Quantitative Techniques and Data Interpretation

Instructions [1 - 3]

Following 3 questions are based on the information given below.

There are 240 students in an engineering college. Each student opted for exactly one of three specialisations among Computer Science, Mechanical and Electronics. The total number of students who opted for Computer Science and Electronics is equal to the number of students who opted for Mechanical. 42.5 % students who opted for Mechanical are girls. The number of girls who opted for Computer Science is one-third the number of boys who opted for Mechanical. The difference between the number of boys who opted for Electronics and the number of girls who opted for Computer Science is equal to the difference between the number of boys who opted for Computer Science and the number of girls who opted for Electronics. The number of girls who opted for Electronics is 28.

1. The total number of girls in the Engineering College is

- A 138
- B 112
- C 102
- D 116

2. The number of girls who opted Mechanical is how much percent of number of students who opted Electronics?

- A 75 %
- B 80 %
- C 85 %
- D 90 %

3. By what percent is the number of boys who opted for Mechanical is more than the total number of students who opted for Electronics?

- A 15 %
- B 12 %
- C 13.5 %
- D 17.5 %

4. If the digit in the unit's place of a two-digit number is halved and the digit in ten's place is doubled, the number thus obtained is equal to the number obtained by interchanging the digits. Which of the following is definitely true?

- A Sum of the digits is a two-digit number.

- B** Digit in the unit's place is half of the digit in the ten's place.
- C** Digit in the unit's place and the ten's place are equal.
- D** Digit in the unit's place is twice the digit in ten's place.

5. Given below are two statements :

Statement I :

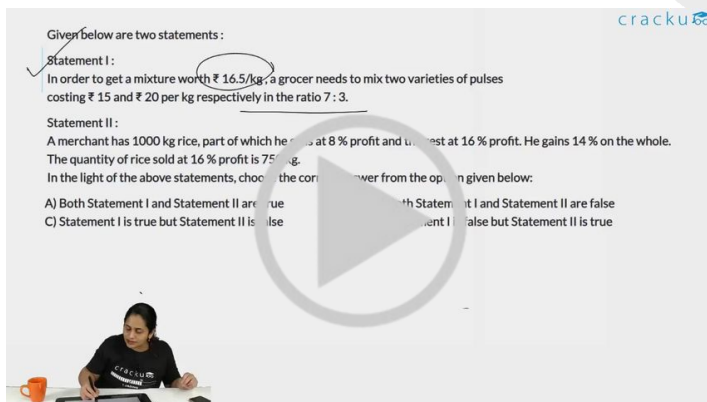

In order to get a mixture worth ₹ 16.5/kg , a grocer needs to mix two varieties of pulses costing ₹ 15 and ₹ 20 per kg respectively in the ratio 7 : 3.

Statement II :

A merchant has 1000 kg rice, part of which he sells at 8 % profit and the rest at 16 % profit. He gains 14 % on the whole. The quantity of rice sold at 16 % profit is 750 kg.

In the light of the above statements, choose the correct answer from the option given below:

- A** Both Statement I and Statement II are true
- B** Both Statement I and Statement II are false
- C** Statement I is true but Statement II is false
- D** Statement I is false but Statement II is true

VIDEO SOLUTION

6.

List I		List II	
A.	Duplicate of ratio 2 : 7	I.	25 : 30
B.	Compound ratio of 2 : 7, 5 : 3 and 4 : 7	II.	4 : 49
C.	Ratio of 2 : 7 is same as	III.	40 : 147
D.	Ratio of 5 : 6 is same as	IV.	4 : 14

Choose the correct answer from the options given below:

- A** (A) - (III), (B) - (I), (C) - (IV), (D) - (II)
- B** (A) - (II), (B) - (III), (C) - (IV), (D) - (I)
- C** (A) - (IV), (B) - (I), (C) - (II), (D) - (III)
- D** (A) - (I), (B) - (III), (C) - (IV), (D) - (II)

List I		List II	
A.	Duplicate of ratio 2:5	I.	25:30
B.	Compound ratio of 2:5, 5:3 and 4:7	II.	8:49
C.	Ratio of 2:7 is same as	III.	40:147
D.	Ratio of 5:6 is same as	IV.	4:14

Choose the correct answer from the options given below:

(A) (A) - (III), (B) - (I), (C) - (IV), (D) - (II)
 (B) (A) - (II), (B) - (III), (C) - (IV), (D) - (I)
 (C) (A) - (IV), (B) - (I), (C) - (II), (D) - (III)
 (D) (A) - (I), (B) - (III), (C) - (IV), (D) - (II)

Handwritten notes: $\frac{a}{b} \rightarrow \frac{a^2}{b^2}$, $\frac{2}{7} \rightarrow \frac{4}{49}$, $\frac{a}{b}, \frac{c}{d}, \frac{e}{f} \rightarrow \frac{a \times c \times e}{b \times d \times f}$, $2 \times 5 \times 4$

VIDEO SOLUTION

7. A) If $\frac{1}{x} : \frac{1}{y} : \frac{1}{z} = 2 : 3 : 5$, then $x : y : z = 15 : 10 : 6$
- B) If $4p = 6q = 9r$, then $p : q : r = 9 : 6 : 4$
- C) If $2A = 3B = 4C$, then $A : B : C = 3 : 4 : 6$
- D) If $P : Q : R = 2 : 3 : 4$, then $\frac{P}{Q} : \frac{Q}{R} : \frac{R}{P} = 9 : 8 : 24$

Choose the correct answer from the options given below:

- A** (C) only
- B** (D) only
- C** (A) and (B) only
- D** (C) and (D) only

Handwritten notes: $\frac{1}{x} : \frac{1}{y} : \frac{1}{z} = 2 : 3 : 5$, then $x : y : z = 15 : 10 : 6$
 B) If $4p = 6q = 9r$, then $p : q : r = 9 : 6 : 4$
 C) If $2A = 3B = 4C$, then $A : B : C = 3 : 4 : 6$
 D) If $P : Q : R = 2 : 3 : 4$, then $\frac{P}{Q} : \frac{Q}{R} : \frac{R}{P} = 9 : 8 : 24$

Choose the correct answer from the options given below:

A) (C) only
 B) (D) only
 C) (A) and (B) only
 D) (C) and (D) only

Handwritten notes: $4p = 6q = 9r$, $r = 4x$, $6q = 36x$, $q = 6x$, $4p = 26x$, $p = 9x$

VIDEO SOLUTION

8. A certain amount of money at compound interest grows to ₹66,550 in 3 years and ₹73,205 in 4 years. The rate percent per annum is :

- A 10 %
- B 9 %
- C 5 %
- D 11 %

A certain amount of money at compound interest grows to ₹66,550 in 3 years and ₹73,205 in 4 years. The rate percent per annum is :

A) 10 %
B) 9 %
C) 5 %
D) 11 %

Handwritten solution on a whiteboard:

$$66550 = P \left(1 + \frac{r}{100}\right)^3 \quad \text{--- (1)}$$

$$73205 = P \left(1 + \frac{r}{100}\right)^4 \quad \text{--- (2)}$$

$$\frac{73205}{66550} = \left(1 + \frac{r}{100}\right)^1$$

A play button icon is overlaid on the equations.

[VIDEO SOLUTION](#)

9. A glass jar contains 1 red, 3 green, 2 blue and 4 yellow marbles. If a single marble is chosen at random from the jar

- A) Probability of getting a yellow marble is $\frac{1}{5}$
- B) Probability of getting a green marble is $\frac{3}{10}$
- C) Probability of getting either a yellow or a green marble is $\frac{7}{10}$
- D) Probability of getting either a red or a yellow marble is $\frac{3}{10}$

Choose the correct answer from the options given below :

- A (A) and (D) only
- B (B) and (C) only
- C (A) and (C) only
- D (B) and (D) only

10. Match List-I with List-II

List I		List II	
A.	$\sqrt{\frac{0.81 \times 0.484}{0.064 \times 6.25}}$	I.	0.024
B.	$\sqrt{\frac{0.204 \times 42}{0.07 \times 3.4}}$	II.	0.99
C.	$\sqrt{\frac{0.081 \times 0.324 \times 4.624}{1.5625 \times 0.0289 \times 72.9 \times 64}}$	III.	50.
D.	$\sqrt{\frac{9.5 \times 0.085}{0.0017 \times 0.19}}$	IV.	6

Choose the correct answer from the options given below :

- A (A) - (I), (B) - (IV), (C) - (III), (D) - (II)
- B (A) - (I), (B) - (III), (C) - (IV), (D) - (II)
- C (A) - (II), (B) - (IV), (C) - (I), (D) - (III)
- D (A) - (II), (B) - (I), (C) - (IV), (D) - (III)

CMAT Syllabus PDF

11. Arrange the following in increasing order:

- A) $16\frac{2}{3}\%$
- B) $\frac{2}{15}$
- C) 0.17
- D) 0.25 % of 64

Choose the correct answer from the options given below:

- A B < D < A < C
- B A < D < B < C
- C C < D < B < A
- D A < C < D < B

Arrange the following in increasing order:

A) $16\frac{2}{3}\%$

B) $\frac{2}{15}$

C) 0.17

D) 0.25 % of 64

Choose the correct answer from the options given below:

A) B < D < A < C

B) A < D < B < C

C) C < D < B < A

D) A < C < D < B

Handwritten calculations:

$\frac{2}{15} \times \frac{100}{100} = \frac{20}{3} = 6.67\%$

$\frac{2}{15} = 0.1333\%$

$0.17 = 17\%$

$0.25\% \text{ of } 64 = 0.16\%$

Order: D < A < B < C

cracku logo

12. Arrange the following in increasing order:

- A) $\sqrt[4]{3}$
- B) $\sqrt[3]{2}$
- C) $\sqrt[6]{5}$
- D) $\sqrt[6]{7}$

Choose the correct answer from the options given below :

- A $A < D < B < C$
- B $B < C < A < D$
- C $A < C < B < D$
- D $B < A < C < D$

13. A dishonest dealer sells his goods at 10 % loss on cost price and uses 30 % less weight. What is his profit or loss percentage ?

