Analytical Ability

Instructions [1 - 20]

A question is followed by data in the form of two statements labelled as I and II. You must decide whether the data given in the statements are sufficient to answer the questions.

1. What is the area of the circle?

I. The centre of the circle is $(0, 0)$.

II. The point $(2, 3)$ lies within the circle.

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

Free Banking Study Material (15000 Solved Questions)

2. What is the value of $2x + 3y$?

I. $x + y = 2$

II. $3x - 2y = 1$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

3. What is the value of $p^3 + q^3$?

I. $p^2 + q^2 = 74$

II. $pq = 35$

- A If the statement I alone is sufficient to answer the question
- B If the statement II alone is sufficient to answer the question

- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

4. After how much time will A meet B ?

I. A and B are at a distance of 50 metres from each other:

II. A and B are moving in the opposite directions with respective speeds of 10 kmph and 15 kmph.

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Daily Free Banking Online Test

5. If $a > 0$ then is $a > b$?

I. $a^2 > b^2$

II. $\frac{a}{b} = \frac{2}{3}$

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

6. Is $g : R \rightarrow R$ an even function ?

I. $g(x) = g(-x)$ for every $x \in R$

II. $g(x)$ is a polynomial of even degree.

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question

- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

7. What is the cost price of the article ?

I. The selling price of the article is ₹ 50.

II. The profit is 10%

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

200+ Free GK Tests for Banking exams

8. What is the positive integer value of x ?

I. $16 < 5x + 1 < 26$

II. $4 < x^2 < 25$

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

9. What is the present age of the father ?

I. The sum of the present ages of the father and his son is 46.

II. 5 years ago the father's age was 5 times that of his son.

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question

- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

10. How many elements are there in the set A ?

I. $A \cup B$ has 25 elements.

II. $B - A$ has 15 elements.

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

[Latest Job Updates on Telegram - Join here](#)

11. How many brothers does A have ?

I. A's father has four children.

II. A is the only daughter of her parents.

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

12. In the right-angled $\triangle ABC$ what is $\angle A$?

I. $\angle B = 30^\circ$

II. $\angle A + \angle C > 90^\circ$

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question

- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

13. What is the perimeter of the circular sector ?

- I. The angle of the sector is $\frac{\pi}{3}$
- II. The area of the sector is 6π square units.

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Whatsapp "JOB" to 7661025557 for Updates

14. Is the product $a.b$ an irrational number?

- I. a is an irrational number.
- II. b is an irrational number.

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

15. Is the value of x unique ?

- I. $x < 0$
- II. $x^2 = 16$

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question

- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

16. Is $x > y$?

I. $5^x = 25^y$

II. $y = -2$

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

AP SI Free Solved Previous Papers PDF

17. What is the area of $\triangle ABC$?

I. $\angle ABC = 60^\circ$

II. $AB = BC = CA = 4$

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

18. What is the average of a, b, c and d ?

I. a, b, c and d are primes.

II. a, b, c and d lie in $\{10, 11, 12, \dots, 20\}$

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question

- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

19. Is $\triangle ABC$ right-angled ?

I. A lies on the circle with BC as a diameter.

II. A, B and C lie on a circle.

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

20. What is the value of V ?

I. V is the volume of a cylinder

II. The cylinder is of height h units.

- A** If the statement I alone is sufficient to answer the question
- B** If the statement II alone is sufficient to answer the question
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

Instructions [21 - 35]

A sequence of numbers or letters that follow a definite pattern is given. Each question has a blank space. This has to be filled by the correct answer from the four given options to complete the sequence. without breaking the pattern.

