Verbal Ability

1. Choose the most appropriate option to fill in the blanks of the given sentence.

Numerous criticisms of medical science _____ in recent years, with critics arguing that spurious diseases _____ for the aim of profit.

- A are articulated, are invented
- B are articulated, will have been invented
- C have been articulated, are being invented
- D have been articulated, will be invented

2. Choose the most appropriate meaning of the underlined idiomatic expression in the given sentence.

In the mad rush for Western modernity and technological skills, both traditional communities and the urban middle class are busy throwing out the baby with the bathwater.

- A Purging themselves of everything OR making a clean sweep
- B Starting again with a clean slate
- C Losing something useful while trying to discard the bad
- D Throwing out something precious by accident

3. Select the option that is related to the third word in the same way as the second word is related to the first word.

Trembling : Fear :: Frowning : ?

- A Mood
- B Joy
- C Thought
- D Displeasure

Instructions [4 - 5]

The given sentence has four underlined phrases. Choose the one that is INCORRECT and the option that gives the grammatically correct phrase.

4. The 11-hour mandatory rest period for workers in Germany is there to protect workers, originally to make sure factory workers could recover physically between shifts, but the break just necessary for mental regeneration.

- A to ensuring
- B within shifts
- C is just as necessary

D is being there

5. Mobile penetration is very high in India because a mobile phone will be allowing people to communicate instantly and orally, without the need to write messages or take someone's help to write messages; in such a scenario, the idea of information protection or privacy of data has little scope.

- A allows people to
- B gives little scope
- C having the need to
- D taking someone's help

6. Choose the most appropriate words to fill in the blanks of the given sentence.

They said they were not going to _____ any gifts for their ceremony _____ for donations to charities.

- A except, expect
- B accept, except
- C expect, except
- D expect, accept

7. Choose the option that best describes the meaning of the underlined word in the given sentence.

Ehrlich's argument that expanding human populations cannot be sustained on an Earth with finite carrying capacity is irrefutable and, indeed, almost tautological.

- A Indisputable
- B Irreconcilable
- C Immaterial
- D Arguable

8. Choose the most appropriate option to fill in the blanks of the given sentence.

It's _____ I've always admired and envied, across the species spectrum in the animal kingdom: the natural _____ with which creatures move in their ordinary lives.

- A ability, movement
- B a quality, ease and grace
- C a tendency, features
- D a characteristic, emotions

9. Three of the following sentences in the options form a coherent passage. Choose the option that contains the irrelevant sentence.

- A Another feature is the extremely complex causal basis of many diseases, which hampers the effectiveness of interventions on those diseases.
- B A prominent feature of medicine is the hope and expectation of patients that medicine can help them, coupled with the training of physicians to actively intervene.
- C The pharmaceutical industry is extremely profitable, and the fantastic gains to be made from selling drugs create incentives to engage in some questionable practices.
- D The history of science shows that major scientific revolutions typically occur without no thought of reward - think of Copernicus, Newton, Darwin and Einstein - breakthroughs in medicine are no different.

10. Select the most appropriate ANTONYM of the underlined word in the given sentence.

From experience we know that the pulp from this plant disintegrates when wet.

- A Falls apart
- B Dissolves
- C Flourishes
- D Separates

11. Select the most appropriate option to fill in the blanks.

Knowledge _____ animal behaviour and migration is much easier to pass on when woven _____ the narrative of a story brought to life _____ artistic representations.

- A in, about, with
- B of, across, with
- C about, into, with
- D on, with, in

Instructions [12 - 13]

Select the option that is related to the third word in the same way as the second word is related to the first word.

12. Architect : Drawing board :: Painter : ?

- A Paintbrush
- B Water-colours
- C Canvas
- D Portrait

13. Person : Crowd :: Musician : ?

- A Melody
- B Violin
- C Orchestra
- D Conductor

BUY NOW

17. Select the most appropriate ANTONYM of the underlined word in the given sentence.

Relentless advertising campaigns are telling Indian parents that coding is critical because making children code will develop their cognitive skills.

- A Intermittent
- B Prolific
- C Widespread
- D Expensive

18. Sentences of a paragraph are given below in jumbled order. Arrange the sentences in the right order to form a meaningful and coherent paragraph.

A. Publishing executives have long described their business as recession-proof; books, after all are relatively cheap compared to other things.

B. While the restrictions of the pandemic have affected business, it is true that a person can watch only so much Netflix, and there aren't a lot of other options.

C. It is not surprising then that bookstores are performing well; business got a boost when, early in the pandemic, Amazon deprioritised books to focus on medical supplies and household staples.

D. This is because the market for books remained stable after the 2008 recession. However, the challenges in 2020 have been more extreme, with social distancing restrictions at warehouses, vast lockdowns and a rapid economic meltdown.

- A A, B, D, C
- B B, D, C, A
- C B, A, C, D
- D A, D, B, C

19. Choose the most appropriate option to fill in the blank of the given sentence.

I _____ at least 500 books by the end of the year.

- A was reading
- B am reading
- C will have read
- D will have been reading

20. Choose the most appropriate option to fill in the blank of the given sentence.

The operator asked the caller to _____ while he transferred the call to the right department.

- A hold to
- B hold fast
- C hold up
- D hold on

21. Choose the most appropriate meaning of the underlined idiomatic expression in the given sentence.
She wanted to submit her artwork in time for the competition but she missed the boat as she had other commitments.