- A $28\frac{4}{7}$ % loss
- B $28\frac{3}{7}$ % profit
- C $28\frac{3}{7}$ % loss
- D $28\frac{4}{7}$ % profit

A dishonest dealer sells his goods at 10 % loss on cost price and uses 30 % less weight. What is his profit or loss percentage ?

A) $28\frac{4}{7}$ % loss
B) $28\frac{3}{7}$ % profit
C) $28\frac{3}{7}$ % loss
D) $28\frac{4}{7}$ % profit

Rs 100 / 100gms CP = 1
Rs 90 / 70gms

CMAT Percentile Predictor

14. If the roots of the equation $px^2 + x + r = 0$ are reciprocal to each other, then which one of the following is correct ?

- A $p = 2r$
- B $p = r$

C $2p = r$

D $p = 4r$

If the roots of the equation $px^2 + x + r = 0$ are reciprocal to each other, then which one of the following is correct?

A) $p = 2r$
B) $p = r$
C) $2p = r$
D) $p = 4r$

Handwritten notes: $A \times \frac{1}{A} = 1$, $ax^2 + bx + c = 0$, Sum

VIDEO SOLUTION

15. Given below are two statements :

Statement I :

Ram and Shyam can finish a task by working together in 6 days. If Shyam can finish the task by working alone in 8 days, then Ram alone will take 24 days to finish it.

Statement II :

If 6 persons working 8 hours a day earn ₹8,400 per week, then 9 person working 6 hours a day will earn ₹9,450 per week.

In the light of the above statements, choose the correct answer from the options given below :

- A Both Statement I and Statement II are true
- B Both Statement I and Statement II are false
- C Statement I is true but Statement II is false
- D Statement I is false but Statement II is true

Given below are two statements :

Statement I :
Ram and Shyam can finish a task by working together in 6 days. If Shyam can finish the task by working alone in 8 days, then Ram alone will take 24 days to finish it.

Statement II :
If 6 persons working 8 hours a day earn ₹8,400 per week, then 9 person working 6 hours a day will earn ₹9,450 per week.

In the light of the above statements, choose the correct answer from the options given below :

A) Both Statement I and Statement II are true
B) Both Statement I and Statement II are false
C) Statement I is true but Statement II is false
D) Statement I is false but Statement II is true

VIDEO SOLUTION

16. If $abc > 0$, such that a, b, c are integers then which of the following must be true?

A $\frac{a}{b} < 0$

B $\frac{ab}{c} > 0$

C $bc < 0$

D $a > bc$

17. A cylindrical vessel of radius 4 cm contains water. A solid sphere of 3 cm radius is lowered into the water until it is completely immersed. The water level in the vessel will rise by :

A $\frac{2}{9}$ cm

B $\frac{4}{9}$ cm

C $\frac{9}{4}$ cm

D $\frac{9}{2}$ cm

18. Find the number of permutations that can be made from the letters of the word OMEGA, if the vowels occupy odd places.

A 12 ways

B 6 ways

C 16 ways

D 20 ways

19. Ramesh invests ₹1,200 at 5 % simple interest. How much additional money must he invest at 8 % simple interest so that his total annual income will be equal to 6 % of his total investment during this year ?

A ₹ 500

B ₹ 600

C ₹ 1,200

D ₹ 1,500

Ramesh invests ₹1,200 at 5 % simple interest. How much additional money must he invest at 8 % simple interest so that his total annual income will be equal to 6 % of his total investment during this year ?

A) ₹ 500 B) ₹ 600
C) ₹ 1,200 D) ₹ 1,500

The diagram shows a circle with a triangle inside. The top-left radius is labeled 5%, the top-right radius is labeled 8%, and the bottom radius is labeled 6. The number 2 is written below the circle.

20. A train travelling at 48 km/h completely crosses another train having half the length of first train and travelling in opposite direction at 42 km/h in 12 seconds. The train having speed 48 km/h also passes a railway platform in 45 seconds. What is the length of the platform ?

- A 600 m
- B 300 m
- C 400 m
- D 200 m

A train travelling at 48 km/h completely crosses another train having half the length of first train and travelling in opposite direction at 42 km/h in 12 seconds. The train having speed 48 km/h also passes a railway platform in 45 seconds. What is the length of the platform ?

A) 600 m
B) 300 m
C) 400 m
D) 200 m

$48 \text{ km/hr} = \frac{48 \times 5}{18} = 13.33$

$T = \frac{L_1 + L_2}{S_1 + S_2}$

$T = \frac{L_1 + L_p}{S_1}$

28. A cylinder is painted in 6 colours - Green, Blue, Yellow, Violet, Red and Pink. Three positions are shown below.

What is the colour in the empty space?

- A Blue
- B Green
- C Violet
- D Yellow

VIDEO SOLUTION

29. Consider the statement given below and the following assumptions and decide which of the assumptions is/are implicit in the statement.

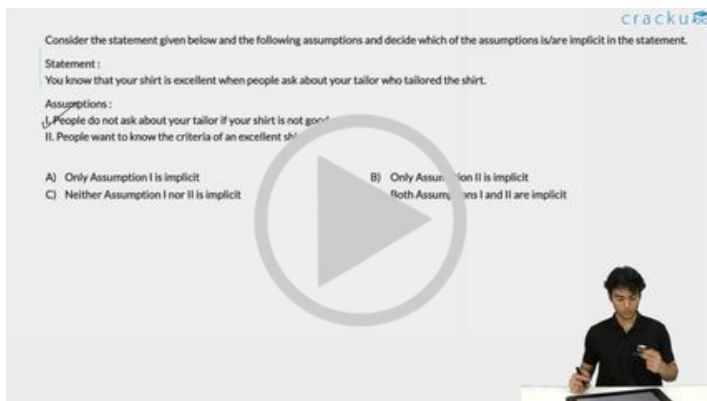

Statement :

You know that your shirt is excellent when people ask about your tailor who tailored the shirt.

Assumptions :

- I. People do not ask about your tailor if your shirt is not good .
- II. People want to know the criteria of an excellent shirt.

- A Only Assumption I is implicit
- B Only Assumption II is implicit
- C Neither Assumption I nor II is implicit
- D Both Assumptions I and II are implicit

 VIDEO SOLUTION

30. The following question consists of a statement and arguments I and II. Choose the best option :

Statement:

Should there be a compulsory medical examination of both the man and the woman before they marry each other ?

Argument I :

No, this is an intrusion to the privacy of an individual and hence cannot be tolerated.

Argument II :

Yes, this will substantially reduce the risk of giving birth to children with serious ailments.

- A Only Argument I is strong
- B Only Argument II is strong
- C Neither Argument I nor Argument II is strong
- D Both Argument I and Argument II are strong

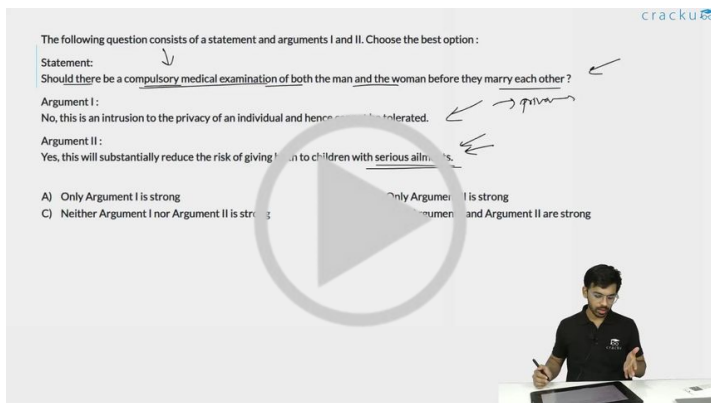

The following question consists of a statement and arguments I and II. Choose the best option :

Statement:
Should there be a compulsory medical examination of both the man and the woman before they marry each other?

Argument I :
No, this is an intrusion to the privacy of an individual and hence should be tolerated.

Argument II :
Yes, this will substantially reduce the risk of giving birth to children with serious ailments.

