English Language Proficiency

Instructions [1 - 5]

In each of the following sentences four words or phrases have been underlined. Only one underlined part in each sentence is not acceptable in Standard English. Find out that part and darkens the circle having its number 1, 2, 3 or 4 in your Answer Sheet.

1. If the government is **bent on**(1) conciliatory measures **their**(2) intention has produced no **effect**(3) on the **insurgents**.(4)

- A (1)
- B (2)
- C (3)
- D (4)

2. Our strongest(1) reason for siding(2) with(3) the Communists is because(4) our father is a Communist.

- A (1)
- B (2)
- C (3)
- D (4)

3. He ordered(1) the servants to prepare(2) a feast, had the gates opened(3) and to fire(4) a salute.

- A (1)
- B (2)
- C (3)
- D (4)

4. The whole(1) block of flats including(2) two shops were(3) destroyed in(4) fire.

- A (1)
- B (2)
- C (3)
- D (4)

5. Those who(1) are desirous(2) of applying for the post they(3) should do on forms(4) supplied by the office.

- A (1)
- B (2)
- C (3)
- D (4)

Instructions [6 - 10]

Each of the following words in capital letters is followed by four likely synonyms. One of them is NOT the correct synonym. Pick up that.

6. A BRIDGE

- A Contract
- B Venerate
- C abstract
- D abbreviate

7. COGNIZANT

- A aware
- B conscious
- C vindict
- D informed

8. FISSURE

- A Slit
- B Chasm
- C ravine
- D fusion

9. INNOCUOUS

- A immoral
- B harmless
- C unobjectionable
- D impeccable

10. PERENNIAL

- A Ceaseless
- B perishable
- C recurrent
- D continual

Instructions [11 - 15]

Each of ten following words in capital letters is followed by four likely antonyms. One of them is not the correct antonym. Pick that up.

11. LATENT

- A apparent
- B exposed
- C manifest
- D officious

12. NAIVE

- A crafty
- B diplomatic
- C brave
- D wily

13. REGAL

- A legal
- B beggarly
- C slavish
- D poor

14. TRANQUILITY

- A calmness
- B excitement
- C agitation

D disturbance

15. AMALGAMATE

A dissociate

B unravel

C untangle

D seethe

Instructions [16 - 20]

Select the lettered pair of words which are related in the same way as the capitalized words are related to each other.

16. TEPID : HOT::

A winter : summer

B pat : slap

C pink : blue

D paper : page

17. MODESTY : ARROGANCE::

A obese : fat

B soldier : army

C debility : strength

D shout : speak

18. GERM: DISEASE::

A man : woman

B doctor : medicine

C shopkeeper : goods

D war : destruction

19. BOUQUET : FLOWER::

A skin : body

B chain : link

C product : factory

D page : book

20. ENCOURAGE : RESTRICT::

- A deprive : supply
- B gain : succeed
- C detain : deny
- D laugh : smile

Instructions [21 - 25]

Fill in the blanks by selecting appropriate alternative.

21. It was time for us _____ preparation to leave.

- A start to make
- B starting to make
- C start to making
- D to start making

22. We _____ start now to work for our project.

- A had better
- B better
- C have better
- D are better

23. He took up the letter from the table and _____ it aloud to his father.

- A was reading
- B had read
- C read
- D has been reading

24. When I met him he was walking _____ the crowded street.

- A upon
- B into

C against

D down

25. He is the only boy in the class who _____ a book whenever he gets time.

A reads

B has read

C is reading

D has been reading

Instructions [26 - 30]

Each sentence below has one or two blanks. Choose the word or set of words that best completes the sentence meaningfully.

26. If you come to the conference table with such an _____ attitude, we can not expect to reach any harmonious agreement.

A exemplary

B indolent

C adamant

D unwonted

27. This well-documented history is of importance because it carefully _____ the _____ accomplishments of Indian artists who are all too little known to the public at large.

A recognizes -- negligible

B overlook -- purported

C scrutinizes -- illusory

D substantiates -- considerable

28. Because he is so _____ we can never predict what course he will take at any moment.

A incoherent

B superficial

C capricious

D conventional

29. He was convinced that people were driven by _____ motives and there was no such thing as a purely unselfish act.

- A sentimental
- B personal
- C ulterior
- D intrinsic

30. He found himself in the _____ position of appearing to support a point of view which he abhorred.

- A obvious
- B anomalous
- C enviable
- D innocuous

Instructions [31 - 40]

For these questions a paragraph with many numbered blanks is given: Read the paragraph carefully and for each question choose the appropriate word from the given alternatives to fill up the blank. Mark your answer in the Answer-sheet as instructed.

Primitive man was perhaps more concerned with fire as a source of warmth and as a means of cooking food than as a source of light. (1) he discovered less labourious ways of making fire, he had to (2) it and whenever he (3) on a journey he carried (4) firebrand with him. His discovery (5) the firebrand, from which (6) torch may well have developed, (7) used for illumination was (8) accidental to the primary purpose (9) Preserving a flame. Lamps too probably developed by accident. Early man (10) his first conception of a lamp while watching a twig or fibre burning in the molten fat dropping from a roasting carcass.

31. (1)

- A As soon as
- B No sooner
- C As
- D Before

32. (2)

- A conserve
- B keep
- C preserve
- D retain

33. (3)

- A did go
- B went
- C had gone
- D was going

34. (4)

- A a
- B some
- C such
- D any one

35. (5)

- A of
- B that
- C as
- D once

36. (6)

- A a
- B our
- C a new
- D the

37. (7)

- A could
- B can be
- C is
- D could be

38. (8)

- A presumably
- B probably
- C perhaps
- D supposedly

39. (9)

- A of
- B for
- C to
- D in

40. (10)

- A have had
- B had had
- C may have had
- D might have had

Quantitative Ability

41. If x and y are natural numbers such that $\left(\frac{1}{x}\right)^{\frac{1}{y}} = 0.\overline{3}$, then the value of XY is

- A 24
- B 81
- C 192
- D 375

42. The sum of the squares of two consecutive natural numbers is 61. The numbers are

- A 4 and 5
- B 5 and 6

- C 6 and 7
D - 6 and - 5

43. Which of the following is equal to 1 ?

- A $\frac{(0.11)^2}{(1.1)^2 \times 0.1}$
B $\frac{(1.1)^2}{11^2 \times (0.01)^2}$
C $\frac{(0.011)^2}{1.1^2 \times (0.01)^2}$
D $\frac{(0.11)^2}{11^2 \times 0.01}$

44. The sum of digits of a natural number $(10^n - 1)$ is 4707, where n is a natural number. The value of n is

- A 477
B 523
C 532
D 704

45. The last digit in the decimal representation of $(\frac{1}{5})^{2000}$ is

- A 2
B 4
C 5
D 6

46. If $\log 2 = 0.3010$, then the number of digits in 4^{50} is

- A 30
B 31
C 100
D 200

47. If $\log \frac{a^2}{b} + \log \frac{b}{a^2} = \log(a + b)$, then

- A $a = b$
B $a - b = 1$
C $a + b = 1$

D $a^2 + b^2 = 1$

48. $\frac{1}{\log_a b} \times \frac{1}{\log_b c} \times \frac{1}{\log_c a}$ is equal to

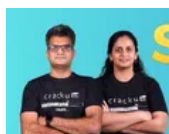

- A $a+b+c$
- B abc
- C 0
- D 1

49. The ratio of the areas of a square and a square on its diagonal is

- A 1 : 1
- B $1 : \sqrt{2}$
- C 1 : 2
- D 1 : 4

50. The volume of the largest possible cube that can be inscribed in a hollow spherical ball of radius r cm is

- A $\frac{2}{\sqrt{3}}r^2$
- B $\frac{4}{3}r^2$
- C $\frac{8}{3\sqrt{3}}r^3$
- D $\frac{1}{3\sqrt{3}}r^3$

SRCC GBO Previous Papers

51. A square is inscribed in a circle and another in a semi-circle of same radius. The ratio of the area of the first square to the area of second square is

- A 5 : 2
- B 5 : 4
- C 4 : 5
- D 2 : 5

52. An open box is made by cutting the congruent squares from the corners of a rectangular sheet of cardboard of dimensions $20 \text{ cm} \times 15 \text{ cm}$. If the side of each square is 2 cm, the total outer surface area of the box is

- A 148cm^2
- B 284cm^2
- C 316cm^2
- D 460cm^2

53. A small ring of negligible thickness and radius 2cm moves on a bigger ring of radius 10 cm. How many rotations will the small ring take on the bigger ring to make a complete round ?