- A Was not serious enough about it
- B Sent in sub-standard work
- C Was too late to meet the deadline
- D Was focused on other tasks

22. Select the most appropriate option to fill in the blanks.

While working at the Human Resources Department, Mina was very _____ of not appearing to be _____ enough to her colleagues and the management.

- A conscience, conscientious
- B conscience, conscious
- C conscientious, conscience
- D conscious, conscientious

23. Choose the most appropriate ANTONYM of the underlined word in the given sentence.

This village presents one of many successes of the country's pledge to eradicate abject rural poverty by the end of 2020.

- A Banish
- B Aggravate
- C Diminish
- D Promote

24. Sentences of a paragraph are given below in jumbled order. Arrange the sentences in the right order to form a meaningful and coherent paragraph.

A. A recent legislation has ensured that the antiquities trade will be subject to greater oversight, which empowers federal regulators to design measures that would remove secrecy from transactions.

B. Regulators have long worried that the opacity of the antiquities trade, where buyers and sellers are seldom identified, made it an easy way to shroud illicit transfers of money.

C. The law also seeks to end the use of shell companies to conceal the identities of buyers and sellers.

D. Legal experts expect that the new antiquities regulations will flag certain transactions to the authorities, who then determine whether they are suspicious.

- A A, B, D, C
- B B, A, D, C
- C B, C, A, D

D A, C, B, D

25. Choose the option that best describes the meaning of the underlined word in the given sentence.

Travel writing is epistolary in nature: it uses the voyage and the destination as referents to communicate our own evolution of thought.

- A In the form of letters
- B An open communication
- C A chronological description
- D A personal description

26. Four options have been given out of which three are alike in some manner and one is different. Select the one that is different.

- A Between
- B Among
- C And
- D Of

27. Choose the most appropriate meaning of the underlined idiomatic expression in the given sentence.

It is difficult to pick new books in a year where there is an embarrassment of riches; one is hampered by the fact that some of the best ones are written by close friends and colleagues.

- A A dearth of good things
- B Overabundance of supply
- C Too many known authors
- D Not much to choose from

28. Choose the option that will complete the following paragraph.

Numerous criticisms of medical science have been articulated in recent years. Some critics argue that spurious disease categories are being invented for the aim of profit. Others say that the benefits of most new drugs are minimal and exaggerated by clinical research, and that the harms of these drugs are extensive and typically underestimated by clinical research.

- A Another prominent feature of medicine is the hope and expectation of patients that medicine coupled with training of physicians can help them in their treatment.
- B The pharmaceutical industry is extremely profitable, and the fantastic financial gains to be made from selling drugs create incentives to engage in some of the practices above.
- C Afflicted by studies with small sample sizes, tiny effects, invalid exploratory analyses and flagrant conflicts of interest, science has taken a turn towards darkness.

- D Still others point to problems with the research methods themselves, arguing that randomised trials and meta-analyses are in fact malleable.

WITH DETAILED SOLUTIONS AND ANALYSIS

29. Choose the most appropriate option to fill in the blanks of the given sentence.
It was quiet and peaceful during the monsoon months, when everything _____ in emerald green, and _____ to meet old friends, in uncrowded spaces.
- A was stained, there was time
B having been stained, with time
C will be stained, there was time
D was stained, there was the time
30. Sentences of a paragraph are given below in jumbled order. Arrange the sentences in the right order to form a meaningful and coherent paragraph.
- A. The program has been criticised for assisting people classified as extremely poor at some point from 2014 to 2016, without adding others who may have fallen on hard times since then.
B. In just five years, China says it has lifted from extreme poverty over 50 million farmers left behind by rapid economic growth in cities.
C. It does very little too for the urban poor people where wages may be higher but workers must pay far more for food and rent.
D. Local government officials identified impoverished households, handed out loans, grants and even farm animals to poor villagers.
- A B, D, A, C
B B, C, D, A
C B, A, C, D
D B, C, A, D
31. Three of the following sentences in the options form a coherent passage. Choose the option that contains the irrelevant sentence.
- A But we must equally take into consideration a need to support the people who have a hand in keeping their culture alive and thriving.
B In 2017, the semi-autonomous region of Catalonia had voted for independence led to the Spanish government dissolving the Catalanian parliament and ordering immediate regional elections.
C Apart from denouncing the physical destruction of sites, we should also spotlight the threat heritage decimation has on people and their cultural livelihoods.
D Many heritage sites are not inert buildings but are also living and breathing entities - a vital part of the daily lives of those that live around them.

32. Four options have been given out of which three are alike in some manner and one is different. Select the one that is different.
- A Hear
 - B Touch
 - C Mouth
 - D Smell
33. In the following question four options have been given out of which three are alike in some manner and one is different. Select the one that is different.
- A Spoon
 - B Fork
 - C Shears
 - D Knife
34. Choose the option that best describes the meaning of the underlined word in the given sentence.
Several inscriptions are etched into the facade of the ancient buildings, and warn of fines for trespassing or attempting to surreptitiously occupy the tomb as your own.
- A Flagrantly
 - B Aggressively
 - C Secretly
 - D Criminally

35. Sentences of a paragraph are given below in jumbled order. Arrange the sentences in the right order to form a meaningful and coherent paragraph.
- A. Researchers say that having a priority access line allows people to choose what resource they want to use to get to the front - time or money.
 - B. Not everyone is enthused about the rise of 'priority queuing' or 'fast-tracking', which sometimes involves paying an additional fee to jump the main queue.
 - C. For many people, time is more precious than money, so being able to hand over money in order to save time is a boon.
 - D. Despite this the concept is spreading worldwide, as queues can effectively be skipped everywhere from airport security to music festivals, with 'VIP' passes.
- A B, D, A, C

B A, C, D, B

C B, A, C, D

D A, D, B, C

Instructions [36 - 40]

Read the passage given below and answer the questions that follow.

