TS ICET 19th August 2021 Shift-1

Analytical Ability

Instructions [1 - 20]

In the following questions a question is followed by data in the form of two statements labelled as I and II. You must decide whether the data given in the statements are sufficient to answer the questions.

1. Five persons P, Q, R, S, and T are going for a vacation on five different days of a week from Monday to Friday. Who goes on vacation Thursday?
- I) Only two persons go on vacation after T and before R. More than two persons go on vacation after R and before P.
 - II) T goes on vacation immediately before S, only one person goes on vacation after S and before R and P goes before Q.

- A If the statement I alone is sufficient to answer the question.
- B If the statement II alone is sufficient to answer the question.
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Free Banking Study Material (15,000 Solved Questions)

2. What is the remainder when the natural number N is divided by 10 ?
- I) N is divisible by 2
 - II) $N = 6^x$, x is an integer ≥ 1

- A If the statement I alone is sufficient to answer the question.
- B If the statement II alone is sufficient to answer the question.
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

3. What is the area of the rectangle?
- I) The perimeter of the rectangle is 50cm
 - II) The ratio of length and breadth is 4 : 1

- A If the statement I alone is sufficient to answer the question.
- B If the statement II alone is sufficient to answer the question.
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

4. What was the distance between the trains T_1 and T_2 in the beginning?
- I) Trains T_1 and T_2 cross each other completely in 18 seconds, while travelling in opposite directions. Speed of trains T_1 and T_2 are respectively 72 KMPH and 54 KMPH
 - II) Length of T_1 is 170 meters less than the length of T_2

- A If the statement I alone is sufficient to answer the question.

- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

Daily Free Banking Online Tests

5. Who completes the job faster?

I) P finishes the job in 12 days

II) The same can be completed together by P and Q in $6\frac{2}{3}$ days

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

6. What is the first term of the arithmetic progression?

I) The sum of the first 10 terms of the arithmetic progression is 85

II) The sum of the first 20 terms of the arithmetic progression is 370

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

7. Is n a prime number ?

I) n leaves remainder 1 when divided by 6

II) n leaves remainder 5 when divided by 6

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

SSC CHSL Previous Question papers (download pdf)

8. What is the lateral surface area of the right circular cylinder (take $\pi = \frac{22}{7}$)?

I) Volume of the cylinder is 3850 cm^3

II) Height of the cylinder is 25 cm

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

9. What is the cost price of the article ?

- I) Its sale price is Rs.10,000/-
- II) Sale Price includes taxes

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

10. Find the volume of the cone of height h and base radius r units.

- I) The volume of a cylinder of height h and radius r is 1694 cu. units
- II) Surface area of a cylinder of height h and radius r is 242 sq. units

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

SSC CHSL Free Mock Test

11. What is the value of x ?

- I) $x^2 - 13x + 42 = 0$
- II) x is a real number

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

12. What is the average of the real numbers a , b , c and d ?

- I) $a + b + c = 16 + d$
- II) $3(b + c + d) = 20 - 3a$

- A** If the statement I alone is sufficient to answer the question.

- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

13. What is the integer m ?

- I) $m^4 = 256$
- II) $(m + 2)(m - 1) = 10$

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

SSC CGL Free Mock Test

14. What is the length of the train?

- I) Its average speed is 72 kmph
- II) It takes 15 seconds to cross an electric pole

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

15. Is 14 a factor of $n + 7$?

- I) n is even
- II) n is divisible by 7

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

16. What is the area of the path around the circular park?

- I) Circular park has area 961π sq. meters
- II) The width of the path is $\frac{1}{2}$ meters

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.

- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Daily Free SSC Practice Set

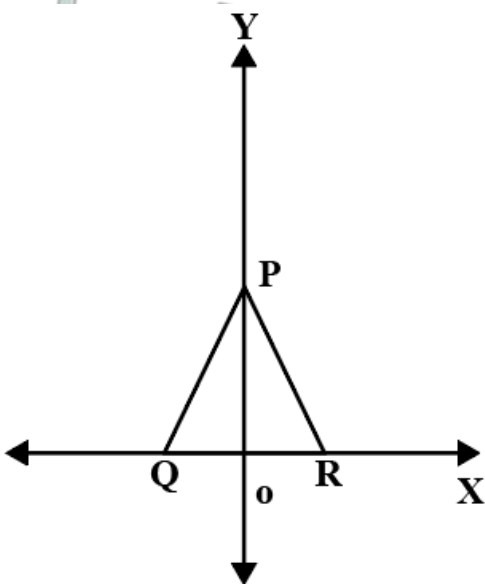

17. How is x related to z ?

- I) z is a son of y
 II) y is a daughter of x

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

18. Is triangle PQR shown below an equilateral triangle ?

- I) The co-ordinates of Q and R are $(-4, 0)$ and $(4, 0)$ respectively
 II) P is a point on the line $y = 4\sqrt{3}$