- A 5
- B 6
- C 7
- D 10

54. The cost of fencing an equilateral triangular park and a square park is the same. If the area of the triangular park is $16\sqrt{3}\text{m}^2$, the length of the diagonal of the square park is

- A $8\sqrt{2}\text{m}$
- B $7\sqrt{2}\text{m}$
- C $6\sqrt{2}\text{m}$
- D $4\sqrt{2}\text{m}$

55. A closed aquarium of dimensions $30\text{ cm} \times 25\text{ cm} \times 20\text{ cm}$ is made up entirely of glass plates held together with tapes. The total length of tape required to hold the plates together (ignore the over lapping tapes) is

- A 75 cm
- B 120 cm
- C 150 cm
- D 300 cm

56. Three boys are standing on a circular boundary of a fountain. They are at a equal distance from each other. If the radius of the boundary is 5m, the shortest distance between any two boys is

- A $\frac{5\sqrt{3}}{2}\text{m}$
- B $5\sqrt{3}\text{m}$
- C $\frac{15\sqrt{3}}{2}\text{m}$
- D $\frac{10\pi}{3}\text{m}$

57. Rita and Meeta both are having lunch boxes of a cuboidal shape. Length and breadth of Rita's lunch box are 10% more than that of Meeta's lunch box, but the depth of Rita's lunch box is 20% less than that of Meeta's lunch box. The ratio of the capacity of Rita's lunch box to that of Meeta's lunch box is
- A 11 : 15
B 15 : 11
C 125 : 121
D 121 : 125
58. On a particular day of a trade fair, 35000 visitors had visited the fair. The amount collected at the entrance counter was Rs. 9,50,000. The entrance fee was at the rate of Rs. 40 for an adult and Rs.20 for a child. If 10% of the visitors had used free passes, the number of children who visited the fair is
- A 12,500
B 15,500
C 16,000
D 31,500

On a particular day of a trade fair, 35000 visitors had visited the fair. The amount collected at the entrance counter was Rs. 9,50,000. The entrance fee was at the rate of Rs. 40 for an adult and Rs.20 for a child. If 10% of the visitors had used free passes, the number of children who visited the fair is

- A) 12,500
C) 16,000

- B) 15,500
D) 31,500

$$35000 \times 0.9 = 31500$$

VIDEO SOLUTION

59. Three spheres of radii 3cm, 4cm and 5cm are melted to form a new sphere. The radius of the new sphere is
- A 6 cm
B 7.5 cm
C 10 cm
D 12 cm

60. The mean of 30 observations was calculated as 150. Later, it was pointed out that value of one of the observations was wrongly taken as 135 instead of 165. The correct mean is
- A 180
B 151
C 149
D 120
61. In a class of 45 students, 30 are boys and remaining are girls. If the mean weight of girls is 45 kg and that of boys is 52 kg, then the mean weight of entire class (in kg) is nearest to
- A 48
B 49
C 50
D 51

VIDEO SOLUTION

62. The mean of the first 10 even natural numbers is

- A 9
B 10
C 11
D 12

63. The median of 6, 7, $x - 2$, x , 17 and 20, (written in ascending order) is 16. Then the value of x is

- A 12
B 15

C 16

D 17

64. A number lying between 10 and 100 is seven times the sum of digits. If 9 is subtracted from it, the digits of the number are reversed. The number is

A 21

B 42

C 54

D 63

65. One-third of a certain sum is invested at 3% per annum; one-sixth of the sum is invested at 6% per annum and remaining sum at 8% per annum. If the annual simple interest from all these investments is Rs. 600, the original sum is

A Rs. 6000

B Rs. 6666

C Rs. 7500

D Rs. 10,000

66. If the compound interest on a certain sum of money for 2 years at 4% per annum compounded annually is Rs. 102, then the simple interest on the same sum of money at the same interest rate and for the same period is

A Rs. 99

B Rs. 100

C Rs. 101

D Rs. 102

67. One of the factor of the expression $X^2 - Y^2 - Z^2 + 2YZ + X + Y - Z$ is

A $X - Y + Z + 1$

B $-X + Y + Z$

C $X + Y - Z + 1$

D $X - Y - Z + 1$

68. If $a + b + c = 0$, then a factor of the expression $(a + b)^3 + (b + c)^3 + (c + a)^3$ is

A abc

- B $a + b + c$
- C $ab + bc + ca$
- D $(a + b)$

69. If the length of a rectangle is reduced by 10% and its breadth is increased by 10%, then the area
- A remains unchanged
 - B is decreased by 1%
 - C is decreased by 0.1%
 - D is increased by 0.1%
70. The sum of the present ages of a father and his son is 99 years. When the father was as old as his son is now, his age was four times the age of the son at that time. The ratio of the present ages of the son and the father is
- A 3 : 7
 - B 3 : 8
 - C 4 : 9
 - D 4 : 7
71. If an article is sold for Rs. x , there is a loss of 15%. If the same article is sold for Rs. y , there is a profit of 15%. The ratio of $(y - x)$ to $(y + x)$ is
- A 20 : 23
 - B 20 : 3
 - C 3 : 20
 - D 17 : 23

TAKE FREE SRCC GBO MOCK TEST

72. If $\sqrt{x + \frac{x}{y}} = x\sqrt{\frac{x}{y}}$, where x and y are positive real numbers, then y is equal to
- A $x + 1$
 - B $X^2 - 1$
 - C $X - 1$
 - D $X^2 + 1$

73. A number when divided by 195 leaves a remainder 47. If the same number is divided by 15, the remainder will be

- A 4
- B 3
- C 2
- D 1

74. If $a : b = 3 : 4$; $b : c = 4 : 7$, then $\frac{a+b+c}{c}$ is equal to

- A 1
- B 2
- C 3
- D 7

75. Two trains of lengths 120 m and 90 m are running with speeds of 80 km/hr and 55 km/hr, respectively, towards each other on parallel lines. If they are 90 m apart, after how many seconds they will cross each other completely?

- A 5.6
- B 7.2
- C 8
- D 9

76. A person goes from town A to town B with a speed of 60 km/h and return to A with a speed of 40 km/h. His average speed for the whole journey is

- A 50 km/h
- B 48 km/h
- C 45 km/h
- D 55 km/h

77. Twelve men can complete a work in 8 days. Three days after they started the work, it was decided to complete the remaining work in 4 days. How many more men should be employed so that the remaining work can be completed in 4 days?

- A 3
- B 4
- C 5

D 6

cracku

Twelve men can complete a work in 8 days. Three days after they started the work, it was decided to complete the remaining work in 4 days. How many more men should be employed so that the remaining work can be completed in 4 days?

A) 3
C) 5

B) 4
D) 6

Handwritten notes: 12 men, 8 days, 3 days, 4 days, 96 unit, 12 men, 1 day, 12 unit/day, 12 men, 4 days, 48 unit/day, 48 unit/day, 96 unit, TW.

78. Efficiency of A is twice as that of B. If they work together, they can complete a job in 18 days. If A alone does the job, in how many days he will complete the job?
- A 27 days
- B 36 days
- C 40 days
- D 54 days
79. Two pipes A and B can fill a tank in 24 hours and 30 hours respectively. If both pipes are opened together, the time taken to fill the tank is
- A 27 h.
- B $\frac{40}{3}$ h.
- C $\frac{41}{3}$ h.
- D $\frac{44}{3}$ h.

cracku

Two pipes A and B can fill a tank in 24 hours and 30 hours respectively. If both pipes are opened together, the time taken to fill the tank is

A) 27 h.
C) $\frac{41}{3}$ h.

B) $\frac{40}{3}$ h.
D) $\frac{44}{3}$ h.

Handwritten notes: A → 24 hours, B → 30 hours, 120 Total Capacity.

80. If $\frac{4}{9}th$ of a bucket is filled in one minute, the rest of it will be filled in

- A 1 min
- B $\frac{9}{4}$ min
- C $\frac{5}{4}$ min
- D $\frac{4}{5}$ min

Logical Ability

Instructions [81 - 85]

In each question given below, there is a statement followed by two assumptions numbered I and II. An assumption is something supposed or taken for granted. You have to consider the statement and the following assumptions and decide which of the assumptions is implicit in the statement.

81. Statement: The cotton crop continues to be poor even after the introduction of improved variety of cotton seeds.

Assumptions:

- I. The yield of cotton was expected to increase after introduction of improved variety of seeds.
- II. The yield of cotton was adequate before the introduction of new variety of seeds.

- A if only assumption I is implicit;
- B if only assumption II is implicit;
- C if neither I nor II is implicit;
- D if both I and II are implicit.

82. Statement: No budgetary provision for the purpose of appointing additional faculty would be made in the context of institute's changed financial priorities.

