AP ICET 2nd May 2018 Shift-1

Analytics Ability

Instructions [1 - 20]

In the following questions each question is followed by data in the form of two statements labeled as I and II. You must decide whether the data given in the statements are sufficient to answer the questions. Using the data make an appropriate choice from (a) to (d) as per the following guidelines:

1. What is the integer n ?

I. n is a multiple of 5

II. n and $n + 1$ are prime numbers

- A if the statement I alone is sufficient to answer the question.
- B if the statement II alone is sufficient to answer the question.
- C if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

Free Banking Study Material (15000 Solved Questions)

2. Is the integer n odd ?

I. n^3 is even

II. $(n + 1)^3$ is divisible by 3.

- A if the statement I alone is sufficient to answer the question.
- B if the statement II alone is sufficient to answer the question.
- C if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

3. What is the area of triangle $\triangle ABC$?

I. $\triangle ABC$ is isosceles

II. $\triangle ABC$ is inscribed in a circle with center A

- A if the statement I alone is sufficient to answer the question.
- B if the statement II alone is sufficient to answer the question.

- C** if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

4. What is the average of a, b, c, d and e?

I. $a + b + c = 20 - d - e$

II. $d + e = 8$

- A** if the statement I alone is sufficient to answer the question.
- B** if the statement II alone is sufficient to answer the question.
- C** if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Daily Free Banking Online Test

5. Is the positive integer n is divisible by 48?

I. n is a multiple of 12

II. 32 divides n

- A** if the statement I alone is sufficient to answer the question.
- B** if the statement II alone is sufficient to answer the question.
- C** if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

6. Is PQRS a square ?

I. $PR > QS$

II. $PQ = QR = RS = SP$

- A** if the statement I alone is sufficient to answer the question.
- B** if the statement II alone is sufficient to answer the question.

- C** if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

7. What is the total number of students in the class in which 24 are boys?

I. The student strength in the school is 284

II. The ratio of boys and girls in the class is 4: 3

- A** if the statement I alone is sufficient to answer the question.
- B** if the statement II alone is sufficient to answer the question.
- C** if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

200+ Free GK Tests for Banking exams

8. What is distance between A and B ?

I. A person P walked from A to B in 50 minutes at a speed of 6 Kmph

II. A person Q took 10 minutes to reach B from A on a motorcycle.

- A** if the statement I alone is sufficient to answer the question.
- B** if the statement II alone is sufficient to answer the question.
- C** if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

9. How many women are needed to complete the work in 10 days?

I. 6 men and 8 women can complete the work in 8 days.

II. 4 women and 3 men can complete the work in 16 days.

- A** if the statement I alone is sufficient to answer the question.
- B** if the statement II alone is sufficient to answer the question.

- C** if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

10. **What is the total interest on principal amount Rs.20,000 for two years period?**

I. The rate of interest is 8% per annum.

II. It is compounded every quarterly.

- A** if the statement I alone is sufficient to answer the question.
- B** if the statement II alone is sufficient to answer the question.
- C** if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

11. **Is the triangle with sides a, b and c equilateral?**

I. $a^2 = b^2 + c^2$

II. $a < b + c$

- A** if the statement I alone is sufficient to answer the question.
- B** if the statement II alone is sufficient to answer the question.
- C** if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

12. **How much amount is needed to fence the circular field?**

I. The radius of the field is half of its diameter.

II. The diameter of the field is 200 mts and the cost of fencing is Rs. 10 per meter.

- A** if the statement I alone is sufficient to answer the question.
- B** if the statement II alone is sufficient to answer the question.

- C** if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

13. In a triangle ABC , $\angle B = 90^\circ$. Then what is $AB : BC : CA$?

I. $\tan C = \frac{1}{2}$

II. $\sin^2 A + \cos^2 A = 1$

- A** if the statement I alone is sufficient to answer the question.
- B** if the statement II alone is sufficient to answer the question.
- C** if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Whatsapp "JOB" to 7661025557 for Updates

14. What is the length of the train?

I. The train crosses a man standing on the platform in 15 seconds.

II. The train crosses its own length in 25 seconds.

- A** if the statement I alone is sufficient to answer the question.
- B** if the statement II alone is sufficient to answer the question.
- C** if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

15. What is the slope of the line l in the xy - plane?

I. l passes through origin.

II. l passes through $(1, 4)$

- A** if the statement I alone is sufficient to answer the question.
- B** if the statement II alone is sufficient to answer the question.

- C** if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: C

16. What is the area of the triangle whose sides are a , b and c ?

I. $a + b = 14$

II. $b + c = 18$

- A** if the statement I alone is sufficient to answer the question.
- B** if the statement II alone is sufficient to answer the question.
- C** if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

AP SI Free Solved Previous Papers PDF

17. In how many days a piece of work can be completed by three men A, B and C?

I. Individually A and B can do the same amount of work in a day.

II. C can do double the amount of work than that of A.

- A** if the statement I alone is sufficient to answer the question.
- B** if the statement II alone is sufficient to answer the question.
- C** if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: D

18. What is the product of divisors of the natural number n ?

I. $d_1, d_2, \dots, d_k$ are all the positive divisors of n

II. $n > 2$

- A** if the statement I alone is sufficient to answer the question.
- B** if the statement II alone is sufficient to answer the question.

- C** if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

19. For real numbers x and y what is the value of $x + 2y$?

I. $x > 0, y > 0$

II. $x^2 + 4y^2 + 4xy = 0$

- A** if the statement I alone is sufficient to answer the question.
- B** if the statement II alone is sufficient to answer the question.
- C** if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: B

200+ Banking Previous Papers (Download PDF)

20. What is the ratio of the length to the diagonal of a rectangle whose dimensions are a and b ?

I. $4a^2 + 9b^2 = 12ab$

II. $a > 0, b > 0$

- A** if the statement I alone is sufficient to answer the question.
- B** if the statement II alone is sufficient to answer the question.
- C** if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- D** if both the statements I and II together are not sufficient to answer the question and additional data is required.

Answer: A

Instructions [21 - 30]

In each of the Following 10 questions a sequence of numbers or letters that follow a definite pattern is given. Each question has a blank space. This has to be filled by the correct answer from the four given options to complete the sequence without breaking the pattern.

21. $216 : 6 :: 512 : \dots\dots\dots$

- A** 8

- B** 7
- C** 9
- D** 12

Answer: A

22. **8 : 72 :: : 819**

- A** 66
- B** 91
- C** 86
- D** 88

Answer: B

Instructions [45 - 47]

The graph shown below gives the sales of the weapons during the years 2008 to 2016. Study the graph and answer the following questions.