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

19. If x and y are length and breadth of a rectangle, then what is the area of the rectangle?

- I) $x > 15$ inches and $y < 10$ inches
 II) The product of x and y is 120 sq. inches

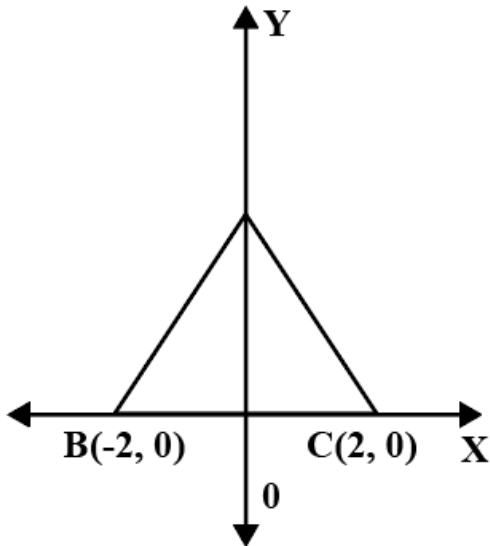

- A** If the statement I alone is sufficient to answer the question.

- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

20. In the figure shown below, the area of the $\triangle ABC$ is 8, Does the point (a, b) lie within the triangle?

- I) $a < 2, b < 4$
- II) $a = 0$ and $0 < b < 3$

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

21. $EFK : GHO :: \underline{\hspace{1cm}} : \underline{\hspace{1cm}}$

- A** BDF : EGL
- B** CDH : EFK
- C** DEL : KLW
- D** LMY : KOY

Answer: A

22. $2 : 49 : 12 :: \underline{\hspace{1cm}} : \underline{\hspace{1cm}} : \underline{\hspace{1cm}}$

- A** 6 : 64 : 16
- B** 5 : 100 : 15
- C** 4 : 121 : 14

D 1 : 16 : 11

- A 80
- B 100
- C 120
- D 140

Answer: C

Instructions [42 - 44]

The following table indicates the tax paid by 5 companies A, B, C, D, E in the months November 2019 to March 2020 (in thousands of rupees). Based on the information given in the table answer the questions.

Month →	Months				
Company ↓	November	December	January	February	March
A	174	186	147	158	193
B	89	76	92	105	122
C	201	212	219	198	225
D	65	71	78	83	92
E	39	42	46	52	61

42. For which company, the tax paid in March has highest percentage increase over the month of November

A B

B C

C D

D E

Answer: D

SSC CHSL Free Mock Test

43. In which month company 'D' recorded highest increase in the tax paid over the previous month?

A December

B January

C February

D March

Answer: D

44. The percentage decrease in the tax paid by company A in January over the month of November, corrected to two decimal places is

A 15.63

B 15.57

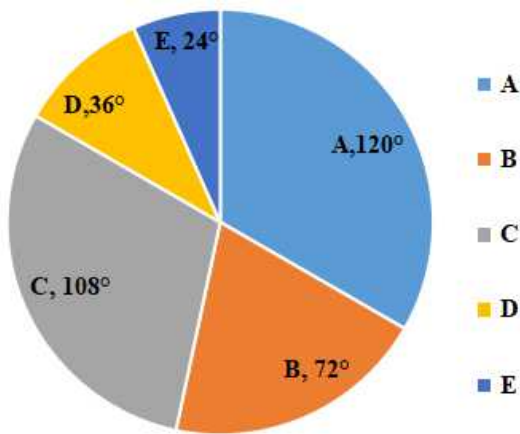

C 15.52

D 15.50

Answer: C

Instructions [45 - 49]

The following Pie Chart depicts the data on the number of students graduating from different branches of engineering in a year from a particular state. Based on this data answer the questions.

45. If the total number of students graduating is 27,000 then the number of students graduating from Civil Engineering is

- A 2800
- B 2500
- C 1950
- D 1800

Answer: D

SSC CGL Free Mock Test

46. The total number of graduates from Computer Engineering and Civil Engineering is equal to the number of graduates from which of the following two branches of Engineering?