21. 5, 10, 30, 150, 1050, -----

- A** 10550

B 11000

C 11525

D 11550

Answer: D

22. $1\frac{8}{9}, 2\frac{2}{9}, 2\frac{5}{9}, \text{---}, 3\frac{2}{9}$

A $2\frac{3}{9}$

B $2\frac{5}{9}$

C $2\frac{7}{9}$

D $2\frac{8}{9}$

Answer: D

Instructions [36 - 40]

The following Pie diagram shows 'the marks secured by a student in different subjects in an examination. If the student scored 135 marks in Mathematics, answer the questions after studying the Pie-chart.

36. What is the total number of marks secured by the student in all the subjects put together ?

- A 360
- B 450
- C 540
- D 720

Answer: C

Free Banking Study Material (15000 Solved Questions)

37. How many marks did he score in Science ?

- A 108
- B 114
- C 120
- D 136

Answer: B

38. How many more marks did the student score in Science and English put together than he scored in Social Studies and Hindi put together ?

- A 9
- B 18
- C 27
- D 45

Answer: A

39. The ratio of the marks scored by him in Hindi to the marks scored in Social Studies, is

- A 2 : 3
- B 3 : 4
- C 4 : 5
- D 5 : 6

Answer: D

Daily Free Banking Online Test

40. Out of the total marks scored by him in the examination, the percentage of marks scored in Social Studies is

- A 15
- B 20
- C 25
- D 30

Answer: B

Instructions [41 - 45]

Each of the integers from 1 to 16 are to be placed on the Venn diagram given below in the appropriate regions A to H. Take

$S = \{\text{the set of Integers from 1 to 16}\}$

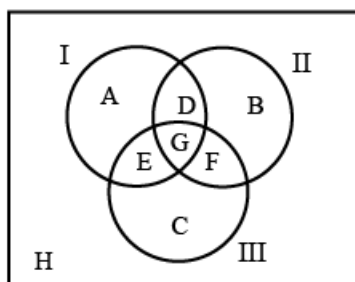

$I = \{\text{The set of odd integers from 1 to 16}\}$

$II = \{\text{The set of perfect square integers from 1 to 16}\}$

$III = \{\text{The set of prime integers from 1 to 16}\}$

$H = S - \{I \cup II \cup III\}$

Answer the questions based on this data.

41. Which regions in the diagram are empty (not represented) ?

- A G only
- B C and G only

C A and F only

D G and F only

Answer: D

42. Which regions contain a single integer ?

A B and D only

B G and D only

C A and C only

D E and B only

Answer: C

200+ Free GK Tests for Banking exams

43. Which regions contain five integers ?

A E and H only

B D and B only

C B only

D A and C only

Answer: A

44. Which regions contain two integers ?

A E and F only

B B and D only

C A and E only

D C only

Answer: B

45. The number of elements contained in the regions E and D puttogether is

A 5

B 6

C 7

D 8

Answer: C

Latest Job Updates on Telegram - Join here

Instructions [46 - 50]

In a code, the n^{th} letter in English alphabet is coded to k^{th} letter, where $k \equiv 3n + 2 \pmod{26}$, $1 \leq k \leq 26$. For example, the 5^{th} letter E is coded as Q since $3 \times 5 + 2 = 17 \equiv 17 \pmod{26}$ and Q is the 17^{th} letter. The reverse of this process is used for decoding. Based on this coding and decoding processes, answer the questions:

46. The code word for STATE is

- A** GJEJG
- B** GJEJF
- C** GJEJP
- D** GJEJQ

Answer: D

47. The code word for MOUSE is

- A** OUMQG
- B** OUMGQ
- C** OUGMQ
- D** OUGQM

Answer: B

48. The code word for JOLLY is

- A** PASSY
- B** FUPPI
- C** FULLY
- D** FOLLY

Answer: C

Whatsapp "JOB" to 7661025557 for Updates

49. The word coded as XEDI is

- A POLE
- B PALE
- C PARK
- D PERK

Answer: C

50. The number of letters that are invariant in this code is

- A 1
- B 2
- C 3
- D 4

Answer: B

Instructions [51 - 55]