45. During which year, the sales witnessed a sharp down fall?

A 2008-2009

B 2014-2015

C 2010-2011

D 2011-2012

Answer: B

Free Banking Study Material (15000 Solved Questions)

46. During which year the sales witnessed a sharp rise?

A 2013-2014

B 2014-2015

C 2008-2009

D 2015-2016

Answer: A

47. During which year consecutive sales witnessed down fall?

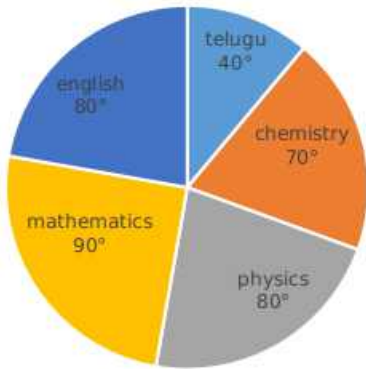

A 2010-2011, 2011-2012

- B** 2011-2012, 2012-2013
- C** 2009-2010, 2010-2011
- D** 2008-2009, 2009-2010

Answer: C

Instructions [48 - 52]

The following pie chart shows the marks obtained by a student in five subjects. The total marks obtained by him in all the five subjects are 900. Study this chart and answer the following questions.

48. Marks obtained by him in mathematics is

- A** 228
- B** 225
- C** 224
- D** 226

Answer: B

Daily Free Banking Online Test

49. The marks obtained by him in physics is

- A** 180
- B** 220
- C** 200
- D** 190

Answer: C

50. The approximate percentage of marks obtained by him in English in total marks is

- A** 21.8

B 20.4

C 23.2

D 22.2

Answer: D

51. The total marks obtained by him in two languages together is

A 300

B 320

C 280

D 340

Answer: A

200+ Free GK Tests for Banking exams

52. The percentage of marks obtained by him in Telugu alone in the total marks

A $22\frac{2}{9}$

B $11\frac{1}{9}$

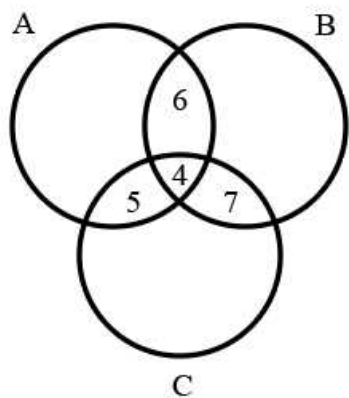

C 40

D 15

Answer: B

Instructions [53 - 54]

In the Venn diagram given below, $n(A) = 24$, $n(B) = 30$, and $n(C) = 36$. Study this diagram and answer the following questions.

53. $n(A \cup B) =$

A 48

B 44

C 50

D 46

Answer: B

54. $n(A \cup B \cup C) =$

A 62

B 72

C 68

D 64

Answer: D

Instructions [55 - 59]

The numbers 0 to 9 are coded as follows by considering the exceptions given below:

9	0	8	5	1	3	4	2	7	6
F	C	I	B	A	G	E	J	D	H

Exception (1): If a number starts and ends with non zero odd digits, then the first and last digits should be coded as P and Q respectively.

Exception (2): If a number starts and ends with non zero even digits, then first and the last digits should be coded X and Y respectively.

55. **What is the code for 389167**

A GIFBHD

B PIFADQ

C PIFAHQ

D GIFAHD

Answer: C

56. **What is the code for 278140 ?**

64. What is the code for 'KILL'?

A MIGG

B IKNN

C IGNN

D IGJJ

Answer: C

65. What is the day of the week was it on 5th November 1987 if it was Monday on 4th April 1988?

A Wednesday

B Thursday

C Sunday

D Friday

Answer: B

66. At what point of time after 3'O clock the hour hand and the minute hand are at right angles for the first time?

A 3 hr 30 min

B 3 hr 30 $\frac{8}{11}$ min

C 3 hr 32 $\frac{8}{11}$ min

D 9 'O clock

Answer: C

SSC CHSL Previous Question papers (download pdf)

67. A watch which gains uniformly, is 5 minutes slow at 7'O clock in the morning on a Sunday and it is 5 minutes 48 sec fast at 7 pm on the following Sunday. Which day was it correctly showing?

A Friday

B Saturday

C Wednesday

D Tuesday

Answer: C

68. P is the father of R and is the son of Q and T is the youngest brother of P. If R is the sister of S, how is Q related to T?

A Sister-in-law

- B** Daughter-in-law
- C** Brother-in-law
- D** Mother-in-law

Answer: A

69. Reaching the meeting place 20 minutes before 8.50 hrs, Satish found himself 30 minutes earlier than the man who comes 40 minutes late. What was the scheduled time of the meeting?

- A** 08.10
- B** 08.20
- C** 08.00
- D** 08.05

Answer: B

SSC CHSL Free Mock Test

70. There is a metro train between stations X and Y every 15 minutes. An announcement was made at station that next train will depart in another 11 minutes as the previous train left at 2.18 PM. At what time was the announcement made?

- A** 2.20 pm
- B** 2.21 pm
- C** 2.22 pm
- D** 2.23 pm

Answer: C

71. Nine persons J, K, L, M, N, O, P, Q and R are sitting in a row facing the same direction. L is at the right of M and at the third place at the right of N. K is at one end of the row. Q is seated adjacent to both O and P. O is at the third place at the left of K. J is next to left of O. Which one of the following is true?

- A** N is two seats away from J
- B** M is in one extreme end.
- C** R and L are neighbors
- D** Only one Person is in between O and L

Answer: D

72. If $\square$ and $\rightarrow$ are defined by $a \square b = \frac{a-b}{a+b}$ and $a \rightarrow b = ab$ then $\frac{(66 \square 6) \rightarrow 66}{55 \square 5} =$

- A 60
- B 66
- C 50
- D 55

Answer: B

SSC CGL Free Mock Test

73. By applying which one of the following meaning of arithmetical signs will the value of $700 - 10 \div \frac{1}{2} \times 35 + 70 = 0$

- A $\times$ means $\div$, $+$ means $\times$, $\div$ means $+$, $-$ means $-$
- B $\times$ means $+$, $+$ means $-$, $\div$ means $\times$, $-$ means $+$
- C $\times$ means $+$, $+$ means $-$, $\div$ means $\times$, $-$ means $\div$
- D $\times$ means $\div$, $+$ means $-$, $\div$ means $\times$, $-$ means $+$

Answer: C

74. If $\rightarrow$ stands for addition

$\leftarrow$ stands for subtraction

$\uparrow$ stands for division

$\downarrow$ stands for multiplication

$\square$ stands for equal to

Then which one of the following is true.