- A Electronics and Communications
- B Electronics and Civil
- C Computer and Communications
- D Communication and Civil

Answer: A

47. If the number of the graduates from all the branches is 21000 then the difference between the maximum number of graduates and the minimum number of graduates in all the branches is

- A 6320
- B 5600
- C 4850
- D 4480

Answer: B

48. What is the percentage of Mechanical Engineers graduating in the year ?

- A 15
- B 18

- C** 20
- D** 25

Answer: C

Daily Free SSC Practice Set

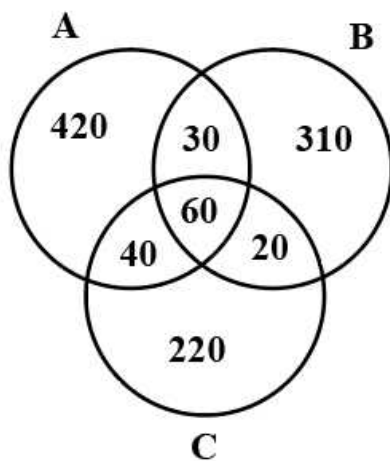

49. What is the ratio of the graduating students from Mechanical to Electronics Engineering?

- A** 4 : 1
- B** 4 : 3
- C** 3 : 2
- D** 2 : 3

Answer: D

Instructions [50 - 51]

In a college of strength 1200 students, the number of students who read news papers A, B, C are given in the Venn diagram below. Using it answer the questions.

50. The number of students who read either paper B or paper C, but do not read paper A is

- A** 760
- B** 670
- C** 550
- D** 610

Answer: C

51. The number of students who do not read any of these three papers A, B, C is

- A** 80
- B** 100
- C** 140
- D** 200

Answer: B

SSC CGL Free Online Coaching

Instructions [52 - 56]

A code designed for certain letters in English alphabet by replacing the letters with certain symbols and natural numbers according to the following rules:

- i) If only two vowels or only two consonants come together in a word, then they are replaced by the symbols corresponding to their successors letters in the code;
- ii) If the first and last letters are vowels in a word: then they are interchanged with the corresponding symbols

Letter	A	C	D	E	G	L	M	O	P	R	S	T	Y
Code	1	*	#	2	%	£	@	3	&	Z	\$	?	+

Based on this answer the following questions.

52. What is the code for the word OMEGA ?

- A 1@2%3
- B 3@2%1
- C 1%2@3
- D 3#%£1

Answer: A

53. What is the code for the word PACE?

- A &\$*1
- B &1*2
- C +@#*
- D @21£

Answer: B

54. What is the code for the word CARRY ?

- A \$2**?
- B #1££?
- C *1\$\$+
- D ?1##+

Answer: C

Free SSC Study Material (18,000 Solved Questions)

55. What is the code for the word DELTA ?

- A #%£12
- B 2\$#?1

C #2@+1

D #2f?1

Answer: C

56. What is the code for the word STREET?

A \$?Z%%?

B \$Z%??#

C \$#++%

D \$*Z&&?

Answer: A

57. In a certain code language, if the word RECTANGLE is coded as TGEVCPING, then how is the word RHOMBUS is coded

A TJOQDWV

B TJQNDWU

C TJQODWU

D TJQOEWD

Answer: C

61. If DECK is coded as VIVXP and MUSIC is coded as NFHRX'. then DART is coded

- A WZIH
- B WZIG
- C WZIK
- D YZIG

Answer: B

62. 21-07-1999 was Wednesday. What would have been the day of the week on 21-07-1947?

- A Monday
- B Sunday
- C Tuesday
- D Saturday

Answer: A

63. At what time between 2 pm and 3 pm will the two hands of a clock be at 150° angle to each other ?

- A $36\frac{1}{11}$ minutes past 2 pm
- B $38\frac{2}{15}$ minutes past 2 pm
- C $37\frac{1}{15}$ minutes past 2 pm
- D $38\frac{2}{11}$ minutes past 2 pm

Answer: D

Free Banking Study Material (15000 Solved Questions)

64. At 3.40, the hour hand and the minute hand of a clock form an angle of

- A 120°
- B 125°

C 130°

D 135°

Answer: C

65. A is mother of B. B is a daughter of C. D is father of C. How is D related to A?

A Grand father

B Father-in-law

C Grand mother

D Daughter-in-law

Answer: B

66. Kabir left for Patna from Ranchi at 8.30 am. He travelled at the speed of 60 kmph for 3 hours 15 minutes. After that he reduced the speed to 20 kmph. If the distance between the two cities is 205 km at what time did Kabir arrived Patna?

A 12.15 pm

B 12.45 pm

C 1.15 pm

D 1.30 pm

Answer: A

AP SI Free Solved Previous Papers PDF

67. A person comes for an interview at 10.10 am which was 30 minutes before scheduled time, which in fact was already delayed by 35 minutes. Then the time at which the interviews started is

A 9.15 am

B 9.35 am

C 9.55 am

D 10.15 am

Answer: D

68. Four bells A, B, C & D ring regularly at intervals of 25 minutes, 35 minutes, 40 minutes and 80 minutes respectively. If all the bells rang together at 10 am on Sunday when will they ring again simultaneously?