In a code, the n^{th} letter of an English alphabet is coded to $f(n)^{th}$ letter, where $f(n)$ is defined by

$$\begin{cases} n + 17, & \text{if } 1 \leq n \leq 9 \\ n - 1, & \text{if } 10 \leq n \leq 18 \\ n - 18, & \text{if } 19 \leq n \leq 26 \end{cases}$$

For decoding, the reverse process is used. Based on this coding and decoding process, answer the questions:

51. The code word for MANGO is

- A LSOYN
- B LRMXN
- C KRLXN
- D KTPFN

Answer: B

67. $\sqrt{\sqrt{60} + 8} =$

- A** $2\sqrt{2} + 3$
- B** $\sqrt{3} + \sqrt{5}$
- C** $\sqrt{3} + \sqrt{15}$
- D** $\sqrt{5} + \sqrt{7}$

Answer: B

68. When the following fractions are arranged in ascending order of magnitude, the middle one is

$\frac{2}{3}, \frac{5}{7}, \frac{9}{13}, \frac{9}{14}, \frac{7}{9}$

A $\frac{2}{3}$

B $\frac{5}{7}$

C $\frac{9}{13}$

D $\frac{7}{9}$

Answer: C

69. A and B started a business investing ₹ 10,00,000 and ₹ 15,00,000 respectively and C joined them after 6 months with an investment of ₹ 20,00,000. The ratio of the share of their profits at the end of the year is

A 3 : 2 : 3

B 2 : 3 : 2

C 1 : 3 : 1

D 2 : 3 : 4

Answer: B

SBI PO Solved Previous Papers (Download PDF)

70. A man sold an article for ₹ 187 and gained 10%. The article was bought for

A ₹ 150

B ₹ 160

C ₹ 170

D ₹ 180

Answer: C

71. If $\left(\frac{1}{3}\right)^{rd}$ of a number is $\frac{1}{10}$, then $\left(\frac{4}{5}\right)^{th}$ of that number is

A $\frac{5}{6}$

B $\frac{25}{6}$

C $\frac{6}{25}$

D $\frac{6}{5}$

Answer: C

72. If $x + y + z = 0$, then for any $a > 0$, $a^{\frac{x^2}{yz}} a^{\frac{y^2}{zx}} a^{\frac{z^2}{xy}} =$

A 1

B a

C a^2

D a^3

Answer: D

SBI Clerk Free Mock Test (Latest Pattern)

73. Three persons A, B and C can do a work individually in 10 days, 12 days and 15 days respectively. If all the three persons work together, the number of days needed to complete the same work is

A 8

B 6

C 4

D 5

Answer: C

74. By selling 15 mangoes, a fruit seller recovers the cost price of 20 mangoes. What is the profit percentage?

A 25%

B $\frac{200}{3}\%$

C $\frac{100}{3}\%$

D 50%

Answer: C

75. The monthly incomes of two persons P and Q are in the ratio 4 : 3 and their monthly expenditures are in the ratio 3 : 2. If each of them save ₹ 750 per month, then Q's monthly income is

A ₹ 3,000

B ₹ 1,500

C ₹ 2,250

D ₹ 3,750

Answer: C

SBI Clerk Previous Papers (Download PDF)

76. Two taps A and B can fill a tank in 12 and 18 minutes respectively. Both are kept open for 2 minutes and then the tap A is closed. In how many minutes will the tank be filled ?