- A $3 \downarrow 6 \uparrow 2 \rightarrow 3 \leftarrow 6 \square 5$
- B $7 \leftarrow 43 \uparrow 6 \downarrow 1 \square 4$
- C $2 \downarrow 5 \leftarrow 6 \rightarrow 2 \square 6$
- D $5 \rightarrow 7 \leftarrow 3 \uparrow 2 \square 4$

Answer: C

Mathematical Ability

75. If $f(x, y) = x^n \cdot y^m$ and $f\left(4x, \frac{y}{2}\right) = k \cdot f(x, y)$ then $k =$

- A $4n - \frac{m}{2}$
- B $2(n - m)$
- C 2^{2n-m}
- D 2^{m-2n}

Answer: C

SSC CGL PREVIOUS PAPERS (download pdf)

76. If $2^x = 4^y = 8^z$ and $xyz = 288$, then, $x + y + z =$

- A 22
- B 24
- C 25
- D 26

Answer: A

Explanation:

$$2^x = 4^y = 8^z$$

$$2^x = 2^{2y} = 2^{3z}$$

$$\Rightarrow x = 2y = 3z$$

$$\text{Let } x = 2y = 3z = k$$

$$xyz = 288$$

$$\Rightarrow k \cdot k/2 \cdot k/3 = 288$$

$$\Rightarrow k^3 = 1728 \Rightarrow k = 12$$

$$x=12, y=6 \text{ and } z = 4$$

$$x+y+z=22$$

77. If $25x^2 + 13y^2 + z^2 = 30xy + 4yz$ then $x : y : z =$

- A $3 : 5 : 10$
- B $3 : 5 : 8$
- C $10 : 5 : 3$
- D $8 : 5 : 3$

Answer: A

78. A, B and C are co-workers in a company and their total salary is Rs. 94,000/-. The salaries of A and B are in the ratio 5 : 6; that of B and C are in the ratio 3:2. If the salaries of C and A are in the ratio 4:5 then the salary of B (in thousands of rupees) is

A 45

B 25

C 24

D 40

Answer: A

Explanation:

Given, total salary of A, B and C = Rs. 94,000

$$A : B = 5:6$$

$$B : C = 3:2 = 6:4$$

$$\Rightarrow A : B : C = 5:6:4$$

$$\therefore \text{Salary of B} = \frac{6}{5+6+4} \times 94000 = \frac{6}{15} \times 94000 = 45,000$$

SBI PO Solved Previous Papers (Download PDF)

79. If $\sqrt{15 - 2\sqrt{35} - 2\sqrt{15} + 2\sqrt{21}} = \sqrt{a} - \sqrt{b} + \sqrt{c}$ then $a^2 - c^2 =$

A $b^2 - 1$

B $b^2 + 1$

C $b(b + 3)$

D $b(b + 1)$

Answer: C

80. $\sqrt{21 - 4\sqrt{5} + 8\sqrt{3} - 4\sqrt{15}} =$

A $2 - \sqrt{5} - 2\sqrt{3}$

B $2 + \sqrt{5} - 2\sqrt{3}$

C $2 - \sqrt{5} + 2\sqrt{3}$

D $2 + \sqrt{5} + 2\sqrt{3}$

Answer: C

Explanation:

$$\sqrt{21 - 4\sqrt{5} + 8\sqrt{3} - 4\sqrt{15}} =$$

$$\sqrt{2^2 + (-\sqrt{5})^2 + (2\sqrt{3})^2 + 2 \cdot 2 \cdot -\sqrt{5} + 2 \cdot (-\sqrt{5}) (2\sqrt{3}) + 2 \cdot (2\sqrt{3}) \cdot 2} =$$

Which is in the form $a^2 + b^2 + c^2 + 2ab + 2bc + 2ca = (a + b + c)^2$

$$\text{hence } \sqrt{21 - 4\sqrt{5} + 8\sqrt{3} - 4\sqrt{15}} = 2 - \sqrt{5} + 2\sqrt{3}$$

81. When a number is divided by 75, the remainder is 28. The remainder when the same number is divided by 25 is

A 5

B 4

C 3

D 2

Answer: C

Explanation:

The number will be of the form $(75k+28)$

$$75k+28 = 75k+25+3 = 25(3k+1)+3 = 25p+3$$

$\therefore$ The remainder when $(75k+28)$ is divided by 25 = 3

Hence, the correct answer is Option C

SBI Clerk Free Mock Test (Latest Pattern)

82. Sum of all integers lying between 200 and 400 that are multiples of 7 is

A 8268

B 8428

C 8612

D 8729

Answer: D

Explanation:

The integers between 200 and 400 divisible by 7 are 203, 210, 399

$\therefore$ Required Sum = $203 + 210 + \dots + 399$

$$= 7[29 + 30 + \dots + 57]$$

$$= 7\left[\frac{29}{2} (29 + 57)\right]$$

$$= 7\left[\frac{29}{2} (86)\right]$$

$$= 7 \times 29 \times 43$$

$$= 8729$$

Hence, the correct answer is Option D

83. A, B and C respectively take 27, 36 and 45 seconds to run around a track. All of them start at a point P on the track simultaneously. The number of rounds made by C when all of them meet next at P is

A 12

B 15

C 20

D 24

Answer: A

Explanation:

LCM of 27, 36, 45 = 540

A, B, C will again meet at P after every 540 seconds.

$\therefore$ Number of rounds made by C in 540 seconds = $\frac{540}{45} = 12$

Hence, the correct answer is Option A

84. State a pair of numbers, whose sum is 184 and whose greatest common divisor is 23

A 53, 131

B 69, 115

C 79, 105

D 84, 100

Answer: B

Explanation:

53 is not divisible by 23, hence option A is eliminated

79 is not divisible by 23, hence option C is eliminated

84 is not divisible by 23, hence option D is eliminated

SBI Clerk Previous Papers (Download PDF)

85. The rational numbers with recurring decimal expansion 0.12 is

A $\frac{7}{33}$

B $\frac{6}{43}$

C $\frac{4}{43}$

D $\frac{4}{33}$

Answer: D

Explanation:

Let $a = 0.12 \dots\dots(1)$

$$\Rightarrow 100a = 12.12 \dots\dots(2)$$

Solving equation(2) - equation(1)

$$99a = 12$$

$$\Rightarrow a = \frac{12}{99}$$

$$\Rightarrow a = \frac{4}{33}$$

$$\Rightarrow 0.12 = \frac{4}{33}$$

Hence, the correct answer is Option D

86. If p is the smallest prime with $7p > 5$ and q is the largest prime with $7q < 497$ then the rational number $\frac{p}{q} =$

A $\frac{1}{67}$

B $\frac{2}{71}$

C $\frac{2}{67}$

D $\frac{1}{71}$

Answer: C

Explanation:

Given, $7p > 5$

$$\Rightarrow p > \frac{5}{7}$$

$$\Rightarrow p > 0.714$$

The smallest prime number greater than 0.714 is 2

$$\Rightarrow p = 2$$

$$7q < 497$$

$$\Rightarrow q < 71$$

The largest prime number less than 71 is 67

$$\Rightarrow q = 67$$

$$\therefore \frac{p}{q} = \frac{2}{67}$$

87. The greatest among $\frac{3}{5}, \frac{6}{7}, \frac{5}{8}, \frac{7}{9}$ is

A $\frac{3}{5}$

B $\frac{6}{7}$

C $\frac{5}{8}$

D $\frac{7}{9}$

Answer: B

Explanation:

$$\frac{3}{5} = 0.6$$

$$\frac{6}{7} = 0.8$$

$$\frac{5}{8} = 0.62$$

$$\frac{7}{9} = 0.77$$

$\therefore$ The greatest among $\frac{3}{5}, \frac{6}{7}, \frac{5}{8}, \frac{7}{9}$ is $\frac{6}{7}$

Hence, the correct answer is Option B

Free Banking Study Material (15000 Solved Questions)