Comprehension:

Every label has its problems — and, as it turns out, an interesting back story. Here's what I learned from talking to many, many experts.

More than half a century ago, the Cold War was just starting. It was Western capitalism versus Soviet socialism. But there was another group of countries. Many of them were former colonies. None of them were squarely in either the Western or the Soviet camp. Thinking of these three factions, French demographer Alfred Sauvy wrote of "Three Worlds, One Planet" in an article published in 'L'Observateur' in 1952. The First World consisted of the US, Western Europe and their allies. The Second World was the so-called Communist Bloc: the Soviet Union, China, Cuba and friends. The remaining nations, which aligned with neither group, were assigned to the Third World.

The Third World has always had blurred lines. "Although the phrase was widely used, it was never clear whether it was a clear category of analysis, or simply a convenient and rather vague label for an imprecise collection of states in the second half of the 20th century and some of the common problems that they faced," writes historian BR Tomlinson in his essay titled 'What was the Third World?', published in 2003 in the 'Journal of Contemporary History'.

Because many countries in the Third World were impoverished, the term came to be used to refer to the poor world. "This 1-2-3 classification is now out-of-date, insulting and confusing." Who is to say which part of the world is "first"? And how can an affluent country like Saudi Arabia, neither Western nor communist, be part of the Third World? Plus, the Soviet Union doesn't even exist anymore.

And it's not like the First World is the best world in every way. It has pockets of deep urban and rural poverty, says Paul Farmer, co-founder of the nonprofit Partners in Health and a professor at Harvard Medical School. "That's the Fourth World," Farmer says, referring to parts of the United States and other wealthy nations where health problems loom large.

'Developing countries' sounds like it might be a better choice. On the surface, it seems accurate. We're writing about countries that need to develop better health care systems, better schools, better ways to bring water and electricity to people.

(However)... when you think about it, 'developing countries' are quite developed in some respects. In countries where government safety nets are practically nonexistent, people step forward to help out, says Mead Over, who studies the economics of health interventions at the Center for Global Development.

Maybe the solution is to come up with a classification that is based on data. That's how the World Health Organization categorises countries. It uses the term "low-and lower-middle-income countries" or LMIC for short. The LMIC category is based on World Bank statistics that divide countries based on gross domestic product: There are low income, lower middle income, middle income and high income.

36. The central theme of the passage is the need:

- A** to change nomenclature to more accurately reflect current times
- B** for advanced countries to reflect on their history vis-à-vis former colonies
- C** to challenge the patronising stance of developed nations
- D** to narrow the gap between the 'First' and 'Third' world

37. We can infer from the passage that the author believes that the 1-2-3 system of classification can be termed as:

- A too generalised
- B imprecise
- C patronising
- D exhaustive

38. The passage suggests that the term 'developing' countries:

- A can also apply to western countries, given their inadequate health systems
- B can be an objective, verifiable way of classifying nations
- C is deceptive, as these countries have strong compensatory social networks
- D is being challenged as it has been coined by western agencies

39. Which of the following is NOT one of the reasons cited in the passage for the 1-2-3 classification to be outdated now?

- A Some First World countries have poorly developed regions and social networks.
- B Many First World countries are not situated in the West.
- C Some very wealthy countries are not included in the First World category.
- D The Second World no longer exists as a bloc of countries.

40. Which of the following views would the author NOT agree with?

- A The term 'Third World' has become synonymous with poor underdeveloped countries.
- B The terms 'developed' and 'developing' no longer reflect today's reality
- C With the Soviet Union's disbanding, the 'Second World' needs to be reclassified.
- D The term 'Third World' has a negative hierarchical connotation.

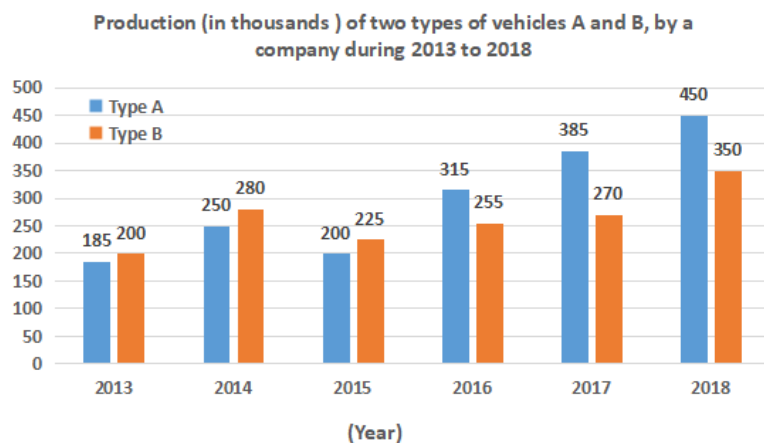

Data Interpretation

Instructions [41 - 45]

Study the graph and answer the given questions:

Production (in thousands) of two types of vehicles A and B, by a company during 2013 to 2018

41. The total number of vehicles of type B produced in 2013, 2014 and 2017 is x% of the total number of vehicles of type A produced in 2014, 2015 and 2018. The value of x is closest to:

- A 83.3
- B 80
- C 72.2
- D 84

Question 1
The total number of vehicles of type B produced in 2013, 2014 and 2017 is x% of the total number of vehicles of type A produced in 2014, 2015 and 2018. The value of x is closest to:

A) 83.3 B) 80
C) 72.2 D) 84

Question 2
The average number of vehicles of type B produced in 2015, 2016 and 2017 is approximately what per cent less than the number of vehicles of type A produced in 2017?

