English Language Proficiency

Instructions [1 - 4]

In each of the question, the underlined word is used in four different ways. Choose the option in which the usage of the word is incorrect or inappropriate.

1. ISSUE

- A My article appeared in the August issue of the magazine.
- B The Government issued a special stamp on World Health Day.
- C The problem came to a successful issue.
- D There were problems of property as he died without an issue.

2. SAVE

- A He is saving his strength for the heavy work he will have to do this afternoon.
- B Malati saved the little boy from drowning.
- C We know nothing about Vijay save that he was in the army for some time.
- D I have saved myself of the truth of the report.

3. MASTER

- A She could not master the courage to tell her friend about her loss.
- B She quickly mastered the art of interviewing people.
- C The terrorist was a master of disguise.
- D He is the master of his house.

4. OVER

- A Attendants held a large umbrella over the chief's head.
- B The thief over witted the police and got away with the loot.
- C Can you stay over Saturday ?
- D The meeting was over before we reached there.

Instructions [5 - 10]

Read the following passage and answer the questions given after it.

Nearly two thousand years have passed since a census decreed by Caesar Augustus became part of the greatest story ever told. Many things have changed in the intervening years. The hotel industry worries more about overbuilding than overcrowding, and if they had to meet an unexpected influx, few inns would have a manager to accommodate the weary guests. Now it is the census taker that does the travelling in the fond hope that a highly mobile population will stay put long enough to get a good sampling. Methods of gathering, recording and evaluating information have presumably been improved a great deal. And where then is the modest purpose of Rometo obtain a simple head count as an adequate basis for levying taxes, now batteries of complicated statistical series furnished by governmental agencies and private organizations are eagerly scanned and interpreted by sages and seers to get a clue to future events. The Bible does not tell us how the Roman census takers made out, and as regards our more immediate concern, the reliability of present day economic forecasting, there are considerable differences of opinion. They are aimed at the celebration of the 125th anniversary of the American Statistical Association. There was the thought that business forecasting might well be on its way from an art to a science, and some speakers talked about newfangled computers and high-falution mathematical systems in terms of excitement and endearment which we, at least in our younger years when these things mattered, would have associated more readily with the description of fair maiden. But others pointed to the deplorable record of the highly esteemed forecasts and forecasters with a batting average below that of the Mets, and the President-elect of the Association cautioned that "high powered statistical methods are usually in order where the facts are crude and inadequate, the exact contrary of what crude and inadequate statisticians assume." We left his birthday party somewhere between hope and despair and with the conviction, not really newly acquired, that proper statistical methods applied to ascertainable facts have their merits in economic forecasting as long as neither forecaster nor public is deluded into mistaking the delineation of probabilities and trends for a prediction of certainties of mathematical exactitude.

5. The passage would be most likely to appear in

- A a journal of biblical studies
- B an introductory college text-book on statistics
- C the annual report of the American Statistical Association
- D a newspaper review of a recent professional festivity

6. According to the passage, taxation in Roman times was based on

- A mobility
- B wealth
- C population
- D census takers

7. The author refers to the Romans primarily in order to

- A prove the superiority of modern statistical methods to ancient ones
- B provide a historical framework for the passage
- C relate an unfamiliar concept to a familiar one
- D show that statistical forecasts have not significantly improved

8. The author refers to the Mets primarily in order to

- A show that sports do not depend on statistics
- B provide an example of an unreliable statistics
- C indicate the change in attitudes from Roman days
- D illustrate the failure of statistical predictions

9. On the basis of the passage it can be inferred that the author would agree with which of the following statements ?

- A It is useless to try to predict economy.
- B Statistics is not, at the present time, a science.
- C Most mathematical systems are inexact.
- D Statistics should be devoted to the study of probability.

10. The author's tone can best be described as

- A jocular
- B pessimistic
- C objective
- D humanistic

Instructions [11 - 15]

In each of the following sentences four words or phrases have been underlined. One underlined part in each sentence is not acceptable in standard English. Pick up that part and mark its number.

11. In order to(1) conserve valuable petrol, motorists had aught(2) check their speedometers while(3) driving along(4) the highway.

- A (1)
- B (2)
- C (3)
- D (4)

12. There have been(1) little(2) change in the patient's condition since(3) he was moved(4) to the intensive care unit.

- A (1)
- B (2)
- C (3)

D (4)

13. He told the members(1) of his staff that(2) each one should carry out(3) his task oneself.(4).

A (1)

B (2)

C (3)

D (4)

- A Enclose : confine
- B Prick : stab
- C Disregard : ignore
- D Scrub : polish

Instructions [21 - 25]

In the following questions choose the alternative which best expresses the meaning of the given word.

21. BEHEST

- A command
- B see
- C attach
- D harm

22. COLOSSUS

- A tall

- B huge
- C lofty
- D towering

23. DEFER

- A respect
- B disguise
- C postpone
- D dislike

24. EXASPERATION

- A exaltation
- B irritation
- C amplification
- D exception

25. FRAGMENT

- A smell
- B image
- C portion
- D impression

Instructions [26 - 30]

In the following questions, fill in the blanks with the appropriate phrase or idiom.

26. He was not called for the interview as his application had been.....

- A turned out
- B turned down
- C turned away
- D turned off

27. This photo clearly the difference between the two brothers.

- A brings about
- B brings in
- C brings up
- D brings out

28. We were decorating the living room, when our guests from Chicago arrived, a week early.

- A piling it thick on
- B thick and fast
- C thick on the ground of
- D in the thick of

35. MAGNANIMITY

- A disability
- B hypocrisy
- C meanness
- D miserliness

Instructions [36 - 40]

Each question has a sentence with two blanks. From the alternatives select the pair which best completes the sentence.

36. State hospitality extended to a visiting foreign dignitary is often used symbolically to convey messages and very often pomp and ceremony serve to sharp differences.

- A subtle mask
- B loud camouflage
- C sharp hide
- D important..... accentuate

37. If you carry this attitude to the conference, you will vany aliportens you may have at this moment.

- A conciliatory defer
- B ubiquitous impress
- C aggressive..... alienate
- D belligerent attract

38. The special purpose vehicle for infrastructural projects has been proposed to impart a to such core sector projects as also to ensure the completion of such projects which remained on account of. paucity of funds.

- A Push inconclusive
- B Thrust..... stalled
- C Breakthrough shelved
- D Fillip active

39. A number of journalists and cameramen WEIS sasic by the police when they went to cover the drive of the state government.

- A attacked vacuous
- B combated evacuation
- C infringed demolition
- D assaulted eviction

40. India and Pakistan should abandon the practice of arresting fishermen who cross into their territorial waters and instead a mechanism for the informal repatriation of these innocents.

- A deliberately constitute
- B mistakenly..... discover
- C wantonly create
- D inadvertently install

Quantitative Ability

Instructions [41 - 45]

A survey of film-watching habits of people living in five cities A, B, C, D and E is summarised in a table given below. Column I in the table gives percentage of film watchers in each city who watch only one film a week while column II gives the total number of film - watchers who watch two or more films per week. Read the table and answer Questions.

City	I	II
A	70	57000
B	39	30500
C	78	55000
D	75	72000
E	31	125442

41. How many film watchers in City B see only one film a week ?

- A 17800
- B 19500
- C 50000
- D 30500

TAKE FREE SRCC GBO MOCK TEST

cracku

42. A city with the highest number of film watchers is

- A A
- B C
- C D
- D E

43. Which city has, the lowest number of film-watchers who see only one film is a week ?

- A A
- B B
- C E
- D C

44. How many cities have the number of film watchers above the average number of all film watchers in the cities above taken together ?

- A 1
- B 2
- C 3
- D 4

45. The ratio of the number of film watchers who see only one film a week in cities B and is

- A 1 : 10
- B 10 : 1
- C 1 : 11
- D 9 : 2

Instructions [46 - 50]

The following graph shows the actual and target production (in lakh tonnes) of a company over the years. Study the graph and answer Questions.