A 18

B 16

C 15

D 13

Answer: C

77. A rectangle of length, 12 cm and breadth 5 cm is inscribed in a circle of radius r cm. Then r (in cm) is

A 13

B 12

C 6.5

15

Answer: A

80. A train runs from station A to station B in 1 hr. 20 min, If the train is running at a speed of 18 kmph, then the distance between A and B is

- A** 24 kms
- B** 27 kms
- C** 20 kms
- D** 30 kms

Answer: A

81. The sum of the even numbers from 100 to 200 (both numbers included) is

- A** 3875
- B** 7650
- C** 3825
- D** 7750

Answer: B

Daily Free Banking Online Test

82. 4 men and 6 women finish a job in 8 days, while 3 men and 7 women finish it in 10 days. 10 women working alone will finish it in

- A** 24 days
- B** 32 days
- C** 36 days
- D** 40 days

Answer: D

83. Two persons A and B together can do a work in 30 days. After A and B worked for 5 days, C joined them and they together finished the work in another 20 days. Then the number of days in which C alone can complete the total work is

- A 60
- B 75
- C 90
- D 120

Answer: D

84. If the diagonal of a cube is $5\sqrt{3}$ m, its volume(in cubic metres) is

- A 150
- B 145
- C 125
- D 120

Answer: C

200+ Free GK Tests for Banking exams

85. If $n = 10838$, then the digit in the units place of n^9 is

- A 4
- B 2
- C 6
- D 8

Answer: D

86. A, B and C started a business. A invested $\left(\frac{1}{5}\right)^{th}$ of the capital; B invested $\left(\frac{1}{3}\right)^{rd}$ of the capital and rest by C. If they got a total profit of ₹3,000/-, then the C's share of profit is

- A ₹1,500
- B ₹1,000
- C ₹1,400
- D ₹600

Answer: C

87. The smallest positive integer which leaves a remainder 3 when divided by 5 and leaves a remainder 5 when divided by 7, is

- A 68
- B 23
- C 33
- D 12

Answer: C

88. If $9x - 3y = 12$ and $3x - 5y = 7$, then $6x - 2y =$

- A -5
- B 4
- C 2
- D 8

Answer: D

89. If 7% of 900 is equal to $x\%$ of 200, then $x =$

- A 14
- B $31\frac{1}{2}$
- C $32\frac{1}{2}$
- D $21\frac{1}{2}$

Answer: B

90. The least value of k such that $735 \times k$ is a perfect square is

- A 3
- B 5
- C 7
- D 15

Answer: D

Whatsapp "JOB" to 7661025557 for Updates

91. What is the remainder when 3^{10} is divided by 4 ?

- A 3
- B 2
- C 1
- D 0

Answer: C

92. Taps A and B can fill a tank in 10 hours and 15 hours respectively. The time taken (in hours) for both the taps together to fill the tank is

- A $12\frac{1}{2}$
- B 5
- C 6
- D 10

Answer: C

93. If the diagonals of a rhombus are 12 cm and 18 cm, then its area (in sq. cm.) is

- A 216
- B 108
- C 54
- D 180

Answer: B

AP SI Free Solved Previous Papers PDF

94. A merchant prepares the market price of the article at a profit of 40% and sells them giving a discount of 10%. If an article is sold for ₹ 630, then its cost price (in rupees) is

- A 600
- B 500
- C 450
- D 400

Answer: B

95. If the speed of a train is 92.4 kmph, how many metres would it cover in 20 minutes ?

- A** 30,800
- B** 3,080
- C** 4,028
- D** 4,280

Answer: A

96. If $\left(\frac{4}{5}\right)^{th}$ of a bucket is filled in one minute, the rest of it will be filled in

- A** $\frac{9}{4}$ minutes
- B** 1 minutes
- C** $\frac{1}{4}$ minutes
- D** $1\frac{1}{2}$ minutes

Answer: C

200+ Banking Previous Papers (Download PDF)

97. The average of all the prime numbers less than 20 is

- A** 9
- B** 9.15
- C** 9.55
- D** 9.623

Answer: D

98. If the area of a triangle with base x is equal to the area of a square with side x, then the altitude of the triangle is

- A** $\frac{x}{2}$
- B** x
- C** 2x
- D** 3x

Answer: C

99. If $\frac{x+y}{4x+y} = \frac{7}{10}$, then $x : y =$

A 7 : 10

B 6 : 1

C 1 : 6

D 10 : 7

Answer: C

SSC CHSL Previous Question papers (download pdf)

