AP ICET 26th April 2019 Shift-1

Analytics Ability

Instructions [1 - 20]

In the following questions, each question is followed by data in the form of two statements labeled as I and II. You must decide whether the data given in the statements are sufficient to answer the questions. Using the data make an appropriate choice from (a) to (d) as per the following guidelines:

1. Is $a > b$?

I. $a^{16} < b^{16}$

II. $a^{21} < b^{21}$

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

Free Banking Study Material (15000 Solved Questions)

2. If x and y are integers, is $\sqrt{x^2 + y^2}$ an integer?

I. $8x^2 - y^2 = 0$

II. $x^2 + y^2$ is an integer

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

3. What is the value of $3a + 2b$?

I. $\frac{a}{b} = \frac{2}{3}$

II. $2a - 3b = 10$

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

4. **How many sons does A have ?**
I. Bis D's brother and sonof A.
II. D's father has three children.

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

Daily Free Banking Online Test

5. **What is the distance between the cities P and Q**
I. City A is 60 km from city Q
II. City P is 80 km form city A

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

6. **What is the GCD of positive integers a and b?**
I. a and b differ by 1.
I. $a > b$

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

7. What is the value of $|x|$?

I. $x^4 - 4x^2 + 4 = 0$

II. x is even

- A** If the statement I alone is sufficient to answer the question.
- B** If the statement II alone is sufficient to answer the question.
- C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

200+ Free GK Tests for Banking exams

8. What is the value of the middle term of the sequence of positive integers $a_1, a_2, \dots, a_{11}$ if their sum is 1380?
- I. The average of first six terms is 100
 - II. The average of last six terms is 150
- A** If the statement I alone is sufficient to answer the question.
 - B** If the statement II alone is sufficient to answer the question.
 - C** If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
 - D** If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

9. Is $x > y$?

I. $|x| < 3$

II. $|y| > 3$

- A If the statement I alone is sufficient to answer the question.
- B If the statement II alone is sufficient to answer the question.
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

10. How many positive integral multiples of 5 are there up to n ?

I. 500 is the largest multiple of 10 that is $\leq n$.

II. 1005 is the largest multiple of 5 that is not greater than n .

- A If the statement I alone is sufficient to answer the question.
- B If the statement II alone is sufficient to answer the question.
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

11. What is the LCM of the positive integers m, n ?

I. GCD of m, n is 9.

II. $m + n = 108$

- A If the statement I alone is sufficient to answer the question.
- B If the statement II alone is sufficient to answer the question.
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

12. Is the positive integer n , a prime?

I. n is an odd integer greater than 3

II. m is an even integer greater than 2

- A If the statement I alone is sufficient to answer the question.
- B If the statement II alone is sufficient to answer the question.
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

13. If p , q and r are real numbers: are the roots of the quadratic equation $px^2 + qx + r = 0$ real?

I. $r - 25p = 0$

II. $q + 9p = 0$

- A If the statement I alone is sufficient to answer the question.
- B If the statement II alone is sufficient to answer the question.
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

Whatsapp "JOB" to 7661025557 for Updates

14. In how many points do the two circles intersect?

I. The radii of the circles are 12 cm and 5 cm.

II. The distance between their centres is 25 cm.

- A If the statement I alone is sufficient to answer the question.
- B If the statement II alone is sufficient to answer the question.
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

15. In how many days P alone can complete the work:
I. P and Q together can complete that work in 12 days.
II. Q alone can complete the work in 36 days.

- A If the statement I alone is sufficient to answer the question.
B If the statement II alone is sufficient to answer the question.
C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

16. How many girls are taller than Sarath in his class?
I. When students in Sarath's class are ranked in the descending order of heights. Sarath is 17th from the top among all the students and 12th among boys.
II. Sarath's rank from the bottom on the basis of height among boys is 18th and among all the students is 29th.

- A If the statement I alone is sufficient to answer the question.
B If the statement II alone is sufficient to answer the question.
C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

AP SI Free Solved Previous Papers PDF

17. If p and q are positive integers. is p multiple of q ?
I. Every prime factor of q is also a prime factor of p.
II. Every factor of q is also a factor of p.

- A If the statement I alone is sufficient to answer the question.
B If the statement II alone is sufficient to answer the question.
C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

18. Paul walks at a constant rate for 80 minutes every day in the same track. How long is the track?

I. Paul began walking at 5.00 a.m yesterday.

II. Paul walked 5km by 5.40 a.m. and 8 km by 6.04 a.m. yesterday.

- A If the statement I alone is sufficient to answer the question.
- B If the statement II alone is sufficient to answer the question.
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

19. p and q are 2 digit numbers that share the same digits, but in reverse order. Then what is the sum of p and q?

I. $p - q = 45$

II. The difference between the two digits in each number is 5

- A If the statement I alone is sufficient to answer the question.
- B If the statement II alone is sufficient to answer the question.
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

200+ Banking Previous Papers (Download PDF)

20. A zebra must get water from either a river or a pond. Which of the two sources of water is closer to the zebra's current position?

I. Morning at a constant rate, it takes the zebra 2 hours to reach the river from its current position.

II. Morning at a constant rate, it takes the zebra 2 hours to reach the pond from the river.

- A If the statement I alone is sufficient to answer the question.
- B If the statement II alone is sufficient to answer the question.
- C If both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D If both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

Instructions [21 - 30]

In each of the following questions, a sequence of numbers or letters that follow a definite pattern is given. Each question has a blank space. This has to be filled by the correct answer from the four given options to complete the sequence without breaking the pattern.

21. **7 : 342 :: 11 :**

A 1331

B 1221

C 1220

D 1330

Answer: D

22. **15 : 224 :: 17 :**

A 289

B 298

C 288

D 278

Answer: C

D $\frac{81}{7}$

Answer: C

Instructions [44 - 46]

The following table gives the number of elected members of parties X, Y, Z, A, and B to the state assembly. Study it carefully and answer the following questions.

Year → party ↓	1970	1975	1980	1985	1990	1995
X	20	60	50	40	35	26
Y	200	160	180	220	224	140
Z	80	70	60	40	31	138
A	35	50	40	20	25	36
B	15	10	20	30	35	10

44. What percentage of seats did party y get in 1990?

A 70

B 64

C 68

D 62

Answer: B

Free Banking Study Material (15000 Solved Questions)

45. what percentage of growth did the party A gain 1995 over the previous election?

A 40

B 42

C 44

D 46

Answer: C

46. How many more seats did the party A get over the party B in all elections put together?

A 76

B 86

C 40

D 65

Answer: B

Instructions [47 - 51]

The following pie chart shows the expenditure of a person's monthly income on different heads A, B, C, D, E and F. Basing on the information given in the pie chart, answer the following questions.