A Monday

B Tuesday

C Wednesday

D Thursday

Answer: B

69. For the integers m, n define

$$m\alpha n = m + 2n, m\beta n = 2m + n \text{ and } m\gamma n = m^2 + n^2 \text{ then } ((-5)\alpha 6)((-2)\gamma(-3)) =$$

A 33

B 30

Mathematical Ability

72. If $\left(\sqrt{\frac{3}{2}}\right)^x = \left(\frac{9}{4}\right)^{2x-7}$, then $x =$

A $\frac{7}{3}$

B $\frac{21}{11}$

C $\frac{14}{3}$

D $\frac{42}{11}$

Answer: D

SSC CHSL Previous Question papers (download pdf)

73. $\left\{4 - \left\{x^2 + \left(3 - \frac{1}{x^2}\right)^{-1}\right\}^{-1}\right\}^{-1} =$

A $\frac{3x^4}{12x^4 - 3x^2 + 1}$

B $\frac{3x^4}{12x^2 + 1}$

C $\frac{3x^2}{12x^2 + 3x + 1}$

D $\frac{3x^2}{12x^4 + 3x^2 - 1}$

Answer: A

74. 28 litres of a mixture contains milk and water in the ratio of 3 : 4. If 8 litres of pure milk is added to this mixture, then the ratio of water to milk in the resulting mixture is

A 4 : 7

B 4 : 5

C 4 : 3

D 4 : 9

Answer: B

75. At a certain party the ratio of gents to ladies was 4 : 3. After some time 6 men and 4 women left the party and the ratio of men to women was 21 : 16. How many people were present in the party initially?

A 82

B 84

C 80

D 86

Answer: B

SSC CHSL Free Mock Test

76. The smallest number among

$x = 3\sqrt{7} - \sqrt{61}$, $y = 6 - \sqrt{34}$, $z = 5 - \sqrt{23}$ and $w = 2\sqrt{3} - \sqrt{10}$ is

A x

B y

C z

D w

Answer: D

77. If $\left(\frac{a}{b}\right)^{x-1} = \left(\frac{b}{a}\right)^{x-3}$, then the value of x is

- A $\frac{1}{2}$
- B 1
- C 2
- D $\frac{7}{2}$

Answer: C

78. The least values of a and b if $(7a342b)$ is divisible by 88 are

- A $a = 6; b = 4$
- B $a = 4; b = 6$
- C $a = 6; b = 6$
- D $a = 4; b = 4$

Answer: D

SSC CGL Free Mock Test

79. When a number is divided by 783 it leaves a remainder 48. What will be the remainder if the same number is divided by 29?

- A 17
- B 18
- C 19
- D 23

Answer: C

80. If the GCD of two positive integers is 29 and their sum is 174, then their difference is

- A 58
- B 116
- C 87
- D 145

Answer: B

81. The LCM of two numbers is 20 times their HCF and the sum of their LCM and HCF is 2520. If the smaller of those numbers is 480, the ratio between the smaller and the bigger number is

- A 2 : 3
- B 3 : 4
- C 4 : 5
- D 5 : 6

Answer: C

Daily Free SSC Practice Set

82. A person spent $\frac{2}{7}$ of his salary on house rent and $\frac{3}{5}$ of the remaining on food and cloths. Rest he saved. If the amount he spent on food and cloths is Rs. 16500, then the amount he saved is (in rupees)

- A 11000
- B 16500
- C 13500
- D 5500

Answer: A

83. If we put $\frac{7}{9}, \frac{6}{8}, \frac{5}{6}, \frac{4}{5}$ in desending order, then the difference between first and second number is

- A $\frac{1}{36}$
- B $\frac{1}{12}$
- C $\frac{1}{30}$
- D $\frac{1}{24}$

Answer: C

84. What is the difference between the largest and smallest of the following rational numbers ?

$\frac{3}{4}, \frac{13}{16}, \frac{5}{7}, \frac{97}{104}$

- A $\frac{53}{728}$
- B $\frac{159}{728}$
- C $\frac{319}{1456}$
- D $\frac{349}{1456}$

Answer: B

SSC CGL Free Online Coaching

85. If $p = \sqrt[3]{2}, q = \sqrt[3]{3}, r = \sqrt[4]{5}$ and $s = \sqrt[6]{7}$, then which one of the following ordering is true?

- A $p > r > s$
- B $q > r > s$
- C $q > r > p$
- D $r > s > p$

Answer: B

86. If $23\frac{1}{3}\%$ of $37\frac{2}{7}\%$ of x is 29, then $x =$

- A $\frac{1}{3}$
- B $3\frac{1}{3}$
- C $33\frac{1}{3}$
- D $333\frac{1}{3}$

Answer: D

87. If the numerator of a fraction is increased by 20% and the denominator is decreased by 10% the fraction becomes $\frac{16}{21}$. What was the original fraction?

