11DD 44 – III(35)

B.Sc. III Semester Degree Examination, November 2011
COMPUTER SCIENCE
Information System Analysis and Design and COBOL

Time : 3 Hours

Max. Marks : 80

*Instruction: Answer all Sections.***SECTION – A**(2×4=8) I. Answer **any ten** of the following :

(10×2=20)

- 1) Define system.
- 2) Mention any two types of system.
- 3) Who is system analyst ?
- 4) Define BCNF.
- 5) What is decision tree ?
- 6) Give the Syntax for ADD and SUBTRACT verbs.
- 7) What is IDENTIFICATION DIVISION ?
- 8) What is system implementation ?
- 9) Mention different levels of management.
- 10) What is entity ?
- 11) Mention different types of relation ships.
- 12) What is cost benefit analysis.
- 13) Mention the syntax of declaring a variable in COBOL.
- 14) What is use of configuration section ?
- 15) Mention the section of DATA DIVISION.

P.T.O.

SECTION - B

Time : 3 H

II. Answer any six of the following :

(6×5=30)

- 1) Explain the management structure of an organization.
- 2) Write a note on environment division.
- 3) What is data name in COBOL ? Mention the rules of declaring Data name.
- 4) Write a COBOL program to find largest of N Numbers.
- 5) Write a note on validating data input.
- 6) What is online data entry ? Explain.
- 7) Explain 3 NF.
- 8) Explain limited entry decision table with an example.

SECTION - C

II. Answer any three :

(3×10=30)

- 1) Write the role, task and mention the attributes of system analyst.
- 2) Explain E-R model and necessity of normalisation.
- 3) Write a note on PICTURE clause.
- 4) Write a COBOL program to sort N numbers in ascending order.
- 5) Write a COBOL program to create and read a sequential file.

Answer a)

1. Find a

2. Show

3. Show

4. Show t
of a th5. The ce
Find th

6. Find th

7. Find the
 $C = (-1$ 8. Find the
 $(-2, 2,$

9. Find the

 $\vec{r} \cdot (3\vec{i} +$

10. Find th

 $\vec{r} \cdot (\vec{i} + 2$