88. If $a = \sqrt[3]{4}, b = \sqrt[4]{5}, c = \sqrt[4]{7}$ and $d = \sqrt[3]{9}$, then their correct ordering is

A $a < b < c < d$

B $b < a < d < c$

C $b < a < c < d$

D $a < d < b < c$

Answer: C

Explanation:

$$a = \sqrt[3]{4} = \sqrt[12]{256}$$

$$b = \sqrt[4]{5} = \sqrt[12]{125}$$

$$c = \sqrt[4]{7} = \sqrt[12]{343}$$

$$d = \sqrt[3]{9} = \sqrt[12]{6561}$$

hence $b < a < c < d$

89. In a fraction if the numerator is increased by 20% and the denominator is decreased by 10% the fraction becomes $\frac{16}{21}$. Then the original fraction is

A $\frac{4}{7}$

B $\frac{5}{7}$

C $\frac{6}{11}$

D $\frac{7}{11}$

Answer: A

Explanation:

Let numerator = x

and denominator = y

New numerator = 1.2x

New denominator = 0.9y

Given,

$$1.2x/0.9y = 16/21$$

$$\Rightarrow x/y = 4/7$$

90. The total number of students in the class with 36 boys and the rest 55% girls is

A 74

B 76

C 80

D 85

Answer: C

Explanation:

Given, number of boys in the class = 36

Percentage of girls in the class = 55%

$\Rightarrow$ Percentage of boys in the class = 45%

Let total students in the class = x

$$\Rightarrow 45\% \text{ of } x = 36$$

$$\Rightarrow \frac{45}{100}x = 36$$

$$\Rightarrow x = 80$$

$\therefore$ Total number of students in the class = 80

Daily Free Banking Online Test

91. Selling two items each at Rs 240/-, a merchant gets, a profit of 20% on one of them and incurs a loss of 20% on the other. In the whole transaction the merchant gets

- A 4% profit
- B 4% loss
- C 10% profit
- D 10% loss

Answer: B

Explanation:

$$SP_1 = 240$$

$$CP_1 = 240/1.2 = 200 \text{ Rs}$$

$$SP_2 = 240$$

$$CP_2 = 240/0.8 = 300$$

$$\text{Total SP} = 480 \text{ and total CP} = 500$$

$$\text{Loss \%} = 20/500 = 4\%$$

92. A sales man writes the price of each article he sells as 50% above the cost price. He allows some discount and makes a profit of 20% still. The rate of discount is

- A 20%
- B 25%
- C 22.5%
- D 15%

Answer: A

Explanation:

$$\text{Let CP} = 100 \text{ Rs}$$

According to the problem,

$$MP = \frac{150}{100} \times 100 = \text{Rs } 150$$

$$\text{Profit\%} = 20\%$$

$$SP = \frac{120}{100} \times 100 = \text{Rs } 120$$

$$\text{Discount} = 150 - 120 = \text{Rs } 30$$

$$\text{Discount\%} = \frac{30}{150} \times 100 = 20\%$$

Hence, the correct answer is Option A

93. A started a business with B joining him investing 60% more than the investment of A after 4 months. If B gets Rs 20,000/- more in the year-end profit then the total profit (in lakhs of rupees)

- A** 7.2
- B** 6.2
- C** 5.2
- D** 4.2

Answer: B

200+ Free GK Tests for Banking exams

94. A, B, C enter into a business partnership such that 3 times the capital of A is equal to 4 times the capital of B which is equal to 5 times the capital of C. The ratio of their capitals is

- A** 3:4:5
- B** 20:15:12
- C** 9:16:10
- D** 15:18:22

Answer: B

Explanation:

Let the capitals of A, B, C are a, b, c respectively

According to the problem, $3a = 4b = 5c$

Let $3a = 4b = 5c = t$

$$\Rightarrow a = \frac{t}{3}, b = \frac{t}{4}, c = \frac{t}{5}$$

$\therefore$ Ratio of their capitals = $a : b : c$

$$= \frac{t}{3} : \frac{t}{4} : \frac{t}{5}$$

$$= \frac{1}{3} : \frac{1}{4} : \frac{1}{5}$$

$$= \frac{60}{3} : \frac{60}{4} : \frac{60}{5}$$

$$= 20 : 15 : 12$$

95. Two pipes A and B can fill an empty tank independently in 20 minutes and 30 minutes respectively. To fill the empty tank both of the pipes were opened at a time and after 4 minutes tap A is closed. The total time (in minutes) takes to fill the tank is

- A** 34
- B** 30
- C** 24
- D** 20

Answer: C

Explanation:

Let the capacity of tank = 60 litres

Speed of A = $60/20 = 3$ litres/min

Speed of B = $60/30 = 2$ litres/min

In 4 min, A will fill 12 l and B will fill 8 l. Total 20 litres

Left = 40 litres

Time required by B to fill remaining = $40/2 = 20$ min

Total time = 24 min

96. A pipe A can fill a tank 3 times faster than a pipe B and takes 28 min less time than pipe B to fill a cistern. If both pipes are opened simultaneously, the time (in minutes) to fill that tank is

A 14

B $11\frac{1}{2}$

C $10\frac{1}{2}$

D 9

Answer: C

Latest Job Updates on Telegram - Join here

97. If the ratio of the speeds of three trains is 3:4:5 then the ratio of the times taken by them to cover the same distance is

A 5:4:3

B 20:15:12

C 12:15:20

D 3:4:5

Answer: B

Explanation:

Time and speed are inversely proportional

hence ratio of times = $\frac{1}{3} : \frac{1}{4} : \frac{1}{5}$

Multiply by 60, we get 20:15:12

98. 600 meters long train is running at the speed of 72 kmph. If it crosses a tunnel in 1 minute. then the length of the tunnel (in meters) is

- A** 500
- B** 800
- C** 600
- D** 900

Answer: C

Explanation:

Let length of the tunnel = x

Length of the train = 600 m

Speed of the train = $72 \text{ km/h} = 72 \times \frac{1000}{3600} \text{ m/sec} = 20 \text{ m/sec}$

Time = 1 min = 60 sec

Speed = $\frac{\text{distance}}{\text{time}}$

$$\Rightarrow 20 = \frac{600+x}{60}$$

$$\Rightarrow x + 600 = 1200$$

$$\Rightarrow x = 600 \text{ m}$$

$\therefore$ Length of the tunnel = 600 m

99. **A can do a work in 12 days while B needs 16 days to do the same work. After working 4 days together, B left the work. The number of days for A alone to complete the remaining work is**

- A** 5
- B** 4
- C** 3
- D** 2

Answer: A

Whatsapp "JOB" to 7661025557 for Updates

00. **If 5 men or 9 women can finish a piece of work in 19 days, then the number of days for 3 men and 6 women to finish the same work is**

- A** 12
- B** 15
- C** 14
- D** 16

Answer: B

Explanation:

