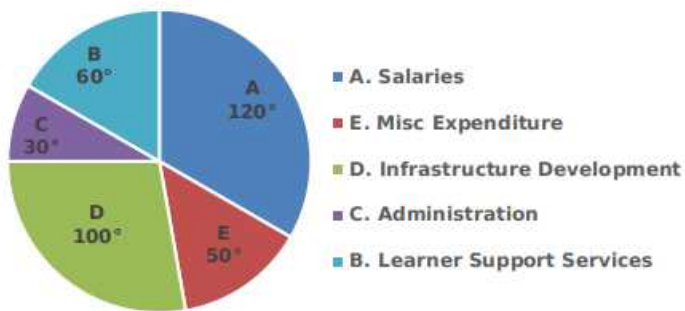

In which year was the ratio of the production to the exports minimum?

- A 2011
- B 2012
- C 2015
- D 2014

Answer: D

Instructions

The following Pie chart details the expenditure under various heads of accounts of an Autonomous University. Based on the data given in the chart answer the questions.

Question 49

If the annual expenditure is Rs. 24 cores, then the amount of money spent of Learner Support Services is (in cores of Rupees).

- A 4
- B 5
- C 5.5
- D 6.5

Answer: A

SSC CGL Free Mock Test

Question 50

The percentage expenditure spent under the Head E is how much more than the expenditure spent under the Head C?

- A $33\frac{1}{3}$
- B $66\frac{2}{3}$
- C 50
- D 25

Answer: B

Question 51

If in a particular year the expenditure under the head A is Rs. 3.6 Crores. then the amount of money available (in Crores of Rupees) for head D is ?

- A 2.5
- B 2.9
- C 3.0
- D 3.1

Answer: C

Question 52

The heads under which $16\frac{2}{3}\%$ of the total expenditure spent is?

- A E

- B C and E together
- C C and D together
- D B

Answer: D

Daily Free SSC Practice Set

Question 53

If in a year the expenditure under the heads C and E put together is Rs. 8 Crores then the total expenditure on the rest of the heads put together is (in Crores of Rupees)?

- A 36
- B 32
- C 28
- D 24

Answer: C

Instructions

For the following questions answer them individually

Question 54

In a group of 100 people who watch sports in television, 10 people watch neither cricket nor foot ball. The number of people in that group who watch at least one of cricket and football is?

- A 90
- B 85
- C 80
- D 75

Answer: A

Question 55

For any set S, let $n(S)$ denote the number of elements in S. For $A \subseteq S$, let A^1 denotes set S-A. If A, B, C are three sets such that $n(A) = 80$, $n(B) = 46$, $n(C) = 38$, $n(A \cap B \cap C^1) = 20$, $n(B \cap C \cap A^1) = 9$, $n(C \cap A \cap B^1) = 13$. If $n(A \cap B \cap C) = 1$, then $n(A \cup B \cup C) =$

- A 115
- B 120
- C 128
- D 137

Answer: B

Instructions

In a code the vowels of the English alphabet A. E. I. O. U are coded as 05, 04, 03, 02, 01 respectively. The consonants B. C. D. F. G. X, Y, Z are coded as 26, 25, 24, 23, 23, 22,, 08, 07, 06 respectively. Basing on this code answer the following question.

Question 56

What is the code for 'WATER'?

- A 0905110414
- B 0905110513
- C 0905110313
- D 0905110413

Answer: D

Question 57

Which word is coded as 03250411?

- A ECHO
- B ICES
- C ICET
- D IGET

Answer: C

Question 58

What is the code word for 'SPIN'?

- A 12150416
- B 12150316
- C 12150317
- D 12150415

Answer: B

Question 65

If 'SOFT' is coded as 19150620. then what is the code for 'HARD'?

- A 08011904
- B 07011804
- C 09011904
- D 08011804

Answer: D

Question 66

If today is Sunday. what day of the week it was 123 days before?

- A Wednesday
- B Thursday
- C Friday
- D Tuesday

Answer: A

Question 67

At what time, between 5 and 6 o'clock. will the two hands of a clock be at right angle?

- A $40\frac{5}{11}$ past 5
- B $42\frac{6}{11}$ past 5
- C $43\frac{7}{11}$ past 5
- D $39\frac{4}{11}$ past 5

Answer: C

Free Banking Study Material (15000 Solved Questions)

Question 68

At what angle the hands of a clock are inclined when the time is 4.20?