A) 20.6 B) 54
C) 35.1 D) 26

Question 3
90% of the total number of vehicles of type A produced in 2013, 2015 and 2016 is equal to the total number of vehicles of type B produced in 2017.

VIDEO SOLUTION

WITH DETAILED SOLUTIONS AND ANALYSIS

42. The average number of vehicles of type B produced in 2015, 2016 and 2017 is approximately what per cent less than the number of vehicles of type A produced in 2017?

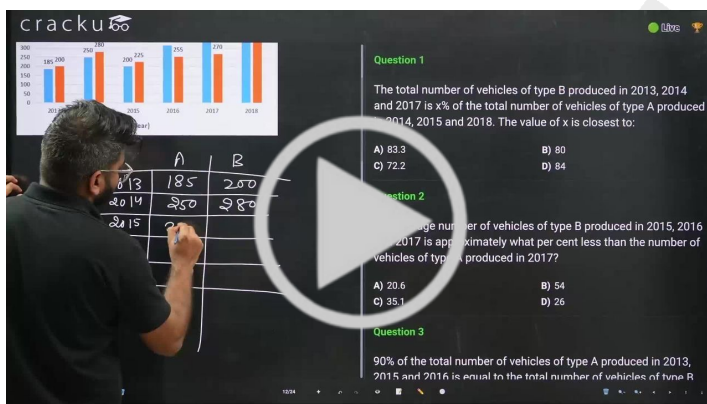

- A 20.6
- B 54
- C 35.1
- D 26

VIDEO SOLUTION

43. 90% of the total number of vehicles of type A produced in 2013, 2015 and 2016 is equal to the total number of vehicles of type B produced in the years _____.

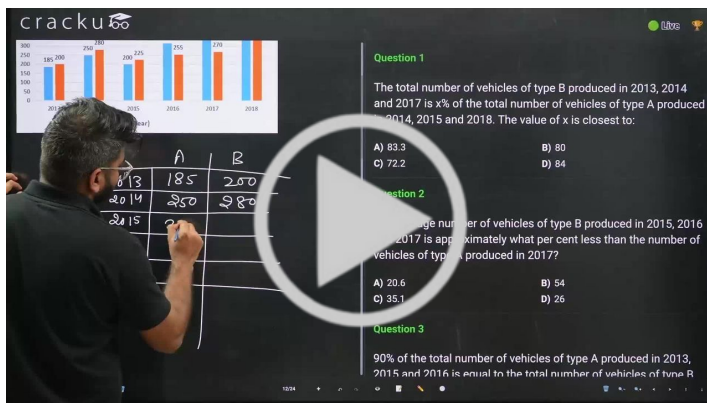

- A 2014 and 2017
- B 2015 and 2018
- C 2015 and 2017
- D 2014 and 2018

VIDEO SOLUTION

44. The ratio of the total number of vehicles of type A produced in 2016 and 2017 to the total number of vehicles of type B produced in 2014 and 2018, is:

- A 11 : 8
- B 11 : 9
- C 9 : 8
- D 10 : 9

45. In 2019, if the production of vehicles of type A increased by the same per cent as in 2016 over its previous year, then what was the number (in thousands) of vehicles of type A produced in 2019?

- A 708.75
- B 693.75
- C 731.25
- D 686.25

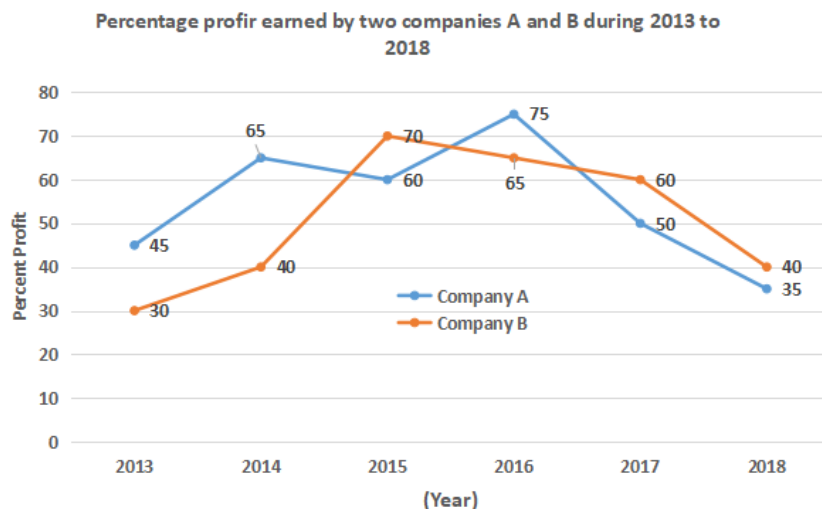

VIDEO SOLUTION

Instructions [46 - 50]

Study the graph and answer the given questions:

Percentage profit earned by two companies A and B during 2013 to 2018

46. If the incomes of companies A and B in 2013 were in the ratio 3 : 4, then the expenditure of company A was what per cent less than that of company B in that year (correct to one decimal place)?
- A 32.8%
- B 48.7%
- C 31.4%
- D 45.6%
47. If the expenditure of company A in 2016 was ₹65 crores, then what was the income (in ₹ crores) of the company in the same year?
- A 113.7
- B 110.5
- C 115.3
- D 120.25

SRCC GBO CRASH COURSE

USE COUPON CODE **SRCCGBO** TO GET AN INSTANT DISCOUNT OF ₹500.