Assumptions:

- I. Appointment of faculty requires funds.
- II. There are areas other than appointment of faculty which require more financial attention.

- A if only assumption I is implicit;
- B if only assumption II is implicit;
- C if neither I nor II is implicit;
- D if both I and II are implicit.

83. Statement: The office building needs repairing just as urgently as it needs internal as well as external painting.

Assumptions:

- I. Efficiency of people working in the office cannot be improved unless office building is repaired.
- II. Repairing and painting of office building require funds.

- A if only assumption I is implicit;
- B if only assumption II is implicit;
- C if neither I nor II is implicit;
- D if both I and II are implicit.

84. Statement: An opportunity to carry out reforms in elections to the Parliament and State Legislatures has been lost when we rejected most of the recommendations of Goswami Committee for partisan reasons.

Assumptions:

- I. Goswami Committee made certain good recommendations to improve the existing election system.
- II. Most of the decisions in our country are taken with partisan considerations.

- A if only assumption I is implicit;
- B if only assumption II is implicit;
- C if neither I nor II is implicit;
- D if both I and II are implicit.

TAKE FREE SRCC GBO MOCK TEST

WITH DETAILED SOLUTIONS AND ANALYSIS

85. Statement: Shri Roy, retired IAS official has taken over as the new Director of the All India Nuclear Research Institute. It is now expected that the administration of the institute will improve.

Assumptions:

- I. The Institute had no Director before Shri Roy.
- II. Director is supposed to look after the administration of the Institute.

- A if only assumption I is implicit;
- B if only assumption II is implicit;
- C if neither I nor II is implicit;
- D if both I and II are implicit.

Instructions [86 - 90]

At an Electronic Data Processing Unit, five out of the eight program sets P, Q, R, S, T, U, V and W are to be operated daily. On any one day, except for the first day of a month, only three of the program sets must be the ones that were operated on the previous day. The program operating must also satisfy the following conditions:

- (i) If program 'P' is to be operated on a day, 'V' cannot be operated on that day.
- (ii) If 'Q' is to be operated on a day, 'T' must be one of the programs to be operated after 'Q'.
- (iii) If 'R' is to be operated on day, 'V' must be one of the programs to be operated after 'R'.
- (iv) The last program to be operated on any day must be either 'S' or 'U'.

86. Which of the following is true of any day's valid program set operation?

- A 'P' cannot be operated at third place
- B 'Q' cannot be operated at third place
- C 'R' cannot be operated at fourth place
- D 'U' cannot be operated at fourth place

87. If the program sets 'R' and 'W' are to be operated on the first day, which of the following could be the other programs on that day?

- A Q, T, V
- B T, S, V
- C Q, S, V
- D T, S, U

88. If the program sets operated on a day is P, Q, W, T, U each of the following could be the next day's program set except

- A Q, R, V, T, U
- B Q, T, V, W, S
- C W, R, V, T, U
- D W, T, S, P, U

89. Which of the following could be the set of programs to be operated on the first day of a month?

- A P, R, V, S, U
- B Q, S, R, V, U
- C T, U, R, V, S
- D U, Q, S, T, W

90. If 'R' is operated at third place in a sequence, which of the following cannot be the second program in that sequence?

- A Q
- B S
- C T
- D U

Instructions [91 - 95]

In each question below are given three statements followed by four conclusions numbered I, II, III and IV. You have to take the three given statements to be true even if they seem to be at variance from commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the three given statements, disregarding commonly known facts.

91. Statements: Some apples are watermelons. All watermelons are fresh. Some potatoes are fresh.

Conclusions:

- I. Some apples are fresh.
- II. Some potatoes are apples.
- III. Some watermelons are potatoes.
- IV. Some watermelons are apples.

- A Only I
- B Only I and II
- C Only I and IV
- D Either II or III and I

92. Statements: All pens are pencils. Some pens are erasers. Some erasers are clips.

Conclusions:

- I. Some clips are pens.
- II. No clip is a pen.
- III. Some erasers are pencils.
- IV. No eraser is a pencil.

- A Only I and II
- B III and either I or II
- C IV and either I or II
- D Only III

93. Statements: Some books are papers. Some papers are plastic. No plastic is black.

Conclusions:

- I. Some papers are not black.
- II. All papers are not black.
- III. Some papers are black.
- IV. Some books are black.

- A Only I
- B Only I and IV
- C I, III and IV
- D Either II or III

94. Statements: Some doors are windows. All windows are black. Some black are brown.

Conclusions:

- I. Some windows are brown.
- II. All doors are black.
- III. Some doors are black.
- IV. No window is brown.

- A Only III
- B Either I or IV, and III
- C Only II
- D Only IV

95. Statements: All teachers are doctors. All doctors are engineers. All engineers are typists.

Conclusions:

- I. Some typists are teachers.
- II. All doctors are typists.
- III. Some engineers are teachers.
- IV. All doctors are teachers.

- A Only I and II
- B Only I and III
- C Either II or IV
- D Only I, II and III

Instructions [96 - 100]

In each question below is given a statement followed by two courses of action numbered I and II. A course of action is a step or administrative decision to be taken for improvement, follow-up or further action in regard to the problems, policy, etc. on the basis of the information given in the statement. You have to assume everything in the statement to be true, then decide which of the given suggested courses of action logically follows for pursuing.

96. Statement: Air export volumes have increased substantially over the past decade causing backlogs and difficulties for air cargo agents because of increased demand for space and service.

Courses of Action:

- I. Airlines and air cargo agents should jointly work out a solution to combat the problem.
- II. The reasons for the increase in the volume of air export should be found out.

- A if only I follows;
- B if only II follows;
- C if neither I nor II follows
- D if both I and II follow.

97. Statement: The world conference on "Education of All" took place in Thailand in 1990. Widely attend conference endorsed the Framework for Action for Meeting the Basic Learning Needs of all Children.

Course of Action:

- I. India should suitably implement the Action points of this conference.
- II. India should also immediately organize this type of conference.

- A if only I follows;
- B if only II follows;
- C if neither I nor II follows
- D if both I and II follow.

98. Statement: About 30 to 40% of children who are enrolled, do not attend school on any given day.

Course of Action:

- I. More schools should be started
- II. Reasons for their absenteeism should be found out.

- A if only I follows;
- B if only II follows;
- C if neither I nor II follows
- D if both I and II follow.

99. Statement: Although the Indian economy is still heavily dependent on agriculture, its share in global agricultural trade is less than the share of agricultural exports to total exports.

Course of Action:

- I. Efforts should be made to increase our agricultural production.
- II. The exports of non-agricultural commodities should be reduced.

- A if only I follows;
- B if only II follows;
- C if neither I nor II follows
- D if both I and II follow.

100. Statement: Huge amount of resources are required to develop tourist places in a country like India which is endowed with vast coastal lines, rivers, forests, temples, etc.

Courses of Action:

- I. More tourist-resorts along the coastal line only should be started.
- II. The tourist-potential of India should be exploited.

- A if only I follows; Give answer

- B if only II follows; Give answer
- C if neither I nor II follows and give answer
- D if both I and II follow.

Instructions [101 - 105]

Each of the questions below consists of a question and two statements marked P and Q given below it. You have to decide whether the data provided in the statements are sufficient to answer the question. Read both the statements and: Give answer:

101. How many daughters does 'L' have?

P. R's father has three daughters.

Q. 'T' is R's sister and daughter of L.

- A if the data in statement P alone are sufficient to answer the question, while the data in statement Q alone are not sufficient to answer the question.
- B if the data in statement Q alone are sufficient to answer the question, while the data in statement P alone are not sufficient to answer the question.
- C if the data even in both the statement P and Q together are not sufficient to answer the question.
- D if the data in both statements P and Q together are needed to answer the question.

102. Who is the brother of C?

P. D is the daughter of M.

Q. M is the father of C.

- A if the data in statement P alone are sufficient to answer the question, while the data in statement Q alone are not sufficient to answer the question.
- B if the data in statement Q alone are sufficient to answer the question, while the data in statement P alone are not sufficient to answer the question.
- C if the data even in both the statement P and Q together are not sufficient to answer the question.
- D if the data in both statements P and Q together are needed to answer the question.

103. A library contains only English, Hindi and Telugu novels. How many Telugu novels are there in the library?

P. Of the one thousand novels in the library, fifty per cent novels are in English and Hindi.

Q. The number of Hindi novels is double the number of English novels.

- A if the data in statement P alone are sufficient to answer the question, while the data in statement Q alone are not sufficient to answer the question.
- B if the data in statement Q alone are sufficient to answer the question, while the data in statement P alone are not sufficient to answer the question.
- C if the data even in both the statement P and Q together are not sufficient to answer the question.
- D if the data in both statements P and Q together are needed to answer the question.