00. The area of a trapezium is 220 sq. cm. and its height is 8 cm. If the sum of the non-parallel sides is 20cm, its perimeter (in cm) is

A 75

B 110

C 100

D 65

Answer: A

01. If $x^4 - 8x^3 + 18x^2 - 8x + 1 = 0$, then the value of $x + \frac{1}{x}$ is

A 1

B 2

C 3

D 4

Answer: D

02. Among the following $(p \rightarrow q) \rightarrow \sim p$ is equivalent to

A $p \wedge q$

B $\sim (p \wedge q)$

C p

D q

Answer: B

SSC CHSL Free Mock Test

03. If a set A has 3 elements and another set B has 5 elements, then the number of relations from A to B is

A 15

B 2^3

C 2^5

D 2^{15}

Answer: D

04. If $A = \{4, 5, 6, 7, 8, 9\}$, $B = \{1, 2, 3, 4, 5, 6\}$ and $C = \{2, 4, 6, 8\}$, then $A - (B \cap C) =$

A $\{4, 6\}$

B $\{5, 7, 8, 9\}$

C $\{2, 4, 6\}$

D $\{7, 8, 9\}$

Answer: B

05. Among the following, the converse of $p \rightarrow (q \rightarrow r)$ is equivalent to

A $(p \vee q) \wedge (r \rightarrow p)$

B $\sin r \vee (p \wedge q)$

C $(r \rightarrow q) \rightarrow p$

D $(p \wedge q) \vee (r \rightarrow p)$

Answer: A

SSC CGL Free Mock Test

06. If a set A has 4 elements and another set B has 2 elements, then the number of functions from A into B that are not surjections is

A 16

B 2

C 14

D 8

Answer: B

07. If $f(x) = 12x^3 - 8x^2 + 4x - 1$ then $f(-2) + f(2) + f(-1) + f(1) =$

A -84

B 84

C 0

D 434

Answer: A

08. $\cos 1^\circ \cdot \cos 2^\circ \cdot \cos 3^\circ \dots \cos 179^\circ =$

A 1

B 0

C 180°

D 90

Answer: B

SSC CGL Free Online Coaching

09. If a set A has 7 elements, then the number of subsets of A having exactly one element in each is

A 2^6

B 2^7

C 7^2

D 7

Answer: D

10. $\tan 170^\circ + \tan 55^\circ + \tan 170^\circ \cdot \tan 55^\circ =$

A $\tan 115^\circ$

B $\tan 45^\circ$

C $\tan 105^\circ$

D $\tan 135^\circ$

Answer: B

11. $\sin 83^\circ \cos 53^\circ - \cos 83^\circ \sin 53^\circ =$

A $\frac{1}{\sqrt{2}}$

B $\frac{\sqrt{3}}{2}$

C $\frac{1}{2}$

D 0

Answer: C

SSC CGL PREVIOUS PAPERS (download pdf)

12. If $180^\circ < A < 270^\circ$, $90^\circ < B < 180^\circ$, $\tan A = \sqrt{3}$ and $\sin B = \frac{\sqrt{3}}{2}$, then the value of $\sin(A - B)$

A 0

B 1

C $\frac{1}{2}$

D $\frac{\sqrt{3}}{2}$

Answer: D

13. The slope of the line $\frac{3x+5}{4y-7} = \frac{1}{2}$ is

A $\frac{3}{2}$

B $-\frac{3}{2}$

C $\frac{2}{3}$

D $-\frac{2}{3}$

Answer: A

14. The Y-intercept of the line $\frac{3y-7}{4} = \frac{4x+1}{5}$ is

A $-\frac{7}{3}$

- B** $\frac{7}{3}$
- C** $-\frac{39}{15}$
- D** $\frac{39}{15}$

Answer: D

SBI PO Solved Previous Papers (Download PDF)