46. The actual production in 2004 is what percent of target production in 2005 ?

- A 50%
- B 66.67%
- C 75%
- D 60%

47. Number of years, in which actual production is above the average target production over the years, is

- A 4
- B 3
- C 2
- D 1

48. The target production in 2002, 2004 and 2007 together is what percent of the actual production in 2001 and 2003

- A 40%
- B 210%
- C 227.27%
- D 250%

49. The ratio of total actual production to the total target production over the years above is

- A 27 : 25
- B 25 : 27
- C 41 : 42
- D 42 : 41

50. Number of years in which target production is less than or equal to the actual production is

- A 1
- B 2
- C 3
- D 4

51. The value of

$$\left(\sqrt[6]{27} - \sqrt{6\frac{3}{4}}\right)^2 + \frac{2(\sqrt{2}+\sqrt{6})}{3\sqrt{2}+\sqrt{3}} \text{ is}$$

- A $\frac{3}{4}$
- B $\frac{4}{3}$
- C $\frac{17}{18}$
- D $\frac{25}{12}$

52. The product

$$\left(1 - \frac{1}{2^2}\right) \left(1 - \frac{1}{3^2}\right) \left(1 - \frac{1}{4^2}\right) \dots \left(1 - \frac{1}{11^2}\right) \left(1 - \frac{1}{12^2}\right) \text{ is equal to}$$

- A $\frac{5}{8}$
- B $\frac{11}{20}$
- C $\frac{17}{18}$
- D $\frac{13}{24}$

53. Smallest positive number amongst the numbers

(a) $10 - 3\sqrt{11}$ (b) $3\sqrt{11} - 10$ (c) $18 - 5\sqrt{13}$ (d) $51 - 10\sqrt{26}$ is

- A (a)
- B (b)
- C (c)
- D (d)

54. From among $2^{\frac{1}{2}}$, $3^{\frac{1}{3}}$, $8^{\frac{1}{8}}$ and $9^{\frac{1}{9}}$, the greatest is

- A $2^{\frac{1}{2}}$
- B $3^{\frac{1}{3}}$
- C $8^{\frac{1}{8}}$
- D $9^{\frac{1}{9}}$

55. The unit's digit of $3^{1001} \times 7^{1002} \times 13^{1003}$ is

- A 1
- B 3
- C 7
- D 9

56. $\frac{1}{1-\sqrt{2}+\sqrt{3}} + \frac{1}{1-\sqrt{2}-\sqrt{3}} - \frac{2}{1+\sqrt{2}-\sqrt{3}} + \frac{3}{\sqrt{2}}$ equals

- A $\frac{1}{2}(\sqrt{2} + \sqrt{6})$
- B $\frac{1}{2}(1 + \sqrt{3})$
- C $(1 - \sqrt{3})$
- D $\frac{1}{2}(\sqrt{2} - \sqrt{6})$

57. x, y and z are distinct positive integers in which x and y are odd and z is even. Which of the following can not be true ?

- A $(x - z)^2 y$ is even
- B $(x - z)^2 y^2$ is odd
- C $(x - z)y$ is odd

D $(x - y)^2 z$ is even

58. For natural numbers, when p is divided by d , the quotient is q and the remainder is r . When q is divided by d' , the quotient is q' and the remainder is r' . Then if p is divided by dd' , the remainder is

A $r + r'd$

B $r' + rd$

C rr'

D r

59. The sum of digits of the number $N = \sqrt{25^{64} \times 64^{25}}$ is

A 8

B 10

C 14

D 35

60. Let p and q be inversely proportional and positive. If p increases by 20%, then q increases by

A 20%

B $\frac{20}{21}\%$

C 5%

D $16\frac{2}{3}\%$

61. If r is the remainder when each of 1059, 1417 and 2312 is divided by k , where k is an integer greater than 1, then the value of $d+k$ is

A 164

B 179

C 343

D 431

62. Two candles of the same length are made of different materials so that one burns out completely at a uniform rate in 3 hours and the other in 4 hours. At what time (P.M.), should the candles be lighted so that at 5 P.M., one stub is twice the length of the other ?

A 1:36

B 2:36

C 1:28

D 2:28

cracku

Two candles of the same length are made of different materials so that one burns out completely at a uniform rate in 3 hours and the other in 4 hours. At what time (P.M.), should the candles be lighted so that at 5 P.M., one stub is twice the length of the other?

A) 1:36
B) 2:36
C) 1:28
D) 2:28

Handwritten notes:
Length of candle = 12cm.
Candle 1 = 3hr
Candle 2 = 4hr
Candle 1 = 4r

63. If 2 persons working 2 hours a day for each of 2 days produce 2 articles, then the number of articles produced by 4 persons working 4 hours a day for each of 4 days is

A 4

B 8

C 16

D 32

64. In racing over a distance d at uniform speed, A can beat B by 20 metres, B can beat C by 10 metres, and A can beat C by 28 metres. Then d , in metres, is

A 50

B 75

C 100

D 120

65. Three machines A, B and C working together can do a work in x hours. When working alone, A needs an additional 6 hours to do the work; B, one additional hour; and C, x additional hours. The value of x is

A $\frac{2}{3}$

B $1\frac{1}{2}$

C $\frac{3}{4}$

D $\frac{4}{3}$

66. In counting m coloured balls, some blue and some white, it was found that 49 of the first 50 counted were blue. Thereafter 7 out of every 8 counted were blue. If, in all, 90% or more of the balls counted were blue, the maximum value of m is
- A 180
B 200
C 210
D 220
67. A bought 636 articles and sold 600 of them for the price he paid for 636 articles. He sold the rest at the same price per piece as the other 600. Percent gain in this transaction is
- A 6
B 6.5
C 8
D 36
68. Two numbers are such that their product, their sum and their difference are in the ratio $24 : 7 : 1$. Then their product is
- A 96
B 48
C 24
D None of these

69. Four persons hired a taxi for ₹ 6,000. The first person paid one half of the sum of amounts paid by other persons; the second person paid one-third of the sum of amounts paid by the other persons; and the third person paid one-fourth of the sum of amounts paid by the others. The amount paid by the fourth person is
- A ₹2,000
B ₹1,500
C ₹2,400
D ₹1,300
70. The identical jars are fully filled with acid solutions, the ratio of volume of acid to the volume of water being $1 : 1$ in one jar and $2 : 1$ in the other jar. If the entire contents of two jars are mixed together, the ratio of volume of water to the volume of acid in the mixture is

- A 5:7
- B 7:5
- C 3:2
- D 2:3

71. Four whole numbers, when added three at a time, give the sums 180, 197, 208 and 222. The largest of these numbers is

- A 89
- B 83
- C 99
- D 93

72. The number of circular pipes with an inside radius 0.5 cm which will carry the same amount of water as a pipe with an inside radius of 3 cm is

- A 6
- B 12
- C 6π
- D 36

73. Assume that the average volume of a raindrop is 10 cubic millimetres. A city spread in 10 km x 10 km received 1 cm of rain. The number of raindrops that fell on the city is

- A 10^{11}
- B 10^{12}
- C 10^{13}
- D 10^{14}

74. The price of a pen was twice that of a pencil. One person ordered 4 pens and some pencils. At the time of preparing the bill, the prices of these articles interchanged. This increased the bill by 50%. The ratio of number of pens to the number of pencils was

- A 4:1
- B 1:4
- C 2:1
- D 1:2

75. The area of a square inscribed in a semicircle is to the area of the square inscribed in the entire circle as
- A 1 : 2
B 2 : 3
C 2 : 5
D 3 : 5
76. The price of an article was increased by $p\%$ and then the new price was decreased by $p\%$. If the last price was ₹ 100, the original price was
- A ₹ $\frac{100}{1 - \left(\frac{p^2}{100^2}\right)}$
B ₹ $\frac{1000}{1 - (p)^2}$
C ₹ $\frac{100000}{100 - p^2}$
D ₹ 100
77. A cylindrical oil tube, lying horizontally, has an interior length of 10 cm and an interior radius 3 cm. If the rectangular surface of the oil has an area of 40 cm², the depth of oil in the tube is
- A $\sqrt{5}$ cm
B $2\sqrt{5}$ cm
C $(\sqrt{5} - 2)$ cm or $(\sqrt{5} + 2)$ cm
D either $(3 - \sqrt{5})$ cm or $(3 + \sqrt{5})$ cm

78. A square and an equilateral triangle have the same perimeter. Let A be the area of the circle circumscribed about the square and B be the area of the circle circumscribed about the triangle. Then the ratio A : B is
- A 9 : 16
B 3 : 4
C 27 : 32
D $3\sqrt{6} : 8$
79. Surface area of a cuboid is 22 cm² and the sum of the lengths of all its edges is 24 cm. The length of each diagonal of the cuboid, in cm, is
- A $\sqrt{11}$

- B $\sqrt{12}$
- C $\sqrt{13}$
- D $\sqrt{14}$

80. A right circular cylinder has its height two times its radius. It is inscribed in a right circular cone having its diameter 10 cm and altitude 12 cm, and the axes of both the cylinder and cone coincide. The radius of the cylinder is

- A $2\frac{8}{11}$ cm
- B $2\frac{2}{5}$ cm
- C $4\frac{8}{11}$ cm
- D $4\frac{2}{5}$ cm

Logical Ability

Instructions [81 - 82]

Words in the following questions have a definite relationship. Your task is to find out the pair with similar relationship from (1), (2), (3) and (4).