Let the total work = W

Number of days required for 9 women to finish the work = 19 days

$$\Rightarrow \text{Work done by 9 women in 1 day} = \frac{W}{19}$$

$$\Rightarrow \text{Work done by 1 woman in 1 day} = \frac{W}{19 \times 9}$$

5 men or 9 women can finish the work in 19 days

$$\Rightarrow 5 \text{ men} = 9 \text{ women}$$

$$\Rightarrow 1 \text{ man} = \frac{9}{5} \text{ women}$$

$$3 \text{ men and 6 women} = 3\left(\frac{9}{5} \text{ women}\right) + 6 \text{ women} = \frac{27}{5} \text{ women} + 6 \text{ women} = \frac{57}{5} \text{ women}$$

$$\text{Work done by } \frac{57}{5} \text{ women in 1 day} = \frac{57}{5} \times \frac{W}{19 \times 9} = \frac{W}{15}$$

Number of days required for $\frac{57}{5}$ women to complete the work = 15 days

$\therefore$ Number of days required for 3 men and 6 women = 15 days

01. In a circle of radius 7 cms, a sector is of $\frac{77}{3}$ sq.cms area. Then the sectorial angle is (Taking $\pi = \frac{22}{7}$)

A 30°

B 45°

C 60°

D 90°

Answer: C

Explanation:

$$\text{Area of sector} = \frac{\theta}{360} \cdot \pi r^2 = \frac{77}{3}$$

$$\Rightarrow \frac{\theta}{360} \cdot \frac{22}{7} \cdot 7^2 = \frac{77}{3}$$

$$\Rightarrow \text{angle} = 60$$

02. The length of a rectangle is thrice its breadth and its perimeter is 96 cm. The area (in square centimetres) of the rectangle is

A 342

B 432

C 452

D 428

Answer: B

Explanation:

Let length = $3b$ and breadth = b

Perimeter = $2(b+3b) = 96$

$\Rightarrow 4b = 48 \Rightarrow b = 12$

Hence $l = 36$ and $b = 12$

Area = $36 \times 12 = 432$

AP SI Free Solved Previous Papers PDF

03. A rain of 2cm fall on a land of 1 sq.km. If 50% of rain water has been driven into a pool having base of dimensions (200 m X 10 m), then the increase (in meters) of water level of the pool

- A 2
- B 4
- C 5
- D 10

Answer: C

04. One cubic meter of aluminium is used to prepare a sheet of 10000 square meters. The thickness (in cm) of the sheet is

- A 10
- B 1
- C 0.1
- D 0.01

Answer: D

Explanation:

Let thickness = a meters

According to the problem,

$$a \times 10000 \text{ m}^2 = 1 \text{ m}^3$$

$$\Rightarrow a \times 10000 = 1 \text{ m}$$

$$\Rightarrow a \times 10000 = 100 \text{ cm}$$

$$\Rightarrow a = \frac{1}{100} \text{ cm}$$

$$\Rightarrow a = 0.01 \text{ cm}$$

Hence, the correct answer is Option D

05. The area of a parallelogram is 128 sq.cm and its altitude is twice the base. Then the base (in cms) is

- A** 9
- B** 7
- C** 6
- D** 8

Answer: D

Explanation:

Given, $h = 2b$

Area of parallelogram = base x height

$$\Rightarrow b \times h = 128$$

$$\Rightarrow b \times 2b = 128$$

$$\Rightarrow b^2 = 64$$

$$\Rightarrow b = 8 \text{ cm}$$

$\therefore$ Base of parallelogram = 8 cm

200+ Banking Previous Papers (Download PDF)

06. A rectangular plot of perimeter 46 meters has area of 120 sq. meters. The length (in meters) of its diagonal is

- A** 13
- B** 15
- C** 17
- D** 20

Answer: C

Explanation:

Let length = l

Breadth = b

Given, $lb = 120$ and $l + b = 23$

$$\text{Squaring on both sides, } l^2 + b^2 + 2lb = 529$$

$$l^2 + b^2 = 529 - 2(120)$$

$$\Rightarrow l^2 + b^2 = 289$$

$$\text{Length of diagonal} = \sqrt{l^2 + b^2} = \sqrt{289} = 17$$

07. A paper is in square form with a side 20cm. Two semicircles are drawn on its opposite sides as diameters. If these semicircles are cut down. the area (in sq.cm) of the remaining part of the paper is

- A** $400 - 200\pi$
- B** $400 - 100\pi$
- C** $400 - 50\pi$
- D** $400 - 80\pi$

Answer: B

08. $3214_{(7)}$ in decimal system is

- A** $1138_{(10)}$
- B** $1248_{(10)}$
- C** $1038_{(10)}$
- D** $1148_{(10)}$

Answer: A

Explanation:

$$3214_{(7)} = 4(7^0) + 1(7) + 2(7^2) + 3(7^3) = 1138$$

$\therefore$ In decimal system, $3214_{(7)} = 1138_{(10)}$

Hence, the correct answer is Option A

SSC CHSL Previous Question papers (download pdf)

09. For any integer k let $k^* = 2k - 5$. Then the number of elements in the set $S = \{x : (x^*)^* = x\}$ is

- A** 1
- B** 3
- C** 5
- D** 0

Answer: A

10. If p and q are statements then $\sim(p \vee q)$ is equivalent to

- A** $(\sim p) \vee (\sim q)$
- B** $(\sim p) \wedge (\sim q)$
- C** $(\sim p) \vee q$
- D** $p \vee (\sim q)$

Answer: B

11. A tautology, among the following is

A $(p \vee Q) \rightarrow (p \wedge Q)$

B $p \rightarrow (p \wedge Q)$

C $(p \vee q) \rightarrow p$

D $(p \wedge q) \rightarrow q$

Answer: D

SSC CHSL Free Mock Test

12. If $E_n =]\{x \in \mathbb{R} : -\frac{1}{n} < x < 0\}$ for $n = 1, 2, 3, \dots$ then $\bigcap_{n=1}^{\infty} E_n =$

A $\mathbb{R}$

B $\{0\}$

C ϕ , the empty set

D $(-\infty, 0)$

Answer: C

13. The number of functions from $\{a, b, c, d, e\}$ into $\{1, 2\}$ is

A 28

B 31

C 16

D 32

Answer: D

14. If $f(x) = \frac{x-1}{x+2}; x \neq -2$, then $f^{-1}(4) =$

A -3

B 3

C -5

D 5

Answer: A

Explanation:

$$f'(x) = \frac{\left((x-2)^1 - (x-1)^1 \right)}{(x-2)^2} =$$

SSC CGL Free Mock Test

15. The equation of the line passing through $(-4, 3)$ and parallel to the line joining the points $(1, -3)$ and $(-5, 1)$ is

- A $3x + 4y = 0$
- B $5x + 6y + 2 = 0$
- C $2x + 3y = 7$
- D $2x + 3y = 1$

Answer: D

16. The equation of a straight line passing through the intersection of the lines $x + 2y - 19 = 0$ and $x - 2y - 3 = 0$ and at 5 units distance from $(-2, 4)$ is

- A $x - y - 7 = 0$
- B $2x - 3y - 10 = 0$
- C $3x - 8y - 1 = 0$
- D $5x - 12y - 7 = 0$