A) Only Argument I is strong
B) Only Argument II is strong
C) Neither Argument I nor Argument II is strong
D) Both Argument I and Argument II are strong

32. A watch which gains uniformly is 2 minutes slow at 10:00 AM on Monday and is $2\frac{1}{2}$ minutes fast at 1:00 PM the following day. When did it show the correct time ?

- A 10:30 PM Tuesday
- B 10:30 PM Monday
- C 10:45 PM Monday

D 10:00 PM Monday

33. Choose the correct word from the given alternatives which bears the same relationship to the third word as the first two.

Vigilant : Alert :: Viable : ?

- A Active
- B Hopeless
- C Feasible
- D Useful

34. Find the odd one out among the following:

- A Bajra
- B Barley
- C Mustard
- D Rice

35. Take the given statements to be true even if they seem to be at variance from commonly known facts. Which conclusion would follow on the basis of given statements.

Statement:

'Some bags are purses', 'All purses are containers' and 'All containers are suitcases'.

Conclusions :

- (A) Some suitcases are bags
- (B) All purses are bags
- (C) All purses are suitcases
- (D) Some containers are purses

Choose the correct answer from the options given below :

- A (A), (B) and (C) only
- B (B) and (D) only
- C (A) and (C) only
- D (A), (C) and (D) only

cracku

37. Miss 'Lilly' started her journey from her house and goes 2 km straight. Then, she turns towards her right and goes 1 km. She again turns towards her right and goes 1 km again. If finally she is in the north-west direction from her house, then in which direction did she go in the beginning ?

- A North
- B South
- C East
- D West

VIDEO SOLUTION

38. Given below are two statements : one is labelled as Assertion (A) and the other is labelled as Reason (R).

Assertion (A) : A person with blood group O is supposed to be an universal donor.

Reason (R): Group O does not contain any antigens.

In the light of the above statements, choose the correct answer from the options given below :

- A Both Assertion (A) and Reason (R) are true and Reason (R) is the correct explanation of Assertion (A).
- B Both Assertion (A) and Reason (R) are true, but Reason (R) is not the correct explanation of Assertion (A).
- C Assertion (A) is true, but Reason (R) is false.
- D Assertion (A) is false, but Reason (R) is true.

39. Consider the statement given below followed by two conclusions. Decide which of the conclusions follows from the information given in the statement.

Statement :

Domestic demand has been increasing faster than production of indigenous crude oil.

Conclusions :

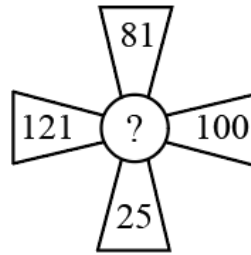

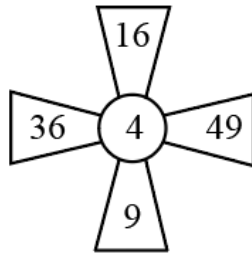

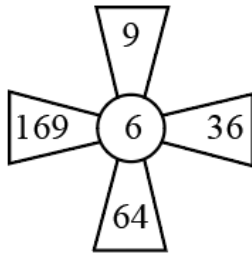

I. Crude oil must be imported.

II. Domestic demand should be reduced.

- A Only Conclusion I follows
- B Only Conclusion II follows
- C Either Conclusion I or II follow
- D Neither Conclusion I nor II follow

40. Find the missing term in the following figure?

- A 5
- B 6
- C 11
- D 7

Language Comprehension

41. Identify the usages of the word "PRINCIPAL" in the following sentence.

"In the meeting the principal stated the principal reasons for the suggested changes in the statute."

- A As a noun and as an adverb
- B As a noun and as a verb
- C As a noun and as an adjective
- D As a noun and as a noun

cracku

Identify the usages of the word "PRINCIPAL" in the following sentence.

"In the meeting the principal stated the principal reasons for the suggested changes in the statute."

A) As a noun and as an adverb
B) As a noun and as a verb
C) As a noun and as an adjective
D) As a noun and as a noun

VIDEO SOLUTION

42. Pick the correct option to complete the following sentence :

"He often _____ cold in winter."

- A catch
- B is catching
- C catches
- D have caught

Pick the correct option to complete the following sentence :
"He often _____ cold in winter."

A) catch ←
B) is catching
C) catches
D) have caught

often → present tense

Instructions [48 - 50]

Read the following passage and answer the next three questions:

To what extent reasoning can (I) _____ a reliable basis for a theory of justice is, of course, itself an issue that has been subject to controversy. (II) _____ first chapter of this book is (III) _____ with the role and reach of reasoning. I argue against the plausibility of seeing emotions or psychology or instincts as independent sources of valuation, without reasoned appraisal. Impulses and mental attitudes remain important, however,

since we have good reasons to take note of them in our assessment of justice and injustice in the world . There is no irreducible conflict here, I argue, between reason and emotion, and there are very good reasons for making room for the relevance of emotions.

In the above passage, there are blanks, each of which has been numbered. Find out the appropriate option in each case to replace the given numbers.

48. Pick the appropriate replacement for (III):

- A concern
- B concerns
- C concerned
- D concerning

Read the following passage and answer the next three questions:

To what extent reasoning can (I) _____ a reliable basis for a theory of justice is, of course, itself an issue that has been subject to controversy. (II) _____ first chapter of this book is (III) _____ with the role and reach of reasoning. I argue against the plausibility of seeing emotions or psychology or instincts as independent sources of valuation, without reasoned appraisal. 58. Given below are two statements :

Statement I :

"DARE" usually forms negatives and questions like an ordinary verb and is followed by an infinitive with to.

Statement II :

It can also be used like a modal verb especially in present tense negative forms and is followed by an infinitive without to.

In the light of the above statements, choose the correct answer from the options given below:

- A Both Statement I and Statement II are true
- B Both Statement I and Statement II are false
- C Statement I is true but Statement II is false
- D Statement I is false but Statement II is true

Instructions [59 - 60]

Read the following passage and answer the next two questions.

Education, taken in its most extensive sense, is properly that which makes the man. One method of education, therefore, would only produce one kind of man; but the greater excellence of human nature consists in the variety of which it is capable. Instead then, of endeavouring, by uniform and fixed systems of education, to keep mankind always the same, let us give free scope to everything which may bid fair for introducing more variety among us. The varied character of the Athenians was certainly preferable to the uniform character of the brute creation. Among them, every species of bird builds its nest with the same materials and in the same form; the genius and disposition of one individual is that of all, and it is only the education which men give them that raises any of them much above others. But it is the glory of human nature that the operations of reason, through variable and by no means infallible, are capable of infinite improvement. We come into the world worse provided than any of the brutes; but when their faculties are at a full stand and their enjoyments incapable of variety or increase, our intellectual powers are growing apace; we are perpetually deriving happiness from new sources, and even before we leave this world, are capable of tasting the felicity of angels.

59. Which of the following statements are true about the given passage?

- A) The author creates a binary between uniformity and diversity in matters of education.
- B) It upholds a uniform and stable system of education.
- C) It holds uniformity rather brutish , but necessary for the society.
- D) It holds diversity in education a key to human excellence and progress.

Choose the correct answer from the options given below:

- A (A) and (B) only
- B (A) and (C) only
- C (A) and (D) only
- D (B) and (D) only

Read the following passage and answer the next two questions.

Education, taken in its most extensive sense, is properly that which makes the man. One method of education, therefore, would only produce one kind of man; but the greater excellence of human nature consists in the variety of which it is capable. Instead then, of endeavouring, by uniform and fixed systems of education, to keep mankind always the same, let us give free scope to everything which may bid fair for introducing more variety among us. The varied character of the Athenians was certainly preferable to the uniform character of the brute creation. Among them, every species builds its nest with the same materials and in the same form, and disposition of one individual is that of all, and it is only education which men give them that raises any of them above others. Choose the correct answer from the options given below:

- A (A), (B), (D) and (E)
- B (B), (C) and (D) only
- C (A), (B), (C) and (D) only
- D (C), (D) and (E) only

90. Design thinking involves which of the following stages?

- (A) Prototyping
- (B) Define
- (C) Empathise
- (D) Modelling
- (E) Test

Choose the correct answer from the options given below :

- A (A), (B), (C), (D) and (E)
- B (A), (B), (C) and (E) only
- C (A), (D) and (E) only
- D (B), (C) and (D) only

91. Which of the following is **NOT** part of Entrepreneurship Development Programme?

- A Identification of entrepreneurs for training
- B Selection of entrepreneurs for training
- C Developing entrepreneurial capabilities
- D Arranging infrastructural capabilities

92. The Government of India has launched the following initiative a few years ago to drive the new age ideas and enterprises :

- A Production Linked Incentive (PLI)
- B Special Economic Zone (SEZ)
- C Technology Development Board
- D Start-Up India

93. Given below are two statements :

Statement I :

People's attitudes have changed over the years leading to involvement of State (Government) in businesses globally.

Statement II :

Increasing technicality is leading to State (Government) to make interventions in businesses globally.