48. If the profit earned by the company A in 2014 was ₹59.28 crores, then what was the income (in ₹ crores) of the company in the same year?
- A 150.48
- B 140.64
- C 156.2
- D 91.2
49. If the income of company B in 2015 was ₹108.8 crores, then what was its expenditure (in ₹ crores) in the same year?
- A 54.4

- B 70.5
- C 64
- D 68

50. If the expenditure of both companies A and B in 2018 was the same, then what was the ratio of the income of A to the income of B in the same year?

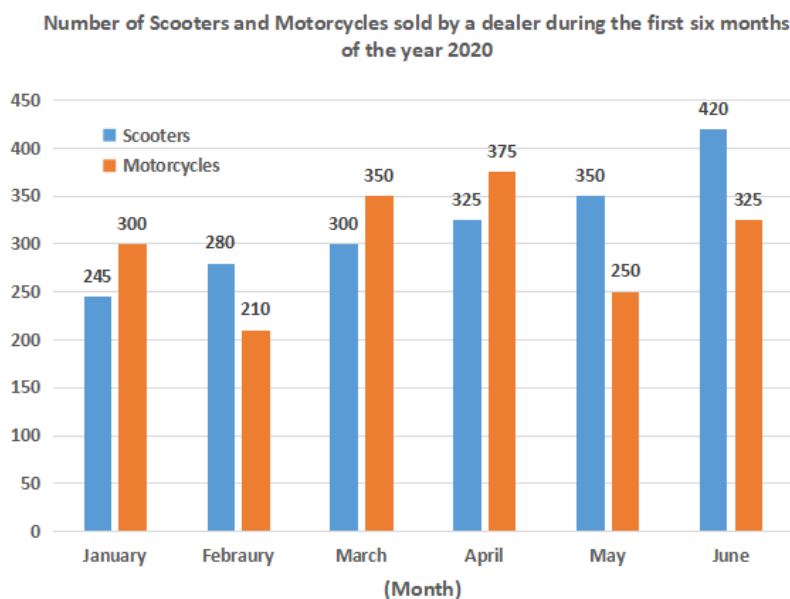

- A 27 : 28
- B 7 : 8
- C 7 : 10
- D 25 : 28

Instructions [51 - 55]

Study the graph and answer the given questions:

Number of Scooters and Motorcycles sold by a dealer during the first six months of the year 2020

51. The average number of scooters sold by the dealer in January, March and April exceeds the average number of motorcycles sold in February and May by:

- A 70
- B 65
- C 55
- D 60

52. The total number of motorcycles sold by the dealer in January, March and May is what percentage more than the total number of scooters sold in January, March and June (correct to one decimal place)?

- A 6.2%
- B 6.7%
- C 7.2%
- D 5.7%

53. In which of the following months was the percentage increase in the sale of scooters as compared to its previous month below 7.5%?

- A May
- B February
- C March
- D April

54. What is the ratio of the total number of scooters sold by the dealer in February and May to the total number of motorcycles sold in April and June?

- A 8 : 15
- B 4 : 5
- C 4 : 3
- D 9 : 10

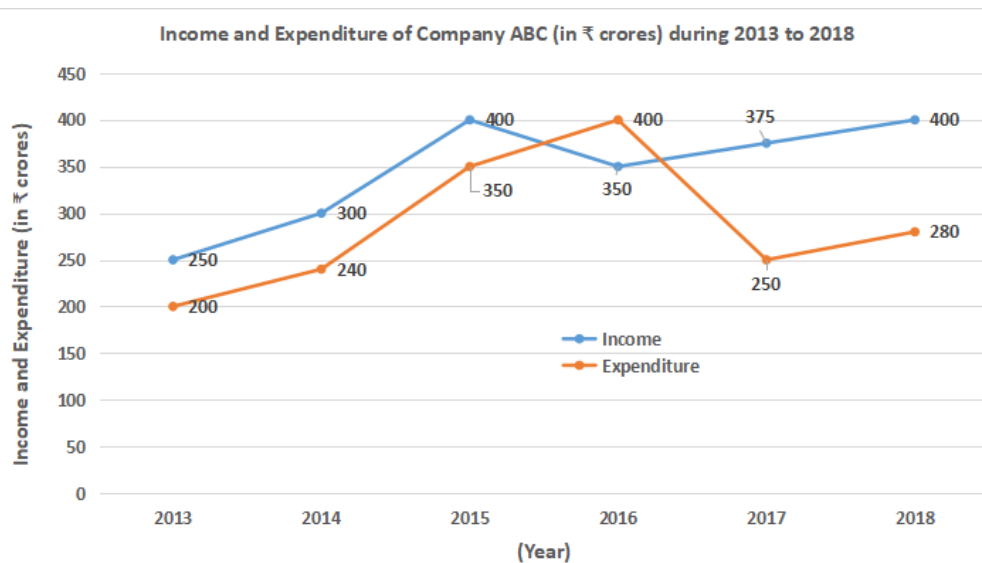

55. In July 2020, the sale of scooters increased by the same percentage in June 2020 over the preceding month. What was the number of scooters sold in July 2020?

