

2008

8NA 31 - I (317)

**B.Sc I Semester Degree Examination
COMPUTER SCIENCE**

Paper - I : Computer Concepts and C Programming

Time: 3 Hours

Max. Marks: 80

(10×2=20)

I. Answer the following :

- 1) Explain the function of ALU.
- 2) Explain AND gate with truth table.
- 3) Briefly explain cache memory.
- 4) List any four dos command.
- 5) Evaluate the expression $2 * (\frac{8}{3} + 4 * (5 - 2))$.
- 6) Compare break and continue.
- 7) What is keyword ? Name any two.
- 8) Distinguish between micro computer and mini computer.
- 9) Write the syntax of If-Else statement.

10) Write the C equivalent expression for the following mathematical function:

i) $\sqrt{a+b}$ ii) $\frac{(a+b)^2}{(a-b)^2}$

II. Answer any five of the following :

(5×6=30)

- 1) Explain the characteristics of computer.
- 2) Differentiate between compiler and interpreter.
- 3) Explain in brief laser and inkjet printer.
- 4) What is operating system ? Explain the function of operating system.
- 5) Define variable. Give rules for naming variable.
- 6) Explain the for loop.

P.T.O.

- 1) Write a C program to find sum of individual digits.
- 2) Explain the Bitwise operator.

Answer **any three** of the following :

(3×10=30)

- 1) State and prove any five postulates of Boolean algebra.
 - 2) a) Distinguish between primary memory and secondary memory.
b) Explain the Harddisk with neat diagram.
 - 3) Write C program to find sum of two matrix.
 - 4) Explain the formatted input output statements.
 - 5) Explain any five string handling functions.