In the light of the above statements, choose the most appropriate answer from the options given below :

- A Both Statement I and Statement II are correct
- B Both Statement I and Statement II are incorrect
- C Statement I is correct but Statement II is incorrect
- D Statement I is incorrect but Statement II is correct

94. Which of the following is **NOT** a form of organisation to initiate a business/enterprise?

- A Partner Organisation
- B Sole Proprietorship
- C Private Limited Company
- D Live and License

95. Which of the following factors must you judge to estimate the market potential?

- (A) Present Market Demand
- (B) Export Market Demand
- (C) Future Market Demand
- (D) Labour Demand
- (E) Retailer's Consumption Preferences

Choose the correct answer from the options given below :

- A (B), (C) and (D) only
- B (A), (B) and (D) only
- C (A), (B) and (C) only
- D (B), (D) and (E) only

96. Given below are two statements :

Statement I :

An entrepreneur can get a lot of quality information about competitors from company reports and its website.

Statement II :

First step to avail finance for a new project is Promoter's Biodata.

In the light of the above statement, choose the correct answer from the options given below:

- A Both Statement I and Statement II are true
- B Both Statement I and Statement II are false
- C Statment I is true but Statement II is false
- D Statement I is false but Statement II is true

97. Given below are two statements, one is labelled as Assertion (A) and the other is labelled as Reason (R).

Assertion (A) :

Small businesses are considered important to economic development.

Reason (R) :

Small businesses can be innovators of new products and provide specialist support to larger companies.

In the light of the above statements, choose the most appropriate answer from the options given below :

- A Both Assertion (A) and Reason (R) are correct and Reason (R) is the correct explanation of Assertion (A).
- B Both Assertion (A) and Reason (R) are correct and Reason (R) is not the correct explanation of Assertion (A).
- C (A) is correct but (R) is not correct.
- D (A) is not correct but (R) is correct.

98. Given below are two statements :

Statement I :

Yoga and focus on hobbies are good ways to deal with stress for an entrepreneur.

Statement II :

Having stress for an entrepreneur is welcoming as it helps in better performance and helps him/her lead a balanced life.

In the light of the above statements, choose the most appropriate answer from the options given below :

- A Both Statement I and Statement II are correct
- B Both Statement I and Statement II are incorrect
- C Statement I is correct but Statement II is incorrect
- D Statement I is incorrect but Statement II is correct

99. Which of the following can give an enterprise dealing in instant coffee a competitive edge ?

- A Quality, taste and location
- B Population increase in the city
- C Ambience and customer relationship
- D (1) and (3) only

CMAT Syllabus PDF

100. Social Enterprise Obligation includes :

- (A) Environment
- (B) Fair Business Practices
- (C) Community Involvement
- (D) Energy
- (E) Shareholder's Profit

Choose the correct answer from the options given below :

- A (A), (B) , (C) and (E) only
- B (A), (B), (C) and (D) only
- C (B), (C) , (D) and (E) only
- D (A), (C) , (D) and (E) only

Quantitative Techniques and Data Interpretation

Let C be Computer Science, M be Mechanical, and E be Electronics

It is also given that $C + E = M - (2)$

$$\text{Girls in M} = \frac{42.5}{100}M$$

$$\text{Boys in M} = \frac{57.5}{100}M$$

$$\text{Girls in C} = \frac{1}{3} \times \frac{57.5}{100}M = \frac{57.5}{300}M$$

$$\text{Boys in E} + \text{Boys in C} = \text{Girls in C} + \text{Boys in C}$$

Girls in E = 28.

$$C + M + E = C + 2C + C = 240$$

$$C = E = 60$$

$$\text{Girls in M} = \frac{42.5}{100}M = \frac{42.5}{100} \times 120 = 51$$

$$\text{Girls in C} = \frac{57.5}{300} \times 120 = 23$$

Total number of Girls = $51 + 23 + 28 = 102$

The correct answer is option C.

Let C be Computer Science, M be Mechanical, and E be Electronics

It is also given that $C + E = M - (2)$

$$\text{Girls in M} = \frac{42.5}{100}M$$

$$\text{Boys in M} = \frac{57.5}{100}M$$

$$\text{Girls in C} = \frac{1}{3} \times \frac{57.5}{100}M = \frac{57.5}{300}M$$

$$\text{Boys in E} - \text{Girls in C} = \text{Boys in C} - \text{Girls in E}$$

$$\text{Boys in E} + \text{Boys in C} = \text{Girls in C} + \text{Boys in C}$$

$$E = C - (3)$$

$$\text{Girls in E} = 28.$$

From (1), (2) and (3) we get

$$C + M + E = C + 2C + C = 240$$

$$4C = 240$$

$$C = E = 60$$

$$M = 120$$

$$\text{Girls in M} = \frac{42.5}{100} M = \frac{42.5}{100} \times 120 = 51$$

$$\text{Girls in C} = \frac{57.5}{300} \times 120 = 23$$

$$\text{Girls in E} = 28$$

The percentage number of girls who opted for Mechanical to the number of students who opted for Electronics is,

$$\frac{\text{Girls in M}}{E} \times 100 = \frac{51}{60} \times 100 = 85\%$$

The correct answer is option C.

3. A

Let C be Computer Science, M be Mechanical, and E be Electronics

$$\text{Total number of students} = C + M + E = 240 - (1)$$

$$\text{It is also given that } C + E = M - (2)$$

$$M = \text{Girls in M} + \text{Boys in M}$$

$$\text{Girls in M} = \frac{42.5}{100} M$$

$$\text{Boys in M} = \frac{57.5}{100} M$$

$$C = \text{Girls in C} + \text{Boys in C}$$

$$\text{Girls in C} = \frac{1}{3} \times \frac{57.5}{100} M = \frac{57.5}{300} M$$

$$\text{Boys in E} - \text{Girls in C} = \text{Boys in C} - \text{Girls in E}$$

$$\text{Boys in E} + \text{Boys in C} = \text{Girls in C} + \text{Boys in C}$$

$$E = C - (3)$$

$$\text{Girls in E} = 28.$$

From (1), (2) and (3) we get

$$C + M + E = C + 2C + C = 240$$

$$4C = 240$$

$$C = E = 60$$

$$M = 120$$

$$\text{Girls in M} = \frac{42.5}{100} M = \frac{42.5}{100} \times 120 = 51$$

$$\text{Girls in C} = \frac{57.5}{300} \times 120 = 23$$

Girls in E = 28

Boys in M = 120 - Girls in M = 120 - 51 = 69

E = 60

$$\text{Ratio} = \frac{69 - 60}{60} \times 100 = 15\%$$

The correct answer is option A.

4. **D**

Let the two-digit number be xy .

$$(2x)(y/2) = yx$$

So, $2x = y$ or $y/2 = x$

This means the digit in the unit's place is twice the digit in ten's place.

5. **A**

Statement I :

Mixing the pulses in ratio 7 : 3, i.e. $7x$ kg and $3x$ kg

we get the total price of the mixture as $7x \times 15 + 3x \times 20 = 165x$

So, the price of 1 kg is $\frac{165x}{10x} = 16.5$

Hence, Statement I is true.

Statement II :

If the quantity of rice sold at 16 % profit is 750 kg, then the quantity of rice sold at 8 % profit is 250 kg.

$$\text{The overall profit is } \frac{(16 \times 750 + 8 \times 250)}{1000} = \frac{14000}{1000} = 14$$

Hence, Statement II is also true

 VIDEO SOLUTION

6. **B**

The Duplicate Ratio of 2 : 7 is the compound of it by itself i.e. 4 : 49

The compound ratio of 2 : 7, 5 : 3 and 4 : 7 is $2 \times 5 \times 4 : 7 \times 3 \times 7$ i.e. 40 : 147

The ratio same as 2 : 7 is 4 : 14

The ratio same as 5 : 6 is 25 : 30

Hence, the answer is Option B.

 VIDEO SOLUTION

7. **C**

A: If $\frac{1}{x} : \frac{1}{y} : \frac{1}{z} = 2 : 3 : 5$, then $x : y : z = 15 : 10 : 6$

$$x : y : z = \frac{1}{2} : \frac{1}{3} : \frac{1}{5} = \frac{15}{30} : \frac{10}{30} : \frac{6}{30}$$

Hence, $x : y : z = 15 : 10 : 6$

Correct

B: If $4p = 6q = 9r$, then $p : q : r = 9 : 6 : 4$

Let $4p = 6q = 9r = k$

Therefore, $p = k/4$

$q = k/6$

$r = k/9$

Hence, $p : q : r = \frac{k}{4} : \frac{k}{6} : \frac{k}{9} = \frac{9k}{36} : \frac{6k}{36} : \frac{4k}{36} = 9 : 6 : 4$

Correct

C: If $2A = 3B = 4C$, then $A : B : C = 3 : 4 : 6$

Let $2A = 3B = 4C = k$

then $A = k/2$

$B = k/3$

$C = k/4$

So, $A:B:C = \frac{k}{2} : \frac{k}{3} : \frac{k}{4} = \frac{6k}{12} : \frac{4k}{12} : \frac{3k}{12} = 6 : 4 : 3$

Incorrect

D: If $P : Q : R = 2 : 3 : 4$, then $\frac{P}{Q} : \frac{Q}{R} : \frac{R}{P} = 9 : 8 : 24$

Let $P = 2k$ so Q and R will be $3k$ and $4k$

SO, $\frac{P}{Q} : \frac{Q}{R} : \frac{R}{P} = \frac{2k}{3k} : \frac{3k}{4k} : \frac{4k}{2k} = \frac{2}{3} : \frac{3}{4} : 2 = 8 : 9 : 24$

Incorrect

 VIDEO SOLUTION

8. A

From 3 years to 4 years, the interest earned is $73205 - 66550 = ₹ 6,655$

Assuming Rate of Interest = $r\%$

Principal = 66,550

For 1 year from 3rd to 4th year, the amount becomes = ₹ 73,205

So, Interest = $PRT/100$

$6655 = 66500 \times r \times 1/100$

$r = 10\%$

 VIDEO SOLUTION

9. B

A glass jar contains 1 red, 3 green, 2 blue and 4 yellow marbles.