15. $\frac{4 \operatorname{cosec} 150^\circ + 3 \sec^2 210^\circ}{5 \tan 225^\circ + 6 \cot^2 330^\circ} =$

- A** $\frac{12}{23}$
- B** $-\frac{12}{23}$
- C** $\frac{7}{11}$
- D** $-\frac{7}{11}$

Answer: A

16. A person on walking 20 metres towards a chimney in a horizontal line through its base observes that its angle of elevation of the top of the chimney changes from 30° to 45° . Then the height(in metres) of the chimney is

- A** $10\sqrt{3}$
- B** $10(\sqrt{3} + 1)$
- C** $20\sqrt{3}$
- D** 20

Answer: B

17. The remainder when $91 \times 93 \times 95 \times 97$ is divided by 18 is

- A** 12
- B** 10
- C** 15
- D** 8

Answer: C

SBI Clerk Free Mock Test (Latest Pattern)

18. A polynomial in x leaves remainders 2 and 3 when divided by $x + 1$ and $x - 1$ respectively. Then the remainder we get when that polynomial is divided by $x^2 - 1$ is

A $\frac{3x+2}{2}$

B $\frac{3x-2}{2}$

C $\frac{x-5}{2}$

D $\frac{x+5}{2}$

Answer: D

19. The 11th term of the series 81, 27, 9, is

A $\frac{1}{729}$

B $\frac{1}{243}$

C $\frac{1}{2187}$

D $\frac{1}{3^{10}}$

Answer: A

20. The sum of first 12 terms of the series 5, 3, 1, -1, is

A -72

B -36

C -48

D -108

Answer: A

SBI Clerk Previous Papers (Download PDF)

21. $\lim_{x \rightarrow 0} \frac{\tan x - x}{x} =$

A 1

B -1

C 0

D does not exist

Answer: C

22. $\lim_{x \rightarrow -1} \frac{1 + \sqrt[3]{x}}{1 + \sqrt[5]{x}} =$

- A $\frac{5}{3}$
- B $\frac{3}{5}$
- C $-\frac{5}{3}$
- D $-\frac{3}{5}$

Answer: A

23. If $y = 2^{\sec x}$, then $\left(\frac{dy}{dx}\right)_{x=0} =$

- A 0
- B $2 \ln 2$
- C $\ln 2$
- D $-2 \ln 2$

Answer: A

Free Banking Study Material (15000 Solved Questions)

24. If $f(x) = \frac{x^2+1}{x^2-1}$, then $f'(2) =$

- A $\frac{8}{9}$
- B $-\frac{8}{9}$
- C $\frac{5}{3}$
- D $-\frac{5}{3}$

Answer: B

25. The coefficient of x^{15} in the product $(x - 1)(x - 2) \dots (x - 16)$ is

- A $(16)!$
- B 136
- C -136
- D $-(16)!$

Answer: C

26. If the sum of all the coefficients in the expansion of $(1 + 3x - 2x^2)$ is 128; then the greatest coefficient in the expansion of $(1 + x)^n$ is

- A 35
- B 21
- C 49
- D 14

Answer: A

Daily Free Banking Online Test

27. If A, B are 3×3 matrices such that $\det A = 2$, $\det B = -1$, then $\det (4 AB) =$

- A -8
- B -32
- C 8
- D -128

Answer: D

28. If $A = \begin{bmatrix} 2x + 3 & -4 \\ x + 7 & 2 \end{bmatrix}$ and if $\det A = 0$, then $x =$

- A $\frac{17}{4}$
- B $\frac{14}{7}$
- C $-\frac{14}{7}$
- D $-\frac{17}{4}$

Answer: D

29. If α, β are the roots of the equation $7x^2 - 8x + 6 = 0$ then $(\alpha^2 + \beta^2)(\alpha + \beta) =$

- A $-\frac{20}{49}$
- B $\frac{20}{49}$
- C $-\frac{160}{343}$

D $\frac{160}{343}$

Answer: C

200+ Free GK Tests for Banking exams

30. The distance (in metres) between two parallel tangents drawn to a circle of area 616 sq.m. is (Take $\pi = \frac{22}{7}$)