- A 462
- B 504
- C 525
- D 546

Instructions [66 - 70]

Study the table and answer the given questions:

Data related to the employees of a multinational company ABC in six offices A, B, C, D, E and F

Office	Total Number of employees	Ratio of male to female employees	Percentage of Post graduate employees
A	1680	4:03	75
B	2160	7:05	65
C	2760	12:11	70
D	2340	6:07	55
E	2520	5:09	60
F	2240	13:15	45

66. What is the ratio of the total number of male employees in offices A and D to the total number of female employees in offices B and E?
- A 16 : 27
- B 2 : 3
- C 17 : 21
- D 5 : 6
67. The average number of female employees in offices D, E and F exceeds the number of male employees in office B by _____.
- A 140
- B 90
- C 100
- D 120
68. If the number of male post graduate employees in office C is 832, then what per cent of the female employees in that office are post graduates (correct to one decimal place)?
- A 75.8%
- B 80.2%
- C 84.6%
- D 83.3%

69. The average number of post graduate employees in offices B, D and E is approximately what per cent of the total number of female employees in offices A, C and F?
- A 45.6%
- B 46.2%
- C 43.2%
- D 45.9%
70. In which office is the percentage of female employees, with respect to the total number of employees in that office, between 45% and 50%?

- A B
- B D
- C F
- D C

Instructions [71 - 75]

Study the table and answer the given questions:

Number of students enrolled for Vocational Courses (VC) in institutes A, B, C, D and E during 2014 to 2019

Year → Institute ↓	2014	2015	2016	2017	2018	2019
A	217	216	220	232	250	256
B	222	227	228	255	253	292
C	245	280	248	245	257	280
D	232	242	258	263	234	310
E	249	251	246	285	230	252

71. The ratio of the total number of students enrolled in VC in institutes B, D and E in 2015 to the total number of students enrolled in institute C in 2016, 2017 and 2018 is:

- A 24 : 25
- B 35 : 38
- C 14 : 15
- D 36 : 37

TAKE FREE SRCC GBO MOCK TEST

WITH DETAILED SOLUTIONS AND ANALYSIS

72. The total number of students enrolled in VC in institutes B and D in 2014 and 2016 is what per cent of the total number of students enrolled in 2019 in all the five institutes (correct to one decimal place)?

- A 64.4%
- B 59.2%
- C 67.6%
- D 60.8%

73. The total number of students enrolled in VC in institutes B and E in 2017 is what per cent more than the total number of students enrolled in institute D in 2015 and 2016?

- A 7.4%
- B 9%
- C 8.5%
- D 8%

74. 35% of the total number of students enrolled in VC in institutes A, B and E in 2019 is 12% more than the number of students enrolled in 2018 in institute _____.

- A E
- B B
- C C
- D A

75. The average number of students enrolled in VC in institute E in 2014, 2016 and 2017 is equal to the average number of students enrolled in institute B in the years _____.

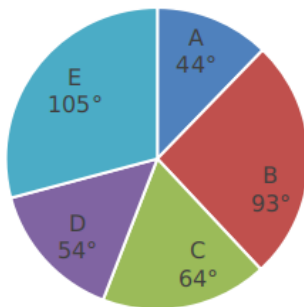

- A 2016 and 2017
- B 2014 and 2017
- C 2016 and 2019
- D 2015 and 2018

Instructions [76 - 78]

Study the table and graph answer the given questions:

School	A	B	C	D	E
Number of boys	220	830	440	450	1017

Distribution (degree wise) of students in five schools A, B, C, D and E

Total number of students (boys and girls) in 5 schools = 5400

76. 40% of the number of students in school B is equal to the number of girls in school _____.

- A A
- B C
- C E
- D D

77. What is the ratio of the total number of boys in schools B and D to the total number of girls in schools A and C?

- A 11 : 21
- B 4 : 3

C 3 : 4

D 21 : 13

SRCC GBO CRASH COURSE

USE COUPON CODE **SRCCGBO** TO GET AN INSTANT DISCOUNT OF ₹500.

78. The average number of girls in schools D and E is approximately what per cent less than the number of students in school C?

A 51.6%

B 52.2%

C 50.4%

D 54.5%

Instructions [79 - 80]

Study the table answer the given questions:

Percentage of marks obtained by six students A, B, C, D, E and F in Different subjects.

Subjects → Students ↓	English (out of 50)	Math (out of 150)	Science (out of 80)	Hindi (out of 75)	Social Studies (out of 100)
A	66	80	85	60	60
B	54	64	55	88	50
C	62	70	75	68	72
D	70	90	70	70	85
E	72	84	65	64	88
F	84	92	90	84	73

79. The total marks obtained by student B in Mathematics and Hindi is approximately what percentage of the total marks obtained by student E in English, Science, Hindi and Social Studies?

A 72.3%

B 73.4%

C 70.6%

D 69.8%

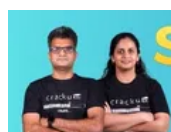

80. The average marks obtained by students A, C and D in Mathematics is what per cent less than the total marks obtained by student F in all the five subjects (correct to one decimal place)?

A 68.8%

B 69.9%

C 69.1%

D 70.2%

82. When two different dice are rolled together, what is the probability that the sum of the numbers coming up on the two dice is 9?