If a single marble is chosen at random from the jar, the probability of getting a yellow marble = $\frac{\text{no of yellow marbles}}{\text{Total no of marbles}} = \frac{4}{10}$

Probability of getting a green marble = $\frac{\text{no of green marbles}}{\text{Total no of marbles}} = \frac{3}{10}$

Probability of getting either a yellow or a green marble = $\frac{\text{no of yellow or green marbles}}{\text{Total no of marbles}} = \frac{4+3}{10} = \frac{7}{10}$

Probability of getting either a red or a yellow marble = $\frac{\text{no of yellow or red marbles}}{\text{Total no of marbles}} = \frac{4+1}{10} = \frac{5}{10}$

So, only B, C are correct.

10. C

A. $\sqrt{\frac{0.81 \times 0.484}{0.064 \times 6.25}} = \sqrt{\frac{0.81 \times 4.84}{0.64 \times 6.25}} = \sqrt{\frac{(0.9)^2 \times (2.2)^2}{(0.8)^2 \times (2.5)^2}} = \frac{0.9 \times 2.2}{0.8 \times 2.5} = 0.99$

$$B. \sqrt{\frac{0.204 \times 42}{0.07 \times 3.4}} = \sqrt{\frac{20.4 \times 42}{3.4 \times 7}} = \sqrt{6 \times 6} = 6$$

$$C. \sqrt{\frac{0.081 \times 0.324 \times 4.624}{1.5625 \times 0.0289 \times 72.9 \times 64}} = \sqrt{\frac{(0.9)^2 \times (0.18)^2 \times (6.8)^2}{(1.25)^2 \times (0.17)^2 \times (27)^2 \times 8^2}} = \frac{0.9 \times 0.18 \times 6.8}{1.25 \times 0.17 \times 27 \times 8} = 0.024$$

$$D. \sqrt{\frac{9.5 \times 0.085}{0.0017 \times 0.19}} = \sqrt{50 \times 50} = 50$$

11. **A**

A) $16\frac{2}{3}\% = 0.1667$

B) $\frac{2}{15} = 0.1333$

C) $0.17 = 0.17$

D) $0.25\% \text{ of } 64 = 0.16$

Hence,

$$B < D < A < C$$

[VIDEO SOLUTION](#)

12. **B**

We can rewrite the following as:

A) $\sqrt[4]{3} = 3\frac{1}{4}$

B) $\sqrt[3]{2} = 2\frac{1}{3}$

C) $\sqrt[6]{5} = 5\frac{1}{6}$

D) $\sqrt[6]{7} = 7\frac{1}{6}$

Now, we will make the denominator of all equal:

A) $3\frac{3}{12}$

B) $2\frac{4}{12}$

C) $5\frac{2}{12}$

D) $7\frac{2}{12}$

Simplifying further, we get,

$$\text{A) } 3\frac{3}{12} = (3^3)\frac{1}{12} = (27)\frac{1}{12}$$

$$\text{B) } 2\frac{4}{12} = (2^4)\frac{1}{12} = (16)\frac{1}{12}$$

$$\text{C) } 5\frac{2}{12} = (5^2)\frac{1}{12} = (25)\frac{1}{12}$$

$$\text{D) } 7\frac{2}{12} = (7^2)\frac{1}{12} = (49)\frac{1}{12}$$

Arranging them in sequence: We get: $B < C < A < D$

13. **D**

Let the cost price be Rs. 1000 per kg

So, Selling price = Rs. 900 per kg

But he sells only 70% of the quantity claiming it to be 100% quantity.

So, the actual cost price of 700 grams = Rs. 700

Actual selling price = Rs. 900

Profit = Rs. 200

$$\text{Profit \%} = (\text{Profit/Cost Price}) \times 100 = 200/700 = 200/7 \% = 28\frac{4}{7}\%$$

 VIDEO SOLUTION

14. **B**

If roots are reciprocal to each other, the product of roots will be 1.

From the given equation, the product of roots will be $\frac{r}{p}$. That will be equal to 1.

So, $r = p$

 VIDEO SOLUTION

15. **A**

Statement I :

If Shyam can finish the task by working alone in 8 days, so he will do $\frac{6}{8} \times 100 = 75\%$ of the work in 6 days.

The remaining 25% is done by Ram in 6 days.

So, if Ram does 25% of the work in 6 days, he will take $\frac{100}{25} \times 6 = 24$ days to complete the work alone.

Hence, the given statement is true.

Statement II :

Assume 1 person does 1 man hour work in one hour

So, in one week, working 8 hours a day,

The total work done by 6 person is $6 \times 8 \times 7 = 336$ man hours

Assume the payment to be Rs. x per man-hour

So, $336x = 8400$

or, $x = 25$

The total man hours for 9 persons working 6 hours a day for a week will be

$$9 \times 6 \times 7 = 378$$

So, the money earned is $378x = 378 \times 25 = 9450$

Hence, the given statement is true.

 VIDEO SOLUTION

16. **B**

If abc is positive, it can have two cases:

Case 1: when all three integers are positive

Case 2: when any two are negative and the third is positive (as the two negative will cancel while multiplying)

We need to find the option which must be true:

Option 1: $\frac{a}{b} < 0$

It is not necessary that one of a and b is negative and the other one is positive. It can be possible that both a and b are negative and hence the fraction can be greater than 0. Therefore, this option is not necessarily true.

Option 2: $\frac{ab}{c} > 0$

Here, if all the three integers are positive then the expression will definitely be greater than 0. On the other hand, if any two are negative then according to the expression, the negatives will cancel out and the expression will again be greater than 0. Hence, this option must be true.

Option 3: $bc < 0$

Same as option 1, it is not necessary that one of b and c is negative and the other one is positive for the expression to be true. There can also be the possibility when both are negative and the product can be greater than 0 in that case.

Option 4: $a > bc$

We don't know the numeric values so we can't say that a will be greater than the product of b and c necessarily.

17. **C**

The volume of the sphere = $\frac{4}{3} \times \pi \times (3)^3 = 36\pi$

Now, the water level will increase equal to the volume of the sphere.

Let the water level increase by h cm.

Therefore, $36\pi = \pi \times (4)^2 \times h$

$$h = \frac{9}{4}$$

18. **A**

"OMEGA" comprises 5 letters: O, M, E, G, A.

Vowels: O, E, A (3 vowels)

Consonants: M, G (2 consonants)

Odd positions in a 5-letter word are: 1st, 3rd, and 5th.

The vowels O, E, and A can be placed in these positions in $3! = 6$ ways.

The even positions are 2 and 4.

The consonants M and G can be arranged in these positions in $2! = 2$ ways.

The total number of arrangements is the product of the arrangements of vowels and consonants = $3! \times 2! = 6 \times 2 = 12$ ways.

19. B

Let A be his additional investment. The interest obtained on A will be $0.08A$.

The interest obtained on Rs. 1,200 will be Rs. 60.

$$60 + 0.08A = 0.06(1200 + A)$$

$$0.02A = 12$$

$$A = 600$$

 VIDEO SOLUTION

20. C

Assume the length of the first train to be x m

So, the length of the second train is $0.5x$ m

The total length to be covered = $1.5x$ m

As they are travelling in the opposite directions, their speed will add in relative frame

So, the combined speed is $48 + 42 = 90$ kmph or $90 \times \frac{5}{18} = 25$ m/s

$$\text{So, } \frac{1.5x}{25} = 12$$

$$1.5x = 300$$

$$\text{or, } x = 200 \text{ m}$$

Given it passes the station in 45 sec

Let the length of the station be l m

$$\text{So, } \frac{l + x}{48 \times \frac{5}{18}} = 45$$

$$l + x = 600$$

$$l = 400 \text{ m}$$

Hence, the answer is 400 m

 VIDEO SOLUTION

Logical Reasoning

21. C

The most logical order would be,

(B) Monsoon, (A) Rain, (D) Flood, (C) Rescue, (E) Shelter, (F) Relief

Hence, the correct answer is option C.