- A $\frac{6}{7}$
- B $\frac{5}{7}$
- C $\frac{4}{7}$
- D $\frac{2}{7}$

Answer: C

Free SSC Study Material (18,000 Solved Questions)

88. A man bought a horse and a caniage for Rs.3000. He sold the horse at a gain of 20% and the caniage at a loss of 10%, there by gaining 2% on the whole. Then the cost of the horse is (in rupees)

- A 1200
- B 1700
- C 1750
- D 1500

Answer: A

89. By selling an airticle for Rs.4525 a merchant gets a loss of $9\frac{1}{2}\%$. In order to get a profit of $7\frac{1}{2}\%$, the selling price of the article in rupees is

- A 5250
- B 5300
- C 5325
- D 5375

Answer: D

90. Three persons A, B, C entered into a business with a total capital of Rs.250000. A invests Rs.20000 more than Band B invests Rs.25000 more than C. If at the end of the year, there is a profit of Rs.70000, then B's share in the profit in mpees is

- A 29400
- B 27800
- C 16800
- D 23800

Answer: D

SSC CGL Previous Papers (DOWNLOAD PDF)

91. Three persons A, B, C started a partnership business with the understanding that A would invest 100% of the capital where as Band C nm the business for 4 and 6 months respectively. At the end of 10 months A got 50% of the total profit of Rs.4 lakhS. Then the share of the profit of C (rnpees in lakhs) is

- A 2.0
- B 1.8
- C 1.5
- D 1.2

Answer: D

92. Pipe 'A' can fill a tank in 5 hours, but due to a tiny hole at the bottom it wok 8 hours to fill the tank. Then the time, in hours. for the fttll taik of water to be drained through the tiny hole is (in hours)

- A $10\frac{3}{4}$
- B $11\frac{1}{4}$
- C $13\frac{1}{3}$
- D $14\frac{2}{3}$

Answer: C

93. Pipe A fills an empty tank in 4 hours and pipe B in 6 hours. If the two pipes are opened for one hour each alternatively with pipe A being opened first, then the tank will be filled (in hours) is

- A $2\frac{3}{4}$
- B $3\frac{1}{2}$
- C $4\frac{2}{3}$
- D $5\frac{1}{4}$

Answer: C

1500+ Very Important Free SSC Solved Questions

94. If a train of 240 meters long crosses a b1idge of length 180 meters in 20 seconds. then the speed of the train (in kmph) is

- A 75.6
- B 70.8
- C 65.2
- D 60.5

Answer: A

95. If a train takes 20 seconds to cross a platform of length 35 meters. the speed of the train (in kmph) is

- A 6.1
- B 6.3
- C 6.5
- D 6.7

Answer: B

96. A person-A can finish a piece of work in 20 days and another person-B in 30 days. With the help of another person-C they completed the work in 6 days. Then the number of days in which C alone can complete that work is

- A 15
- B 12
- C 10
- D 8

Answer: B

Free Banking Study Material (15000 Solved Questions)

97. Two persons A and B together can finish a piece of work in 12 days, while B and C can together finish the same piece of work in 16 days. If A, B, C work together, they can finish it in 8 days. Then the number of days required for C alone to complete the work is

- A 18
- B 20
- C 22
- D 24

Answer: D

98. The area of a square is 196 sq.cm. whose side is half of the radius of a circle. The circumference of the circle is equal to the breadth of a rectangle. If the perimeter of rectangle is 712 cm. the length (in cm) of the rectangle is

- A 160
- B 170
- C 180

D 192

Answer: C

99. A window is in the shape of a rectangle surmounted by a semi circle on the width of the rectangle. If 12 cm, 8 cm are the sides of the rectangle, then the area of the window (in cm^2) is

A $4(12 + \pi)$

B $6(12 + \pi)$

C $8(12 + \pi)$

D $10(12 + \pi)$

Answer: C

AP SI Free Solved Previous Papers PDF

100. 120 boys take a dip simultaneously into a swimming pool of length 80m and breadth 30 m. If the average displacement of water spilled over by one boy is 5 m^3 , then the raise in the water level (in m) of that swimming pool will be

A 0.25

B 0.4

C 0.5

D 1

Answer: A

101. Volume of a right circular cone having base radius 70 cm and curved surface area 40040 cm^2 is (in cm^3)

A 823400

B 824000

C 840000

D 862400

Answer: D

102. A spherical ball, when immersed in a cylinder of base radius 7 cms., raises the level of water in the cylinder by 2 cms. Then the radius of the ball (in cm)

A $\sqrt{\frac{210}{6}}$

B $\sqrt{\frac{147}{2}}$

C $\frac{\sqrt{94}}{7}$

D $\frac{\sqrt{95}}{3}$

Answer: B

Free Banking Study Material (15,000 Solved Questions)

103. A cuboid of dimension $16\text{ cm} \times 12\text{ cm} \times 8\text{ cm}$ is cut into 24 equal small cubes. Then the length of the side of each small cube in cm, is