47. If the amount spent on the head D is Rs. 43,320, then the amount in rupees that he has spent on the head E is

A 52,984

B 51,984

C 48,984

D 53,984

Answer: B

Daily Free Banking Online Test

48. The percentage of his monthly income spent on the head D corrected to two decimals, is

A 6.14

B 6.34

C 6.74

D 6.94

Answer: D

49. If the income of the person in that month is Rs.93,240, then the amount in rupees that he spent on the head B in that month is

A 18,340

B 18,420

C 18,130

D 18,080

Answer: C

50. If the amount spent on the heads A and C together in that month is Rs 60,450 then the amount he spent on the head B in that month in rupees is

A 21,700

B 12,400

C 29,450

D 18,360

Answer: A

200+ Free GK Tests for Banking exams

51. If the person spent on the head E is Rs. 11,520 in a month. then the amount spent on the head C in that month in rupees is

A 34,600

B 35,720

C 36,480

D 37,260

Answer: C

Instructions [52 - 53]

60 students of a class were asked which TV programmes among A, B and C they had watched on a particular Sunday. 30 had watched programme A, 38 programme B, 25 programme C, 18 watched both A and B, 12 both B and C, 10 both A and C while 4 watched all the three. Based on this information answer the following questions.

52. How many watched only one programme?

- A 16
- B 12
- C 18
- D 25

Answer: D

53. How many watched exactly two programmes?

- A 22
- B 18
- C 28
- D 32

Answer: C

Instructions [54 - 58]

In a certain code n^{th} letter of the English alphabet is coded as $(n + 10)^{th}$ letter cyclically. The reverse process is used for decoding. with this information answer the following questions.

54. what is the code for the word 'ATTACK'

- A LDDL MU
- B KDDK NU
- C KDDK MU
- D KDDK MV

Answer: C

55. The code for 'APICET' is

- A KZSM OC
- B KZTN OD
- C KZSN OD
- D KZSM OD

Answer: D

56. "SYSTEM" is coded as

- A DIDEOW
- B CICDOW
- C BIBDOW
- D CICDOV

Answer: B

Whatsapp "JOB" to 7661025557 for Updates

57. 'USVV' is decoded as

- A KILL
- B MILL
- C BILL
- D KISS

Answer: A

58. "BKREV" is decoded as

- A BAHUL
- B RAHUM
- C RAHUL
- D RAHIM

Answer: C

59. If 'BEAT' is coded as 'EHDW', the code for 'ROAD' is

- A URDH
- B UREG
- C URDF
- D URDG

Answer: D

63. In a certain code the word 'RAMBO' and 'BRING *' are coded as 114 and 109 respectively, then in the same code 'BLIND' is coded as

- A 91
- B 82
- C 73
- D 41

Answer: A

64. The number of leap years in between the years 2018 and 2126 is

- A 24
- B 25
- C 26
- D 27

Answer: C

65. The angle between hour hand and the minute hand of a clock when the time is 5.40 is

- A 77°
- B 72°
- C 70°
- D 65°

Answer: C

SSC CHSL Previous Question papers (download pdf)

66. If two hands of a clock coincide (are together) every 64 minutes. the time gained, in minutes, by that clock in a day is

- A 34
- B $33\frac{3}{11}$
- C $32\frac{8}{11}$
- D $32\frac{2}{11}$

Answer: B

67. If P is the wife of the grandson of the father of father of Mr R and R's father is the only child of his father, then P is related to R as

- A Sister
- B Aunt
- C Daughter-in-law
- D Sister-in-law

Answer: D

68. A bus for Tirupati leaves every two hours from Bangalore bus station. An announcement was made at the Bangalore bus station that the bus for Tirupati had left 40 minutes ago and the next bus will leave at 4.00 pm. At what time the announcement was made?

- A 2.20 p.m
- B 2.00 p.m
- C 2.40 p.m
- D 2.30 p.m

Answer: C

SSC CHSL Free Mock Test

69. A person came to his office 40 minutes late at 10.55 a.m on Friday. Next day he started early and reached his office 25 minutes before the scheduled time. Then the time of his arrival at office on Saturday is

- A 9.50 a.m
- B 9.455 a.m
- C 10.00 a.m
- D 10.05 a.m

Answer: A

70. 5 persons A, B, C, D and E are sitting around a circle facing its center. B sits between A and E. C is sitting on immediate right side of the E. Then the person on the immediate left of D is

- A A
- B C
- C B
- D E

Answer: B

71. If $\triangle$ denotes multiplication, $*$ denotes subtraction, ∇ denotes addition and $\oplus$ denotes division then $10 \nabla 8 \oplus 2 * 5 \triangle 3 = ?$

- A 12
- B -6

C 27

D -1

Answer: D

SSC CGL Free Mock Test

72. If $x * y = \frac{1}{x} + \frac{1}{y}$ for all $x, y \in \mathbb{R} - \{0\}$ then $(4 * 5) * (3 * 2) =$

A $\frac{77}{60}$

B $\frac{33}{20}$

C $\frac{154}{45}$

D $\frac{121}{54}$

Answer: C

73. For $m, n \in \mathbb{R}$, define $m * n = m + n - 2$ and $m \oplus n = \frac{mn}{2}$ then $(3 * 5) \oplus (9 * 7) = ?$

A 48

B 42

C 56

D 58

Answer: B

75. If $x = \sqrt{7} - \sqrt{6}$ then $x^4 + \frac{1}{x^4} =$

- A 674
- B 675
- C 776
- D 676

Answer: A

76. $5(x^2 + y^2 + z^2) = 4(xy + yz + zx)$ then $x : y : z$

- A 8 : 1 : 4
- B 2 : 1 : 8
- C 4 : 1 : 8
- D 4 : 8 : 1

Answer: C

77. $yz : zx : xy = 1 : 2 : 3 \Rightarrow \frac{x}{yz} : \frac{y}{zx} =$

- A 4 : 1
- B 1 : 4
- C 1 : 3
- D 3 : 1

Answer: A

SBI PO Solved Previous Papers (Download PDF)

78. $\sqrt{4 + \sqrt{4 + \sqrt{4 + \sqrt{4 + \dots \infty}}}} =$

- A $\frac{\sqrt{17}-1}{2}$
- B $\frac{1+\sqrt{17}}{2}$
- C $\frac{1+\sqrt{13}}{2}$
- D $\frac{\sqrt{13}-1}{2}$