104. "You must renew your driving licence within ten days from the date of expiry".

What is the exact date before which the licence must be renewed?

P. The statement was uttered on 17th February.

Q. It was a leap year.

- A** if the data in statement P alone are sufficient to answer the question, while the data in statement Q alone are not sufficient to answer the question.
- B** if the data in statement Q alone are sufficient to answer the question, while the data in statement P alone are not sufficient to answer the question.
- C** if the data even in both the statement P and Q together are not sufficient to answer the question.
- D** if the data in both statements P and Q together are needed to answer the question.

105. The area of a playground is 484 sq. metres. What is its perimeter?

P. It costs Rs. 912 to put a fence around the playground.

Q. The playground is a perfect square.

- A** if the data in statement P alone are sufficient to answer the question, while the data in statement Q alone are not sufficient to answer the question.
- B** if the data in statement Q alone are sufficient to answer the question, while the data in statement P alone are not sufficient to answer the question.
- C** if the data even in both the statement P and Q together are not sufficient to answer the question.
- D** if the data in both statements P and Q together are needed to answer the question.

Explanations

English Language Proficiency

1. **B**

In common English, government actions are referred to as "Its actions" and not its actions. So, Option B is the correct answer.

2. **D**

Option D is the answer as the correct way to phrase it would be "that" our father is a communist.

3. **C**

In common English, it should be "open the gates". So, Option C is the correct answer.

4. **C**

The block of the flat should be singular. Therefore, instead of were, we should say was. So, Option C is the correct answer.

7. **C**

If someone is cognizant of something, they are aware of it or understand it. So, Options A, B and D are likely synonyms of the word.

Vindict is having or showing a desire to harm someone because you think that the person has harmed you. So, Option C is the correct answer.

8. **D**

A fissure is a narrow opening or crack of considerable length and depth, usually occurring from some breaking or parting.

Options A, B and C are similar to it.

Fusion on the other hand means to combine something. Therefore, Option D is the correct answer.

9. **A**

Innocuous is something that is not harmful or offensive.

Option B, C and D are close to what it means. Option A, immoral on the other hand means something that is not moral.. Therefore, Option A is the correct answer.

10. **B**

Perennial is something lasting or existing for a long or apparently infinite time, enduring or continually recurring.

Option B on the other hand (perishable) means likely to decay or go bad quickly.

Therefore, Option B is the correct answer.

11. **D**

Option D is the correct answer.

The word "latent" means existing but not yet developed or manifest, hidden or concealed. Therefore, the words that are opposite in meaning to "latent" would be:

a) Apparent: Clearly visible or understood; obvious. b) Exposed: Make (something) visible by uncovering it. c) Manifest: Clear or obvious to the eye or mind.

The word that does not fit in this context is:

d) Officious: Assertive of authority in a domineering way, especially with regard to trivial matters.

Therefore, "officious" is the most appropriate choice here as it is not the correct antonym of "latent". It does not convey the meaning of something being visible or revealed.

12. **C**

The word "naive" typically means showing a lack of experience, wisdom, or judgment. Therefore, the words that are opposite in meaning to "naive" would be:

a) Crafty: Clever at achieving one's aims by indirect or deceitful methods. b) Diplomatic: Having the ability to deal with people in a sensitive and effective way. d) Wily: Skilled at gaining an advantage, especially deceitfully.

The word that does not fit in this context is:

c) Brave: Ready to face and endure danger or pain; showing courage.

Therefore, "brave" is the most appropriate choice here as it is not the correct antonym for "naive".

13. **A**

Option A is the correct answer.

The word "regal" typically means of, resembling, or fit for a monarch, especially in being magnificent or dignified. Therefore, the words that are opposite in meaning to "regal" would be:

b) Beggarly: Resembling or befitting a beggar; extremely poor. c) Slavish: Showing no originality; blindly imitative. d) Poor: Lacking sufficient money to live at a standard considered comfortable or normal in a society.

The word that does not fit in this context is Option a) Legal: Permitted by law.

Therefore, "legal" is the most appropriate choice here as it is not the correct antonym of "regal".

14. **A**

Option A is the correct answer.

The word "tranquillity" typically means the quality or state of being tranquil or calm. Therefore, Option A is a synonym of Tranquillity.

The other options are antonyms of the word:

b) Excitement: A feeling of great enthusiasm and eagerness. c) Agitation: A state of anxiety or nervous excitement. d) Disturbance: The interruption of a settled and peaceful condition.

15. **D**

The word "amalgamate" means to combine or unite to form one organization or structure. Therefore, the words that are opposite in meaning to "amalgamate" would be:

a) Dissociate: Disconnect or separate (used especially in abstract contexts). b) Unravel: Undo (twisted, knitted, or woven threads). c) Untangle: Free from a tangled or knotted state.

The word that does not fit in this context is:

d) Seethe: (of a person) be filled with intense but unexpressed anger.

Therefore, "seethe" is the most appropriate choice here as it is not the correct antonym of "amalgamate". It does not convey the meaning of separation or disconnection. Instead, it relates to a state of intense but unexpressed anger.

16. **B**

In this question, "TEPID: HOT", the relationship between the words is one of degree. "Tepid" means slightly warm, while "hot" refers to a higher degree of warmth.

The pair related in the same way as "TEPID: HOT" is Option B: Pat: Slap. A pat is a light touch, while a slap is a hit with more force, which is similar to the relationship between tepid and hot.

17. **C**

Modesty and Arrogance are opposites of each other. Modesty is the quality or state of being unassuming in the estimation of one's abilities.

Arrogance, on the other hand, is the quality of being unpleasantly proud and behaving as if you are more important than, or know more than, other people

So, the correct answer would be Option C as it also has words that are opposites of each other. Debility the quality or state of being weak, feeble, or infirm. Strength on the other hand implies strong.

SRCC GBO Cracku's WhatsApp Group

Join Now

18. **D**

Here, the relation is cause and effect. Germs cause diseases, so we have to find a pair of words that illustrate the same relationship.

Option D is the correct answer, as Wars cause destruction.

The rest of the options don't exemplify a cause-effect relationship.

19. **B**

Flowers are a part of a bouquet, or flowers make up a bouquet. So, we have to find a pair of words that illustrate the same relation.

Here, only Option B exemplifies this. Multiple links make a chain. So the correct answer is Option B.

21. **D**

Option d) "to start making" is the best choice.

The sentence says it's time for us to begin or "start" doing something. That something is "making preparation to leave." So, "to start making" fits perfectly in the blank and makes the sentence sound right.

The other options don't fit as well because they don't sound as good in the sentence, or they don't follow the rules of how we usually use words in English.

22. **B**

Option B is the correct answer.

The completed sentence is: "We better start now to work for our project."

The term "better" in this context is a modal verb that is often used in informal spoken English. Modal verbs are auxiliary verbs that express necessity or possibility, and in this case, "better" is expressing a strong recommendation or advice.

When we say "We better start now," it implies that it would be a good or beneficial idea to start now, and that there might be negative consequences if we don't start now.

23. **C**

The correct option to fill in the blank is Option C.

The sentence is in the simple past tense, which is used to talk about finished actions in the past. "He took up the letter" is a completed action, so the following action "read it aloud to his father" should also be in the simple past tense.

Therefore, "read" is the correct choice.

The other options "was reading", "had read", and "has been reading" are not in the simple past tense, so they don't fit in this context.

TAKE FREE SRCC GBO MOCK TEST

WITH DETAILED SOLUTIONS AND ANALYSIS

24. D

The correct answer is Option D.

The completed sentence is: "When I met him he was walking down the crowded street."

The preposition "down" is often used when referring to someone moving along a path such as a street or corridor. The other options "upon", "into", and "against" don't fit as well in this context.

Quantitative Ability

41. B

$0.\bar{3}$ can be written as $\frac{1}{3}$. So the possible values of x, y will be as follows.

$$3,1 \Rightarrow \left(\frac{1}{x}\right)^{\frac{1}{y}} = \frac{1}{3}. \text{ Here, } xy=3.$$

$$9,2 \Rightarrow \left(\frac{1}{x}\right)^{\frac{1}{y}} = \left(\frac{1}{9}\right)^{\frac{1}{2}} = \frac{1}{3}. \text{ Here, } xy=18.$$

$$27,3 \Rightarrow \left(\frac{1}{x}\right)^{\frac{1}{y}} = \left(\frac{1}{27}\right)^{\frac{1}{3}} = \frac{1}{3}. \text{ Here, } xy=81.$$

So, option B is correct.