- A 8
- B 6
- C 5
- D 4

Answer: D

104. The sum of the dimensions of a cuboid is 13 cm and its diagonal is $5\sqrt{3}\text{ cm}$. Its surface area (in cm^2) is

- A 64
- B 72
- C 84
- D 94

Answer: D

105. $(465)_7 + (535)_7 =$

- A $(1403)_7$
- B $(1333)_7$
- C $(1304)_7$
- D $(1503)_7$

Answer: B

Daily Free Banking Online Tests

106. $(465)_7$ in Binary system is

- A $(11110111)_2$
- B $(11010011)_2$
- C $(11110011)_2$
- D $(11100011)_2$

Answer: C

107. The negation of $(p \rightarrow q) \rightarrow r$ is

- A $(p \rightarrow r) \wedge (q \rightarrow r)$

- B** $(\sim p \rightarrow r) \wedge (q \rightarrow r)$
- C** $(p \rightarrow r) \wedge (\sim q \rightarrow r)$
- D** $(\sim p \rightarrow r) \wedge (\sim q \rightarrow r)$

Answer: B

108. If p and q are two statements, then which of the following represents a tautology?

- A** $(p \vee q) \wedge (\sim p) \rightarrow q$
- B** $(p \vee q) \vee p \rightarrow q$
- C** $p \wedge q) \vee p \rightarrow q$
- D** $(p \wedge q) \wedge (\sim p)$

Answer: A

109. If a set A has 8 elements, B has 6 elements and $A \cup B$ has 10 elements, then the number of all subsets of $A \cap B$ is

- A** 4
- B** 8
- C** 16
- D** 32

Answer: C

110. If A has six elements, then the number of relations on A that are not symmetric is

- A** $2^6 - 2$
- B** $2^{36} - 2^{21}$
- C** $2^{18} - 2^6$
- D** $2^{36} - 2^6$

Answer: B

111. The function $f: N \rightarrow N$ defined by $f(x) = 2x + 7$ for all $n \in N$, then f is

- A** one-one but not onto
- B** onto but not one-one
- C** both one-one and onto
- D** neither one-one nor onto

Answer: A

SSC CHSL Free Mock Test

112. If a line passing through the points (3, -5) and (7, 1) make intercepts a, b on the coordinate axes, then $a^2 + b^2 =$

- A $\frac{3729}{36}$
- B $\frac{4117}{36}$
- C $\frac{4359}{36}$
- D $\frac{4693}{36}$

Answer: D

113. The perpendicular distance from origin to the line passing through the point (15, -5) and making an angle 135° with positive x-axis is

- A $3\sqrt{2}$
- B $4\sqrt{2}$
- C $5\sqrt{2}$
- D $6\sqrt{2}$

Answer: C

114. If $\sin \theta = \frac{1}{2}$ and $\theta \in \left[\frac{\pi}{2}, \frac{3\pi}{2} \right]$, then $4\theta =$

- A $-\frac{2\pi}{3}$
- B $\frac{2\pi}{3}$
- C $\frac{10\pi}{3}$
- D $\frac{14\pi}{3}$

Answer: D

SSC CGL Free Mock Test

115. $\frac{\sin 15^\circ - 5 \cos 300^\circ + 7 \tan 225^\circ}{\tan 135^\circ + 3 \sin 210^\circ} =$

- A -2
- B -1
- C $\frac{3}{2}$
- D $\frac{5}{2}$

Answer: A

116. $\sin^2(\theta - 45)^\circ + \sin^2(\theta + 15)^\circ - \sin^2(\theta - 15)^\circ =$

A $\frac{1}{4}$

B $\frac{1}{2}$

C 1

D 0

Answer: B

117. From the top of a building of height 20m, the angles of depression of the top and bottom of a tower are 30° , 60° respectively. Then the height of the tower. in meters, is

A $15\frac{1}{3}$

B $13\frac{1}{3}$

C $11\frac{1}{3}$

D $9\frac{1}{3}$

Answer: B

Daily Free SSC Practice Set

118. If the sum and product of the roots of the equation $ax^2 - 5x + c = 0$ are equal to 10 each. then the value of a and c respectively are