- A 10°
- B 12°
- C 8°
- D 20°

Answer: A

Question 69

A is the father of two sisters B and C; E is the mother of C; F is brother of E; and D is the wife of F. How B is related to F?

- A Nephew
- B Niece
- C Daughter
- D Son

Answer: B

Question 70

A train T_1 leaves from A towards B at 2.45pm with a speed of 50 kmph. A train T_2 leaves B at 1.35pm goes on a different track at a rate of 60 kmph towards A. If the distance between A and B is 510kms, at what time distance from A T_1 meets T_2 ?

- A 200 km
- B 210 km
- C 240 km
- D 260 km

Answer: A

AP SI Free Solved Previous Papers PDF

Question 71

A person starts from a point A and travels 3km towards B and then turns left and travels thrice that distance to reach C. He again turns left and travels 5 times the distance he covered between A and B and reaches his destination D. The shortest distance between his departure point and destination?

- A 18
- B 16
- C 15
- D 14

Answer: C

Question 72

Seven children A, B, C, D, E, F and G are standing in a line. G is to the right of D and to the left of B. A is on the right of C. A and C have one child between them. E and B have two children between them. Who is exactly in the middle?

- A E
- B D
- C G
- D C

Answer: A

Question 73

If $\square$ is defined by $a \square b = \frac{a-b}{a+b}$, $\diamond$ by $a \diamond b = \frac{a+b}{a-b}$, $\rightarrow$ is defined by $a \rightarrow b = ab$, then $\frac{(55 \square 5) \rightarrow (77 \diamond 7)}{(2 \square 3) \rightarrow (4 \diamond 5)} =$

- A $-\frac{5}{9}$
- B 1
- C $\frac{9}{5}$
- D $\frac{5}{9}$

Answer: D

Free Banking Study Material (15,000 Solved Questions)

Question 74

If $+$ means $\div$, $-$ means $+$, $\times$ means $-$, and $/$ means $\times$, then the value of the expression $[\{(17 \times 12) - (4/2)\} + (23 - 4)]/9 =$

- A $\frac{11}{3}$
- B $\frac{12}{5}$
- C $\frac{13}{3}$
- D $\frac{15}{4}$

Answer: C

Question 75

For integers a and b, if $a \triangle b = (a + b - 3)^2 + 1$ then $(1 \triangle 2) \triangle (1 \triangle 2) =$

- A 0
- B 1
- C 2
- D 3

Answer: C

If $\sqrt{x} + \sqrt{y} = 13$ and $\sqrt{x} - \sqrt{y} = 7$ then $\sqrt{xy} = ?$

A 30

B $\sqrt{20}$

C $\sqrt{30}$

D $3\sqrt{2}$

Answer: A

Question 81

If $a = \frac{\sqrt{3}-1}{\sqrt{3}+1}$ and $b = \frac{\sqrt{3}+1}{\sqrt{3}-1}$ then the value of $\frac{a^2-ab+b^2}{a^2+ab+b^2}$ is

A $\frac{5}{4}$

B $\frac{13}{15}$

C $\frac{13}{14}$

D $\frac{4}{5}$

Answer: B

Question 82

The greatest integer not exceeding 2180 which is divisible by 13 is

A 2184

B 2158

C 2171

D 2169

Answer: C

SSC CGL Free Mock Test

Question 83

The number of positive divisors of 37800 is?

A 95

- B 96
- C 98
- D 102

Answer: B

Question 84

What is the least square number which is divisible by 3, 4, 5 and 6?

- A 1600
- B 900
- C 800
- D 400

Answer: B

Question 85

If 398, 436 and 542 are divided by k the respective remainders are 7, 11 and 15 then the largest value of k is?

- A 34
- B 27
- C 19
- D 17

Answer: D

Daily Free SSC Practice Set

Question 86

$$\frac{1.75 \times 1.75 \times 1.75 + 1.25 \times 1.25 \times 1.25}{1.75 \times 1.75 - 1.75 \times 1.25 + 1.25 \times 1.25} =$$

- A 1
- B 2
- C 3
- D 4

Answer: C

Question 87

$$0.333 \dots + 0.444 \dots =$$

- A $\frac{3}{7}$
- B $\frac{5}{9}$
- C $\frac{6}{7}$

D $\frac{7}{9}$

Answer: D

Question 88

If $a = \frac{22}{5}$, $b = \frac{32}{7}$, $c = \frac{50}{11}$ and $d = \frac{57}{13}$ then

A $a < b < c < d$

B $d < c < a < b$

C $a < d < b < c$

D $d < a < c < b$

Answer: D

SSC CGL Free Online Coaching

Question 89

What is the ascending order of the fractions $\frac{6}{11}$, $\frac{5}{14}$, $\frac{9}{10}$, $\frac{8}{13}$, $\frac{7}{9}$, ?