Answer: B

79. $\sqrt{8 + 2\sqrt{15}} =$

A $\sqrt{3} - \sqrt{5}$

B $\sqrt{5} - \sqrt{3}$

C $\sqrt{3} + \sqrt{5}$

D $3 + \sqrt{5}$

Answer: C

80. If 11 divides $29x03$ then $x =$

A 3

B 4

C 5

D 6

Answer: B

Explanation:

Any number is divisible by 11 if,

The sum of odd placed number - sum of even placed number will be divisible by 11, then the number will be divisible by 11.

$$3 + x + 2 - (0 + 9) = x - 4$$

It will be divisible by 11, if $x - 4 = 0$

Or $x = 4$

SBI Clerk Free Mock Test (Latest Pattern)

81. How many integers are there from 200 to 400 which are multiples of 7?

A 27

B 28

C 29

D 30

Answer: C

Explanation:

The numbers which are divisible by 7, in between 200 to 400 are given below,

203, 210, 217, 399

We know for the AP series,

$$\Rightarrow t_n = a + (n - 1)d$$

$$\Rightarrow 399 = 203 + 7(n - 1)$$

$$\Rightarrow 7(n - 1) = 399 - 203 = 196$$

$$\Rightarrow n - 1 = \frac{196}{7}$$

$$n = 28 + 1 = 29$$

82. The smallest positive integer which when divided by 6, 9, 12 and 15 leaves 5 as remainder in each case is

A 545

B 180

C 365

D 185

Answer: D

Explanation:

As per the given question,

The given numbers 6, 9, 12, 15

It is giving remainder 5, if we are dividing a by these given number.

So, the required number is = LCM of the given number + 5

Hence the required number = $180 + 5 = 185$

83. A trader has three kinds of oils. the first kind 462 liters, the second kind 286 liters and the third kind 187 liters. What is the least number of tins of equal volume required to fill them completely and store these oils without mixing?

A 75

B 85

C 95

D 105

Answer: B

Explanation:

As per the given question,

The first type of oil have 462 liters

2nd type of oil have 286 liters

3rd type of oil have 187 litres of oil

Hence $462 = 2 \times 3 \times 7 \times 11$

$286 = 2 \times 11 \times 13$

$187 = 11 \times 17$

Hence the required capacity = 11 liter

The number of tin required $= \frac{462}{11} + \frac{286}{11} + \frac{187}{11}$

Hence, the number of tin of 11 liter capacity required $= 42 + 26 + 17 = 85$

SBI Clerk Previous Papers (Download PDF)

84. $\left(1 - \frac{1}{7}\right)\left(1 - \frac{1}{8}\right)\left(1 - \frac{1}{9}\right)\left(1 - \frac{1}{10}\right) \dots \left(1 - \frac{1}{51}\right) =$

A $\frac{50}{51}$

B $\frac{7}{51}$

C $\frac{2}{17}$

D $\frac{6}{53}$

Answer: C

85. $0.\overline{234} =$

A $\frac{232}{9909}$

B $\frac{232}{9990}$

C $\frac{0.232}{9909}$

D $\frac{232}{990}$

Answer: D

86. The increasing order of $a = \sqrt{7} - \sqrt{6}$, $b = \sqrt{3} - \sqrt{2}$, $c = \sqrt{6} - \sqrt{5}$, $d = \sqrt{2} - 1$ is

A c, a, b, d

B a, c, b,
d

C a, c, d,
b

- a, d, c,
D b

Answer: B

Free Banking Study Material (15000 Solved Questions)

87. The smallest among $\frac{9}{11}$, $\frac{8}{9}$, $\frac{5}{6}$ and $\frac{7}{8}$ is

- A** $\frac{8}{9}$
B $\frac{5}{6}$
C $\frac{9}{11}$
D $\frac{7}{8}$

Answer: C

88. A person gave 12% of his money to charities. After spending 80% of the remainder, he is still left with Rs. 264. The amount of money he had at the beginning, in Rupees, is

- A** 2000
B 2500
C 1800
D 1500

Answer: D

Explanation:

Let he have the total amount of x Rs.

Percentage of money gave to charity $= \frac{12x}{100} = 0.12x$

The remaining amount $= x - 0.12x = 0.88x$

Now money gave to charity = 80%

Hence the remaining amount $= \frac{0.88x \times 20}{100} = 264$

$= 0.176x = 264$

Hence $x = \frac{264}{0.176} = 1500$

Hence, The amount of money he have in the begining $= 1500$ Rs.

89. When 40% of a number is added to 84, if the resultant is the number itself. then that number is

- A** 120
B 140
C 150

D 160

Answer: B

Explanation:

Let the number is x

Now, as per the condition given in the question,

$$\frac{40x}{100} + 84 = x$$

$$0.4x + 84 = x$$

$$x - 0.4x = 84$$

$$0.6x = 84$$

$$x = \frac{84}{0.6} = \frac{840}{6} = 140$$

$$x = 140$$

Daily Free Banking Online Test

90. A man purchased 11 books for Rs. 100 and sold at the rate of 10 books for Rs. 110. How much percentage of profit or loss he made on a book?

A Loss 11%

B Profit 11%

C Profit 21%

D Loss 21%

Answer: C

Explanation:

As per the given question,

$$\text{The cost price of one book} = \frac{100}{11}$$

$$\text{The sale price of one book} = \frac{110}{10}$$

$$\text{Hence the required percentage} = \frac{(11 - 9.09) \times 100}{9.09}$$

$$= \frac{1.91 \times 100}{9.09} = 21\% \text{ Profit}$$

91. To successive profits of 8% and 10% are equal to a single profit of

A 18%

B $19\frac{4}{5}\%$

C 19%

D $18\frac{4}{5}\%$

Answer: D

92. P and Q enter into a partnership with capitals in the ratio 9:7. At the end of 8 months Q withdrew his capital from the business. If they received profits in the ratio 9:4, the time (in months) P's capital remained, is

A 14

B 16

C 15

D 13

Answer: A

Explanation:

The partnership ratio of P and Q $= 9:7$

As per the question, at the end of the 8 months, Q withdraw his amount,

The ratio in the profit is given as 9:4

So, we know that profit sharing ratio $= \frac{C_P \times T_P}{C_Q \times T_Q}$

$\Rightarrow \frac{9}{4} = \frac{9 \times T_P}{7 \times 8}$

$\Rightarrow \frac{9}{4} = \frac{9 \times T_P}{56}$

$\Rightarrow T_P = \frac{56}{4} = 14$

200+ Free GK Tests for Banking exams

93. In a partnership. P, Q and R shared profit in the ratio 1:4:5. If the total profit is Rs. 55,000, then the difference of profit between the shares of P and Q (in Rs.) is