 VIDEO SOLUTION

22. **D**

We are asked the color of the milk which is white and in the second phrase, we are told that green means white. Hence, the color of the milk is green.

 VIDEO SOLUTION

23. **C**

If you look at the 4 dices given in the question, numbers 6, 3 and 4 are adjacent to 2.

Hence, these options are eliminated.

Thus, the number on the face opposite the face showing 2 is 5.

 VIDEO SOLUTION

24. **B**

A monkey climbs 20 feet at the beginning of each hour and rests for a while when he slips back 5 feet before he again starts climbing in the beginning of the next hour. So, the resultant height moved in an hour will be 15 feet.

In six hours, the monkey reaches 90 feet. At the start of 7th hour, monkey climbs 20 feet. With this it touches 110 feet.

So, at exactly 3:00 PM monkey reaches 110 ft for the first time.

 VIDEO SOLUTION

25. **C**

- **Bald** and **Blond** are related in that they are both terms used to describe characteristics of hair. **Bald** refers to a lack of hair, while **Blond** refers to a color of hair.
- Similarly, **Barren** and **Fertile** are related in that they are opposites concerning the ability to produce offspring or to be productive. **Barren** refers to the inability to produce, while **Fertile** refers to the ability to produce, often used in the context of soil, animals, or people (as in fertility).

Thus, the relationship is based on opposites or contrasts between the terms, just as **Bald** contrasts with **Blond**, so **Barren** contrasts with **Fertile**.

 VIDEO SOLUTION

26. **B**

A is 16th from the left, which means that there are 15 members to the left of A. C is 16th from the right, which means that there are 15 members to the right of C. It is also given that B is 4th to the right of A and 5th to the left of C. So, there are a total of 15 members to the left of A, 3 members between A and B, 4 members between B and C, and 15 members to the right of C in the row of boys. So, the total number of boys in the row is $15 + 3 + 4 + 15 + 3 = 40$ boys. The last 3 in the calculation represent A, B and C.

Hence, the correct answer is option B.

 VIDEO SOLUTION

27. **C**

H = 8th A = 1st N = 14th D = 4th

S = 19th Z = 26th M = 13th W = 23rd

$$8 + 19 = 27$$

$$1 + 26 = 27$$

$$14 + 13 = 27$$

$$4 + 23 = 27$$

Similarly,

M = 13th I = 9th L = 12th K = 11th

Now, let's check for all the options:

Option a: O = 15th R = 18th N = 14th P = 16th Not equal sum

Option b: P = 16th N = 14th R = 18th O = 15th Not equal sum

Option c: N = 14th R = 18th O = 15th P = 16th Equal sum = 27

Option d: R = 18th N = 14th O = 15th P = 16th Not equal sum

 VIDEO SOLUTION

28. **C**

If you look carefully on the images given of the cylinder, you will observe that the cylindrical bases have Pink and Yellow colours.

The colours on the curve of the cylinder are Green, Blue, Red and Violet.

Green and Blue colours are together, so Red and Violet will be together.

Hence, the colour in the empty space is Violet.

 VIDEO SOLUTION

29. **A**

I: People do not ask about your tailor if your shirt is not good.

The statement implies that when a shirt is excellent, it prompts people to inquire about the tailor. This suggests that such inquiries are tied to the shirt's quality. Therefore, it is reasonable to assume that if the shirt is not good, people are less likely to ask about the tailor. Assumption I is implicit in the statement.

II: People want to know the criteria of an excellent shirt.

The statement does not explicitly mention or imply that people are interested in the criteria for an excellent shirt. It focuses on their curiosity about the tailor, which could stem from admiration of the craftsmanship, rather than a desire to understand what makes a shirt excellent. Assumption II is not necessarily implied by the statement.

So, only Assumption I is implicit

 VIDEO SOLUTION

30. **B**

- **Argument I** raises a valid concern about individual privacy, but the intrusion into privacy is not necessarily absolute. In public health matters, certain individual rights can be balanced against the potential benefits to society. For example, medical checks before marriage could prevent serious health risks for future children, which could be seen as a societal benefit that outweighs individual privacy concerns in this specific context.
- **Argument II** is stronger because it addresses a clear, tangible benefit: reducing the risk of giving birth to children with serious health conditions. This has direct positive implications for public health and the well-being of families and future generations. The argument is grounded in a practical, preventive approach that could have significant health benefits, making it a more compelling reason for the compulsory medical examination.

Therefore, **Argument II** is stronger because it presents a clear, socially beneficial reason for why compulsory medical examinations might be necessary, with long-term health benefits, whereas Argument I is more abstract and focused on individual rights without addressing the potential public health advantages.

CMAT Syllabus PDF

31. A

The given statements can be represented diagrammatically as follows,

From the diagram, it is clear that X must have been walking in the north direction at the end. Therefore, option A is the correct answer.

VIDEO SOLUTION

32. D

Between 10 A.M. on Monday to 1:00 PM the following day, the watch gained 4.5 minutes.

So, in 27 hours, the watch gained 4.5 minutes.

It means, the watch gained every minute in every $\frac{27}{4.5} = 6$ hours

At 10:00 AM, the watch was 2 minutes slow, so the watch would be showing accurate time in next $2 \times 6 = 12$ hours i.e. 10:00 P.M.

33. C

The relationship is one of synonyms:

"Vigilant" and "Alert" are synonymous, meaning watchful or attentive.

"Similarly, "Viable" means capable of working or feasible.

34. C

Bajra, Barley, and Rice are all cereals or grains primarily grown for their seeds, which are used as staple food crops. Mustard is primarily an oilseed crop, grown for its seeds that are processed to produce mustard oil or used as a spice.

Since mustard serves a different primary purpose (oil production or seasoning) compared to the others (staple food grains), it is the odd one out.

35. D

- (A) Some suitcases are bags:

Since **some bags are purses** (from Statement 1), and **all purses are containers** (Statement 2), and **all containers are suitcases** (Statement 3), this logically means that some of the bags, through purses, will also be suitcases. Therefore, **Conclusion (A) is true**.

- (B) All purses are bags:

The statement "some bags are purses" does not imply that all purses are bags. Thus, **Conclusion (B) does not follow** from the given statements.

- (C) All purses are suitcases:

Since **all purses are containers** and **all containers are suitcases**, it follows logically that **all purses are suitcases**. Therefore, **Conclusion (C) is true**.

- (D) Some containers are purses:

Since **all purses are containers**, it follows that **some containers (specifically, purses) are indeed purses**. Therefore, **Conclusion (D) is true** as well.

Thus, the correct conclusions are (A), (C), and (D).

CMAT Percentile Predictor

36. D

The number of triangles with no lines inside them is 6.

The number of triangles with 1 line inside them is 7.

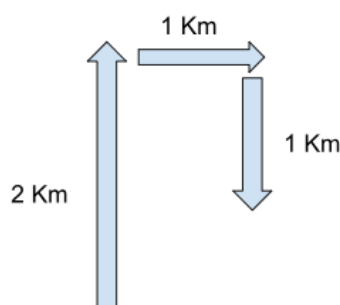

The number of triangles with multiple lines inside them is 8.

So, a total of 21 triangles are inside the given figure.

Hence, the correct answer is option D.

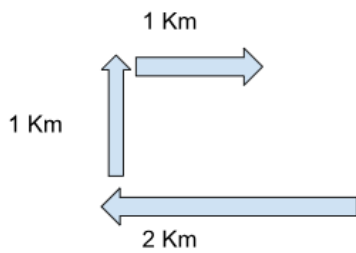

37. D

Let Miss Lilly start moving towards North direction. So the diagram would be as follows:

According to this diagram, Lilly is currently in the North - East Direction from her house.

If we tilt to make the current direction of Lilly in North - West direction, we get the following diagram,

Hence, Lilly would have initially moved in the West Direction.

[▶ VIDEO SOLUTION](#)

38. **A**

Assertion (A) states that a person with blood group O is supposed to be a universal donor. This statement is scientifically accurate because individuals with blood group O can donate blood to recipients of any other blood group. Their red blood cells do not have A or B antigens on their surface, which minimizes the risk of an immune reaction when their blood is transfused into someone with a different blood group.

The **Reason (R)** explains that blood group O contains no antigens. This statement is correct because individuals with blood group O lack A and B antigens in their red blood cells. The absence of these antigens means that the recipient's immune system is less likely to recognize the donor blood as foreign, making it safe for transfusion across different blood groups.

Finally, the **Reason (R)** directly and sufficiently explains why the **Assertion (A)** is accurate. The universal donor status of blood group O is entirely due to the absence of A and B antigens, which is why the Reason is the correct explanation for the Assertion.

Hence, Both statements are correct, and the Reason explains the Assertion appropriately.

39. **C**

The given statement states that *"domestic demand has been increasing faster than production of indigenous crude oil."*

This means the country's demand would be greater than its current production, or supply.

In this case, we must look for a conclusion to address the issue mentioned in the statement. So, Either of the given conclusions would follow because:

I. This would resolve the issue of meeting demand if production is less than demand.

II. This could help tackle the issue by balancing the demand with the available supply.

Therefore, Option C is the correct answer.