A $\frac{6}{11}$, $\frac{9}{10}$, $\frac{5}{14}$, $\frac{8}{13}$, $\frac{7}{9}$

B $\frac{5}{14}$, $\frac{6}{11}$, $\frac{8}{13}$, $\frac{7}{9}$, $\frac{9}{10}$

C $\frac{9}{10}$, $\frac{7}{9}$, $\frac{6}{11}$, $\frac{8}{13}$, $\frac{5}{14}$

D $\frac{7}{9}$, $\frac{9}{10}$, $\frac{8}{13}$, $\frac{6}{11}$, $\frac{5}{14}$

Answer: B

Question 90

If 2a% of b is c then 3a% of 5b is?

A 10c

B c

C 7.5c

D 15c

Answer: C

Question 91

In an examination minimum pass percentage is 40. If a candidate gets 75 marks and fails by 25 marks then the maximum mark in the examination is?

A 200

B 225

C 250

D 300

Answer: C

Free SSC Study Material (18,000 Solved Questions)

Question 92

A person sold a table at profit of $6\frac{1}{2}\%$. Had he sold it for Rs. 1250 more, he would have gained 19%. Then the cost of that table (in rupees) is?

- A 12500
- B 12000
- C 10250
- D 10000

Answer: D

Question 93

A person purchased a property and sold $\frac{3}{4}$ th of the property with 10% profit. If he receives Rs. 120000 as profit through part of the sale, then total price of the property (in lakhs of rupees) is?

- A 25
- B 26
- C 23
- D 24

Answer: D

Question 94

P, Q and R invested capitals in the ratio 2 : 3 : 5, the timing of their investments being in the ratio 4 : 5 : 6. In what ratio would their profits be distributed?

- A 13 : 15 : 30
- B 8 : 12 : 30
- C 8 : 15 : 25
- D 8 : 15 : 30

Answer: D

Question 95

Ravi and Shyam are partners in a business. Ravi contributes $\frac{1}{4}$ of the capital for 15 months and Shyam receives $\frac{2}{3}$ of the total profits. For how long Shyam's money was in the business?

- A 10 months
- B 8 months

- C 9 months
- D 6 months

Answer: A

Question 96

Three taps P, Q, R can separately fill a cistern in 6 min, 12 min and 15 min respectively. While a fourth tap S can empty the cistern in 4 min. If all the four taps are opened together when the cistern is empty. in what time (in minutes) the cistern is full?

- A 10
- B 12
- C 15
- D 20

Answer: C

Question 97

Pipes P and Q can fill a cistern in 12 minutes and 15 minutes respectively. Both are opened together but after 3 minutes P is turned off. After how much more time (in minutes) will the cistern be filled?

- A 8
- B $9\frac{1}{2}$
- C 9
- D $8\frac{1}{4}$

Answer: D

Question 98

A man travels $\frac{1}{2}$ of the total distance with a speed of 40 kmph, $\frac{1}{3}$ distance at a speed of 50 kmph and the remaining distance at a speed of 100 kmph. Then the average speed in kmph is?

- A 64
- B 48
- C 56
- D 72

Answer: B

Question 99

A person travels from his home to office at a speed of 20 kmph and reaches office late by 15 min. Next day he travels at a speed of 30 kmph and reaches office 15 min early. Then the distance from his home to office in k.m.s is?

- A 25
- B 30

C 35

D 40

Answer: B

Question 100

Mr. A alone can finish a piece of work in 24 days. For the same work, to finish alone B and C require 18 days and 12 days respectively. The 3 persons worked for 4 days and then A left the job, then the number of days required to finish the remaining work by B and C together is?

A 2

B 3

C 4

D 5

Answer: A

Free Banking Study Material (15000 Solved Questions)

Question 101

If a person requires 36 hours to do $\frac{4}{5}$ th of a work the number of additional hours required to complete the work is?

A 6

B 8

C 9

D 18

Answer: C

Question 102

The sides of a rectangular plot of land are in the ratio 2:3 and its area is 29400 sq meters. The cost (in rupees) of the putting up a fence around the plot at the rate of Rs. 50 per meter is?