A 11,100

B 16,500

C 15,600

D 14,500

Answer: B

Explanation:

as in the given question,

total profit $= 55000$

shared profit of P, Q, R will be $= x + 4x + 5x$

then, sum of profit will be $\Rightarrow x + 4x + 5x = 55000$

$\Rightarrow x = 5500$

then, the profit of $P = 1 \times 5500$

profit of Q $= 4 \times 5500 = 22000$

difference of profit between Q and P = Profit of Q - Profit of P

$$= 22000 - 5500 = 16500$$

So the difference of profit between Q and P is 16500

94. A pipe can fill a tank in 9 hours. Due to a leak in the bottom, it is filled in 10 hours. If the tank is full, then the time (in hours) that the leak takes to empty that tank is

- A 85
- B 60
- C 90
- D 80

Answer: C

Explanation:

Part filled without leak in 1 hour $= \frac{1}{9}$

Part filled with leak in 1 hour $= \frac{1}{10}$

Work done by leak in 1 hour $= \frac{1}{9} - \frac{1}{10} = \frac{1}{90}$

We used subtraction as it is getting empty.

So total time to empty the cistern is 90 hours

95. Two taps P and Q can separately fill a cistern in 36 minutes and 45 minutes respectively. After both the taps are opened simultaneously by what time (in minutes) the pipe Q should be closed so that the cistern is completely filled in 27 minutes?

- A $11\frac{1}{2}$
- B $12\frac{1}{2}$
- C $12\frac{1}{4}$
- D $11\frac{1}{4}$

Answer: D

Latest Job Updates on Telegram - Join here

96. Car A starts at 8 am from the place P, with a speed of 65 kmph. Another car B starts at 9 am from the same place P, and follows the car A with a speed of 70 kmph. Then the meeting time of the cars A and B is

- A 4 p.m
- B 6 p.m

- C** 8 p.m
D 10 p.m

Answer: D

Explanation:

Car A starts at 8AM with the speed of \$65\text{kmph}\$

Car B starts at 9AM with the speed of \$70\text{kmph}\$

Both starts from the point P,

Let after the time t , both the car will meet.

$$d = 65 \times t \text{-----(i)}$$

$$d = 70 \times (t-1) \text{-----(ii)}$$

From the equation (i) and (ii)

$$65 \times t = 70 \times (t-1)$$

$$5 \times t = 70$$

Hence $t = 14$ hour.

Hence both the car will meet 10PM

97. A bus covers a total distance of 400 km for its to and fro journey, in 8 hours. If the average speed of the bus in the onward journey is 25% more than that in the return journey, then the speed of the bus in the onward journey (in km/hr) is

- A** $25\frac{3}{4}$
B $50\frac{1}{4}$
C $56\frac{1}{4}$
D 45

Answer: C

98. P alone can do a work in 15 days and Q alone can do it in 20 days. With the help of R they finish the work in 5 days. How many days R alone will take to finish the work?

- A** 8
B 10
C 12
D 9

Answer: C

Explanation:

Let P will complete the work in 15 days

P can do the work in one day $\frac{1}{15}$

Q can finish the work in 20 days.

Q can do the work in one day $\frac{1}{20}$

Let R can do the work in x days.

R can do the work in one day $\frac{1}{x}$

If P, Q and R working together, then they can finish the work in 5 days.

Hence, working together, then can do the work in one day $\frac{1}{15} + \frac{1}{20} + \frac{1}{x} = \frac{1}{5}$

$\Rightarrow \frac{1}{x} = \frac{1}{5} - \frac{1}{15} - \frac{1}{20}$

$\Rightarrow \frac{1}{x} = \frac{1}{5} - \frac{7}{60}$

$\Rightarrow \frac{1}{x} = \frac{5}{60} = \frac{1}{12}$

Hence x=12 days. So, R can finish the work in 12 days.

Whatsapp "JOB" to 7661025557 for Updates

99. 5 men can prepare 10 toys in 6 days working 6 hours per day. In how many days can 12 men prepare 16 toys working 8 hours per day?

A 5

B 7

C 4

D 3

Answer: D

Explanation:

5 men in 6 days in 6 hours per day $= 5 \times 6 \times 6 = 180$ hours

Therefore, 180 hours will be taken to produce 10 toys

Therefore 1 toy $= \frac{180}{10} = 18$ hours

16 toys can be prepare in $= 16 \times 18 = 288$ hours

When, 12 men prepare 16 toys $= \frac{288}{12} = 24$ hours per day

Then by working 8 hours per day it will be $= \frac{24}{8} = 3$ days

Therefore in 3 days 12 men can prepare 16 toys for working 8 hours a day.

00. If the area of an equilateral triangle is $4\sqrt{3}$ sq.cm.. then its perimeter, in centimetres, is

A 15

B 12

C 18

D 9

Answer: B

Explanation:

Let a is the length of the side of the equilateral triangle.

We know that the area of the equilateral triangle $= \frac{\sqrt{3}a^2}{4}$

So, $\frac{\sqrt{3}a^2}{4} = 4\sqrt{3}$

$a^2 = 4 \times 4$

$a = 4$

Hence, perimeter of the triangle $= 3a = 12$ cm

01. The length and breadth of a rectangle are in the ratio 7:5 and its area is 3500 sq.cm. What is the perimeter of the rectangle. in cm?

A 220

B 260

C 240

D 280

Answer: C

Explanation:

As per given in the question,

Let, the length be $7x$ and breadth be $5x$

We know that the area of the rectangle $= \text{length} \times \text{breadth}$

So, $3500 = 7x \times 5x$

$\Rightarrow 3500 = 35x^2$

$x = 10$ cm

We know that the perimeter of the rectangle $= 2(\text{length} + \text{breadth})$

hence, perimeter $= 2(7x + 5x)$

$\Rightarrow 2 \times 12x$

$\Rightarrow 24 \times 10 = 240$

therefore, the perimeter of the rectangle is 240 cm

AP SI Free Solved Previous Papers PDF

02. If the surface area of a cube is 726 sq.cm., then its volume. in cubic centimeters, is

A 2197

B 1728

C 1000

D 1331

Answer: D

Explanation:

given,

surface area of cube $= 6 \times a^2$

according to the given condition,

$$6 \times a^2 = 726$$

$$a^2 = \frac{726}{6}$$

$$a = 11$$

hence, volume of cube will be $= a^3$

$$= 11^3$$

$$= 1331 \text{ cubic cm}$$

Therefore the volume of the cube is 1331 cubic cm

03. A solid sphere of radius 10 cm is melt and moulded into 8 solid spherical balls of equal radius. The surface area of each ball. in sq. cm. is

