

13DD 44 – III (35)

B.Sc. III Semester Degree Examination, Nov./Dec. 2013

**COMPUTER SCIENCE
COBOL AND System
Analysis and Design**

Time : 3 Hours

Max. Marks : 80

I. Answer **any 10** of the following : **(10×2=20)**

- 1) State any two examples of systems.
- 2) Mention types of users of an information system.
- 3) State the use of IDENTIFICATION DIVISION.
- 4) State any four reserved words of COBOL.
- 5) What is the use of column 8 in a COBOL program ?
- 6) Write the syntax of COMPUTE statement.
- 7) State the syntax of IF statement.
- 8) Mention the mathematical operators of COBOL.
- 9) Give any two figurative constants of COBOL.
- 10) Who are the members of system development team ?
- 11) What is DFD ?
- 12) What is feasibility study ?

II. Answer **any 6** of the following : **(6×5=30)**

- 1) Write a COBOL program to reverse a given number.
- 2) Mention any five file-related verbs with purpose and syntax.
- 3) Explain level 66 entry of COBOL.
- 4) Write a COBOL program to find sum and average of N numbers.
- 5) Write a note on test data.

- 6) Explain the use of GOTODEPENDING ON statement with syntax and example.
- 7) State any 5 forms of PERFORM statement.
- 8) What are the rules to merge contents of two sequential files ?

III. Answer **any 3** of the following :

(3×10=30)

- 1) Explain in brief, the phases of SDLC with a neat diagram.
- 2) Write COBOL program to sort contents of a sequential file.
- 3) Write the syntax of arithmetic verbs of COBOL.
- 4) Write a short note on :
 - a) Fact-finding techniques
 - b) Types of testing.
- 5) Write a COBOL program to sort N numbers in descending order.