81. Cool : Cold

- A Fall : Slip
- B Sprain : Fracture
- C Accident: Death
- D Hot : Drink

82. Unity : Diversity

- A Union : War
- B Steal : Catch
- C Push : Throw
- D Lead : Follow

Instructions [83 - 85]

Match the questions with (1) (2), (3) and (4) on the basis of the relationship among the items given in the questions. The relationship among the items, should be the same irrespective of the order in which they are placed.

83. Cow: Black : Dog

- A Pocket : Purse : Money
- B Pharmacy : Patient : Medicine
- C Forest : Plains : Mountains
- D History : Geography : Economics

84. Crow : Horse : Shark

- A Pocket : Purse : Money
- B Pharmacy : Patient : Medicine
- C Forest : Plains : Mountains
- D History : Geography : Economics

- C Forest : Plains : Mountains
- D History : Geography : Economics

Instructions [86 - 90]

We come across many funny incidents related to different walks of life. One of the funny incident is the punchline or a climax — which gives the incident a sudden transformation or twist (into something not expected). It is this punchline which makes the incident funny.

In each of the following questions an incident is described but the punchline is missing - indicated by a blank. After the incident, two statements numbered I and II are given. Considering the incident, you have to decide which of the two statements fits as a punchline.

86. The patient was grumbling about the fee. Hundred Rupees for pulling out a tooth!”, she exclaimed, “and it’s only a minute’s work.”

The dentist said, “well,

I. I can give you 50% discount if you get all your teeth pulled out.

II. I will pull it-out slowly, if you wish.

- A if you think only statement I fits;
- B if you think only statement II fits;
- C if you think both I and II fit and the wavelengths of approach in both the statements are also more or less the same;
- D if you think both I and II fit but the ideas or wavelengths of approach in both statements are different and contrasting.

87. The grand-son reported to his father : "Dad the car has developed some trouble. There is water in its carburettor"? When the father asked how it happened, he replied : "....."

I. Oh, I was checking the carburettor when, suddenly, it began to rain.

II. Oh, I was driving the car when the bridge collapsed suddenly and fell into a river.

- A if you think only statement I fits;
- B if you think only statement II fits;
- C if you think both I and II fit and the wavelengths of approach in both the statements are also more or less the same;
- D if you think both I and II fit but the ideas or wavelengths of approach in both statements are different and contrasting.

88. The psychiatrist was assuring the husband : "Don't worry about your wife. You'll have a different woman when she gets back from hospital."

Husband :

I. 'And what if she finds out ?'

II. 'No sir, I love my wife'.

- A if you think only statement I fits;
- B if you think only statement II fits;
- C if you think both I and II fit and the wavelengths of approach in both the statements are also more or less the same;
- D if you think both I and II fit but the ideas or wavelengths of approach in both statements are different and contrasting.

89. Wife : The cleaning woman seems to have stolen two of our new towels.

Husband : Which towel ?

Wife :

I. "The ones we had been gifted on our anniversary".

II. "The ones we brought back from the hotel in Delhi."

- A if you think only statement I fits;
- B if you think only statement II fits;
- C if you think both I and II fit and the wavelengths of approach in both the statements are also more or less the same;
- D if you think both I and II fit but the ideas or wavelengths of approach in both statements are different and contrasting.

90. A asked his friend B how the latter had amassed so much wealth in such a short time. B said, "J joined hands with a rich men. He had the money and I had the experience." He added.....

I. "Now he has the experience and I the money."

II. 'When experience joins money, it creates miracles.'

- A if you think only statement I fits;
- B if you think only statement II fits;
- C if you think both I and II fit and the wavelengths of approach in both the statements are also more or less the same;
- D if you think both I and II fit but the ideas or wavelengths of approach in both statements are different and contrasting.

Instructions [91 - 95]

Study the following information carefully and answer the given questions:

'P', 'Q', 'R', 'S', 'T', 'X', 'Y' and 'Z' are sitting around a circular table facing the centre.

- (A) 'S' sits exactly between 'Z' and 'T'.
- (B) 'Z' sits second to the left of 'T' and second to the right of 'Q'.
- (C) 'Y' sits third to the left of 'X'.
- (D) 'P' is not an immediate neighbour of 'Q'.

91. 'P' : 'Z' then 'Q' : ?

- A 'S'
- B 'Z'
- C 'P'
- D 'R'

92. Who is immediate right of 'S' ?

- A 'R'
- B 'Z'
- C 'Y'
- D 'T'

93. Who sits third to the left of 'Z' ?

- A 'R'
- B 'P'
- C 'Y'
- D 'T'

SRCC GBO Previous Papers

with detailed video solutions and analysis

94. How many people sit between 'P' and 'Q' when counted anti-clockwise direction from 'Q' ?

- A One
- B Two
- C Three
- D Four

95. In which of the following pairs, is the second person sitting to the immediate left of the first person ?

- A 'X' - 'S'
- B 'Q' - 'R'
- C 'Z' - 'S'
- D 'Y' - 'T'

Instructions [96 - 100]

Below are given two passages followed by several possible inferences which can be drawn from the facts stated in the passage. You have to examine each inference separately in the context of the passage and decide upon its degree of truth or falsity.

Data available from the National Institute of Nutrition (NIN) compares, separately for boys and girls, the average heights recorded during 2010 with the average for the period 2005-10 at different ages in the 10 states covered by the NNMB survey. The 2010 height turns out to be neither uniformly higher nor uniformly lower than the 2005-10 average height at ages 2, 5 and 9 in most of the states. However, the comparison at age 13 is more meaningful as it represents the cumulative result of childhood growth. At age 13, the average height recorded for boys in 2010 is lower than the average for 2005-10 in only one state; Karnataka. For girls at this age, the average height recorded in 2010 turns out to be lower than the 2005-10 average in four States — Andhra Pradesh, Gujarat, Madhya Pradesh and Uttar Pradesh. In all other States, the 2010 average was greater than or equal to the 2005-10 average.

96. There are only two institutes - NIN and NNMB which have collected data on average height.

- A if the inference is 'definitely true' i.e. it properly follows from the statement of facts given.
- B if the 'data are inadequate' i.e. from the facts given you cannot say whether the inference is likely to be true or false.
- C if the inference is 'probably false' though not 'definitely false' in the light of the facts given.
- D if the inference is 'definitely false' i.e. it cannot possibly be drawn from the facts given or it contradicts the given facts.

SRCC GBO Cracku's WhatsApp Group

[Join Now](#)

97. The data from Karnataka was collected by both NIN and NNMB.

- A if the inference is 'definitely true' i.e. it properly follows from the statement of facts given.
- B if the 'data are inadequate' i.e. from the facts given you cannot say whether the inference is likely to be true or false.
- C if the inference is 'probably false' though not 'definitely false' in the light of the facts given.

- D** if the inference is 'definitely false' i.e. it cannot possibly be drawn from the facts given or it contradicts the given facts.

98. In Karnataka, the average age recorded in 2010 for both boys and girls is lower than that for 2005-10.

- A** if the inference is 'definitely true' i.e. it properly follows from the statement of facts given.
- B** if the 'data are inadequate' i.e. from the facts given you cannot say whether the inference is likely to be true or false.
- C** if the inference is 'probably false' though not 'definitely false' in the light of the facts given.
- D** if the inference is 'definitely false' i.e. it cannot possibly be drawn from the facts given or it contradicts the given facts.

99. More States indicated higher average in 2010 as compared to that 2005-10.

- A** if the inference is 'definitely true' i.e. it properly follows from the statement of facts given.
- B** if the 'data are inadequate' i.e. from the facts given you cannot say whether the inference is likely to be true or false.
- C** if the inference is 'probably false' though not 'definitely false' in the light of the facts given.
- D** if the inference is 'definitely false' i.e. it cannot possibly be drawn from the facts given or it contradicts the given facts.

100. There may not be large differences in the height of boys and girls from 2nd to 5th year.

- A** if the inference is 'definitely true' i.e. it properly follows from the statement of facts given.
- B** if the 'data are inadequate' i.e. from the facts given you cannot say whether the inference is likely to be true or false.
- C** if the inference is 'probably false' though not 'definitely false' in the light of the facts given.
- D** if the inference is 'definitely false' i.e. it cannot possibly be drawn from the facts given or it contradicts the given facts.