A $\frac{1}{2}, 5$

B $\frac{1}{2}, 3$

C $\frac{3}{2}, 1$

D $\frac{1}{3}, 2$

Answer: A

119. If one root of the equation $3x^2 - 8x + 2k + 1 = 0$ is seven times the other, then the value of k

A $\frac{2}{3}$

B $\frac{1}{3}$

C 2

D 3

Answer: A

120. If $a \neq b$, $x^2 + ax + b$ and $x^2 + bx + a$ have a common factor, then

A $a + b + 1 = 0$

B $a - b - 1 = 0$

C $a - b + 1 = 0$

D $a - b + ab = 0$

Answer: A

121. A number was divided successively by 4, 5 and 6. The remainders were respectively 2, 3 and 4. The number is

A 214

B 476

C 954

D 1908

Answer: A

122. If $\frac{x+y}{xy} = \frac{5}{18}$ and $\frac{x-y}{xy} = \frac{1}{18}$, then $2x + 3y =$

A 36

B 32

C 28

D 18

Answer: A

123. If $x + y = a$, $y + z = b$, $z + x = c$ then $x - 2y + z =$

A $2a - b - c$

B $2b - a - c$

C $2c - a - b$

D $2a + b - c$

Answer: C

Free SSC Study Material (18,000 Solved Questions)

124. If 9 times the 9th term of an Arithmetic Progression is equal to 13 times the 13th term, then the 22nd term of the Arithmetic Progression is

A 0

B 22

C 220

D 198

Answer: A

125. If the third term of Geometric Progression is 4, then, the product of its first 5 terms is

- A 4^3
- B 4^4
- C 4^5
- D 4^6

Answer: C

126. If the coefficients of 2^{nd} , 3^{rd} and the 4^{th} terms in the expansion of $(1+x)^n$ are in Arithmetic Progression. Then the value of n is

- A 2
- B 7
- C 11
- D 14

Answer: B

130. $\lim_{x \rightarrow 0} \frac{1 - \cos 5x}{4x^2} =$

A $\frac{5}{4}$

B $\frac{25}{4}$

C $\frac{25}{16}$

D $\frac{25}{8}$

Answer: D

131. If $y = \sqrt{x} + \frac{1}{\sqrt{x}}$, then $\frac{dy}{dx}$ at $x = 1$ is equal to

A 1

B $\frac{1}{2}$

C $\frac{1}{\sqrt{2}}$

D 0

Answer: D

132. The equation of the line passing through the point (1, 2) and perpendicular to the line $x + y + 1 = 0$ is

A $y - x + 1 = 0$

B $y - x - 1 = 0$

C $y - x + 2 = 0$

D $y - x - 2 = 0$

Answer: B

133. ABCD is a trapezium with AB and CD as its parallel sides. If the diagonals AC and BD intersect in E and $CE : EA = 3 : 2$, then $AB : CD =$

- A 1 : 2
- B 2 : 3
- C 3 : 4
- D 4 : 5

Answer: B

134. The equation of a circle with origin as centre and passing through the vertices of an equilateral triangle whose median is of length $3a$ is

- A $x^2 + y^2 = 9a^2$
- B $x^2 + y^2 = 16a^2$
- C $x^2 + y^2 = 4a^2$
- D $x^2 + y^2 = a^2$

Answer: C

135. If $A(3, -7)$, $B(-2, 5)$ and the point $C(x, y)$ is on the line segment AB between A and B such that $AC = 8$, then $3x + 2y =$

- A 4
- B 3
- C 2
- D 1

Answer: D

AP SI Free Solved Previous Papers PDF

136. If a line makes unequal intercepts on x, y axis with the sum 12 and if it passes through the point $(2, 4)$, then the perpendicular distance from origin to the line is

- A $\frac{2}{\sqrt{5}}$
- B $\frac{4}{\sqrt{5}}$
- C $\frac{8}{\sqrt{5}}$
- D $\frac{9}{\sqrt{5}}$

Answer: C

137. If the arithmetic mean of the series $a_1, a_2, \dots, a_n$ is A and the arithmetic mean of the series $b_1, b_2, \dots, b_n$ is B, then the arithmetic mean of the series

$a_1 + b_1, a_2 + b_2, \dots, a_n + b_n$ is

A $\frac{A+B}{2}$

B $A + B$

C $2(A + B)$

D $\frac{A+B}{n}$

Answer: B

138. The median of the first 41 even natural numbers is

A 40

B 41

C 42

D 44

Answer: C

139. Arithmetic Mean of the following frequency distribution is

Height (in cms)	52-55	55-58	58-61	61-64
Frequency	15	20	25	10

A 58.25

B 57.78

C 59.25

D 60.00

Answer: B

140. The variance of the data 151, 152, 153, ... , 175 is

A 202

B 52

C 172

D 32

Answer: B

141. If σ is the standard deviation of $x_1, x_2, x_3, \dots, x_n$ then the standard deviation of observations $5x_1 - 11, 5x_2 - 11, 5x_3 - 11, \dots, 5x_n - 11$ is

- A $5(\sigma - 11)$
- B $5\sigma - 11$
- C 5σ
- D σ

Answer: C

Daily Free Banking Online Tests

142. In a data with 12 observations, the coefficient of rank correlation is zero, then

$$\sum_{i=0}^{12} d_i^2 =$$

- A 286
- B 215
- C 143
- D 72

Answer: A

143. If a number is selected at random from the first 120 natural numbers, then the probability that it is a multiple of 6 or 8 is

- A $\frac{1}{40}$
- B $\frac{1}{24}$
- C $\frac{1}{12}$
- D $\frac{1}{4}$

Answer: D

144. When 5 boys and 6 girls sit in a row at random, the probability that no two boys sit together is

- A $\frac{1}{42}$
- B $\frac{1}{242}$
- C $\frac{1}{22}$
- D $\frac{1}{462}$

Answer: C

- D sensuous

Answer: B

Instructions [182 - 186]

Read the following passage and answer the questions.