A 100π

B 80π

C 88π

D 96π

Answer: A

Explanation:

given,

radius of sphere = 10 cm

volume of each spherical ball $= \frac{\text{volume of sphere}}{8}$

$$\frac{4 \times \pi \times r^3}{3} = \frac{1}{8} \times \frac{4 \times \pi \times 10^3}{3}$$

$$r^3 = \frac{1000}{8}$$

$$r^3 = \frac{10^3}{2^3}$$

$$r = \frac{10}{2}$$

$$r = 5$$

surface area of each ball $= 4 \times \pi \times r^2$

$$= 4 \times \pi \times 5^2$$

$$= 4 \times 25 \times \pi$$

$$= \$100 \times \pi$$

04. The breadth of a rectangular plot is 75% of its length and the perimeter of the plot is 1050 m. Then the area, in square meters, of the plot is

A 64,750

B 65,000

C 67,500

D 56,800

Answer: C

Explanation:

Let, Length be l , breadth be b

As per the condition given in the question,

$$b = l \times \frac{3}{4}$$

$$\Rightarrow 4b = 3l \text{ or } 3l - 4b = 0 \text{ ----- (i)}$$

$$\Rightarrow 2(l+b) = 1050$$

$$\Rightarrow l+b = 525$$

$$\Rightarrow l = 525 - b \text{ ----- (ii)}$$

Put the value of " l " from equation (ii) in the equation (i)

$$\Rightarrow 3(525 - b) - 4b = 0$$

$$\Rightarrow 1575 - 3b - 4b = 0$$

$$\Rightarrow 1575 = 7b$$

$$\Rightarrow b = 225 \text{m ----- (iii)}$$

Put the value of b from equation (iii) in the equation (ii)

$$l = (525 - b)$$

$$l = (525 - 225)$$

$$l = 300 \text{m ----- (iv)}$$

Area of plot in square metres will be $= l \times b$

Put the value of l and b from equation (iii) and (iv)

$$A = 300 \times 225$$

$$A = 67,500$$

Therefore, area of the plot in square metre is 67500 metres

200+ Banking Previous Papers (Download PDF)

05. The base of a triangular shape field is 3 times its height. If the cost of cultivating the field at Rs.73.44 per hectare is Rs. 991.44, then the height of triangular field (in meters) is

- A 320
- B 280
- C 360
- D 300

Answer: D

Explanation:

Let, the height of triangular field be = h

Then base = $3h$

Now cost per hectare 73.44 is Rs 991.44

So, area of field = $\frac{991.44}{73.44}$

$\Rightarrow 13.5$

we know that area of triangle = $\frac{1}{2} \times b \times h$

Then,

$\Rightarrow \frac{1}{2} \times 3h \times h = 13.5$

$\Rightarrow 3h^2 = 27$

$\Rightarrow h^2 = \frac{27}{3}$

$\Rightarrow h^2 = 9$

$\Rightarrow h = 3$

In meters it will be

$\Rightarrow (h \times 100)m$

$\Rightarrow (3 \times 100)m$

$\Rightarrow 300m$

06. The breadth of a cuboid is $\frac{2}{3}$ of its length and its height is $\frac{3}{4}$ of its breadth. If its volume is 72 cu.mts, then its surface area. in sq.mts, is

- A 124
- B 108
- C 144
- D 116

Answer: B

Explanation:

As per given question,

volume of cuboid = 72 cu. mts

Let the length of the cuboid be x

breadth $= \frac{2}{3} \times x$

then height $= \frac{3}{4} \times \frac{2}{3} \times x$

as we know volume of cuboid $= \text{length} \times \text{breadth} \times \text{height}$

$\Rightarrow x \times \frac{2}{3} \times x \times \frac{1}{2} \times x$

$\frac{1}{3} \times x^3 = 72$

$x^3 = 216$

$x = 6$

then length $= 6$

breadth $= \frac{2}{3} \times 6 = 4$

height $= \frac{3}{4} \times \frac{2}{3} \times 6 = 3$

as we know surface area of cuboid $= 2(lb + bh + hl)$

surface area $= 2(6 \times 4 + 4 \times 3 + 3 \times 6)$

surface area $= 108 \text{ sq.mts}$

07. $12_{(7)} = x_{(10)} \Rightarrow x =$

A 451

B 541

C 415

D 514

Answer: A

SSC CHSL Previous Question papers (download pdf)

08. $101_{(2)} + 110_{(2)} =$

A $1010_{(2)}$

B $1101_{(2)}$

C $1011_{(2)}$

D $1001_{(2)}$

Answer: C

09. $P \Rightarrow (Q \Rightarrow P) \Rightarrow$

A $(P \Rightarrow Q) \Rightarrow (Q \Rightarrow R)$

B $\$(P \rightarrow Q) \rightarrow (P \rightarrow R)\$$

C $\$(7P \vee Q) \rightarrow R\$$

D $\$(P \rightarrow Q) \rightarrow R\$$

Answer: B

10. The negation of the statement $\$p \vee (\sim p \wedge q)\$$ is

A $\$p \wedge \sim q\$$

B $\$\sim p \wedge \sim q\$$

C $\$\sim p \wedge q\$$

D $\$\sim (p \wedge q)\$$

Answer: B

SSC CHSL Free Mock Test

11. If $A = \{(x, y) \in z \times z \mid x^2 + y^2 \leq 16\}$, then the number of reflexive relations defined on A is

A 2^{2352}

B 2^{2462}

C 2^{1176}

D 2^{2401}

Answer: A

12. If $n(A) = 5$, then the number of relations on A which are not symmetric is

A 2^{15}

B $2^{15} - (1023)$

C $2^{15} - (255)$

D 2^{25}

Answer: B

13. Let f be defined on $[0, 7]$ and $g(x) = 2x + 1$. Then the domain of $(f \circ g)(x)$ is

A $[-6, 6]$

B $[-3, 4]$

C $[-4, 3]$

D $[-7, 0]$

Answer: C

SSC CGL Free Mock Test

14. The equation of the straight line passing through $(-5, 4)$ and which makes an intercept of $\frac{2}{\sqrt{5}}$ units between the lines $x + 2y + 1 = 0$ and $x + 2y - 1 = 0$, is