Answer: D

17. $\sin 0^\circ + \cos 30^\circ - \tan 45^\circ + \operatorname{cosec} 60^\circ + \cot 90^\circ =$

- A $\frac{7\sqrt{3} - 6}{2\sqrt{3}}$
- B $\frac{7\sqrt{3} + 6}{6}$
- C $\frac{7\sqrt{3} - 6}{6}$
- D $\frac{7\sqrt{3} + 5}{6}$

Answer: C

Explanation:

$$\sin 0^\circ + \cos 30^\circ - \tan 45^\circ + \operatorname{cosec} 60^\circ + \cot 90^\circ = 0 + \frac{\sqrt{3}}{2} - 1 + \frac{2}{\sqrt{3}} + 0 = \frac{(7-2\sqrt{3})}{2\sqrt{3}} = \frac{(7\sqrt{3}-6)}{6}$$

SSC CGL Free Online Coaching

18. If $\sin \theta = -\frac{1}{2}$ and $\cot \theta = -\sqrt{3}$ then the minimum value that θ can take is

- A** 30°
- B** 150°
- C** 210°
- D** 330°

Answer: D

19. $\sin^2 \frac{\pi}{4} + \sin^2 \frac{3\pi}{4} + \sin^2 \frac{5\pi}{4} + \sin^2 \frac{7\pi}{4} =$

- A** 0
- B** 1
- C** 2
- D** 4

Answer: C

20. Two boys who are on either side of a tower of 100 meters height observe that the angles of elevation of the top of the tower are 30° and 45° . The distance (in meters) between the boys is

- A** $100(2 + \sqrt{3})$
- B** $100(1 - \sqrt{3})$
- C** $100(1 + \sqrt{3})$
- D** $100(2 - \sqrt{3})$

Answer: C

SSC CGL PREVIOUS PAPERS (download pdf)

21. For $a \neq b$, if the quadratic expression $x^2 + ax + b$ and $x^2 + bx + a$ have a common factor, then the relation between a and b is

- A** $a = b - 1$
- B** $a = b + 1$
- C** $a + b = 1$
- D** $a + b + 1 = 0$

Answer: D

22. If $f(x)$ and $g(x)$ are polynomials of degrees 3 and 2 respectively then $f(g(x))$ is of degree

- A 9
- B 8
- C 6
- D 5

Answer: C

23. If two of the factors of the polynomial $x^3 + x^2 - 10x + 8$ and $x - 1$ and $x - 2$ then the third factors is

- A $x + 4$
- B $x - 4$
- C $x + 6$
- D $x - 6$

Answer: A

Explanation:

If $x + a$ is factor of a polynomial $f(x)$, then $f(-a)$ should be zero

$$f(-4) = (-4)^3 + (-4)^2 - 10(-4) + 8 = 0$$

Hence $x + 4$ is the third factor.

SBI PO Solved Previous Papers (Download PDF)

24. If the remainders when the polynomial $f(x)$ is divided by $x - 1$ and $x + 1$ are 3 and 4 respectively. then the remainder when $f(x)$ is divided by $x^2 - 1$ is

- A $7 - x$
- B $\frac{1}{2}(7 - x)$
- C $\frac{1}{2}(x - 7)$
- D $x - 7$

Answer: B

25. If 5 is subtracted from each of the two numbers their ratio becomes 1:2. while 1 is added to each. their ratio becomes 8:13. Then the difference between those numbers is

- A 5
- B 8
- C 9

D 10

Answer: D

Explanation:

Let the numbers be x, y

$$\text{Given, } \frac{(x-5)}{(y-5)} = \frac{1}{2} \Rightarrow 2x - y = 5$$

$$\text{Given, } \frac{(x+1)}{(y+1)} = \frac{8}{13} \Rightarrow 13x - 8y = -5$$

Solving we get $x=15$ and $y=25$

Difference = 10

26. The point (x, y) in the plane for which $6x + 6y = 5xy$ and $6y - 6x = xy$ is

A $\left(\frac{1}{2}, \frac{1}{3}\right)$

B $\left(-\frac{1}{2}, -\frac{1}{3}\right)$

C (2, 3)

D (-2, -3)

Answer: C

Explanation:

Given, equation of planes is

$$6x + 6y = 5xy \dots\dots(1)$$

$$6y - 6x = xy \dots\dots(2)$$

Solving equation (1) + equation (2)

$$12y = 6xy$$

$$\Rightarrow 12y - 6xy = 0$$

$$\Rightarrow 6y(2-x) = 0$$

$$\Rightarrow y = 0 \text{ or } 2-x = 0$$

$$\Rightarrow y = 0 \text{ or } x = 2$$

From equation (1)

$$\text{When } y = 0, 6x + 0 = 0 \Rightarrow x = 0$$

$$\text{When } x = 2, 6(2) + 6y = 5(2)y \Rightarrow y = 3$$

$\therefore$ Required point is (2,3)

SBI Clerk Free Mock Test (Latest Pattern)

27. In an arithmetic progression the 8^{th} and 19^{th} terms are respectively 17 and 39. The 25^{th} term of it is

A 56

B 51

C 47

D 45

Answer: B

Explanation:

Given, a_8 and a_{19} terms of the arithmetic progression are 17 and 39

$$\Rightarrow a + 7d = 17 \text{ and } a + 18d = 39$$

Solving the above two we get $11d = 22$

$$\Rightarrow d = 2 \text{ and } a = 3$$

$$\text{Hence 25th term} = a + 24d = 3 + 24(2) = 51$$

28. $1 + \frac{3}{4} + \frac{5}{16} + \frac{7}{64} + \dots \infty =$

A $\frac{1}{9}$

B $\frac{8}{9}$

C $\frac{15}{9}$

D $\frac{20}{9}$

Answer: D

29. The term independent of x in the binomial expansion of $\left(x - \frac{1}{x^2}\right)^{3n}$ is

A $(3n)C_{2n}$

B $(3n)C_n$

C $(-1)^n \cdot (3n)C_{2n}$

D $(-1)^n \cdot (3n)C_n$

Answer: C

SBI Clerk Previous Papers (Download PDF)

30. The coefficient of x^8 in $\left(x - \frac{2}{x}\right)^{20}$ is

A $^{20}C_6$

B $^{20}C_6 \cdot 2^8$

C $^{20}C_6 \cdot 2^6$

D $^{20}C_6 \cdot 2^4$

Answer: C

31. If the system of equations $3x - 2y + z = 0$, $\lambda x - 14y + 15z = 0$, $x + 2y + 3z = 0$ has non-trivial solution, then λ is a root of the equation

- A $\lambda^2 - 4\lambda + 5 = 0$
- B $\lambda^2 - 29\lambda + 56 = 0$
- C $\lambda^2 - 29\lambda - 1600 = 0$
- D $\lambda^2 - 31\lambda + 58 = 0$

Answer: D

32. $A = \begin{bmatrix} 4 & 0 & 0 \\ 0 & 5 & 0 \\ 0 & 0 & 6 \end{bmatrix} \Rightarrow A^{-1} =$