42. B

We can do this question by looking at the options

Clearly the 2nd option is correct as $5^2 + 6^2 = 61$

Hence that is the correct answer

43. C

Let's look at Option 3

$$\frac{0.011 \times 0.011}{1.21 \times 0.01 \times 0.01} = \frac{11 \times 11 \times 100}{100 \times 121}$$

We can clearly see that on simplification that this will give 1. Hence this is the answer

44. B

When 1 is subtracted from 10^n , it always results in a series of 9s.

Let the number of 9's be n. $9(n)=4707$ or $n=523$

Hence there are 523, 9's. Thus $n=523$

10 SRCC GBO Mocks For ₹499

BUY NOW

45. D

$$\text{Now we have } \left(\frac{1}{5}\right)^{2000} = \left(\frac{2}{10}\right)^{2000}$$

As we can see the last digit of the decimal representation will be the unit digit of 2^{2000} . Now the cyclicity of 2 is 4, i.e powers of 2 repeats its unit digit after every 4 units. Now divide 2000 by 4, we get remainder as 0. So we can say that 2^{2000} is equivalent to 2^4 . Hence the unit digit of 2^{2000} is the unit digit of 2^4 . Hence the unit digit is 6

46. B

The number of digits in 4^{50} is $\log 4^{50} = 50 \log 4$

$$\text{or } 100 \log 2 = 100(0.3010) = 30.10$$

Number of digits $30+1=31$

47. C

We can simplify the LHS to $\log \left(\frac{a^2}{b} \times \frac{b}{a^2} \right) = \log 1$

Now $\log 1 = \log(a+b)$ Hence $a+b=1$.

48. D

$$\frac{1}{\log_a b} \times \frac{1}{\log_c b} \times \frac{1}{\log_a c} = \frac{1}{\log_a b} \times \frac{\log_c a}{\log_c b} = \frac{\log_a b}{\log_a b} = 1$$

49. C

Let the side of the square be a cm. Hence the area shall be $a \text{ cm}^2$

Hence, the diagonal of the square shall be $a\sqrt{2}$, and a square with this side shall have an area of $2a \text{ cm}^2$

Thus, the ratio of these two areas is 1:2

50. C

For the largest possible cube (of side a) in a sphere with radius r :

Diagonal of cube = diameter of the sphere, which is $a\sqrt{3} = 2r$, or $a = \frac{2r}{\sqrt{3}}$

Now, the volume of this cube is a^3 , or $\frac{8r^3}{3\sqrt{3}} \text{ cm}^3$

51. A

For the first case where the square (side being a cm) is inscribed in a circle, the square's diagonal is equal to the circle's diameter ($2r$).

Hence, $2r = a\sqrt{2}$, Hence $a = r\sqrt{2}$

For the second case, where the square (side is b cm) is inscribed in the semi circle with the same radius, the radius, half of the square side, and a complete side will form a right angle triangle (from the mid point on the base of the semi circle).

$$\text{Hence, } r^2 = \frac{r^2}{4} + b^2, \text{ or } b = \frac{2r}{\sqrt{5}}$$

Hence the area of square with side a to the area of square with side b is 5:2

52. B

Total area of the cardboard is $20 \times 15 = 300 \text{ m}^2$ Area of the four squares is $2 \times 2 \times 4 = 16 \text{ m}^2$

Remaining area is $300 - 16 = 284$

53. A

The perimeter of the smaller ring is 4π . The perimeter of the larger ring is 20π

As we can clearly see, it will take 5 rotations of smaller ring to completely cover the larger circle.

54. C

Area of the equilateral triangle park is $16\sqrt{3} = \frac{\sqrt{3}}{4} a^2$ where " a " is the length of the side of the triangle

$a^2 = 64$ or $a = 8 \text{ cm}$ Now cost of fencing triangular and square park is same, hence their perimeter will also be same. Perimeter of the square park is 24 cm

Hence the length of each side of square park is 6 cm . $\sqrt{6^2 + 6^2} = \sqrt{72} = 6\sqrt{2}$

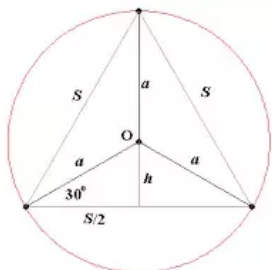

Length of each diagonal is $6\sqrt{2} \text{ cm}$

55. D

The length of glass tape required will be the sum of lengths of all the edges. Hence total length required will be $4(30+25+20)=300$ cms of total tape will be required

56. B

Radius of circle at centre O = 5 m and the triangle formed is an equilateral triangle.

Let side of triangle be $s = ?$

O is the centroid of the triangle dividing $a : h = 2 : 1$

$$\Rightarrow h = 2.5 \text{ m}$$

$$\Rightarrow \tan(30^\circ) = \frac{h}{\frac{s}{2}}$$

$$\Rightarrow \frac{1}{\sqrt{3}} = \frac{5}{s}$$

$$\Rightarrow s = 5\sqrt{3} \text{ m}$$

$\Rightarrow$ Ans - (B)

57. D

Let length, breadth and height of Meeta's lunch box be 10 cm each

$\Rightarrow$ Length and Breadth of Rita's lunch box = 11 cm and height = 8 cm

Volume of a cuboid = lbh

$$\Rightarrow \text{Required ratio} = \frac{11 \times 11 \times 8}{10 \times 10 \times 10}$$

$$= 121 : 125$$

$\Rightarrow$ Ans - (D)

58. B

$$\text{Number of visitors who paid for the ticket} = \frac{90}{100} \times 35000 = 31500$$

Let number of children be x and number of adults = $(31500 - x)$

According to ques,

$$\Rightarrow 40(31500 - x) + 20x = 9,50,000$$

$$\Rightarrow 12,60,000 - 20x = 9,50,000$$

$$\Rightarrow 20x = 3,10,000$$

$$\Rightarrow x = \frac{310000}{20} = 15,500$$

$\Rightarrow$ Ans - (B)

[VIDEO SOLUTION](#)

59. A

Let radius of new sphere = r cm

Volume of a sphere = $\frac{4}{3}\pi r^3$

$$\Rightarrow \frac{4}{3}\pi r^3 = \left(\frac{4}{3}\pi \times 3^3\right) + \left(\frac{4}{3}\pi \times 4^3\right) + \left(\frac{4}{3}\pi \times 5^3\right)$$

$$\Rightarrow r^3 = 27 + 64 + 125 = 216$$

$$\Rightarrow r = \sqrt[3]{216} = 6 \text{ cm}$$

$\Rightarrow$ Ans - (A)

60. B

Mean of 30 observations = 150

For correcting the error, we need to subtract 135 and add 165,

$$\Rightarrow \text{New average} = \frac{(150 \times 30) + 165 - 135}{30}$$

$$= \frac{150 \times 30 + 30}{30}$$

$$= 150 + 1 = 151$$

$\Rightarrow$ Ans - (B)

61. C

Total students = 45, Number of boys = 30 and number of girls = 15

$\Rightarrow$ Ratio of boys : girls = 2:1

Average weight of girls is 45 kg and that of boys is 52 kg

$$\therefore \text{Average weight of class} = \frac{52(2) + 45(1)}{2+1}$$

$$= \frac{149}{3} = 49.67 \approx 50 \text{ kg}$$

$\Rightarrow$ Ans - (C)

VIDEO SOLUTION

62. C

Average of first n even numbers = $(n + 1)$ and average of first n odd numbers = n

$$\Rightarrow \text{Average of first 10 even numbers} = (10 + 1) = 11$$

$\Rightarrow$ Ans - (C)

63. D

Terms : 6, 7, $x - 2$, x , 17 and 20

Since, there are 6 terms, median is the average of 3rd and 4th term

$$\Rightarrow \text{Median} = \frac{x-2+x}{2} = 16$$

$$\Rightarrow x - 1 = 16$$

$$\Rightarrow x = 17$$

$\Rightarrow$ Ans - (D)

64. A

Let the unit's digit is y and ten's digit is x , $\Rightarrow$ Number = $10x + y$

$$\Rightarrow 10x + y = 7(x + y)$$

$$\Rightarrow 10x + y = 7x + 7y$$

$$\Rightarrow 3x = 6y$$

$$\Rightarrow x = 2y \text{ -----(i)}$$

$$\text{Also, } 10x + y - 9 = 10y + x$$

$$\Rightarrow 9(x - y) = 9$$

$$\Rightarrow x - y = 1$$

Substituting value from equation (i), $\Rightarrow 2y - y = y = 1$

$$\Rightarrow x = 2$$

$\therefore$ Original number = 21

$\Rightarrow$ Ans - (A)