A 14

B 28

C $\frac{14}{\pi}$

D $\frac{28}{\pi}$

Answer: B

31. If the Mode and Mean of a data are 44 and 38 respectively, then the Median of the data is

A 39

B 40

C 42

D 43

Answer: B

32. The Median of the observations 108, 343, 721, 39, 74, 192, 48, 10, 123 is

A 108

B 123

C 74

D 721

Answer: A

33. If two dice are thrown, then the probability that the sum of the two numbers obtained is a prime number is

A $\frac{7}{12}$

- B** $\frac{5}{12}$
- C** $\frac{1}{4}$
- D** $\frac{3}{4}$

Answer: B

34. The arithmetic mean of the first 71 natural numbers is

- A** 72
- B** 71
- C** 36
- D** 35.5

Answer: C

35. If a letter is selected at random from the first 15 letters of the English alphabet, then the probability that it is a consonant is

- A** $\frac{4}{15}$
- B** $\frac{11}{15}$
- C** $\frac{1}{3}$
- D** $\frac{2}{3}$

Answer: B

Whatsapp "JOB" to 7661025557 for Updates

36. The variance of the observations 73, 74, 75, ..., 84, 85 is

- A** 17
- B** $\sqrt{14}$
- C** $\sqrt{17}$
- D** 14

Answer: D

37. If E, F are two events in a random experiment such that $P(E) = \frac{1}{2}$, $P(F) = \frac{1}{3}$ and $P(E \cap F) = \frac{1}{12}$ then $P(E \cup F) =$

- A** $\frac{1}{4}$
- B** $\frac{3}{4}$
- C** $\frac{5}{6}$
- D** $\frac{7}{12}$

Answer: B

38. If a number is selected at random from the first 120 natural numbers, then the probability that it is divisible by 6 or 8 is

- A** $\frac{1}{24}$
- B** $\frac{1}{5}$
- C** $\frac{1}{4}$
- D** $\frac{1}{30}$

Answer: C

AP SI Free Solved Previous Papers PDF

39. For two positive real numbers, arithmetic mean and geometric mean are 13 and 12 respectively, then these two numbers are

- A** 12.5, 13.5
- B** 12, 14
- C** 8, 18
- D** 16, 10

Answer: C

40. If a leap year is selected at random, then the probability that there will be 53 Sundays in that year is

- A** $\frac{1}{7}$
- B** $\frac{6}{7}$
- C** $\frac{2}{7}$
- D** $\frac{5}{7}$

Answer: C

75. Despite our disagreements, we have been able to ----- an accord.

- A reach
- B locate
- C find
- D strike

Answer: D

Instructions [176 - 180]

Read the following passage and answer questions:

Passage:

Museums must make their collections accessible. In the past, this simply meant packing them into display cases, often with wordy labels that made little concession to the lay person. Now adays, accessibility should demand more than this. Displays can be lively and interesting, making the best use of theatrical or architectural techniques to capture the visitor's attention and perhaps stimulate emotional response. But museums should be about more than their displays. They should make their collection accessible to the widest possible community. The provision of loan boxes of objects for class teachers is one known example of this, and recently this principle has been extended by some museums so that similar material is made available for use in treating elderly people who are losing their memory.

Museums concern themselves with 'artifacts and specimens' – not replicas. They exist to facilitate an encounter with authenticity. They present items that actually existed were used – had meaning – at some historical time. This is a great strength and is what distinguishes them from heritage centres and theme parks, books and C.D. ROMs. Museums which rise to the challenge, which this distinction implies, and provide exciting and accessible displays, catalogues and outreach programmes, will find that their apparent competitors in 'virtual history' are in fact their allies, stimulating an appetite for the 'real thing' that museums are uniquely placed to satisfy.