- A $\begin{bmatrix} \frac{1}{4} & 0 & 0 \\ 0 & \frac{1}{5} & 0 \\ 0 & 0 & \frac{1}{6} \end{bmatrix}$
- B $\begin{bmatrix} 0 & 0 & \frac{1}{4} \\ 0 & \frac{1}{5} & 0 \\ \frac{1}{6} & 0 & 0 \end{bmatrix}$
- C $\begin{bmatrix} \frac{1}{4} & 0 & 0 \\ 0 & \frac{1}{5} & 0 \\ 0 & 0 & \frac{1}{6} \end{bmatrix}$
- D $\begin{bmatrix} \frac{1}{4} & 0 & 0 \\ 0 & \frac{1}{5} & 0 \\ 0 & 0 & \frac{1}{6} \end{bmatrix}$

Answer: C

Free Banking Study Material (15000 Solved Questions)

33. $\lim_{x \rightarrow 0} \frac{1 - \cos 4x}{1 - \cos 5x} =$

- A $\frac{4}{5}$
- B $\frac{16}{25}$
- C $\frac{5}{4}$
- D $\frac{25}{16}$

Answer: B

34. If $y = \sqrt{x + y}$ then $\frac{dx}{dy} =$

- A $1 - y$
- B $y - 1$

C $1 - 2y$

D $2y - 1$

Answer: D

Explanation:

Given, $y = \sqrt{x + y}$

Squaring on both sides, we get

$$y^2 = x + y$$

$$\Rightarrow x = y^2 - y$$

$$\Rightarrow \frac{dx}{dy} = 2y^{2-1} - y^{1-1}$$

$$\Rightarrow \frac{dx}{dy} = 2y - 1$$

Hence, the correct answer is Option D

35. If each interior angle of a regular polygon is 135° , then the number of sides of the polygon is

A 6

B 7

C 8

D 9

Answer: C

Explanation:

Each interior angle of the regular polygon = $\frac{(n-2)180^\circ}{n}$

Given, each interior angle of the regular polygon is 135°

$$\Rightarrow \frac{(n-2)180^\circ}{n} = 135^\circ$$

$$\Rightarrow 4(n-2) = 3n$$

$$\Rightarrow 4n - 8 = 3n$$

$$\Rightarrow n = 8$$

$\therefore$ Number of sides of the polygon = 8

Daily Free Banking Online Test

36. ABCD is a quadrilateral and P, Q, R and S are the mid-points of AB, BC, CD and DA respectively. Then PQRS is a

A square

B rectangle

- C** rhombus
- D** parallelogram

Answer: D

37. A parallelogram and a triangle have same base and the third vertex of the triangle lies on the side parallel to base. If the area of the triangle is 36 sq.cms then the area (in square cms) of the parallelogram is

- A** 18
- B** 54
- C** 72
- D** 108

Answer: C

38. The area (in sq. units) of the triangle formed by points (2, 3), (3, 4) and (4, 2) is

- A** $\frac{3}{2}$
- B** 3
- C** $\frac{5}{2}$
- D** 5

Answer: A

Explanation:

Area of triangle formed by points (2, 3), (3, 4) and (4, 2) = $\frac{1}{2} |x_1(y_2 - y_3) + x_2(y_3 - y_1) + x_3(y_1 - y_2)|$

$$= \frac{1}{2} |2(4 - 2) + 3(2 - 3) + 4(3 - 4)|$$

$$= \frac{1}{2} |2(2) + 3(-1) + 4(-1)|$$

$$= \frac{1}{2} |4 - 3 - 4|$$

$$= \frac{1}{2} |-3|$$

$$= \frac{3}{2}$$

200+ Free GK Tests for Banking exams

39. PQR is a right angled triangle where P and R are the points (2, 4) and (6, 10) respectively and $\angle Q = 90^\circ$. Then the circumcentre of the triangle is

- A** (4, 6)

B (4,
5)

C (3,
7)

D (4,
7)

Answer: D

Explanation:

In a right-angled triangle, circumcentre is the centre of the hypotenuse.

Hence circumcentre = $\left(\frac{6+2}{2}, \frac{10+4}{2}\right) = (4, 7)$

40. If the arithmetic mean of a, b, c, d and 18 is 17 then the arithmetic mean of $a+2b$, $b+2c$, $c+3d$ and $2a-1$ is

A 17

B 28

C 49

D 50

Answer: D

41. The median of 462, 378, 448, 364, 528, 486, 534, 386 is

A 462

B 448

C 455

D 486

Answer: C

Explanation:

Ascending order of the given numbers is 364, 378, 386, 448, 462, 486, 528, 534

$\therefore$ Median of the given numbers = $\frac{448+462}{2} = 455$

Hence, the correct answer is Option C

Latest Job Updates on Telegram - Join here

42. The mode of the observations 10, 13, 16, 13, 19, 24, 13, 9, 24, 13, 26 is

A 26

B 17

C 13

D 9

Answer: C

Explanation:

The mode is defined as the entity that repeats the maximum number of times

In the given observations, 13 is repeating thrice which is maximum.

∴ Mode of the given observations = 13

43. The standard deviation of five consecutive positive integers is

A $\sqrt{2}$

B 2.5

C $\sqrt{3}$

D 3.5

Answer: A

Explanation:

five consecutive positive integers = 1, 2, 3, 4, 5

Mean = 3

Standard deviation = $\sqrt{\frac{\left(\left(3-1\right)^2+\left(3-2\right)^2+\left(3-3\right)^2+\left(3-4\right)^2+\left(3-5\right)^2\right)}{5}} = \sqrt{2}$

44. The standard deviation of the first five even natural numbers is

A $\sqrt{2}$

B $2\sqrt{2}$

C 4

D 8

Answer: B

Explanation:

first five even natural numbers = 2, 4, 6, 8, 10

Mean = 6

Standard deviation = $\sqrt{\frac{\left(\left(6-2\right)^2+\left(6-4\right)^2+\left(6-6\right)^2+\left(6-8\right)^2+\left(6-10\right)^2\right)}{5}} = \sqrt{8} = 2\sqrt{2}$

Whatsapp "JOB" to 7661025557 for Updates

45. In the calculation of the rank correlation coefficient ρ of 9 pairs of observations (x_i, y_i) , it is found that the sum of the squares of the deviations of the corresponding ranks is 144. Then $\rho =$

A $\frac{1}{5}$

B $-\frac{1}{5}$

C $-\frac{5}{6}$

D $\frac{5}{6}$

Answer: B

46. A number is selected from $S = \{1, 2, 3, \dots, 30\}$ at random. The probability that the number has no square factor other than one is

A $\frac{13}{30}$

B $\frac{17}{30}$

C $\frac{19}{30}$

D $\frac{23}{30}$

Answer: C

47. P and Q are two sets such that $n(P) = 5$ and $n(Q) = 3$. A relation from P to Q is selected at random. Then the probability that the relation is not a function is