- A $\frac{1}{12}$
- B $\frac{1}{9}$
- C $\frac{1}{6}$
- D $\frac{1}{8}$

83. The roots of the quadratic equation $2x^2 - 7x + 2 = 0$ are:

- A Rational and unequal
- B Irrational
- C Real and equal
- D Imaginary

84. Which of the following is a function from $A \rightarrow B$, where $A = \{1, 2, 3\}$ and $B = \{2, 3, 4, 5\}$?

- A $\{(1, 1), (2, 2), (3, 3)\}$
- B $\{(1, 2), (2, 4), (3, 5)\}$
- C $\{(1, 2), (3, 4), (4, 5)\}$
- D $\{(1, 1), (2, 3), (3, 4)\}$

WITH DETAILED SOLUTIONS AND ANALYSIS

85. Vessels A and B contain mixtures of milk and water. The ratios of milk and water in A and B are 4 : 5 and 3 : 1, respectively. In what ratio should the contents of A and B be drawn and mixed, to obtain a mixture having milk and water in the ratio 3 : 2?
- A 27 : 28
B 35 : 36
C 24 : 23
D 11 : 12
86. Find the value of the expression $(800 + 7n - n^2)$ where n cm is the length of one diagonal of a quadrilateral whose opposite sides are parallel. The adjacent sides of the quadrilateral are 3 cm and 4 cm in length and the other diagonal is 1 cm in length.
- A 3648
B 196
C 256
D 800
87. Find the value of $\sqrt{16 + 2\sqrt{55}}$.
- A $\sqrt{11} + \sqrt{5}$
B $\sqrt{10} + \sqrt{5} + 5$
C $1 + \sqrt{10}$
D $2 + \sqrt{10} + \sqrt{5}$

88. The centres of three circles that touch each other externally form a triangle of sides 21 cm, 22 cm and 23 cm. Find the approximate area of the smallest circle?
- A 120 cm^2
B 314 cm^2
C 111 cm^2
D 139 cm^2
89. If the second, third and first terms of a geometric progression (GP) form an arithmetic progression (AP), then find the first term of the GP, given that the sum to infinite terms of the GP is 36
- A 9
B 54

C 27

D 18

90. The common root of $x^2 + 10x + 24 = 0$ and $x^2 + 14x + 48 = 0$ is:

A -2

B 2

C 6

D -6

SRCC GBO CRASH COURSE

91. The function $y = \cos x$ is:

A an even function

B an odd even function

C an odd function

D None of the given function

92. A rhombus has a perimeter of 40 cm. The line joining the midpoints of two adjacent sides is 6 cm long. Find the area of the rhombus.

A 372 cm^2

B 96 cm^2

C 48 cm^2

D 84 cm^2

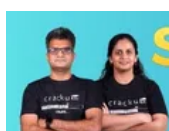

93. The distance between two points A and B is 84 km. Two persons start at the same time, one travelling from A towards B and the other travelling from B towards A. If their respective speeds are 36 km/h and 27 km/h and they meet at point C between A and B, then find the value of $(CA/(CA - CB))$.

A -3

B -4

C 3

D 4

94. An unknown sum when compounded annually yields extra interest that is equal to 240! times of the unknown sum compared to simple interest. If the unknown sum, rate of interest $r\%$ and time 2 years is same for compound and simple interest, then find the value of the expression $\sqrt{50(r+1)}$.
- A 35
B 100
C 75
D 50
95. In an equilateral triangle, the orthocentre divides each median in the ratio $x : y$. If $x > y$, then find $x : y$.
- A 2 : 1
B 1 : 2
C 4 : 1
D 3 : 1
96. Let m and n be two numbers such that their LCM is 196 and their HCF is 7. If the difference between the two numbers is 21. then find the value of $\sqrt{\frac{m \times n}{7}}$
- A 21
B 28
C 7
D 14

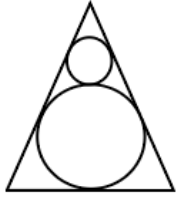

97. The number of non-negative integral solutions to the equation $x + y + z = 14$ is:
- A 120
B 45
C 78
D 110
98. A person had two plots of land. In each plot, he cultivated maize and barley. The ratio of the area under maize cultivation to that under barley cultivation in the larger plot is 8 : 9. The ratio of the total areas under maize cultivation and barley cultivation in the two plots together is 29 : 33. The ratio of the areas under maize cultivation and barley cultivation in the smaller plot is 13 : 15. The ratio of the area under maize cultivation in the larger plot to that under barley cultivation in the smaller plot is:
- A 8 : 15
B 16 : 15

C 15 : 8

D 15 : 16

99. **Figure description:** An equilateral triangle encloses the two circles touching each other externally. Two sides act as common tangent to both the circles, whereas the third side is tangent to the larger circle only. What will be the ratio of the perimeter of the smaller circle to that of the equilateral triangle in the given figure?

A $\pi : 12\sqrt{3}$

B $\pi : 18\sqrt{3}$

C $\pi : 9\sqrt{3}$

D $\pi : 6\sqrt{3}$

100. Two articles are bought at the same price. One is sold at 30% profit and the other is sold at 20% loss. Find the overall profit/loss percentage.