A $3x - y - 5 = 0$

B $x - 2y + 7 = 0$

C $2x - 3y + 14 = 0$

D $2x - y + 14 = 0$

Answer: D

15. The equation of the straight line passing through the point $(-2, 3)$ and which makes intercepts in the ratio $1 : 3$ on the coordinate axes, is

A $2x - y + 1 = 0$

B $x + 3y - 7 = 0$

C $3x + y + 3 = 0$

D $x + y - 1 = 0$

Answer: C

Explanation:

As per the given in the question,

Ratio of intercept $= \frac{1}{3}$

So, $x = k$ and $y = 3k$

So, the co-ordinates of intersection point on the x and y axis $(k, 0)$ and $(0, 3k)$

So, equation of line

$$\Rightarrow (y - 0) = \frac{3k - 0}{0 - k}(x - k)$$

$$\Rightarrow y = -3(x - k)$$

Now, this line is passing through the point $(-2, 3)$

$$\Rightarrow 3 = -3(-2 - k)$$

$$\Rightarrow 3 = 6 + 3k$$

$$\Rightarrow k = -1$$

Hence the line equation will be

$$\Rightarrow y = -3x - 3$$

$$\Rightarrow 3x + y + 3 = 0$$

16. $\tan 480^\circ + \sec 510^\circ + \operatorname{cosec} 750^\circ + \cot 765^\circ =$

A $3 - \sqrt{3}$

B $3 - \frac{2}{\sqrt{3}}$

C $3 - \frac{5}{\sqrt{3}}$

D $2 - \frac{5}{\sqrt{3}}$

Answer: C

20. The smallest value of x for which $\left(\frac{12}{x} + 36\right)(4 - x^2) = 0$ is

A $-\frac{1}{3}$

B $-\frac{1}{2}$

C -2

D -3

Answer: C

21. If α and β are the roots of the equation $8x^2 - 3x - 27 = 0$, then the value of $\left(\frac{\alpha^2}{\beta}\right)^{\frac{1}{3}} + \left(\frac{\beta^2}{\alpha}\right)^{\frac{1}{3}}$ is

A $\frac{1}{4}$

B $\frac{1}{3}$

C $\frac{3}{2}$

D $\frac{1}{9}$

Answer: A

22. If the number obtained after subtracting x from 2035 leaves the same remainder 5 when it is divided by 9, 10 and 15, then the smallest possible x is

A 35

B 40

C 45

D 50

Answer: D

Explanation:

The given number in the question is $=2035$

Now, after subtracting x from the given number, new number will be $2035 - x$

When we are dividing the $2035 - x$ by 9, 10, 15 it is leaving the remainder 5.

Now, the LCM of the number 90

Now, when we are dividing the 2035 by 90, then it is leaving the remainder 55.

But as per the condition, the remainder should be 5. hence the required number $= 55 - 5 = 50$

SBI PO Solved Previous Papers (Download PDF)

23. If the remainder obtained when a certain integer x is divided by 5 is 2, then which one of the following is never an integer?

A $\frac{x}{17}$

B $\frac{x}{11}$

C $\frac{x}{10}$

D $\frac{x}{6}$

Answer: C

24. Rahim is 6 years older than David and David is 8 years older than Amar. After 8 years, if Rahim will be twice as old as Amar. then 4 years ago, David's age was

A 16

B 14

C 12

D 10

Answer: D

Explanation:

Let the present age of Rahim $= x$ years

So, the present age of David $= x - 6$

and the present age of Amar $= x - 6 - 8 = x - 14$ years

After the 8 years, age of Rahim will be $x + 8$

After the 8 years, age of Amar will be $x - 14 + 8 = x - 6$

As per the condition given in the question, $x + 8 = 2(x - 6)$

Hence, $2x - x = 12 + 8$

$x = 20$ years

Hence, the present age of David $= 20 - 6 = 14$ years

4 years ago, the age of David $= 14 - 4 = 10$ years.

25. Set X contains 10 consecutive integers. Sum of the 5 least numbers of the set is 265. The sum of the four greatest numbers of that set is

- A 290
- B 280
- C 264
- D 234

Answer: D

Explanation:

10 consecutive integers are:-

$$x, (x+1), (x+2), (x+3), (x+4), \dots, (x+9)$$

sum of the 5 least number of the set is 265

$$\Rightarrow x + (x+1) + (x+2) + (x+3) + (x+4) = 265$$

$$\Rightarrow 5x + 10 = 265$$

$$\Rightarrow 5x = 255$$

$$\Rightarrow x = \frac{255}{5}$$

$$\Rightarrow x = 51$$

Therefore, the sum of 4 greatest number of the set will be

$$\Rightarrow (x+6) + (x+7) + (x+8) + (x+9)$$

$$\Rightarrow 4x + 30$$

$$\Rightarrow 4 \times 51 + 30$$

$$\Rightarrow 204 + 30$$

Hence the sum of the greatest number will be 234

SBI Clerk Free Mock Test (Latest Pattern)

26. If the sum of three consecutive numbers in a geometric progression is 26 and the sum of their squares is 364, then the product of those numbers is

- A 729
- B 512
- C 343
- D 216

Answer: D

Explanation:

Let the terms of the GP are $\frac{a}{r}, a, ar$

Where a is the first term and r is the common ratio.

As per the condition, $\frac{a}{r} + a + ar = 26$(i)

$$\frac{a}{r}(1+r+r^2) = 26$$

Now, squaring both side,

$$\frac{a^2}{r^2}(1+r+r^2)^2 = 676$$

As per the the second condition,

$$\left(\frac{a}{r}\right)^2 + a^2 + (ar)^2 = 364$$

$$\frac{a^2}{r^2}(1+r+r^2)(1+r+r^2) = 364$$
.....(ii)

From equation (i) and (ii)

$$\Rightarrow \frac{1+r+r^2}{(1+r+r^2)^2} = \frac{364}{676}$$

$$\Rightarrow \frac{1+r+r^2}{(1+r+r^2)^2} = \frac{7}{13}$$

$$\Rightarrow 13 - 13r + 13r^2 = 7 + 7r + 7r^2$$

$$\Rightarrow (3r-1)(r-3) = 0$$

$$\text{So, } r = 3 \text{ and } r = \frac{1}{3}$$

Now, substituting the value of $r = 3$,

$$\text{So, } a(1+r+r^2) = 26$$

$$a(1+3+9) = 26$$

$$a(13) = 26$$

$$a = \frac{26}{13} = 2$$

Hence, the product of these numbers $= a \times \frac{a}{r} \times ar = a^3 = 2^3 = 8$

27. The sum of all the natural numbers between 100 and 1000 which are multiples of 5 is

A 96350

B 98450

C 98960

D 108280

Answer: B

Explanation:

The natural number between 100 and 1000 are 105, 110, 115.....995

It is making an arithmetic series.