A $\frac{2^{15} - 5^3}{2^{15}}$

B $\frac{2^{15} - 3^5}{2^{15}}$

C $\frac{3^5}{2^{15}}$

D $\frac{5^3}{2^{15}}$

Answer: B

AP SI Free Solved Previous Papers PDF

48. When two dice are thrown, the probability of getting the sum 9 is

A $\frac{5}{36}$

B $\frac{1}{6}$

C $\frac{1}{9}$

D $\frac{2}{9}$

Answer: C

Explanation:

When two dice are thrown, the possible cases of getting a sum of 9 are (3,6) (4,5) (5,4) (6,3)

Number of favourable cases = 4

Total possibilities = $6 \times 6 = 36$

$\therefore$ Required probability = $\frac{4}{36} = \frac{1}{9}$

Hence, the correct answer is Option C

49. Bag I contains 4 white and 3 black marbles while bag II contains 3 white and 5 black marbles. One marble is drawn at random from bag I and put in bag II without seeing it. The probability that a marble drawn from bag II is a black one is

- A $\frac{18}{63}$
- B $\frac{20}{63}$
- C $\frac{28}{63}$
- D $\frac{38}{63}$

Answer: D

84. India is also Bharath.

- A** called as
- B** known as
- C** called
- D** known

Answer: C

Instructions [185 - 189]

Read the following paragraph and answer the following questions.

Try walking into an office of any small time entrepreneur, businessman or trader, chances are that you may find a slogan adorning the reception area – “Customer satisfaction is our motto”. Nothing profound in that, many of us have sometimes seen such slogans prominently on advertisements and billboards for decades. The more business – savvy types have dispensed with it long ago, categorizing it as cliché and not in tune with the times.

What is not so clichéd and ordinary is the fact that very few of our business practitioners have actually molded their profession around this philosophy – knowingly or unknowingly. Let me explain – have you as a customer been subjected to sales calls by DSA's (Direct Sales Agents) of reputable banks proclaiming that you are the lucky one who has been cleared for a loan of some preposterous amount? Yes indeed, most of us

have at some point or the other. You decide to be polite and decline the offer in the most affable manner and hope that is the end of your transactions with the bank's sales agent. Think again – high probability that for the next several days you shall get multiple calls from the similar direct personnel of the so-called reputable bank, all offering the same product that you had declined just the other day, you may be lucky not to have them visit your home or office, again offering the same product. When you confront them with the fact that someone had already approached you from their office earlier with a similar offering and that you have declined it for the umpteenth time, they feign ignorance and unashamedly blame it on some internal operational gaffe which they are not responsible for.

85. Sophisticated business organizations removed the slogan because

- A** everyone follows it
- B** it has been overused

- C** everyone knows about it by now
- D** their seniors do not like it being displayed openly

Answer: B

86. The example the writer gives of business not following what they preach is that

- A** they are rude to customers
- B** they do not do the work in time
- C** they transact business with a smile
- D** they continue to harass clients with calls

Answer: D

Whatsapp "JOB" to 7661025557 for Updates

87. The word that suggests that the offer made through the sales representative is absurd is

- A** preposterous
- B** business-savvy
- C** cliched
- D** operational

Answer: A

88. The initial reaction of a customer who receives a call from the agent is

- A** anger
- B** warmth
- C** shock
- D** worry

Answer: B

89. The writer's main focus here is to show how

- A** seriously the sales agents do their work.
- B** carefully the customer is approached.
- C** insensitive companies are to their clients.

D tactful the sales representatives are.

Answer: C

AP SI Free Solved Previous Papers PDF

Instructions [190 - 194]

Read the following paragraph and answer the following questions.

When I first visited Bangalore in the sixties it was a garden city. With its parks, one a forest in the centre of the city, its lakes, its avenues covered with a green canopy of rain trees, its altitude of three thousand feet above sea-level and the temperate climate that goes with the height. It became a victim of its own natural assets. At the beginning of the twentieth century the Indian Institute of Science was founded there and just before independence came the Raman Research Institute. They gave Bangalore a reputation for excellence in science which attracted nationalized hi-tech industries like Hindustan Aeronautics as well as the private sector. Then followed the IT wallahs. To add all those pressures post-independence Bangalore also became the capital of one of India's largest and progressive states. Bangaloreans who once boasted of their garden city now do not use that term for obvious reasons. Their homes for the future, fuelled by the city's readiness to move on to the national, even international platform, have been belied, at least for the moment, by their innumerable travails like environmental pollution, haphazard expansion and piece-meal planning.

90. 'one' in the second sentence refers to

- A** park
- B** avenue
- C** tree
- D** lake

Answer: A

91. What caused the loss of the city's tranquility?

- A** Indian Institute of Science
- B** a reputation for excellence
- C** innumerable travails
- D** its own assets

Answer: D

92. For "obvious reasons" implies that the city

- A** Was a garden city

- B** had grown extensively
- C** was no longer one
- D** could accommodate to change

Answer: C

200+ Banking Previous Papers (Download PDF)

93. Which one of the following is not one of the current problems mentioned by the writer about the city he is describing?

- A** environmental pollution
- B** indiscriminate constructions
- C** piece-meal planning
- D** haphazard expansion

Answer: B

94. Which one reason does the writer not give for the city to get a reputation for excellence in science?

- A** setting up HAL
- B** starting of multinational companies
- C** founding of IIS
- D** starting of Raman Research Institute

Answer: B

Instructions [195 - 199]

Read the following paragraph and answer the following questions.

Union Budget 2018 has been on expected lines. aimed at appeasing farmers and others in rural areas, as well as small industry. When it comes to most tare proposals, it has disappointed everybody except senior citizens and Micro. Small & Medium Enterprises (MSMEs). Inits last full budget before the next general elections. the BJP-led NDA government targets its vote banks in rural areas and the agriculture sector, promising them a lot. In direct taxes, however, where it was expected bring in a lot of reforms and exemptions. it has done precious little.

If all classes of tax payers, the salaried employee has been left almost high and dry with the finance minister announcing there would be no change in the personal income-tax rates. There was a lot of expectation that the personal income tax exemption limit would be raised. That has not happened with GST becoming a reality, most citizens are being made to pay taxes on almost every purchase and in most cases, the taxes are higher than before. That is why there were expectations that the finance ministers would put more money into the taxpayer's hands by lowering personal taxes. None of these has happened.

95. According to the passage the Union Budget 2018 has not disappointed

- A salaried employees
- B taxpayers
- C farmers
- D any citizen

Answer: C

SSC CHSL Previous Question papers (download pdf)

96. In the area of direct taxes the budget has done

- A a great deal
- B pretty much
- C hardly anything
- D something substantial

Answer: C

97. The main reason for citizens ending up paying taxes on almost every purchase is the introduction of

- A higher taxes
- B simplified direct tax laws
- C lower personal taxes
- D GST

Answer: D

98. Which statement is true about the budget ?

- A It was favorable to senior citizens.
- B It was not favorable to farmers.
- C It was favorable to personal income tax payers.
- D It was not favorable to MSMEs.

Answer: A

SSC CHSL Free Mock Test

99. The expression 'left high and dry' means

- A** left in a high position
- B** left waiting
- C** abandoned
- D** humiliated

Answer: C