40. **D**

Taking square root of the numbers on the edges

$$\sqrt{9} = 3$$

$$\sqrt{36} = 6$$

$$\sqrt{64} = 8$$

$$\sqrt{169} = 13$$

Adding these and dividing by 5 we get

$$\frac{3 + 6 + 8 + 13}{5} = \frac{30}{5} = 6$$

Similarly, for the second one we get

$$\sqrt{16} = 4$$

$$\sqrt{49} = 7$$

$$\sqrt{9} = 3$$

$$\sqrt{36} = 6$$

Adding these and dividing by 5 we get

$$\frac{4 + 7 + 3 + 6}{5} = \frac{20}{5} = 4$$

Hence, for the last one we get

$$\sqrt{81} = 9$$

$$\sqrt{100} = 10$$

$$\sqrt{25} = 5$$

$$\sqrt{121} = 11$$

Adding these and dividing by 5 we get

$$\frac{9 + 10 + 5 + 11}{5} = \frac{35}{5} = 7$$

Hence, the answer is 7.

Language Comprehension

41. **C**

The answer is both as a noun and an adjective as it is used to refer to the head of an institution and the primary concern

VIDEO SOLUTION

42. **C**

"He" is singular in nature. In simple present tense, the singular subject takes the verb in the third person with a -s.

hence, the correct answer would be "catches."

Option B: "Is catching" shows a continuous nature, which does not fit the sentence's "often" e.

Option D: "Have caught" shows the past nature, which also does not fit the present form of the original sentence.

Option A: "catch" is the base form, if we want to use catch we would need something like "He does often catch cold."

Therefore, Option C is the correct answer.

VIDEO SOLUTION

43. **B**

Option B is the correct answer.

The other options (hold back, hold on, hold up) are phrasal verbs that have commonly used idiomatic meanings:

Hold back: To restrain or keep something under control.

Hold on: To wait or to endure.

Hold up: To delay or to support.

On the other hand, hold high is not a commonly used idiomatic expression in English, making it the odd one out.

 VIDEO SOLUTION

44. C

The word "obligatory" means something that is required or compulsory, often implying that it must be done or adhered to. The only word opposite to this is "voluntary." this means done out of one's free will, not compelled or mandatory. Hence, Option C is the correct choice.

 VIDEO SOLUTION

45. D

Speech without any prior preparation is the definition of Extempore

 VIDEO SOLUTION

46. A

Option B is grammatically incorrect; the advertisement does not "see" and can easily be eliminated.

Option C is also slightly grammatically incorrect, it should be "is seen" and not "are seen", also the placement of "one" fits awkwardly.

Option D changes the intent of the original sentence, it is not that thee advertisements are shown everywhere but that they are seen everywhere

Option A is the only correct passive form of the sentence.

Therefore, Option A is the correct answer.

 VIDEO SOLUTION

47. C

Option C is the correct answer. 'Getting at me' is the correct phrasal verb here, meaning "criticizing me" or "picking on me," which fits the context.

Gets at me (Option A) is in the wrong tense and does not align with the rest of the sentence structure. Get off at me (Option B) and getting by me (Option D) are not idiomatic or grammatically correct in this context.

 VIDEO SOLUTION

48. C

The word "**concerned**" (used as a past participle) is appropriate because it expresses that the chapter is focused on or dedicated to a specific subject, i.e., the role and reach of reasoning. This usage aligns with formal writing conventions.

 VIDEO SOLUTION

49. A

The word "**provide**" fits because it completes the infinitive verb phrase "can provide," indicating the potential role of reasoning in forming a theory of justice. This is both grammatically correct and contextually appropriate.

 VIDEO SOLUTION

50. **C**

The definite article "**the**" is appropriate because "first chapter" is a specific entity. In formal English, we use "the" before ordinal numbers (e.g., "the first," "the second") to denote something specific and singular.

 VIDEO SOLUTION

51. **D**

Option D is the correct answer. The sequence BADC forms a coherent paragraph.

Sentence (B) introduces the central issue of India's water crisis.

Sentence (A) elaborates on the pollution in water bodies, providing a reason for the crisis.

Sentence (D) highlights the lack of clean water availability as a consequence.

Sentence (C) concludes with the resulting interstate disputes over river water.

 VIDEO SOLUTION

52. **A**

The definition of "Cajole" is as follows: persuade (someone) to do something by sustained flattery. Using this we can infer that the synonyms are Entice and Coax

 VIDEO SOLUTION

53. **D**

Why C is the starting sentence:

The sentence must begin with the subject, which is "The Indian Government" (C). This introduces who is performing the action, making it the logical starting point.

Why B follows C:

After introducing the subject, the next logical step is to describe what the government "had to plan for" (B). This phrase connects the subject to the action.

Why A comes after B:

The phrase "balanced economic growth" (A) specifies what the government planned for, naturally following the verb phrase in B.

Why D comes last:

"and development of a huge country" (D) adds additional detail and completes the idea, providing a conclusion to the sentence.

Thus, the logical flow is:

C (subject) → B (action) → A (object of planning) → D (additional detail).

 VIDEO SOLUTION

54. **C**

(A) Win hands down can be easily understood to win without putting much effort, the option most in line with this would be II, conquering easily.

(B) Learning the hard way would best fit III: Learning from bad experiences.

(C) Feeling blue is not very common, but among the given options, only IV: Miserable would best fit the "blue".

(D) The connection of "heel" can be made to connect with running and I: to run away.

Hence, the correct matching would be: (A)-II, (B)-III, (C)-IV, (D)-I

Therefore, Option C is the correct answer.

 VIDEO SOLUTION

55. **C**

Option C is the correct answer.

A. Alibi - (II) Other [Refers to being "elsewhere" (other) as an excuse for not being at the scene of a crime.]

B. Ex parte - (IV) From one side only [Refers to a legal proceeding conducted from one side only.]

C. Lex loci - (III) The law of the place [Means "the law of the place" in legal terminology.]

D. Quid pro quo - (I) This for that [Means "something for something" or "this for that."]

 VIDEO SOLUTION

56. **C**

Modal verbs are auxiliary verbs that express modality, indicating possibility, ability, permission, necessity, or obligation. For example: "She **can** swim."

Statement I: This is correct; modal verbs have only one form (for example, can, may, should and so on); they do not have -ing or -ed forms.

Statement II: This is incorrect; modal verbs are not followed by the past participle directly, but by the base form of the verb.

Therefore, Option C is the correct answer.

 VIDEO SOLUTION

57. **A**

Assertion (A): The sentence "*The details of the incident was not known*" does not adhere to the requirement of subject-verb agreement and is grammatically incorrect.

This is correct because the subject "*details*" is plural, so the verb should be "*were*" instead of "*was*."

Reason (R): In "Noun + Preposition + Noun" constructions, the verb agrees with the number and person of the noun preceding the preposition.

This is also correct because in the given sentence, the noun preceding the preposition "*of*" is "*details*," which is plural. Therefore, the verb should match the plural subject.

Conclusion: The Reason (R) correctly explains the grammatical error identified in Assertion (A). Thus, the correct answer is:

Both Assertion (A) and Reason (R) are true, and Reason (R) is the correct explanation of Assertion (A).

 VIDEO SOLUTION

58. **A**

Statement I is correct. Dare is usually used in sentences to question the authority of an action in a negative tone: He dare speak against the king. It also is often followed by "to": He dared to steal again from here.

Statement II is also correct; it can also be used as a modal verb: "He dare not speak." or "He dares to challenge his opponents."

Both statements are correct.

Therefore, Option A is the correct answer.

59. **C**

The passage discusses how uniform and fixed systems of education are limiting and how diversity is essential for human excellence and progress. The author argues for a flexible, varied approach to education to foster intellectual and moral growth. In this context, let us evaluate the given statements -

Statement A: The author indeed establishes a binary between uniformity (which is static and limiting) and diversity (which promotes intellectual and moral progress).

Statement B: The passage explicitly criticizes fixed and uniform educational systems and does not uphold them.

Statement C: While the author associates uniformity with brutishness, the passage does not present it as necessary for society but rather as an impediment to progress.

Statement D: The passage strongly advocates for diversity in education as a cornerstone for human excellence and development, contrasting it with the uniformity found in nature (e.g., birds).

Hence, only statements A and D are valid. Therefore, Option C is the correct choice.

 VIDEO SOLUTION

60. **C**

The passage is not descriptive (as in Option A) or narrative (as in Option B) but rather an exploration of education's transformative power and its role in advancing human capabilities. This makes Option C the best choice. The passage is reflective and philosophical, exploring the role and impact of education on human development. It emphasizes how education can shape individuals, encourage diversity, and lead to infinite intellectual and moral improvement.

General Awareness

Innovation and Entrepreneurship

81. **C**

Option c) (A) - (II), (B) - (III), (C) - (I), (D) - (IV). is the correct answer.

Intrapreneur → Risk-taking in an organisational role (II): An intrapreneur is an individual within an organization who takes initiative and risks to innovate or implement ideas within the company.