Sum of the terms of arithmetic series $S_n = \frac{n(2a + (n-1)d)}{2}$

$$t_n = a + (n-1)d$$

$$995 = 105 + (n-1)5$$

$$S_n - 1 = \frac{995 - 105}{5} = 178$$

$$S_n = 178 + 1 = 179$$

Hence, the required sum $S_n = \frac{179(2 \times 105 + (179 - 1) \times 5)}{2}$

$$S_n = \frac{179 \times (210 + 178 \times 5)}{2} = 550 \times 179 = 98450$$

Hence, the required sum $S_n = 98450$

28. The middle term in the expansion of $\left(x^2 - \frac{1}{2x}\right)^{10}$ is

A $\frac{56}{7}x^5$

B $-\frac{36}{7}x^5$

C $-\frac{63}{8}x^5$

D $-\frac{72}{5}x^5$

Answer: C

SBI Clerk Previous Papers (Download PDF)

29. The numerically greatest term in the expansion of $(2 + 3x)^5$ when $x = \frac{5}{4}$ is

A $\frac{3 \times 15^3}{8}$

B $\frac{5 \times 15^3}{8}$

C $\frac{5 \times 15^4}{16}$

D $\frac{3 \times 15^4}{16}$

Answer: B

30. If $A = \begin{bmatrix} 3 & -4 \\ 1 & -1 \end{bmatrix}$ then $A^4 - A^3 + A^2 - A =$

A $\begin{bmatrix} 4 & -8 \\ 2 & -4 \end{bmatrix}$

B $\begin{bmatrix} 5 & -8 \\ 2 & -3 \end{bmatrix}$

C $\begin{bmatrix} 7 & -12 \\ 3 & 5 \end{bmatrix}$

D $\begin{bmatrix} 4 & -6 \\ 1 & -3 \end{bmatrix}$

Answer: A

31. The value of x for which the matrix $\begin{bmatrix} x-2 & 2x-3 & 3x-4 \\ x-4 & 2x-9 & 3x-16 \\ 2x-27 & 3x-64 \end{bmatrix}$ does not possess inverse, is

A 2

B 3

C 4

D 5

Answer: C

Free Banking Study Material (15000 Solved Questions)

32. $\lim_{x \rightarrow 0} \frac{e^x - 1}{\sqrt{1+x} - 1} =$

A 0

B 1

C 2

D ∞

Answer: C

33. $\lim_{x \rightarrow 3} \frac{x^4 - 81}{2x^2 - 5x - 3} =$

A 0

B $\frac{27}{8}$

C $\frac{102}{7}$

D $\frac{108}{7}$

Answer: D

34. In the adjoining figure, ABCD is a cyclic quadrilateral in which AC and BD are its diagonals. If $\angle DBC = 55^\circ$ and $\angle BAC = 45^\circ$, then $\angle BCD =$

A 75°

B 80°

C 85°

D 70°

Answer: B

Daily Free Banking Online Test

35. A and B are the end points of the longest line drawn in the circle with centre x. If C is a point on the circle such that $AC = Ax = 3$. Then the perimeter of $\triangle ABC$ is

A $\frac{9\sqrt{3}}{2}$

B 9

C $6 + 3\sqrt{3}$

D $9 + 3\sqrt{3}$

Answer: D

36. A, B and C are three points on the circumference of a circle with centre O. If in $\triangle ABC$ $\angle B = 60^\circ$ and $\angle C = 70^\circ$ then $\angle BOC =$

A 100°

B 120°

C 90°

D 80°

Answer: A

37. If A(3, 10), B (-3, 4) and C (5, 8) are the vertices of a $\triangle ABC$ and AD and CF are its medians. then the ratio of the length of AD to the length of CF is

A $\sqrt{10} : \sqrt{13}$

B $\sqrt{12} : \sqrt{13}$

C $\sqrt{10} : \sqrt{9}$

D $\sqrt{10} : \sqrt{15}$

Answer: A

200+ Free GK Tests for Banking exams

38. If (-2, -1), (1, 0) and (4, 3) are three consecutive vertices of a parallelogram, then the sum of the lengths of the diagonals of that parallelogram is

A $2\sqrt{13}$

B $1 + 2\sqrt{13}$

- C** $2 + \sqrt{13}$
- D** $2(1 + \sqrt{13})$

Answer: D

39. The arithmetic mean of 28, 32, 34, 24, 42, 46, 38, 36 is

- A** 37
- B** 34
- C** 36
- D** 35

Answer: D

Explanation:

The given data is 28, 32, 34, 24, 42, 46, 38, 36

Number of records=8

The arithmetic mean of the given data $\frac{28+32+34+24+42+46+38+36}{8}=35$

40. The median of 18, 16, 18, 12, 10, 14, 16 is

- A** 18
- B** 16
- C** 14
- D** 12

Answer: B

Explanation:

As per the question,

18, 16, 18, 12, 10, 14, 16

Now arranging the data in the increasing order=10, 12, 14, 16, 16, 18, 18

Total number of observations =7

Hence, the median $=\frac{n}{2}+1$

$\Rightarrow$ median=4th terms =16

41. The mode of the following frequency distribution is

x	1	2	3	4	5	6	7	8
f	4	9	16	25	22	15	7	3

- A** 4.5
- B** 4
- C** 5
- D** 5.5

Answer: B

42. The standard deviation of 6, 7, 8, 9, 10 is

- A** 2
- B** $\sqrt{3}$
- C** $\sqrt{2}$
- D** $2\sqrt{2}$

Answer: C

43. The standard deviation of any three consecutive integers is

- A** $\sqrt{\frac{3}{2}}$
- B** $\frac{2}{\sqrt{3}}$
- C** $\frac{\sqrt{2}}{3}$
- D** $\sqrt{\frac{2}{3}}$

Answer: D

Whatsapp "JOB" to 7661025557 for Updates

44. If d_i stands for the difference of ranks and if $\sum_{i=1}^n d_i^2 = \frac{(n-1)n(n+1)}{8}$, then the value of the coefficient of rank correlation is

- A** 0.75
- B** 0.25
- C** -0.25
- D** -0.40

Answer: B

45. A problem in Mathematics is given to three students A, B and C whose chances of solving it are $\frac{1}{3}$, $\frac{1}{4}$ and $\frac{1}{2}$ respectively. What is the probability that the problem will be solved by at least one of them?