Instructions [101 - 105]

In a certain code, letters of English alphabet (consonants and vowels) are coded as given for some words. The numeric code for each letter is given in bracket under coded form and corresponds to the letter in the word in the same serial order. Study the coded forms of the given words and find out the rules for their codification. Applying those rules, answer the questions that follow.

Word	Coded Form			
SALE	5	25	5	25
EXIT	30	5	30	5

Instructions [106 - 110]

Read the following information carefully and answer the questions.

A famous monument issues entry passes to all its visitors for security reasons. Visitors are allowed in batches after every one hour. In a day there are six batches. A code is printed on entry pass which keeps on changing for every batch. Following is an illustration of pass-codes issued for each batch.

Batch I : clothes neat and clean liked are all by

Batch II : by clothes neat all are and clean liked

Batch III: liked by clothes clean and neat all are and so on.....

106. If pass-code for the second batch is 'to confidence hard you leads work and success', what will be the pass-code for the fourth batch ?

- A leads success to you hard confidence work
- B leads to success you hard confidence and work
- C leads success to you hard confidence and work
- D leads success you to hard confidence and work

107. If the pass-code issued for the last (sixth) batch is 'and pencil by all boys used are pen', what will be the pass-code for the first batch ?

- A pencils and pen are used by all boys
- B pencils and pen are used all by boys
- C pen and pencils used are by all boys
- D pen and pencils are used by all boys

108. If pass-code for the third batch is 'night succeed day and hard work to for' what will be the passcode for the sixth batch?

- A hard work for and succeed night to day
- B work hard for to succeed night and day
- C word hard to for succeed night and day
- D hard work for to succeed night and day

109. 'A' went to visit the monument in the second batch. He was issued a pass-code 'length the day equal of an night are'. However, he could not visit the monument in the second batch as he was little late. He then preferred to visit in the fifth batch. What will be the new pass-code issued to 'A' ?

- A an of are night the length equal day
- B an of are the night length day eqaul
- C an are of night the length equal day
- D an of are night the equal day length

110. If 'visit in zoo should the we time day' is the pass-code for the fifth batch, 'zoo we the should visit day time in' will be pass-code for which of the following batches ?

- A III
- B IV
- C I
- D II

Instructions [111 - 115]

Below are given three statements a, b and c followed by four conclusions. You have to take the given statements to be true even if they appear to be at variance with commonly, known facts, and then decide which of the conclusions logically follow(s) from the given statements. For each question, mark out an appropriate answer choice that you think is correct.

111. Statements:

- a. All colleges are books.
- b. Some colleges are students.
- c. No chairs are books.

Conclusions :

- I. Somestudents are chairs.
- II. No colleges are chairs.
- III. Some students are books.
- IV. Some students are not en

- A I, III and IV follow
- B II, III and IV follow
- C Only II and III follow

D Only III and either I or IV follow

112. Statements:

- a. Only stars are moons.
- b. No cosmosis star.
- c. No planets are moons.

Conclusions :

- I. Some moons are not planets.
- II. No moon is a cosmos.
- III. No cosmos is a planet.
- IV. No stars are planets.

- A** I and II follow
- B** III and IV follow
- C** I, II and IV follow
- D** II, III and IV follow

113. Statements :

- some colleges are hospitals.
- All hospitals are medicines.
- Some medicines are machines.

Conclusions :

- I. All hospitals are medicines.
- II. Some colleges are medicines.
- III. Some colleges are machines.
- IV. Some colleges are not machines.

- A** I, II and III follow
- B** I, II and IV follow
- C** I, II and either III or IV follow
- D** II and either III or IV follow

114. Statements :

- a. No book is a plate.
- b. No chair is a plate.
- c. Some chairs are bags.

Conclusions :

- I. Some bags are plates.
II. Some bags are not plates.
III. No book is a chair.
IV. Some chairs are books.

- A** Either I or II and III follow
- B** Either III or IV and II follow

- C Either II or II follows
- D Either I or II and either III or IV follow

115. Statements:

- a. No, hero is dancer.
- b. some musicians are players.
- c. All musicians are heros.

Conclusions:

- I. Some dancers are not players.
- II. No dancer is a musician.
- III. Some players are heros.
- IV. Some players are not dancers.

- A I and II follow
- B II and III follow
- C I, II and III follow
- D II, III and IV follow

Instructions [116 - 120]

Six children P, Q, R, S, T and U, were all born on the same day of the year, but each was born in a different year during a single six-year period.

P is older than R.

Q is older than both S and T.

U is two years older than S.

P was born either in 2007 or in 2008.

The oldest children was born in 2005.

116. If P is younger than S, all of the following must be true EXCEPT

- A Q was born in 2006
- B S was born in 2007
- C P was born in 2008
- D T was born in 2009

117. If U is the oldest of the children, then which of the following must be true ?

- A Q was born in 2006
- B S was born in 2006
- C R was born in 2009
- D T was born in 2010

118. Which of the following could be a correct listing of the children from the youngest to be oldest?

- A R, P, Q, S, T, U
- B R, T, P, S, U, Q
- C R, T, S, P, U, Q
- D R, T, P, U, S, Q

119. If P is older than U, then in how many different orders could the six children have been born ?

- A 1
- B 2
- C 3
- D 4

120. If T is older than S, which of the following must be true ?

- I. Q was born in 2005.
- II. T was born in 2006.
- III. P was born in 2008.

- A I only
- B I and II only
- C I and III only
- D I, II and III

- A Egypt
- B Iran
- C Libya
- D Afghanistan

140. What is 'Operation Twist' in news in September, 2011 ?

- A US program to support overthrow of Assad regime in Syria.
- B US program to locate Libyan dictator Gaddafi.
- C US program to sell short-term debt and buy long-term debt.
- D US program to trade deficit with china.

141. Which country's Progress cargo rocket launch, ferrying food and fuel to the International Space Station, ended in a failure recently ?

- A Russia
- B China
- C Japan
- D USA

142. Which of the following is not among the State/union territories that underwent a name — change after their creation ?

- A Chhattisgarh
- B Uttarakhand

- C Puducherry
- D Odisha

143. India assumed the Chairmanship of which of the following international organisation in September, 2011 ?

- A G-77
- B Non-Aligned Movement
- C G-24
- D BRICS

144. The Union Environment Ministry has decided to declare Sathymangalam Wildlife Sanctuary a 'Tiger Reserve'. The sanctuary is in which State ?

- A Tamil Nadu
- B Karnataka
- C Puducherry
- D Andhra Pradesh

145. Which of the following has conducted a study on the economic impact of interlinking of rivers programme ?

- A CRISIL
- B NCAER
- C Planning Commission
- D CMIE

146. Education Innovation Fund for India is an initiative of

- A Intel
- B IBM
- C Microsoft India
- D Hewlett-Packard

147. Which Indian petroleum company was in news recently for the first hydrocarbon discovery in Sri Lanka ?

- A RIL

- B Cairn India
- C ONGC
- D Essar Oil

148. The term 'Golden Revolution' is most closely related to which of the following missions ?

- A National Mission on Clean Coal Technologies.
- B National Bamboo Mission.
- C National Solar Mission.
- D National Horticulture Mission.

149. What is the number of digits in the MICR Magnetic Ink character Recognition code mentioned at the bottom of the cheque just after the cheque number ?

- A 6
- B 7
- C 8
- D 9

150. Which of the following has become the first Indian State to launch health insurance policy covering all its people ?

- A Jammu & Kashmir
- B Haryana
- C Kerala
- D Goa

151. In which of the following States are India's maximum number of mines producing minerals (excluding minor minerals, petroleum (crude), natural gas and atomic minerals) located

- A Madhya Pradesh
- B Gujarat
- C Jharkhand
- D Andhra Pradesh

152. Economic and Social Commission for Asia and Pacific (ESCAP) is an organisation under which of the following ?
- A International Monetary Fund
 - B World Economic Forum
 - C United Nations
 - D World Bank
153. Who has written the biography of the Congress leader Sonia Gandhi, 'Sonia Gandhi : An Extra-ordinary Life, An Indian Destiny'?
- A Rani Singh
 - B Anjali Joseph
 - C Rana Dasgupta
 - D Moni Mohsri
154. Who among the following has won the 26th Indira Gandhi Award for National Integration ?
- A Balraj Puri
 - B Shyam Benegal
 - C Mohan Dharia
 - D Javed Akhtar

SRCC GBO CRASH COURSE

USE COUPON CODE **SRCCGBO** TO GET AN INSTANT DISCOUNT OF ₹500.