A 35000

B 36000

C 40000

D 42000

Answer: A

Question 103

If a rhombus has diagonals of length 18 cm and 24 cm, then its area (in sq.cm) is

A 42

B 84

C 432

D 216

Answer: D

AP SI Free Solved Previous Papers PDF

Question 104

A rectangular sheet of dimensions 22 m X 10 m is rolled into a cylinder so that the smaller side becomes the height. The volume of the cylinder (in cu. cm) is

A $\frac{1320}{\pi}$

B $\frac{1250}{\pi}$

C $\frac{1210}{\pi}$

D $\frac{1000}{\pi}$

Answer: C

Question 105

In a circle of radius 7 cm, the area of a sector is $\frac{77}{3}$ sq.cm. The sectorial angle is

A 30°

B 45°

C 60°

D 90°

Answer: C

Question 106

The height of a cylindrical drum is 7 cm and the difference between the outer and inner surface areas is 44 sq cm. The thickness of the drum is? (Take $\pi = \frac{22}{7}$)

A 0.5 cm.

B 0.75 cm.

C 1.0 cm.

D 1.25 cm.

Answer: C

Free Banking Study Material (15,000 Solved Questions)

Question 107

The area of a rhombus whose side and height are 12 cm and 26 cm respectively.

A 284 sq.cm

- B 340 sq.cm
C 234 sq.cm
D 312 sq.cm

Answer: D

Question 108

The smallest side of a triangle is 9 cm and its angles are $90^\circ, 60^\circ, 30^\circ$. Then the area of the triangle (in square centimeters)

- A $\frac{81}{2}\sqrt{3}$
B 81
C $\frac{81}{2}$
D $81\sqrt{3}$

Answer: A

Question 109

If $1397 \equiv \gamma \pmod{144}$ and $0 \leq \gamma \leq 143$ then $\gamma =$

- A 101
B 145
C 245
D 201

Answer: A

Daily Free Banking Online Tests

Question 110

$(110110011)_2 =$

- A 531
B 443
C 439
D 435

Answer: D

Question 111

If p and q are two statements then $\sim (p \wedge q)$ is equivalent to

- A $(\sim p) \wedge q$
B $(\sim p) \wedge (\sim q)$

C $p \vee (\sim q)$

D $p \vee q$

Answer: A

Question 112

$\sim (p \vee (\sim p \wedge q))$ is equivalent to

A $p \wedge (\sim q)$

B $\sim p \wedge q$

C $\sim p \wedge (\sim q)$

D $\sim p \vee (\sim q)$

Answer: C

Question 113

If $f(x) = \frac{x}{\sqrt{1-x^2}}$ and $g(x) = \frac{x}{\sqrt{1+x^2}}$ then $(f \circ g)x =$

A $\sqrt{\frac{1-x^2}{1+x^2}}$

B $\sqrt{\frac{1+x^2}{1-x^2}}$

C x^2

D x

Answer: D

Question 114

If $|x| < 1$ and $f(x) = 1 + x + x^2 + \dots$ then $f^{-1}(x) =$

A $\frac{x+1}{x}$

B $\frac{x}{x+1}$

C $\frac{x-1}{x}$

D $\frac{x}{x-1}$

Answer: C

Question 115

The domain of the function $f(x) = \frac{1}{x^2+1}$ is

A $\mathbb{R}$

B $\mathbb{R} - \{1\}$

C $R - \{-1\}$

D $R - \{1, -1\}$

Answer: A

SSC CHSL Free Mock Test

Question 116

The area of the region (in sq. units) bounded by $y = |x| - 5$ with the coordinates axes is

A 15

B 20

C 25

D 50

Answer: C

Question 117

The equation of the line passing through the point of intersection of the lines $3x + 4y + 5 = 0$ and $4x + y - 2 = 0$ and perpendicular to the line $\frac{x}{5} + \frac{y}{2} = 1$ is

A $2x - 5y - 12 = 0$

B $2x + 5y + 8 = 0$

C $5x + 2y - 1 = 0$

D $5x - 2y - 9 = 0$

Answer: D

Question 118

If $2 \cot \theta = 3$, then $\frac{2 \cos \theta - \sin \theta}{2 \cos \theta + \sin \theta} =$

A $\frac{1}{\sqrt{2}}$

B $\frac{1}{2}$

C $\frac{2}{3}$

D $\frac{2}{\sqrt{3}}$

Answer: B

SSC CGL Free Mock Test

Question 119

$(1 + \tan 17^\circ)(1 + \tan 28^\circ) =$

A 1

B 2

C 3

D 4

Answer: B

Question 120

$$\frac{3 \tan A - \tan^3 A}{1 - 3 \tan^2 A} =$$

A $\cot 3A$

B $\tan 2A$

C $\tan 3A$

D $\cot 2A$

Answer: C

Question 121

A person walking along a straight road towards a hill observes at two points with distance $\sqrt{3}$ km. between them the angles of elevation of the hill to be 30° and 60° . What is the height of the hill?