76. **According to the passage, museums must make their collections accessible to**

- A** lay persons.
- B** buyers.
- C** researchers
- D** general public

Answer: D

77. **"But museums should be about more than their displays." This statement means:**

- A** They should go beyond their visuals.
- B** They should have more space for their collections.
- C** They should have wordy labels.
- D** They should have more displays.

Answer: A

Whatsapp "JOB" to 7661025557 for Updates

78. **Museums are different from heritage centres, theme parks, books and CD-ROMs because they deal with**

- A** exciting objects.
- B** replicas.
- C** original objects.
- D** modern objects.

Answer: C

79. According to the passage, the “provision of loan boxes of objects” helps museums

- A** become popular
- B** serve society
- C** get publicity
- D** make objects accessible to more people

Answer: D

80. The “real thing” refers to

- A** authentic displays.
- B** catalogues.
- C** outreach programmes.
- D** virtual displays.

Answer: A

AP SI Free Solved Previous Papers PDF

Instructions [181 - 185]

Read the following passage and answer questions:

Passage:

‘A stamp is, to many people, just a slip of paper that takes a letter from one town or country to another. They can’t understand why stamp collectors find so much pleasure in collecting them and how we find time to indulge in our hobby. To them it seems a waste of time, effort and money. But, they do not realise that many find the effort worthwhile and many who, if they did not spend their time collecting stamps, would spend it less profitably. In our leisure hours what better occupation is there to keep us out of mischief than that of collecting stamps? An album, a packet of hinges, a new supply of stamps, and the time passes swiftly. Stamp-collecting has no limits and a collection never has an end; countries are always issuing new stamps to celebrate coronations, great events, anniversaries and deaths. And the fascination of collecting is in obtaining these stamps before one’s rivals. Every sphere of stamp collecting has its fascination – receiving letters from distant countries and discovering old stamps in the leaves of dusty old books. A stamp itself has a fascination all its own. Gazing at its little picture we are transported to the wilds

of Congo, the homes of the Arabs, and the endless tracks' of the Sahara desert. There is a history in a stamp. The ancient Roman Empire and the Constitution of America, India's Independence and the Allied Victory, are all conveyed to our mind's eye through stamps. We see famous men – printers, writers, scientists, soldiers, politicians – and famous incidents. Stamps, so small and minute, contain knowledge that is vast and important.

81. **Stamps take us through**

- A** albums
- B** history
- C** old books
- D** dusty books.

Answer: C

82. **Stamp collection profits one to**

A stamps and their ignominious history

B the usefulness of collecting stamps.

C the competition in collecting stamps.

D stamp vendors.

Answer: B

Instructions [186 - 190]

Read the following passage and answer questions:

Passage:

How do you understand multiple intelligences? In 1983, Howard Gardner, a Harvard University Professor, developed a theory called Multiple Intelligences. In his book Frames of Mind, he outlines seven intelligences that he feels are possessed by everyone : visual/spatial, verbal/linguistic, musical/rhythm, logic/math, body/kinesthetic, interpersonal and intrapersonal. In 1996, he added an eighth intelligence : naturalistic. In short, if you have ever done things that come easily for you, you are probably drawing on one of your intelligences that is well developed. On the other hand, if you have tried to do things that are very difficult to master or understand, you may be dealing with material that calls on one of your less developed intelligences. If playing the Piano by ear comes easily to you, your musical/rhythm intelligence may be, very strong. If you have trouble writing or understanding poetry, your verbal/ linguistic intelligence may not be as well developed. This does not mean that you will never be able to write poetry : it simply means that you have not fully developed your skills in this area.

86. **How many intelligences does Gardner speak about ?**

A Eight

B Seven

C Multiple

D Innumerable

Answer: A