46. **C**

Actual production in 2004 = 45

Target production in 2005 = 60

$$\Rightarrow \text{Required \%} = \frac{45}{60} \times 100 = 75\%$$

=> Ans - (C)

47. **A**

Total target production over the years = 15+30+30+35+60+40+60 = 270

$$\Rightarrow \text{Required average target production} = \frac{270}{7} \approx 38.5$$

∴ In **4 years**, i.e. 2004, 2005, 2006 and 2007 actual production is above the average target production over the years.

=> Ans - (A)

48. **D**

The target production in 2002, 2004 and 2007 together = 30+35+60 = 125

Actual production in 2001 and 2003 = 20+30 = 50

$$\Rightarrow \text{Required \%} = \frac{125}{50} \times 100 = 250\%$$

=> Ans - (D)

49. **B**

Total actual production over the years = 20+25+30+45+40+45+45 = 250

Total target production over the years = 15+30+30+35+60+40+60 = 270

$$\Rightarrow \text{Required ratio} = \frac{250}{270} = 25 : 27$$

=> Ans - (B)

50. **D**

Number of years in which target production is less than or equal to the actual production is **4 times**, in 2001, 2003, 2004 and 2006

=> Ans - (D)

$$= \left[\left(3 \right)^{\frac{3}{6}} - \left(\frac{3\sqrt{3}}{2} \right) \right]^2 + \frac{2(\sqrt{2}+\sqrt{6})}{3\sqrt{2}+\sqrt{3}}$$

$$= \left(\sqrt{3} - \frac{3\sqrt{3}}{2} \right)^2 + \frac{2(\sqrt{2}+\sqrt{6})}{3\sqrt{2}+\sqrt{3}}$$

$$= \left(\frac{-\sqrt{3}}{2} \right)^2 + \frac{2(\sqrt{2}+\sqrt{6})}{3\sqrt{2}+\sqrt{3}}$$

$$= \frac{3}{4} + \frac{2(\sqrt{2}+\sqrt{6})}{3\sqrt{2}+\sqrt{3}}$$

$$= \frac{9\sqrt{2}+3\sqrt{3}+8\sqrt{2}+8\sqrt{6}}{4(3\sqrt{2}+\sqrt{3})}$$

$$= \frac{3\sqrt{3}(\sqrt{6}+1)+8\sqrt{2}(\sqrt{3}+1)}{4\sqrt{3}(\sqrt{6}+1)}$$

52. D

$$\begin{aligned} \text{Expression : } & \left(1 - \frac{1}{2^2}\right) \left(1 - \frac{1}{3^2}\right) \left(1 - \frac{1}{4^2}\right) \dots \left(1 - \frac{1}{11^2}\right) \left(1 - \frac{1}{12^2}\right) \\ &= \left(1^2 - \frac{1}{2^2}\right) \left(1^2 - \frac{1}{3^2}\right) \left(1^2 - \frac{1}{4^2}\right) \dots \left(1^2 - \frac{1}{11^2}\right) \left(1^2 - \frac{1}{12^2}\right) \\ &= \left(1 - \frac{1}{2}\right) \left(1 + \frac{1}{2}\right) \left(1 - \frac{1}{3}\right) \left(1 + \frac{1}{3}\right) \left(1 - \frac{1}{4}\right) \left(1 + \frac{1}{4}\right) \dots \left(1 - \frac{1}{11}\right) \left(1 + \frac{1}{11}\right) \left(1 - \frac{1}{12}\right) \left(1 + \frac{1}{12}\right) \\ &= \left(\frac{1}{2}\right)\left(\frac{3}{2}\right) \times \left(\frac{2}{3}\right)\left(\frac{4}{3}\right) \times \left(\frac{3}{4}\right)\left(\frac{5}{4}\right) \times \left(\frac{4}{5}\right)\left(\frac{6}{5}\right) \times \dots \times \left(\frac{10}{11}\right)\left(\frac{12}{11}\right) \times \left(\frac{11}{12}\right)\left(\frac{13}{12}\right) \\ &= \frac{1}{2} \times \frac{13}{12} = \frac{13}{24} \end{aligned}$$

=> Ans - (D)

53. D

Option D has to be the smallest, since $\sqrt{26}$ is nearly 5.1, which when multiplied with 10 shall get almost totally cancel out the positive number 51.

54. B

Terms : $2^{\frac{1}{2}}, 3^{\frac{1}{3}}, 8^{\frac{1}{8}}$ and $9^{\frac{1}{9}}$

L.C.M. (2,3,8,9) = 72

Multiplying the exponents by 72, we get :

$$\begin{aligned} &= 2^{\frac{72}{2}}, 3^{\frac{72}{3}}, 8^{\frac{72}{8}} \text{ and } 9^{\frac{72}{9}} \\ &= (2)^{36}, (3)^{24}, (8)^9, (9)^8 \end{aligned}$$

Now, clearly, $(2)^{36} > (8)^9$ and $(3)^{24} > (9)^8$

Now, among $(2)^{36}$ and $(3)^{24}$

these can be written as : $(8)^{12} < (9)^{24}$

Thus, greatest among these are : $3^{\frac{1}{3}}$

=> Ans - (B)

55. D

$$\begin{aligned} \text{Expression : } & 3^{1001} \times 7^{1002} \times 13^{1003} \\ &= 3^{4k+1} \times 7^{4k+2} \times 13^{4k+3} \end{aligned}$$

Unit's digit will be same as unit digit of $(3)^1 \times (7)^2 \times (13)^3$

Only unit digit considered = $3 \times 9 \times 7 = 9$

$$\begin{aligned} \text{Expression : } & \frac{1}{1-\sqrt{2}+\sqrt{3}} + \frac{1}{1-\sqrt{2}-\sqrt{3}} - \frac{2}{1+\sqrt{2}-\sqrt{3}} + \frac{3}{\sqrt{2}} \\ &= \left[\frac{1}{1-\sqrt{2}+\sqrt{3}} \times \frac{(1-\sqrt{2})-\sqrt{3}}{(1-\sqrt{2})-\sqrt{3}} \right] + \left[\frac{1}{1-\sqrt{2}-\sqrt{3}} \times \frac{(1-\sqrt{2})+\sqrt{3}}{(1-\sqrt{2})+\sqrt{3}} \right] - 2 \left[\frac{1}{1+\sqrt{2}-\sqrt{3}} \times \frac{(1+\sqrt{2})+\sqrt{3}}{(1+\sqrt{2})+\sqrt{3}} \right] + \left[\frac{3}{\sqrt{2}} \right] \\ &= \left[\frac{1-\sqrt{2}-\sqrt{3}}{(1-\sqrt{2})^2-(\sqrt{3})^2} \right] + \left[\frac{1-\sqrt{2}+\sqrt{3}}{(1-\sqrt{2})^2-(\sqrt{3})^2} \right] - 2 \left[\frac{1+\sqrt{2}+\sqrt{3}}{(1+\sqrt{2})^2-(\sqrt{3})^2} \right] + \left[\frac{3}{\sqrt{2}} \right] \\ &= \left[\frac{1-\sqrt{2}-\sqrt{3}}{1-2\sqrt{2}+2-3} \right] + \left[\frac{1-\sqrt{2}+\sqrt{3}}{1-2\sqrt{2}+2-3} \right] - 2 \left[\frac{1+\sqrt{2}+\sqrt{3}}{1+2\sqrt{2}+2-3} \right] + \left[\frac{3}{\sqrt{2}} \right] \\ &= \left[\frac{1-\sqrt{2}-\sqrt{3}}{-2\sqrt{2}} \right] + \left[\frac{1-\sqrt{2}+\sqrt{3}}{-2\sqrt{2}} \right] - 2 \left[\frac{1+\sqrt{2}+\sqrt{3}}{2\sqrt{2}} \right] + \left[\frac{6}{2\sqrt{2}} \right] \\ &= \left[\frac{-1+\sqrt{2}+\sqrt{3}}{2\sqrt{2}} \right] + \left[\frac{-1+\sqrt{2}-\sqrt{3}}{2\sqrt{2}} \right] + \left[\frac{-2-2\sqrt{2}-2\sqrt{3}}{2\sqrt{2}} \right] + \left[\frac{6}{2\sqrt{2}} \right] \end{aligned}$$

$$\begin{aligned}
&= \frac{1}{2\sqrt{2}}[(-1 - 1 - 2 + 6) + (\sqrt{2} + \sqrt{2} - 2\sqrt{2}) + (\sqrt{3} - \sqrt{3} - 2\sqrt{3})] \\
&= \frac{1}{2\sqrt{2}}(2 - 2\sqrt{3}) \\
&= \frac{1-\sqrt{3}}{\sqrt{2}} \\
&= \frac{1}{2}(\sqrt{2} - \sqrt{6})
\end{aligned}$$

=> Ans - (D)

57. **A**

Let $x = 5, z = 4, y = 3$

(A) : $(x - z)^2 y = 1 \times 3 = 3$ is **odd**

(B) : $(x - z)^2 y^2 = 1 \times 9 = 9$ is odd

(C) : $(x - z)y = 1 \times 3 = 3$ is odd

(D) : $(x - y)^2 z = 4 \times 4 = 16$ is even

=> Ans - (A)

58. **A**

We are given that p on being divided by d given that quotient q and remainder r, giving us the equation $p = qd + r$

From the second relation, we can get the second equation to be $q = d'q' + r'$

Substituting the value of q from the second equation into the first equation, we get p to be $(q'd' + r')d + r$
 $p = q'd'd + r'd + r$

Dividing this by dd' , the first term will not give any remainder as it is a multiple of dd' , and the second and third terms are not multiples of dd' , giving the remainder to be $r'd + r$

Therefore, Option A is the correct answer.