65. D

Let original sum = Rs. $6x$

Sum invested at 3% = Rs. $2x$ and sum invested at 6% = Rs. x and sum invested at 8% = Rs. $3x$

$$\text{Simple interest} = \frac{P \times r \times t}{100}$$

According to ques,

$$\Rightarrow \frac{2x \times 3 \times 1}{100} + \frac{x \times 6 \times 1}{100} + \frac{3x \times 8 \times 1}{100} = 600$$

$$\Rightarrow 6x + 6x + 24x = 60,000$$

$$\Rightarrow x = \frac{60000}{36} = \frac{10,000}{6}$$

$\therefore$ Original sum = $6 \times \frac{10000}{6} = \text{Rs. } 10,000$

$\Rightarrow$ Ans - (D)

66. B

Let principal sum = Rs. x

Rate of interest = 4% for 2 years

$$\text{Compound interest} = P \left[\left(1 + \frac{r}{100} \right)^t - 1 \right]$$

$$\Rightarrow P \left[\left(1 + \frac{4}{100} \right)^2 - 1 \right] = 102$$

$$\Rightarrow P \left[\left(\frac{26}{25} \right)^2 - 1 \right] = 102$$

$$\Rightarrow P \left(\frac{676 - 625}{625} \right) = 102$$

$$\Rightarrow P = 625 \times 2 = \text{Rs. } 1250$$

$$\therefore \text{Simple interest} = \frac{P \times r \times t}{100}$$

$$= \frac{1250 \times 4 \times 2}{100} = \text{Rs. } 100$$

$\Rightarrow$ Ans - (B)

67. A

$$\text{Expression : } X^2 - Y^2 - Z^2 + 2YZ + X + Y - Z$$

$$= x^2 - (y^2 + z^2 - 2yz) + (x + y - z)$$

$$= x^2 - (y - z)^2 + (x + y - z)$$

$$= [x^2 - (y - z)^2] + (x + y - z)$$

$$\text{Using, } a^2 - b^2 = (a - b)(a + b)$$

$$= (x - y + z)(x + y - z) + (x + y - z)$$

$$= (x + y - z)(x - y + z + 1)$$

=> Ans - (A)

68. **A**

Given : $a + b + c = 0$

$$\Rightarrow (a + b) = -c$$

$$\text{Cubing both sides, } \Rightarrow (a + b)^3 = (-c)^3$$

$$\Rightarrow a^3 + b^3 + 3ab(a + b) = -c^3$$

$$\Rightarrow a^3 + b^3 + 3ab(-c) = -c^3$$

$$\Rightarrow a^3 + b^3 + c^3 = 3abc \text{ -----(i)}$$

$$\text{Expression : } (a + b)^3 + (b + c)^3 + (c + a)^3$$

$$= [a^3 + b^3 + 3ab(a + b)] + [b^3 + c^3 + 3bc(b + c)] + [c^3 + a^3 + 3ca(c + a)]$$

$$= [a^3 + b^3 + 3ab(-c)] + [b^3 + c^3 + 3bc(-a)] + [c^3 + a^3 + 3ca(-b)]$$

$$= 2(a^3 + b^3 + c^3) - 9abc$$

Substituting value from equation (i), we get :

$$= 2(3abc) - 9abc = -3abc$$

$\therefore abc$ is a factor of the given expression.

=> Ans - (A)

69. **B**

Let length and breadth of rectangle initially be 10 cm each

$$\text{Area} = A = lb = 10 \times 10 = 100 \text{ cm}^2$$

New length after 10% decrease = 9 cm and similarly new breadth = 11 cm

$$\Rightarrow \text{New area} = A' = 9 \times 11 = 99 \text{ cm}^2$$

$$\therefore \text{Decrease in area} = \frac{100-99}{100} \times 100 = 1\%$$

=> Ans - (B)

70. **D**

Let son's present age = x years and father's present age = y years

$$\Rightarrow x + y = 99$$

Let n years ago, father was same as his son's age, where $n = y - x$

$$\Rightarrow 4(x - n) = (y - n)$$

$$\Rightarrow 4x - 4(y - x) = y - y + x$$

$$\Rightarrow 8x - 4y = x$$

$$\Rightarrow 7x = 4y$$

$$\Rightarrow \frac{x}{y} = \frac{4}{7}$$

=> Ans - (D)

71. **C**

Initial selling price = Rs. x

$$\text{Cost price after 15\% loss} = \frac{x}{100-15} \times 100 \text{ -----(i)}$$

New selling price = Rs. y

$$\text{Cost price after 15\% gain} = \frac{y}{100+15} \times 100 \text{ -----(ii)}$$

Comparing equations (i) and (ii),

$$\Rightarrow \frac{x}{85} = \frac{y}{115}$$

$$\Rightarrow \frac{x}{y} = \frac{115}{85} = \frac{23}{17}$$

Using componendo and dividendo

$$\Rightarrow \frac{y-x}{y+x} = \frac{17-23}{17+23} = \frac{6}{40}$$

$$\Rightarrow \frac{y-x}{y+x} = 3 : 20$$

$\Rightarrow$ Ans - (C)

72. B

$$\text{Expression : } \sqrt{x + \frac{x}{y}} = x \sqrt{\frac{x}{y}}$$

$$\Rightarrow x + \frac{x}{y} = x^2 \times \frac{x}{y}$$

$$\Rightarrow 1 + \frac{1}{y} = \frac{x^2}{y}$$

$$\Rightarrow \frac{1}{y}(x^2 - 1) = 1$$

$$\Rightarrow y = x^2 - 1$$

$\Rightarrow$ Ans - (B)

73. C

A number when divided by 195 leaves a remainder 47

$$\text{Let the number be } N = 195q + 47$$

Now, if N is divided by 15, the remainder is $= (195q + 47) \% 15$

Since, 195 is completely divided by 15, thus remainder depends on 47, $\Rightarrow 47 = 3 \times 15 + 2$

$\Rightarrow$ Remainder = 2

$\Rightarrow$ Ans - (C)

74. B

Given = $a : b = 3 : 4$; $b : c = 4 : 7$

$$\Rightarrow a : b : c = 3 : 4 : 7$$

$$\text{Let } a = 3, b = 4, c = 7$$

$$\therefore \frac{a+b+c}{c}$$

$$= \frac{3+4+7}{7} = \frac{14}{7} = 2$$

$\Rightarrow$ Ans - (B)

USE COUPON CODE **SRCCGBO** TO GET AN INSTANT DISCOUNT OF ₹500.

75. C

The speeds of the two trains in m/s would be $80 \times \frac{5}{18} = 22.22$ m/s and $55 \times \frac{5}{18} = 15.277$ m/s

Giving their relative speed to be 37.5 m/s

The total distance both trains essentially have to cover would be the distance between them + length of train 1 + length of train 2

Distance to be travelled = $90+120+90 = 300\text{m}$

The time taken would then be $\frac{300}{37.5} = 8$ second

Therefore, Option C is the correct answer.

76. **B**

Average speed is the harmonic mean of both speeds = $2 \div \left(\frac{1}{60} + \frac{1}{40} \right)$

$$= 2 \div \left(\frac{2+3}{120} \right)$$

$$= 2 \times \frac{120}{5} = 48 \text{ km/hr}$$

=> Ans - (B)

77. **A**

Let total work to be done = 96 units

Thus, 12 men complete 12 units of work each day, thus 1 man's efficiency = 1 unit/day

Work done in first 3 days = 36 units

Now, remaining work, i.e. 60 units must be completed in 4 days

$$\Rightarrow \text{Number of men required} = \frac{60}{4} = 15$$

Thus, **3 more men** are required.

=> Ans - (A)

 VIDEO SOLUTION

78. **D**

Let total work = 18 units

Let B's efficiency = x units/day and A's efficiency = $2x$ units/day

According to ques, working together, they finish work in = $(x + 2x) \times 18 = 18$

$$\Rightarrow 3x = 1$$

$$\Rightarrow x = \frac{1}{3}$$

$\therefore$ Time taken by A alone to finish the work = $\frac{18}{\frac{1}{3}} = 54$ days

=> Ans - (D)

79. **B**

Two pipes A and B can fill a tank in 24 hours and 30 hours respectively.

Time taken by both pipes together = $1 \div \left(\frac{1}{24} + \frac{1}{30} \right)$

$$= 1 \div \left(\frac{5+4}{120} \right)$$

$$= \frac{120}{9} = \frac{40}{3} \text{ hours}$$

Logical Ability

81. **A**

The statement talks about the poor yield of cotton even after the introduction of a new variety of seeds.

We shall try negating the assumption and see if it invalidates the main statement as well for it to be a valid conclusion.

1. Had the yield not been expected to improve after the introduction of a new variety of seeds, the main statement would not be mentioned the same and seeds wouldn't have been introduced in the first place. Hence, a valid assumption.
2. Had the yield been adequate before the new seeds, they would not have been introduced in the first place. Hence, an invalid assumption.