A $\frac{\sqrt{3}}{2}$ km

B $\frac{1}{2}$ km

C 1 km

D $\frac{3}{2}$ km

Answer: D

Daily Free SSC Practice Set

Question 122

$$\sqrt{(ab - ac - bc)^2 + 4abc(a + b)} =$$

A $ab + bc + ca$

B $ab - bc + ca$

C $ab + bc - ca$

D $ab - bc - ca$

Answer: A

Question 123

$$a + b + c = 9; a^2 + b^2 + c^2 = 27 \Rightarrow ab + bc + ca =$$

A 24

B 25

C 27

D 28

Answer: C

Question 124

If $x^2 - 3x + 2$ is a factor of $x^3 - 6x^2 + ax + b$, then (a, b) =?

A (-11, -6)

B (11, 6)

C (-11, 6)

D (11, -6)

Answer: D

SSC CGL Free Online Coaching

Question 125

The remainder obtained when $9^{19} + 6$ is divided by 8 is

A 3

B 5

C 7

D 4

Answer: C

Question 126

If $\frac{6}{x+y} + \frac{15}{x-y} = 8$ and $\frac{10}{x+y} - \frac{9}{x-y} = 2$ then $3x + 2y =$

A 6

B $6\frac{1}{2}$

C 7

D $7\frac{1}{2}$

Answer: B

Question 127

In a triangle PQR, $\angle P = x^\circ$, $\angle Q = 3x^\circ$, $\angle R = y^\circ$. If $3y - 5x = 30$, then the triangle is

A Equilateral

B Isosceles

- C Right angled
- D Not a right angled

Answer: C

Question 134

$$\lim_{x \rightarrow 1} \frac{x^2 - 5x + 4}{x^2 - 3x + 2} =$$

A 0

B 2

C 3

D 4

Answer: C

Question 135

$$y = \tan^{-1} \left[\frac{1 + \tan x}{1 - \tan x} \right] \Rightarrow \frac{dy}{dx} =$$

- A 1
- B 2
- C 0
- D -1

Answer: A

Question 136

PQRS is a square with diagonal $a + b$. The perimeter of the square whose area is twice that of PQRS is

- A $2(a + b)$
- B $4(a + b)$
- C $\sqrt{8}(a + b)$
- D $8ab$

Answer: B

Free Banking Study Material (15000 Solved Questions)

Question 137

In a triangle the point of concurrence of internal bisectors of its angles is called its

- A Centroid
- B Circum-centre
- C Ortho-centre
- D In-centre

Answer: D

Question 138

A, B, C, D are four points on a circle AC and BD intersect at E such that $\angle BEC = 130^\circ$ and $\angle ECD = 20^\circ$. Then $\angle BAC =$

- A 90°
- B 100°
- C 110°
- D 120°

Answer: C

Question 139

The area (in sq units) of the triangle formed by the points (1, 2), (3, 4) and the origin is

- A 1

B 2

C $\frac{3}{2}$

D $\frac{5}{2}$

Answer: A

AP SI Free Solved Previous Papers PDF

Question 140

If the points A(1, 2), B(3, -4), C(5, -6) and D(11, -8) lie on a circle, then the center of the circle is

A (11, 2)

B (-11, 2)

C (-11, -2)

D (11, -2)

Answer: A

Question 141

If the arithmetic mean of 17 , $2a-b$, $2b-c$ and $2c-a$ is 20 then the arithmetic mean of a , b , c is

A 17

B 19

C 21

D 23

Answer: C

Question 142

The median of the observations 7, 5, 2, 6, 4, 3, 15, 14, 19, 25, 8, 11, 13 is

A 15

B 14

C 8

D 7

Answer: C

Question 146

From a well-shuffled deck of playing cards the probability of choosing a card at random which is either a red card or an ace. is