59. **C**

Expression : $N = \sqrt{25^{64} \times 64^{25}}$

$$= \sqrt{(5)^{128} \times (2)^{150}}$$

$$= (5)^{64} \times (2)^{75}$$

$$= (2)^{11} \times (10)^{64}$$

$$= 2048 \times (10)^{64}$$

Thus, there are 68 digits in the numbers and sum of digits = $2 + 0 + 4 + 8 = 14$

=> Ans - (C)

60. **D**

Let $p = \frac{1}{q}$

If p increases by 20%, => $p' = \frac{6p}{5} = \frac{6}{5q}$

Now, $p' = \frac{1}{q'}$

$$\Rightarrow q' = \frac{1}{p'}$$

$$\Rightarrow q' = \frac{5q}{6}$$

$\therefore$ Percentage decrease in $q = \frac{1}{6} \times 100 = 16\frac{2}{3}\%$

=> Ans - (D)

WITH DETAILED SOLUTIONS AND ANALYSIS

61. C

Since, each has the same remainder, we need to find the H.C.F. [(1417-1059),(2312-1417),(2312-1059)]

$$= \text{H.C.F. } (358, 895, 1253) = 179$$

Now, when we divide 1059, 1417 and 2312 by 179, we get remainder as 164

$$\therefore r + k = 164 + 179 = 343$$

=> Ans - (C)

62. B

Let length of each candle be l cm

Time taken to burn each candle is 3 hours and 4 hours respectively.

$$\Rightarrow \text{Candle burn in 1 minute} = \frac{l}{180} \text{ cm and } \frac{l}{240} \text{ cm}$$

Let required time be t minutes.

$$\text{Thus, candle burnt in } t \text{ minutes} = l - \frac{tl}{180} \text{ cm and } l - \frac{tl}{240} \text{ cm}$$

According to ques,

$$\Rightarrow (l - \frac{tl}{180}) : (l - \frac{tl}{240}) = 1 : 2$$

$$\Rightarrow 2l - \frac{tl}{90} = l - \frac{tl}{240}$$

$$\Rightarrow l = \frac{tl}{30} (\frac{1}{3} - \frac{1}{8})$$

$$\Rightarrow \frac{30}{t} = \frac{5}{24}$$

$$\Rightarrow t = 30 \times \frac{24}{5} = 144 \text{ minutes}$$

$\therefore$ Candles should be lit 144 minutes prior to 5 pm, i.e. at **2:36 pm**

=> Ans - (B)

VIDEO SOLUTION

63. C

$$\text{Using, } \frac{M_1 D_1 H_1}{W_1} = \frac{M_2 D_2 H_2}{W_2}$$

Let number of articles produced be x

$$\Rightarrow \frac{2 \times 2 \times 2}{2} = \frac{4 \times 4 \times 4}{x}$$

$$\Rightarrow x = \frac{64}{4} = 16$$

=> Ans - (C)

64. C

Let speed of A, B and C be a, b, c m/s respectively.

Time taken by A to cover d metres = Time taken by B to cover $(d - 20)$ metres

$$\Rightarrow \frac{s_a}{s_b} = \frac{d}{d-20} \text{ -----(i) [Since, speed is directly proportional to distance]}$$

Similarly, Time taken by A to cover d metres = Time taken by C to cover $(d - 28)$ metres

$$\Rightarrow \frac{s_a}{s_c} = \frac{d}{d-28} \text{ -----(ii)}$$

and Time taken by B to cover d metres = Time taken by C to cover $(d - 10)$ metres

$$\Rightarrow \frac{s_b}{s_c} = \frac{d}{d-10} \text{-----(iii)}$$

Equating equations (i) and (ii), $\Rightarrow \frac{s_b}{s_c} = \frac{d-20}{d-28}$

Comparing it with equation (iv), $\Rightarrow \frac{d}{d-10} = \frac{d-20}{d-28}$

Solving above equation, we get : $d = 100 \text{ m}$

$\Rightarrow$ Ans - (C)

65. A

Time taken by the machines working together = x hours

According to ques,

$$\Rightarrow \frac{1}{x+6} + \frac{1}{x+1} + \frac{1}{x+x} = \frac{1}{x}$$

$$\Rightarrow \frac{(x+6)+(x+1)}{(x+6)(x+1)} = \frac{1}{x} - \frac{1}{2x}$$

$$\Rightarrow \frac{2x+7}{(x+6)(x+1)} = \frac{1}{2x}$$

$$\Rightarrow 4x^2 + 14x = x^2 + 7x + 6$$

$$\Rightarrow 3x^2 + 7x - 6 = 0$$

$$\Rightarrow 3x^2 + 9x - 2x - 6 = 0$$

$$\Rightarrow (3x - 2)(x + 3) = 0$$

$$\Rightarrow x = \frac{2}{3}, -3$$

$\therefore x$ cannot be negative, hence $x = \frac{2}{3}$ hours

$\Rightarrow$ Ans - (A)

66. C

Out of first 50 balls, number of blue balls = 49

From now, for each x balls, number of blue balls = $\frac{7x}{8}$

Total number of balls = $m = (x + 50)$

According to ques,

$$\Rightarrow \frac{\frac{7x}{8} + 49}{x+50} \geq \frac{9}{10}$$

$$\Rightarrow \frac{70x}{8} + 490 \geq 9x + 450$$

$$\Rightarrow 40 \geq \frac{x}{4}$$

$$\Rightarrow x \leq 160$$

$\therefore$ To maximize m , we need to maximize x , which has a maximum value of 160

$\Rightarrow$ Maximum number of balls = $160 + 50 = 210$

$\Rightarrow$ Ans - (C)

67. A

Shortcut : SP = Rs. 636 and CP = Rs. 600

$$\Rightarrow \text{Profit \%} = \frac{636-600}{600} \times 100$$

$$= \frac{36}{6} = 6\%$$

$\Rightarrow$ Ans - (A)

68. **B**

Let the numbers be a and b

According to ques, $\Rightarrow ab : (a + b) : (a - b) = 24 : 7 : 1$

Thus, $\frac{a+b}{a-b} = \frac{7}{1}$

$$\Rightarrow a + b = 7a - 7b$$

$$\Rightarrow 6a = 8b$$

$$\Rightarrow \frac{a}{b} = \frac{4}{3}$$

Let $a = 4y$ and $b = 3y$

$$\text{Also, } \frac{ab}{a-b} = \frac{24}{1}$$

$$\Rightarrow \frac{4y \times 3y}{4y-3y} = 24$$

$$\Rightarrow 12y^2 = 24y$$

$$\Rightarrow y = 2$$

$\therefore$ Numbers are $a = 8$ and $b = 6$

$$\Rightarrow \text{Product} = ab = 8 \times 6 = 48$$

$\Rightarrow$ Ans - (B))

69. **D**

Let price paid by each individual be Rs. a, b, c, d respectively.

$$\Rightarrow (a + b + c + d) = 6000 \text{ -----(i)}$$

$$\text{Also, } 2a = b + c + d \text{ -----(ii)}$$

Solving above equations, $\Rightarrow a = 2000$ and $b + c + d = 4000$

Similarly, $3b = a + c + d, \Rightarrow b = 1500$ and $c + d = 2500$

and $4c = a + b + d, \Rightarrow c = 1200$

$\therefore$ Amount paid by 4th person = Rs. 1300

$\Rightarrow$ Ans - (D)

70. **A**

Since, the jars are identical (have same capacity). Let quantity of each jar be L.C.M. (2,3) = 6 units