82. **D**

The statement talks about the changed financial priorities of the institute and not having provisions for recruiting additional faculty.

We shall try negating the assumption and see if it also invalidates the main statement, for it to be a valid conclusion.

1. If the appointment would not require funds, the same should not have been removed from the list of budgetary provisions. Hence, a valid assumption.
2. The statement clearly mentions about changed financial priorities of the institute, hence it is clear that there are other important areas to focus than faculty recruitment at the current point. Hence, a valid assumption.

83. **C**

The statement talks about the urgent need to repair the office building along with painting.

We shall try negating the assumption and see if it also invalidates the main statement for it to be a valid conclusion.

1. The main statement does not mention the connection between the efficiency of the employees and the condition of the building. Hence, negating the contention of improved efficiency will not have any effect on the main premise. This makes it an invalid assumption.
2. The repairing will definitely require funds, but the same is not an assumption for the main statement, as it merely talks about the need to repair. Hence, an invalid assumption.

84. **A**

The statement talks about the lost opportunity of carrying out reforms for the election system when most of the recommendations by the Goswami committee were rejected due to partisan reasons.

We shall try negating the assumption and see if it also invalidates the main statement, for it to be a valid conclusion.

1. Had the committee not laid down good recommendations, there wouldn't be an instance of loss of opportunity in carrying reforms. Hence, it is a valid assumption.
2. The committee's recommendations were rejected for partisan reasons. However, there is no sufficient evidence to claim that most of the decisions are guided by partisan reasons. Hence, an invalid assumption.

85. B

The statement talks about Shri Roy taking over as the new director and the hope of seeing improvements in the administration.

We shall try negating the assumption and see if it also invalidates the main statement, for it to be a valid conclusion.

1. The statement clearly mentions 'new director', which makes this an invalid assumption.
2. Had the director not been supposed to look after the administration, there should not be any expectation to see improvements in the same. Hence, it is a valid assumption.

86. C

Following are the conditions:

1. The following can be the possibilities with respect to P and V: P/V/None
2. The following can be the possibilities with respect to T and Q: Q...T
3. The following can be the possibilities with respect to R and V: R...V
4. The last has to be S or U.

Now, we shall test each of the options.

Option 1: If we can find a combination with P at the third place, this option will be incorrect. A possible combination can be: QTPW(S/U). Since all conditions are met in this combination, we know this option is incorrect.

Option 2: If we can find a combination with Q at the third place, this option will be incorrect. A possible combination can be: PWQT(S/U). Since all conditions are met in this combination, we know this option is incorrect.

Option 3: If we can find a combination with R at the fourth place, this option will be incorrect. There cannot be any valid combination since V has to come after R, but the last element shall be S/U. Hence, this is a correct option.

Option 4: If we can find a combination with U at the fourth place, this option will be incorrect. A possible combination can be: PQTUS. Since all conditions are met in this combination, we know this option is incorrect.

87. B

Following are the conditions:

1. The following can be the possibilities with respect to P and V: P/V/None
2. The following can be the possibilities with respect to T and Q: Q...T
3. The following can be the possibilities with respect to R and V: R...V
4. The last has to be S or U.

If R and W are mandatorily in the list, we need to have V as well (condition with R).

Now, RWV are in the list. For the other two: We need to have at least one of S/U for the end. Both of them will also be fine.

Hence, one set can be R,W,V,S,U.

We can also have T instead of one of S/U, as we cannot have P (since it cannot come with V). This makes another possible set as: R,W,V,T, S/U. Hence, Option B is correct.

88. D

The current list is : P, Q, W, T, U

Now, we shall have three elements from this list and two from the remaining ones: R,S,V.

We shall test each of the options:

1. QRVTU: This is a valid combination as it satisfies all the conditions.
2. QTVWS: This is a valid combination as it satisfies all the conditions.

3. WRVTU: This is a valid combination as it satisfies all the conditions.

4. WTSPU: We can only take three elements out of P, Q, W, T, U. However, this option takes four, hence an invalid option.

89. **C**

We shall test each of the options:

1. PRVSU: We cannot have P and V together, hence an invalid choice.

2. QSRVU: If Q is selected, T must be operated sometime after Q. This condition is violated in the given case, hence an invalid option.

3. TURVS: This case satisfies all the given conditions.

4. UQSTW: The last element has to be one from S or U, which is not there in the given case. Hence, an invalid option.

TAKE FREE SRCC GBO MOCK TEST

WITH DETAILED SOLUTIONS AND ANALYSIS

90. **A**

We shall test each of the options with R in the third place.

1. _ Q R _ : In this case, we know that T has to come after Q, and V after R. However, this will violate the rule of having one of S/U at the end. Hence, an invalid combination and the correct choice for the question.

2. _ S R _ : With this, we can have TSRVU as one of the valid sequences.

3. _ T R _ : With this, we can have QTRVU as one of the valid sequences.

4. _ U R _ : With this, we can have TURVS as one of the valid sequences.

91. **C**

Statement: Some apples are watermelons. All watermelons are fresh. Some potatoes are fresh.

Now, let us try to negate each option with a possible scenario, and if we find an option that cannot be negated, that shall be the correct answer.

1. Some apples are fresh: We know that every watermelon is fresh. We also know that some apples are watermelons (which are fresh). Hence, those apples that are watermelons must also be fresh in every case. This is a valid conclusion.

2. Some potatoes are apples: We know that some potatoes are fresh, while all watermelons are fresh. It is also given that some apples are watermelons. We can form a possible scenario where no potatoes are watermelons (fresh encompassing both of them as two separate subsets), and then some apples being watermelons. From this, we can negate the case of some potatoes being apples.

3. Some watermelons are potatoes: We know that some potatoes are fresh, while all watermelons are fresh. We can form a possible scenario where no potatoes are watermelons (fresh encompassing both of them as two separate subsets). From this, we can negate the case of some watermelons being potatoes.

4. Some watermelons are apples: It is clearly given that some apples are watermelons. Hence, we are sure that some watermelons will always be apples, if not all. This is a valid conclusion.

92. **B**

We know: All pens are pencils. Some pens are erasers. Some erasers are clips.

We shall now test each of the conclusions and try negating them. The ones that will be necessarily true in every case shall be valid in nature.

1 and 2. Some clips are pens, and no clip is a pen: We know that some pens are erasers and some erasers are in-turn clips. Hence, clips and pens can overlap, or they can be disjointed sets. There is no other possibility. Hence, either of 1 or 2 shall be true.

3. Some erasers are pencils: We know that all pens are pencils, and some pens are erasers. Hence, there are definitely some pens that are both erasers and pencils, making at least a small part of erasers overlap with pencils. This makes 3 a valid conclusion.
4. No eraser is a pencil: This is an invalid conclusion as there are definitely some pens that are both erasers and pencils, making at least a small part of erasers overlap with pencils.

93. **A**

We know: Some books are papers. Some papers are plastic. No plastic is black.

We shall now test each of the conclusions by negating them, and the ones which shall hold true in every case are valid in nature.

1. Some papers are not black: This is a true statement since some papers are plastic, and no plastic can be black. Hence, The papers which are plastic are definitely not black.
2. All papers are not black: We cannot be sure about this conclusion, as we merely know that papers that are plastic are definitely not black. However, we don't have any information about the papers which are not plastic, they may or may not be black.
3. Some papers are black: Again, we cannot be sure about this conclusion because there can be a case when papers and black are totally disjointed sets.
4. Some books are black: Invalid conclusion by the same logic as mentioned in 3.

94. **B**

We know: Some doors are windows. All windows are black. Some black are brown.

We shall now test each option by negating them with a possible scenario, and the one that holds true for every scenario shall be a valid conclusion.

- 1 and 4. Some windows are brown, and no windows are brown. It is clear from the given information that there can be a possibility of windows overlapping with brown as all windows are black and some black are brown. However, we cannot be sure that some windows will fall under brown. Hence, one of the two conclusions shall definitely be true.
2. All doors are black: We only know that some doors are windows, that in turn, are black. However, we cannot say for sure that all doors can be classified as windows for them to be black. Hence, an invalid conclusion.
3. Some doors are black: It is known that some doors are windows, and all windows are black. Hence, the doors that are windows shall also be black. This is a valid conclusion.

95. **D**

We know: All teachers are doctors. All doctors are engineers. All engineers are typists.

Now, we shall test each option by finding a scenario where the conclusion would not hold true. One which shall hold true in all the cases shall be valid in nature.