A $\frac{1}{2}$

B $\frac{4}{13}$

C $\frac{6}{13}$

D $\frac{7}{13}$

Answer: D

Question 147

The probability for a number chosen at random from the first 32 natural numbers to be a composite, is

A $\frac{5}{8}$

B $\frac{11}{32}$

C $\frac{21}{32}$

D $\frac{21}{31}$

Answer: A

Question 148

A bag contains 8 white balls and 6 red balls. The probability of drawing at random two balls of the same colour is

A $\frac{43}{88}$

B $\frac{43}{91}$

C $\frac{43}{93}$

D $\frac{46}{93}$

Answer: B

Question 185

True religion does not require one to ----- through force.

- A proselytise
- B persuade
- C commend
- D confuse

Answer: A

Instructions

Read the following passage and answer questions:

Passage:

It is very likely that at one point or another during your employment, you have been, or will be, asked to work on group projects. Although they can be interesting and challenging at times, it can become a stressful situation when the members of the team do not pull their fair share of the load. Some do less than others because their participation in the project does not require as much input, but other co-workers might try to pawn their share of the work on their members of the team. Unless you have the skill and inner strength to say 'No' to these individuals who ask you to do their work for them, you are going to be in deep trouble. However, sometimes getting overburdened has nothing to do with people asking you to take more on, but instead it is you not being able to tell yourself 'No' — that is stopping yourself from taking on more than what is actually your responsibility because you may be of the type that likes to take charge of situations. If the problem lies with being asked to do more by one or more members of the team, then you need to work on learning how to say 'No' to their requests. You need to be straight forward yet polite. You do not want to give them any negotiating room.

Question 186

When can group projects become troublesome?

- A When it is boring
- B When it is difficult
- C When others do not do their share of work
- D When nobody bothers

Answer: C

Question 187

When does ".....: try to pawn their share of work....." mean?

- A exchange their work
- B exploit others
- C bargain with others
- D humiliate others

Answer: B

Answer: C

Question 195

Which is not stated as a reason for 'Raviz' being a favourite holiday spot?

- A** availability of expert surgeons
- B** serene surroundings
- C** world class facilities
- D** Its close location to a waterbody

Answer: A

Instructions

Read the following passage and answer questions:

Passage:

A new US study has warned that adolescents who take performance enhancing anabolic steroids are more likely to have adverse neural and behavioural consequences like aggression and moodiness because of the steroids effect on the underdeveloped brain and nervous system. The study by Northern University in US, centered around a brain chemical called serotonin, which is linked to mood. Lower levels of serotonin are associated with depression and aggression. For the study, experiments were carried out on a strain of Syrian hamsters. This breed has similar neurological circuitry to humans, so experts felt it might be a good model for humans in this respect. The hamsters were given a high dose of anabolic steroids over the course of the month – which corresponded to five years repeated dosage in humans. The researchers found that the hamsters were more aggressive than those not given steroids and these aggressive tendencies were mellowed if Prozac – a drug which boosts serotonin “uptake” – was given. However, subsequent analysis showed significantly lower than normal serotonin levels in the neural connections of the hamster’s brains. This suggests there may be long-term effects of taking steroids while the brain is still developing. Professor Richard Melloni who helped run the study, was quoted as saying by BBC: “We know steroids affect the development of serotonin nerve cells, which in turn, decreases serotonin availability in the brain. The serotonin neural system is developing during adolescence and the use of anabolic steroids during this critical period appears to have immediate neural and behavioural consequences”.

Question 196

Upon which breed of mammals were the experiments carried out?

- A adolescents
- B Syrian hamsters
- C Sicilian gangsters
- D Italian hamsters

Answer: B

Free SSC Study Material (18,000 Solved Questions)

Question 197

Which is the drug used for boosting serotonin ‘uptake’?

- A Penicillin
- B Melanin
- C Entrocytes
- D Prozac

Answer: D

Question 198

Why do adolescents develop neural disorders?

- A The effect of steroids hampers the growth of the brain
- B Due to decrease in the level of serotonin in the blood
- C Steroids affect the underdeveloped brain more
- D Prozac makes adolescents aggressive

Answer: A

Question 199

What was the specific characteristic of the ‘breed’ selected for the experiment?

- A They were similar to humanin their metabolic function.
- B They were easily available.
- C They have a similar neurological circuitry as humanbeings.
- D They can with stand high dose of steroids.

Answer: C