$\Rightarrow$ Acid in jar one = 3 units and acid of water in jar 1 = 3 units

Similarly, Acid in jar two = 4 units and water in jar two = 2 units

When mixed together, ratio of water to acid = $(3 + 2) : (3 + 4) = 5 : 7$

$\Rightarrow$ Ans - (A)

SRCC GBO CRASH COURSE

USE COUPON CODE **SRCCGBO** TO GET AN INSTANT DISCOUNT OF **₹500.**

71. **A**

Let the whole numbers be a, b, c, d

$$\text{According to ques, } \Rightarrow a + b + c = 180 \text{ -----(i)}$$

$$a + b + d = 197 \text{ -----(ii)}$$

$$a + c + d = 208 \text{ -----(iii)}$$

$$b + c + d = 222 \text{ -----(iv)}$$

Adding above equations, we get : $3(a + b + c + d) = 180 + 197 + 208 + 222$

$$\Rightarrow (a + b + c + d) = \frac{807}{3} = 269$$

Substituting value from equation (i) in above equation,

$$\Rightarrow d = 269 - 180 = 89$$

$\therefore$ Largest number = **89**

$\Rightarrow$ Ans - (A)

72. D

Radius of small pipes = 0.5 cm and big pipes = 3 cm

$$\Rightarrow \text{Number of circular pipes required} = \frac{\pi R^2}{\pi r^2}$$

$$= \frac{3^2}{0.5^2} = \frac{9}{0.25}$$

$$= 9 \times \frac{4}{1} = 36$$

$\Rightarrow$ Ans - (D)

73. D

Dimensions of city after rainfall = 10km x 10km x 1 cm

$$\Rightarrow \text{Volume} = 10^7 \times 10^7 \times 10 \text{ mm}$$

$$= 10^{15} \text{ mm}$$

$$\text{Volume of raindrop} = 10 \text{ mm}^3$$

$$\therefore \text{Number of raindrops} = \frac{10^{15}}{10} = 10^{14}$$

$\Rightarrow$ Ans - (D)

74. B

Let price of each pencil = Rs. x and price of each pen = Rs. $2x$

Let number of pencils ordered = y and number of pens ordered = 4

$$\Rightarrow \text{Original cost price} = \text{Rs. } (xy + 8x)$$

$$\text{After interchanging the price, } \Rightarrow \text{New price of bill} = \text{Rs. } (4x + 2xy)$$

According to ques,

$$\Rightarrow \frac{4x+2xy}{xy+8x} = 1.5$$

$$\Rightarrow 4x + 2xy = 1.5xy + 12x$$

$$\Rightarrow 4 + 2y = 1.5y + 12$$

$$\Rightarrow 0.5y = 12 - 4 = 8$$

$$\Rightarrow y = \frac{8}{0.5} = 16$$

$$\therefore \text{Ratio of pens to pencils} = \frac{4}{16} = 1 : 4$$

$\Rightarrow$ Ans - (B)

75. C

Let side of square inscribed in the semi circle be a cm and radius of semi circle = r cm

$$\text{In right } \triangle, \Rightarrow r^2 = a^2 + \left(\frac{a}{2}\right)^2$$

$$\Rightarrow r^2 = a^2 + \frac{a^2}{4}$$

$$\Rightarrow r^2 = \frac{5a^2}{4}$$

$$\Rightarrow a^2 = \frac{4r^2}{5} \text{-----(i)}$$

Similarly, let side of another square be b cm and radius of same circle = r cm

$$\Rightarrow b^2 + b^2 = (2r)^2$$

$$\Rightarrow b^2 = 2r^2 \text{-----(ii)}$$

$\therefore$ Ratio of area of first square to area of second square = $\frac{a^2}{b^2}$

Substituting values from equation (i) and (ii), $\Rightarrow \frac{\frac{4r^2}{5}}{2r^2}$

$$= 2 : 5$$

$\Rightarrow$ Ans - (C)

76. A

Let original price = Rs. x

$$\text{Price after } p\% \text{ increase} = x + \frac{p}{100} \times x = \text{Rs. } (x + \frac{px}{100})$$

$$\text{Price after } p\% \text{ decrease} = (x + \frac{px}{100}) - (\frac{p}{100})(x + \frac{px}{100})$$

$$\text{According to ques, } \Rightarrow x + \frac{px}{100} - \frac{px}{100} - \frac{p^2x}{10000} = 100$$

$$\Rightarrow x(1 - \frac{p^2}{10000}) = 100$$

$$\Rightarrow x = \text{Rs. } \frac{100}{1 - \frac{p^2}{10000}}$$

$\Rightarrow$ Ans - (A)

78. C

Let the common perimeter be c

$$\text{So, each side of square} = \frac{c}{4}$$

$$\Rightarrow \text{Circum radius of square} = r_s = \frac{s}{\sqrt{2}} = \frac{c}{4\sqrt{2}}$$

Thus, area of circle circumscribed about the square will be

$$\Rightarrow A = \pi(r_s)^2 = \pi \frac{c^2}{32} \text{-----(i)}$$

$$\text{Now, each side of triangle} = \frac{c}{3}$$

$$\Rightarrow \text{Height of triangle} = \frac{\sqrt{3}}{2} \times \frac{c}{3}$$

$$\Rightarrow \text{Circum radius of triangle} = r_t = \frac{2}{3} \times (\frac{\sqrt{3}}{2} \times \frac{c}{3}) = \frac{c}{3\sqrt{3}}$$

So area of the circle circumscribed about the triangle

$$\Rightarrow B = \pi(r_t)^2 = \pi \frac{c^2}{27} \text{-----(ii)}$$

$\therefore$ Required ratio $A : B = 27 : 32$

$\Rightarrow$ Ans - (C)

79. D

Let length, breadth and height be l, b, h cm respectively.

$$\Rightarrow \text{Surface area of cuboid} = 2(lb + bh + hl) = 22 \text{ -----(i)}$$

$$\text{Sum of all edges} = 4(l + b + h) = 24 \Rightarrow (l + b + h) = 6$$

$$\text{Squaring both sides, } \Rightarrow (l^2 + b^2 + h^2) + 2(lb + bh + hl) = 36$$

Substituting value from equation (i), we get :

$$\Rightarrow (l^2 + b^2 + h^2) + 22 = 36$$

$$\Rightarrow (l^2 + b^2 + h^2) = 36 - 22 = 14$$

$$\therefore \text{Diagonal of cuboid} = \sqrt{l^2 + b^2 + h^2} = \sqrt{14}$$

$\Rightarrow$ Ans - (D)

80. A

Let radius of cylinder = x cm and its height = $2x$ cm

Height of cone = $h = 12$ cm and radius of cone = $r = 5$ cm

Since, the axes coincide, thus in the two similar triangles, we have : $\frac{y}{h} = \frac{x}{r}$

$$\Rightarrow \frac{12-2x}{12} = \frac{x}{5}$$

$$\Rightarrow 60 - 10x = 12x$$

$$\Rightarrow 12x + 10x = 22x = 60$$

$$\Rightarrow x = \frac{60}{22} = 2\frac{8}{11} \text{ cm}$$

$\Rightarrow$ Ans - (A)

Logical Ability

81. B

Cool and cold are two states that vary in intensity. For instance, cool is comfortable, but cold is not conducive to oneself. The same relation is displayed by sprain and fracture where sprain is lesser in intensity when compared with fracture.

82. D

Unity and diversity are two opposite concepts altogether because diversity mainly overrides the concept of unity. The same relation is displayed by Lead and Follow, which are opposite poles as well.

83. C

Easy way to look at this: Cow and Dog are two different kinds of animals. The same relation is exhibited by Forests and Mountains, which are two different forms of landscape/land forms.

85. A

The house has a fan, which is located inside the room. Similarly, pocket has money, which is kept in a purse.

86. C

Here, the customer has expressed that the rate is too high for getting one single tooth pulled out, and that too for work that needs only a minute.

Hence, statement 1 can be a funny punchline, wherein the dentist mocks the patient by asking her to get all the teeth pulled out, which is not a practical solution to secure a discount.

Even the second statement is a good punchline that counters the argument made by the patient about the work needing only a minute.

This makes both statements good punchlines.

87. B

The son was talking about the carburetor having some water. Hence, any reason against the practical notions shall be a good punchline.

Statement 1 is not a funny line, considering the possibility of rain while he was checking the carburetor. It can actually be a valid reason.

Statement 2 is funny, since the line seems to exaggerate the incident, and had the car fallen off the bride, it would not exist anymore.