Literature is tightly called 'the brain of humanity'. Just as the brain preserves every experience or sensation and judges a fresh experience or sensation in the light of the acquired knowledge or experience so humanity at large has a record of its past in literature. Its present conditions, problems and circumstances can best be examined and understood for it is a record available through literature. Literature is fundamentally an expression of life through the medium of language. It is the storehouse of individual human experience and also of experiences of the human race in general. It does not simply record human deeds and actions nor does it concern itself much with man and his social, political and economic activities. It is concerned chiefly with man's inner life - our passions, emotions and feelings. A description of outward human life is just the means and not the end in literature. Man's outer life is studied and examined to understand him thoroughly and fully. Hence literature is concerned with human thinking and feeling - how we think and solve our problems - ethical, moral, emotional and spiritual.

182. **Why is literature called the 'brain of humanity'?**

- A It is recreative
- B It is imaginative
- C It is factual
- D It preserves the past and present of humanity

Answer: D

183. **What is literature fundamentally?**

- A Expression of language
- B Expression of life
- C Expression of experiences
- D Expression of knowledge

Answer: B

Instructions [187 - 191]

Read the following passage and answer the questions.

Losers let it happen. Winners make it happen. Life is a do-it-yourself project. Whatever you give credence in your thinking will likely come to pass. Learn to develop two critical abilities; the ability to live with uncertainty, and the ability to delay immediate gratification in favour of longrange goals. Losers try to escape from their fears with activities that are tension-relieving. Winners are motivated by their desires towards activities that are goal-achieving. Choose your responses to what occurs. Learn from your mistakes, rather than repeat them. Spend time taking action in the present rather than fearing what may happen in the future. And be different, if it means taking the calculated risk. The greatest risk in life is to wait for and depend on others for your security. The greatest security is to plan and act, and take the risk that will ultimately make you independent.

187. What does the term 'losers' mean ?

- A Losers are active
- B Losers do not act
- C Losers let it happen
- D Losers prefer to complain

Answer: B

188. How do 'winners make it happen' ?

- A Winners have positive self-determination
- B Winners remain passive
- C Winners hate losers
- D Winners depend on others for their success

Answer: A

189. What is essential for success?

- A Impatience
- B Patience and mental equilibrium
- C Greed and intolerance
- D An impulsive nature

Answer: B

SSC CGL Free Online Coaching

190. How do losers try to escape from their fear?

- A By ignoring the problem
- B By putting the blame on fate
- C By waiting for their luck to change
- D By distracting themselves with tension-relieving activities

Answer: D

191. How can one achieve success?

- A By planning and working towards long-range goals
- B By not taking calculated risks
- C By making mistakes
- D By hasty actions

Answer: A

Instructions [192 - 196]

Read the following passage and answer the questions.

A list of articles lost by railway travellers and now on sale at a great London station has been published. and many people who read it have been astonished at the absent-mindedness of their fellows. If statistical records were available on the subject, however. I doubt whether it would be found that absent-mindedness is common. It is the efficiency rather than the inefficiency of human memory that compels my wonder. Modern man remembers even telephone numbers. He remembers the addresses of his friends. He remembers the dates of good vintages.

He remembers appointments for lunch and dinner. His memory is crowded with the names of actors and actresses and cricketers and footballers and murderers. He can tell you what the weather was like in a long-past August and the name of the provincial hotel at which he had a vile meal during the summer. In his ordinary life, again. he remembers almost everything that he is expected to remember. How many men in all London forget a single item of their clothing when dressing in the morning? Not one in a hundred. Perhaps not one in ten thousand. How many of them forget to shut the front door when leaving the house? Scarcely more. And so it goes on through the day, almost everybody remembering to do the right things at the tight moment till it is time to go to bed. and then the ordinmy man seldom forgets to nun off the lights before going upstairs.

As for leaving articles in trains and in taxies, I am no great delinquent in such matters. I can remember almost anything except books and walking-sticks and I can often remember even books. Walking-sticks I find it quite impossible to keep.

192. The essayist is astonished about _____.

- A the loss of articles by passengers in the railway station

- B** the efficiency of human memory
- C** forgetfulness
- D** absent-mindedness

Answer: B