1. It is clear that all teachers are typists, because of the given data. Hence, we can conclude that some typists must be teachers.
2. This is a valid conclusion by the same logic as Option 1.
3. Since all doctors are engineers, some engineers shall definitely be doctors. This is a valid conclusion.
4. We only know that all teachers are doctors, but we cannot say vice versa. It might be possible that there are doctors that cannot be classified as teachers. Hence, an invalid conclusion.

96. **B**

The statement talks about an increase in air export volumes that is causing problems for air cargo agents.

The first course of action talks about airlines and air cargo working together for a solution. However, the statement mentions nothing about the airlines, and hence, we cannot say whether the problem even concerns the airlines. Hence, it is an invalid course of action.

The second course of action talks about finding the reason for the increased volume, that has eventually caused problems for air cargo. This is a valid course of action, since it will help in coming up with potential solutions.

97. A

The statement talks about a world conference that laid down some framework with respect to meeting the learning needs of children.

The first course of action states that India shall implement the framework, which is a valid statement considering the utility of the said framework. Hence, a valid course of action.

The second course of action states that India shall conduct a similar conference immediately, which seems to be serving no purpose. This is because the framework has already been laid down and widely discussed, thereby making another conference a not-so-urgent event. Hence, an invalid course of action.

98. B

The statement talks about many students being absent from the school.

The first course of action talks about opening new schools, which seems to be irrelevant considering the issue of absenteeism even in the current school.

The second course of action talks about finding the reason for absenteeism, which is definitely a good idea to come up with potential solutions in for combating the issue.

99. C

The statement talks about India's share in global agricultural trade being less than the share of agricultural exports to total exports.

Both courses of action seem to be invalid in this case. This is because we neither know whether the issue is due to the lower agricultural production nor if the reduction of export of non-agricultural commodities is a potential solution.

100. D

The statement talks about the requirement of natural resources for developing India's tourist spots, as well as the vast number of potential tourist attractions that are present.

The first course of action makes sense since India has a vast coastal line, and it can be turned into a tourist attraction.

The second course of action also makes sense since there are various potential tourist attractions in India.

101. D

Let us test each statement and see if we can arrive at the number of daughters L has.

1 talks about the number of daughters that R's father has. However, to answer the question, we need additional information about the relation between R and L. This is given by 2, that 'T' is R's sister and daughter of L. Using this, we know L is a parent of R. Hence, L has three daughters, which we get by combining both 1 and 2.

102. C

If we combine both P and Q, we get to know that M is the sister of C. However, we cannot answer the question pertaining to C's brother. Hence, the data together is insufficient.

103. A

Let us test each statement and see whether we can get the number of Telugu novels.

1. There are only three types of novels, and of the one thousand novels in the library, fifty percent novels are in English and Hindi. This means that the remaining 500 books are Telugu novels.

2. Even after knowing that Hindi novels are double in number than English novels, we have no clue about the exact number of any of these categories. Hence, we can't find the number of Telugu novels from this data.

104. **C**

Even when we know the date on which the statement was made and the fact that it is a leap year, we still don't know about the date of expiry of the driving license. Hence, we can't give the exact date before which the license shall be renewed.

105. **B**

Since the area is 484 sq. cm:

P. If it costs Rs. 912 to fence the playground, we need to get the cost of fencing per cm to arrive at the perimeter of the playground. However, the same is not mentioned, and hence, we cannot answer the question using this data.

Q. If the playground is a perfect square, we can use the given area to find the value of each of the sides. The sides, thus, are of 22 cm. From this, we can find the perimeter, which is four times the side, that becomes 88 cm.

106. **A**

Out of Ear, Lungs, Heart, and Kidney: Ear is a body part, while others are functioning organs.

107. **A**

The path can be traced like:

After moving to 10 m to west, he moves 20 m north, and then again 10 m east. The movement in west and then east will cancel each other, further making the movement to north the only effective one. Hence, he is 20 m north from the initial starting point.

108. **D**

The statement talks about a connection between ulcers and anxiety. However, it also states that some happy-go-lucky people also suffer from ulcers. Now, we need to have a strong set of data to strengthen the connection between ulcers and anxiety.

1. This option talks about peptic ulcer, which is a specific case of ulcers. Further, this is a mere statement and hence doesn't add value to the original information. Hence, a weak option.
2. Even if anxiety is more harmful than ulcers, we cannot use this to strengthen the association between anxiety and ulcers.
3. Even if about 90% of women suffer from ulcers, we don't get any input to support the association of ulcers and anxiety.
4. If more than 65% of the ulcer patients were found to be high on anxiety, we can strongly claim the association of anxiety and ulcers. Hence, a strong statement to substantiate the premise.

109. **A**

It is best to eliminate each option in this question.

1. This can be a valid conclusion owing to the line *Research in this area is extremely homogeneous, as anywhere from 50% to 85% of this literature employs scales developed by APA.*
2. The statement mentions that 'employs scales developed by APA'. The word 'scales' shows that there are more than one scale developed by APA.
3. It is mentioned that role conflict and ambiguity are the 'most widely' examined source, which shows that there might be other sources as well.
4. There is nothing to conclude that the area has a dearth of literature.

Hence, the first option is correct.

110. D

We know that: $A > B$, $C > D$, and $D > E$.

To know who is taller, we need a link connecting $A > B$ to the other two conditions.

1. Even if A is taller than E and D, we don't know about its relation with C. Hence, we cannot find the tallest person.
2. Even if C is taller than B, we cannot deduce the taller person among A and C. Hence, this is an incorrect choice.
3. Even if A is taller than D, we cannot deduce the taller person among A and C. Hence, this is an incorrect choice.
4. If E is taller than A, we know that C will be the tallest. Hence, this is the correct choice.

111. C

If it is known that the militants were hiding in area X and cannot be traced after the search, it is clear that they either kept hiding with the support of locals or ran away before the search. There cannot be any other possibility. Hence, either of the statements is correct.

112. B

It is given that a lot of officers were transferred by the Chief Secretary, except for those who kept him in good humor.

R1: The main statement mentions about 'good humor', which is insufficient to say that the Chief Secretary is a jolly person.

R2: Since the only officers who were not transferred are the ones who kept the Chief Secretary in good humour, it is clear that the transfers were made on the personal feelings of the Chief Secretary. Hence, a valid statement.

113. D

The two statements focus on the party losing in the election and the noticeable lack of enthusiasm among the workers. However, there is no direct correlation between the two statements as expressed in the question.

Hence, we cannot state whether the party workers play an important role, because no such correlation has been expressed between losing the elections and lack of enthusiasm. These two might be two stand-alone statements.

From the same logic, we cannot say that had the workers been dedicated enough, the win was a sure shot thing.

114. C

We shall mainly focus on the line **which had faulty designs or inferior material**.

Hence, it is clear that either the reason is faulty design or interior material.

This means either R1 or R2 is true.

115. A

As per the statements, if a person dies in police custody, the police official is summoned. Further, if the atrocities are proved, they are punishable under law.

Hence, it is clear that the law is considerate for criminals, providing a safeguard to them by preventing them from atrocities.

However, we cannot state that a person cannot die a natural death in the custody.

116. **D**

In this, we shall test each option to arrive at the correct pair.

1. No wealthy persons are vagrants, All lawyers are wealthy persons, Some lawyers are vagrants: This is logically inconsistent, because it can be clearly seen that wealthy people can't be vagrants, and all lawyers are wealthy people. Hence, they cannot be vagrants.
2. All lawyers are wealthy persons, No lawyers are vagrants, All lawyers are vagrants: The second and third statements are contradictory in nature, hence logically inconsistent.
3. No wealthy persons are vagrants, All lawyers are wealthy persons, All lawyers are vagrants: This is logically inconsistent by the same logic as Option 1.
4. No wealthy persons are vagrants, All lawyers are wealthy persons, No lawyers are vagrant: This is logically consistent because it can be clearly seen that wealthy people can't be vagrants, and all lawyers are wealthy people. Hence, they cannot be vagrants.

118. **B**

We shall test each option to find whether they are logically consistent or not:

1. CBA: It is clearly given that no preacher is an intellectual, while some intellectuals are persons of unfailing vigour. From this, we cannot conclude that some preachers are persons of unfailing vigour because there might be a case where preachers and persons with unfailing vigour are disjointed sets.
2. CBD: It is clearly given that no preacher is an intellectual, while some intellectuals are persons of unfailing vigour. From this, we can definitely conclude that some persons with unfailing vigour are not preachers, exactly those who are intellectuals.
3. ABD: We cannot conclude that some persons of unfailing vigour are not preachers, because there might be a case where both of them are overlapping sets with the same elements in total.
4. CBE: In this, we don't have any relationship given about persons with unfailing vigour and preachers. Hence, an invalid connection.

General knowledge