88. D

The psychiatrist said that the man's wife would be completely different (in the sense that she would experience a major change in her personality) after the treatment. Hence, any line that uses the words 'different woman' in the context of having another person altogether shall be funny.

1. This is a funny statement as it shows that the words of the psychiatrist were used in a different context altogether, and the man used a punchline in the context of having another woman and his wife finding it out.

2. This is a funny statement as well as he uses the line in context of there being another woman. However, the two punchlines are opposite in nature as the man's attitude of having another woman is different in the two.

89. D

Both options are apt punchlines as they change the course of discussion altogether by twisting the phrase 'new towels' by first mentioning them as gifts on the anniversary and second by mentioning them as the ones brought from the hotel. In both the cases, the towels won't be new, but the two statements are different ideas altogether.

90. D

Statement 1 is a punchline as B induced humor by saying that the interaction with J got him money and J got experience. The tradeoff is shown with a funny statement in this.

Statement 2 is a punchline as well, because it is presented in an unusual manner. However, the two statements are entirely different in the way they are presented.

91. C

For the sake of clarity, we shall know that ABCDE represents A as the starting point, and on moving anticlockwise we get B. On the other hand, clockwise movement gives E.

The following conclusions can be made:

A and B: The order shall be Q_ZST

Now, Y sits third to the left of X, which means Y's position is third to the left of X (clockwise).

Also, P is not an immediate neighbor of Q.

Hence, a possible combination can be: Y_QXZSTP

R can occupy the blank. Hence, the combination, in a clockwise direction, can be YRQXZSTP

Now, Z is third to the left of P. Hence, Third to the left of Q is P.

92. **D**

Hence, a possible combination can be: Y_QXZSTP

R can occupy the blank. Hence, the combination, in a clockwise direction, can be YRQXZSTP

Between P and Q (anti clockwise from Q), we have XZST. Hence, four people.

95. **B**

For the sake of clarity, we shall know that ABCDE represents A as the starting point, and on moving anticlockwise we get B. On the other hand, clockwise movement gives E.

The following conclusions can be made:

A and B: The order shall be Q_ZST

Now, Y sits third to the left of X, which means Y's position is third to the left of X (clockwise).

Also, P is not an immediate neighbor of Q.

Hence, a possible combination can be: Y_QXZSTP

R can occupy the blank. Hence, the combination, in a clockwise direction, can be YRQXZSTP

Here, R is sitting to the immediate left of Q.

96. **B**

The passage only mentions NIN and NNMB. However, we cannot say anything about the number of institutes that collected data on heights. Hence, the data is inadequate to corroborate the statement.

97. **A**

The passage states: At age 13, the average height recorded for boys in 2010 is lower than the average for 2005-10 in only one state; Karnataka.

Hence, it is clear that there is data about Karnataka in both the time brackets, and hence we can say for sure that both the agencies have collected data from Karnataka.

98. **B**

The survey was intended to measure the average height of people in different age groups. However, the passage is silent over the average age of the states. Hence, there is no adequate data to corroborate the statement.

99. **B**

The passage talks about specific groups (say female in age group of 13 years, or boys at age 13). However, we cannot say anything about the cumulative average of the states. Also, we have no information about the overall average of other states. Hence, data inadequate.

100. **B**

The passage specifically talks about boys/girls at the age of 13. However, it is silent over the other age groups. Hence, there is no adequate data to corroborate the statement.

111. **B**

We shall test each of the options and try to negate by coming up with a scenario where the particular conclusion won't hold true. If we cannot do that for a particular conclusion, that shall be the valid one.

1. Some students are chairs: We don't have any information about the connection between Books and Chairs. There can be an instance where students who are not books can come under the header of chairs. However, the other instance where chairs and students are disjoint sets can hold true as well. Hence, an invalid conclusion.
2. No college is a chair: Since it is clearly given that all colleges are books, and no book can be classified as a chair, we can definitely say that no college is a chair.
3. Some students are books: We know that all colleges are books, and at the same time, some students are college as well. Hence, we can definitely conclude that students which are classified as college are books as well.
4. Some students are not chairs: We definitely know that some students are college, which in turn are books. Further, it is also given that no book is a chair. Hence, students which are college cannot be chair.

112. **A**

Only stars are moons, which shall be interpreted in this way: All moons are stars.

We shall verify each option:

1. Some moons are not planets: Since we know that only stars can be classified as moons, it is always true that some moons are not planets.
2. No moon is a cosmos: We know that only stars are moons; this is again, a valid conclusion.
3. No cosmos is a planet: We have no relation given for planet and cosmos; hence, we cannot say for sure whether some cosmos are planets or not.
4. No star is a planet: We have no relation given for stars and planets. We only know that no planets are moons. However, there might or might not be stars which are not moon but are planet indeed.

113. **C**

Testing each of the options:

1. All hospitals are medicines: This is directly given in the question.
2. Some colleges are medicines: We know that some colleges are hospitals, and all hospitals are medicines. Hence, the colleges which are hospitals are definitely medicines.
- 3 and 4: We don't have any relation given between colleges and machines. Hence, either of the statements shall hold true.

114. **B**

We shall verify each of the options:

1. Some bags are plates: We don't have any relation given for bags and plates. Hence, an invalid conclusion.
2. Some bags are not plates: We know that some chairs are bags, and none of the chairs are plates. Hence, the chairs that come under bags are not plates. This is a valid conclusion.
- 3 and 4: We don't have any relation given about books and chairs, hence either of these shall be true.

115. **D**

Let us verify each of the options:

1. Some dancers are not players: There can be an instance where players are a bigger set, only some of them fall within heroes and musicians, and in the rest of the set of players, all dancers are classified. Hence, this is an invalid conclusion.
2. No dancer is a musician: Since all dancers are heroes, and none of the dancers are heroes, we can say that none of the dancers are musicians.
3. Some players are heroes: Since some musicians are players, and all musicians are heroes, we can say the players that can be classified as musicians are heroes.
4. Some players are not dancers: Since some musicians are players, all musicians are heroes, and no dancer is a hero, we can say that players which are musicians are definitely not dancers.

116. **D**

We know:

$P > R$

$Q > S$ and T

$U > S$ (2 years)

P - 2007/2008

Oldest in 2005

Now, we can see that P is not the oldest. Hence, the oldest shall be either U or Q .

The birth years shall be: 2005, 2006, 2007, 2008, 2009, 2010.

Case 1: When the oldest is U

Hence, U (2005), S (2007), Q (2006), P (2008), R/T (2009/2010)

Case 2: When Q is the oldest

Hence, Q (2005), U (2006), S (2008), P (2007), R/T (2009/2010)

It has to be case 1, where P is younger than S . Hence, all the options must be true except for D , as either R or T can take 2009.

117. **A**

We know:

$P > R$

$Q > S$ and T

$U > S$ (2 years)

P - 2007/2008

Oldest in 2005

Now, we can see that P is not the oldest. Hence, the oldest shall be either U or Q .

The birth years shall be: 2005, 2006, 2007, 2008, 2009, 2010.

Case 1: When the oldest is U

Hence, U (2005), S (2007), Q (2006), P (2008), R/T (2009/2010)

Case 2: When Q is the oldest

Hence, Q (2005), U (2006), S (2008), P (2007), R/T (2009/2010)

It is case 1 where U is the oldest. There, Q has to be from 2006.

118. C

We know:

$P > R$

$Q > S$ and T

$U > S$ (2 years)

P - 2007/2008

Oldest in 2005

Now, we can see that P is not the oldest. Hence, the oldest shall be either U or Q .

The birth years shall be: 2005, 2006, 2007, 2008, 2009, 2010.

Case 1: When the oldest is U

Hence, U (2005), S (2007), Q (2006), P (2008), R/T (2009/2010)

Case 2: When Q is the oldest

Hence, Q (2005), U (2006), S (2008), P (2007), R/T (2009/2010)

Hence, the cases can be (youngest to oldest): $R/T, P, S, Q, U$ or $R/T, S, P, U, Q$.

119. B

We know:

$P > R$

$Q > S$ and T

$U > S$ (2 years)

P - 2007/2008

Oldest in 2005

Now, we can see that P is not the oldest. Hence, the oldest shall be either U or Q .

The birth years shall be: 2005, 2006, 2007, 2008, 2009, 2010.

Case 1: When the oldest is U

Hence, U (2005), S (2007), Q (2006), P (2008), R/T (2009/2010)

Case 2: When Q is the oldest

Hence, Q (2005), U (2006), S (2008), P (2007), R/T (2009/2010)

It is case 2 where P is older than U. And there, two cases can be made depending on the year of R/T.