Entrepreneur → Calculated Risk-taking (III): Entrepreneurs are individuals who take calculated risks to start and run businesses, aiming for profit and growth.

Distributor → Value Addition (I): Distributors play a crucial role in adding value by bridging the gap between manufacturers and consumers, ensuring products reach the market.

Customer → Utility Maximisation (IV) : Customers aim to maximise their utility or satisfaction by choosing products or services that best meet their needs and preferences.

82. **D**

The correct answer here is Option D: (A) - (III), (B) - (IV), (C) - (II), (D) - (I).

(A) - (III): Availability of raw materials, machinery, etc., falls under technical feasibility, as it ensures that the required inputs and resources for production are technically viable.

(B) - (IV): Demand and customer preferences are related to market feasibility, as they determine the product's market acceptance.

(C) - (II): Profit projections relate to financial feasibility, as they evaluate whether the business can sustain itself financially.

(D) - (I): A business plan integrates market, technical, and financial feasibility, summarizing the overall strategy for the business.

83. D

The entrepreneur is best described by both (1) and (2) because:

- **Option A:** Entrepreneurs are indeed catalysts for change. They identify gaps in the market, challenge the status quo, and drive innovation, often creating significant shifts in how industries operate. Their aggressive pursuit of improvement and solutions marks them as transformative forces.
- **Option B:** Entrepreneurs are independent thinkers who take calculated risks and dare to stand out. They pursue unconventional paths and ideas that differentiate them from the crowd, often pioneering new trends and practices.
- **Option C:** While entrepreneurs create businesses, reducing their role to mere creators is an oversimplification. Their impact extends beyond the creation stage, influencing industries, economies, and society.

Entrepreneurs do more than just create businesses. They embody the spirit of innovation (A) and individuality (B), which are essential in navigating dynamic and competitive business environments. Together, these traits highlight their multifaceted role.

Therefore, the correct answer is option D.

84. C

Speculative risk business refers to the type of risk that involves the possibility of either a gain or a loss. Unlike pure risk, which only involves the potential for loss (such as property damage or injury), speculative risk allows for the possibility of both positive and negative outcomes.

According to the question, **A special promotion fails to increase the sales** is an example of a speculative risk business because there is a possibility of either gaining or losing (in this case, the company might not achieve the desired sales increase). Speculative risks involve outcomes that can result in both profits and losses, which is the nature of this situation.

85. C

An **intrapreneur** is a corporate manager or employee who takes the initiative within an organization to create a new business unit, product, or service. They act like entrepreneurs but work within the structure and resources of an existing organization. Intrapreneurs bring innovative ideas to life while leveraging the company's support.

Ecopreneur: Focuses on environmental sustainability and creates businesses that contribute to ecological well-being.

Technopreneur: An entrepreneur who specializes in technology-based ventures.

Businessman/Businesswoman: Refers to individuals engaged in traditional business operations, typically outside the scope of intrapreneurship.

Hence, answer is Option C Intrapreneur

CMAT Syllabus PDF

86. C

87.D

1. **Shishu** (Up to ₹50,000): This category is for very small businesses or startups looking for small loans.
2. **Kishore** (₹50,001 to ₹5 lakh): This category is for businesses that are slightly larger or need more working capital.
3. **Tarun** (₹5,00,001 to ₹10 lakh): This category is for more established businesses that require larger amounts of funding for expansion.

88.C

1. Knowledge accumulation (A): This is the initial stage where the entrepreneur gathers information, insights, and expertise relevant to the problem or opportunity.
2. Incubation (B): In this stage, the gathered knowledge is subconsciously processed, allowing ideas to develop and mature over time.
3. Idea experience (D): Here, the entrepreneur experiences a "eureka moment" or breakthrough idea based on the incubation process.
4. Evaluation (E): The generated idea is critically assessed for feasibility, practicality, and potential impact.
5. Implementation (C): The final stage involves putting the evaluated idea into action, turning creativity into tangible outcomes.

89.C

90. **B**

63/66

1. Empathise: Understanding the user's needs and experiences.
2. Define: Clearly defining the problem or challenge.
3. Ideate: Brainstorming and generating creative ideas.
4. Prototype: Developing low-fidelity versions of the solution to test ideas.
5. Test: Testing the prototypes to gather feedback and refine the solution.

D) Modelling is not a part of the design thinking process.

CMAT Percentile Predictor

91. D

Entrepreneurship Development Programmes (EDPs) focus on identifying and selecting potential entrepreneurs, enhancing their capabilities through training, and developing their entrepreneurial mindset. Though they address entrepreneurial skills and strategies, they do not directly involve arranging infrastructural capabilities, which are external, logistical concerns typically handled by other agencies or partnerships. Hence, Option D is the best choice.

92. D

The Government of India launched the **Start-Up India** initiative in 2016 to foster innovation, encourage entrepreneurship, and support new-age ideas and enterprises. This program focuses on building a robust startup ecosystem by providing financial support, simplifying regulations, and promoting collaboration between startups and government or private entities.

A) Production Linked Incentive (PLI): A scheme to boost domestic manufacturing and exports in specific sectors by linking incentives to production. It targets established industries rather than startups.

B) Special Economic Zone (SEZ): Focuses on promoting exports and investments by creating industrial zones with favourable economic laws but not directly aimed at startups.

C) Technology Development Board: Provides financial assistance for commercializing indigenous technologies but is not a comprehensive startup ecosystem program.

Therefore, the correct answer is option D.

93. B

Statement I: "People's attitudes have changed over the years leading to involvement of State (Government) in businesses globally."

This statement is misleading because while people's attitudes have indeed evolved, the increased involvement of the state in business globally is more driven by economic, social, and political factors rather than just changes in people's attitudes.

Statement II: "Increasing technicality is leading to State (Government) to make interventions in businesses globally."

This statement is also incorrect in its phrasing. While increasing technical complexity in industries may be necessary for certain government interventions (like regulations for safety, intellectual property, etc.), the statement makes it sound as though the main driver of state intervention is the technical complexity itself, which is not entirely accurate.

94. D

The correct answer is "**Live and License**" because it is not a recognized form of business organization.

Sole Proprietorship: This is the simplest form of business, where a single individual owns and manages the enterprise.

Partner Organization: In this setup, two or more individuals come together to run a business and share profits, responsibilities, and liabilities.

Private Limited Company: This is a registered company with limited liability for its shareholders, often chosen for scalability and credibility.

On the other hand, "**Live and License**" does not pertain to business structuring. It usually refers to property agreements, such as a rental contract, and has no relevance to initiating a business or enterprise.

95. **C**

A) Present Market Demand gives a snapshot of the current consumption levels.

B) Export Market Demand helps in understanding the potential in international markets, which can contribute to overall market potential.

C) Future Market Demand is crucial for projecting growth and long-term viability.

Labour Demand (D) and Retailer's Consumption Preferences (E), while important for operational and marketing strategies, are less directly related to estimating overall market potential.

So, option C is the correct answer.

96. **C**

Statement I: True

An entrepreneur can indeed gather useful information about competitors from publicly available sources like company reports and websites. These sources often include annual reports, financial statements, and other insights into the competitors' strategies.

Statement II: False

The first step to avail finance for a new project is **not** the promoter's biodata. Typically, the first step involves preparing a **detailed business plan** or **project proposal** that outlines the nature of the business, its objectives, financial projections, and the need for financing. The promoter's biodata may be required later during the due diligence process but is not usually the very first step in seeking financing.

97. **A**

Assertion (A): Small businesses are considered important to economic development.

This is correct because small businesses contribute significantly to job creation, economic diversification, and the development of local economies.

Reason (R): Small businesses can be innovators of new products and provide specialist support to larger companies.

This is also correct because small businesses often bring innovation to the market through niche products and services while complementing the operations of larger firms by offering specialized expertise.

Conclusion: The Reason (R) clearly explains why small businesses are important to economic development, as stated in Assertion (A). Therefore, the correct answer is:

Both Assertion (A) and Reason (R) are correct, and Reason (R) is the correct explanation of Assertion (A).

98. **C**

Statement I: This is widely considered true as yoga and hobbies are scientifically proven to reduce stress, improve mental health, and promote relaxation. Hence, this statement is correct.

Statement II: While a certain stress level (known as eustress) can motivate an individual to perform better, chronic or excessive stress is generally harmful and counterproductive. Stress is not universally "welcoming" and does not inherently lead to a balanced life. Hence, this statement is incorrect.

Therefore, Option C is the correct answer.

99. **D**

Option D is the correct answer.

For an enterprise dealing in instant coffee, the factors that provide a competitive edge are:

1) Quality and taste: Customers are primarily drawn to products that meet their expectations in terms of taste and quality. This is a critical factor for a coffee business.

3) Ambience and customer relationship: While selling coffee, creating a positive customer experience and maintaining good relationships can improve customer retention and loyalty.

Population increase in the city (option B) is not a direct factor that provides a competitive edge, as it doesn't guarantee increased preference for the business or its products.