A $\frac{3}{4}$

B $\frac{2}{3}$

C $\frac{4}{5}$

D $\frac{5}{6}$

Answer: A

46. If a card is drawn at random from a well shuffled pack of 52 cards, then the probability that it is a spade or a king is

A $\frac{3}{13}$

B $\frac{4}{13}$

C $\frac{2}{13}$

D $\frac{1}{52}$

Answer: B

A I have seen

- B** I seen
- C** I have saw
- D** have I seen

Answer: D

Instructions [184 - 188]

Read the following passage and answer questions

The comradeship of the young both sustains them in their own image of themselves and gives them the emotional sustenance they need for the independence of their lives. They live apart from us. they hold themselves back, and from the untouchable center of their personal lives they look distantly at our existence and our knowledge as items possessed by beings on a different planet. They are not what they seem to the professor who merely looks at the faces before him. He cannot be certain even of their attention, since they have learned how to occupy a classroom and look attentive while they take their minds elsewhere. He cannot be sure of their respect. since they have learned how to be quiet and how to act respectfully. The silence of the present generation has been many ways deceptive, and it is false to assume that the silence has meant either consent or lack of creative and critical thought.

The students must be asked to determine for themselves which books are great, which ideas are viable, which values are compelling. To do otherwise is to use the familiar brand name approach as a form of intellectual propaganda. It is to take the young through an educational tour of the museum of literature. to inspire a dutiful pious attitude to authors other than an attitude of expectancy and involvement.

84. Friendship among youngsters confers upon them

- A** self-awareness and emotional sufficiency
- B** self-awareness derived of emotional involvement
- C** emotional involvement without any self-awareness
- D** neither emotional involvement nor self-sufficiency

Answer: A

85. Students in a classroom

- A** are highly attentive
- B** appear to be attentive
- C** are engrossed in the teacher's lecture
- D** take down notes, rather meticulously

Answer: B

86. The silence of the students is a mark of

- A approval without strings
- B lack of creativity
- C deceptive attitude
- D fear of the future

Answer: C

87. Students must

- A not be allowed to think on their own
- B be allowed freedom of forming opinions
- C totally be guided by their instructors
- D be restricted by a strict code of conduct

Answer: B

88. Which word means 'feasible'?

- A compelling
- B viable
- C dutiful
- D pious

Answer: B

AP SI Free Solved Previous Papers PDF

Instructions [189 - 193]

Read the passage below and answer questions.

Some years ago when executives and managers talked about the type of employees they wanted to contract for their businesses they spoke of skills and qualifications. These words are still used but have been overshadowed by the term competencies. Competencies are a concept taken on board by Human Resource departments to measure a person's appropriateness for a particular job.

In simple terms a competency is a tool that an individual can use in order to demonstrate a high standard of performance. Competencies are characteristics that we use to achieve success. These characteristics or traits can include things like knowledge, aspects of leadership, self-esteem, skills or relationship building. There are a lot of competencies but they are usually divided into groups. Most organizations recognize two main groups and they have numerous sub groups which competencies can be further

divided into.

Competencies can be divided into two distinct types: technical competencies (sometimes referred to as functional) and personal competencies. As the name suggests, technical competencies are those which are related to the skills and knowledge that are essential in order for a person to do a particular job appropriately. An example of a technical competency for a secretary might be: "Word processing: able to word process a text at a rate of 80 words per minute with no mistakes." Personal competencies are not linked to any particular function. They include characteristics that we use together with our technical competencies in order to do our work well. An example of a personal competency is: "interpersonal sensitivity: Demonstrates respect for the opinions of others, even when not in agreement."

Competencies are probably here to stay so it is worth thinking about your own competencies and trying to categorise them: first into the two sub-categories mentioned above and then into a more detailed list.

89. **Which qualities have been found necessary for selecting employees by the managers and executives. until recently?**

- A** money and background
- B** political contacts
- C** skills and qualifications
- D** competency

Answer: C

90. **For achieving success. which of the following is NOT mentioned as necessary in the passage?**

- A** leadership
- B** self-esteem
- C** skills
- D** political clout

Answer: D

91. **Into what categories have competencies been divided?**

- A** Technical and personal
- B** Political and social
- C** Economic and cultural
- D** Manoeuvring and manipulating

Answer: A

200+ Banking Previous Papers (Download PDF)

92. Personal competency results in

- A Inter-personal argument
- B Inter-personal conflict
- C Intra-personal conflict
- D Inter-personal sensitivity

Answer: D

93. According to the passage, in future, the identified competencies are going to be

- A irrelevant
- B relevant
- C outdated
- D abandoned

Answer: B

Instructions [194 - 198]

Read the following passage and answer questions.

A writer creates a world of characters and situations and philosophy that have a life of their own and may have no relation to him. After writing ten novels and a number of short stories, I find that I have created good men, bad men, idiots and saints. Once they have served their purpose, they pass clean out of my memory. I have no time to think of them again, although for months everyone of those characters could have occupied my thoughts obsessively while the story was in progress. Once the last line is written and "The End" is inscribed with a happy flourish, out goes the character. But this is a solution that the reader is not likely to take into account.

A reader is attracted or repelled by a character and expects the writer to offer various explanations and interpretations of the particular character and his or her philosophy. The reader will also have the advantage having gone through the book recently and possibly more than once. But the writer is likely to have forgotten the whole subject, especially if he has had to write a great deal else since then. When people expect him to say wise or significant things about his own book, they may find him tongue-tied and disappointing. In my view to find the author less than the book is an excellent situation.

94. Identify the correct statement:

According to the author, a writer

- A represents in his works his own personal world
- B creates an imaginary world that has no bearing on reality

- C** creates characters and situations which may not be related to his personal life
- D** creates characters and situations drawn from his personal life.

Answer: C

SSC CHSL Previous Question papers (download pdf)

95. The speaker of the passage is a

- A** poet
- B** dramatist
- C** fictionist
- D** critic

Answer: C

96. After writing a book, the writer every character in the novel

- A** does not distinctly remember
- B** distinctly remembers
- C** often recollects
- D** begins to analyse

Answer: A

97. According to the passage, the writer

- A** can speak eloquently about his character
- B** can be disappointing when asked to speak about his own book
- C** is the only authority to speak about his books
- D** is obsessed with his characters even after the book is written.

Answer: B

SSC CHSL Free Mock Test

98. Identify the correct statement based on the last line of the passage

- A** The author prefers to interact with his readers

- B** The author prefers writing to reading books
- C** The author wants his books to be stolen.
- D** The author prefers to remain unknown.

Answer: D

 **SSC CGL Free Mock Test**