A 10% profit

B 5% loss

C 10% loss

D 5% profit

101. If the value of 624 in the base 7 system is equal to 312 in the base k system, then find the value of k^2

A 400

B 441

C 900

D 100

102. If $f(x) = 8x^4$ and $g(x) = \sqrt[3]{f(x)}$, then find the value of $\log_2(f \circ g(64))$.

A 39

B 28

C 32

103. Find the value expression $\left(750 \left(\frac{x^2+y^2}{xy}\right)\right)$, where ₹x is the amount when a sum of ₹y is lent at an unknown interest rate for an unknown period compounded quarterly. Also ₹y is the amount when a sum of ₹9x is lent under similar condition as above.
- A 2000
B 2200
C 2500
D 3000
104. Find the 12th term of the progression S_n , where $S_n = 1 + 3 + 7 + 13 + 21 + 31 + 43 \dots$
- A 150
B 144
C 169
D 133
105. How much should be paid to Changez when work is completed combinedly by Akbar, Babar and Changez in 2 days, and the total amount paid to the team is 100 Dinars? It is known that Akbar alone can do the work in 10 days, whereas Babar takes 5 days for the completion of the same work.
- A 20 dinars
B 60 dinars
C 30 dinars
D 40 dinars

106. If a person would have walked at 12 km/h instead of 10 km/h, he would have walked 20 km more. The actual distance travelled by him when he walked at the pace of 10 km/h is
- A 100 km
B 80 km
C 150 km
D 125 km
107. Ram and Shyaam together complete a task in 45 days and receive ₹13,500. If Shyaam is three times as efficient as Ram, then what is the amount of money he earns in 10 days?

- A ₹2,750
- B ₹2,250
- C ₹2,500
- D ₹2,000

108. Let n be the total count of the 5-digit numbers in the binary system. What is the value of $2n$?

- A 16
- B 64
- C 32
- D 4

109. Find the value of expression.

$$8 \left(1 + \frac{1}{2} + \frac{1}{4} + \dots \infty \right)$$

- A 8
- B 64
- C 4
- D 2

110. x is directly proportional to 4 more than the square of y . x is 39 when y is 3. What is the value of $\sqrt{y}$ when x is 60?

- A 2
- B 4
- C 3
- D 1

111. Find x if $\frac{x}{\sqrt{128}} = \frac{\sqrt{162}}{x}$.

- A 18
- B 16
- C 12
- D 14

112. The solution set of the inequality $-9y - 5 < 7y + 27$ is:

- A $(-2, \infty)$
- B $(-\infty, -2)$
- C $(2, \infty)$
- D $(-\infty, 2)$

113. The number of ways of arranging 10 different books on a shelf such that two particular books are always together is:

- A $9!2!$
- B $8!$
- C $9!$
- D $10!$

114. What must be added to 315654 so that it becomes a multiple of 11?

- A 3
- B 2
- C 1
- D 4

115. Gandhi Sew bridge has a pole that divides the bridge into two parts in a manner such that the ratio of the larger part to the smaller part is $m : n$. It is found that the ratio of the length of the bridge to the length of the smaller part is six times the ratio of the length of the larger part to the length of the bridge. Find the value of $\sqrt{25 + mn(m^2 - 4mn + n^2)}$.

- A 17
- B 10
- C 26
- D 5

116. Consider a trapezium PQRS in which $PQ \parallel RS$. Point E internally divides RS in equal parts and PQRE forms a parallelogram. The area of triangle PSE is 37 cm^2 . Find the area enclosed by the shape PQRS.

- A 125 cm^2
- B 111 cm^2
- C 175 cm^2

D 100 cm^2

117. What is the equation of a straight line that has y-intercept 5 and is perpendicular to a straight line joining (2, -3) and (4, 2)?

A $2y = -5x + 5$

B $2y = 5x - 5$

C $y = 5x - 5$

D $2y = -0.4x + 5$

118. Two non-intersecting circles, one lying inside the other, are of radii r_1 , and r_2 , and $r_1 > r_2$. If the minimum distance between any two points on their circumferences is s , then the distance between their centres is:

A $r_1 - r_2 - s$

B $r_1 + r_2 + s$

C $r_1 + r_2 - s$

D $r_1 - r_2 + s$

119. Tom, Suresh and Adil are capable of finishing a task in 2, 4 and 8 hours, respectively. Suresh takes a magic medicine that increases his power by n times. Suresh works together with Tom and Adil to complete the task in less than 1 hour. Find the value of the expression $n^2 + 2$ where n is a positive integer.

A 14

B 12

C 10

D 6

120. Find x if $\log_x [\log_5 (\sqrt{x+5} + \sqrt{x})] = 0$

A 1

B 0

C 4

D 5

Reasoning and Logical Ability

121. P, Q and R gave the following statements:

P - "Either it is day or it is night".

Q - "It is night".

R - "It is neither day nor night".

Of these people, only one is wrong.

What time of the day is it?

- A Day
- B Data is inadequate
- C Neither day nor night
- D Night

122. Read the given statements and conclusions carefully, and decide which of the conclusions logically follow(s) from the statements.

Statements:

Only creative and innovative people score high on a creativity test.

Rahul scored high on the creativity test.

Conclusions:

I. Rahul is creative.

II. Rahul is innovative.

- A Neither conclusion I nor II follows.
- B Both conclusions I and II follow.
- C Only conclusion I follows.
- D Only conclusion II follows

123. Select the number from among the given options that can replace the question mark (?) in the following series.

123, 468, 91011, 121416, 171819, ?

- A 202122
- B 202224
- C 202326
- D 212325

124. If

'P + Q' means 'P is the daughter of Q',

'P - Q' means 'P is the mother of Q',

'P % Q' means 'P is the brother of Q' and

'P * Q' means 'P is the father of Q',

then which of the following will show the relationship that 'A is the sister-in-law of D'?

- A $A - B + C \% D$
- B $A \% B - C * D$
- C $A * B * C \% D$
- D $A + B \% C - D$

128. Select the option that is true regarding the following two statements labelled Assertion (A) and Reason (R).

A: Doctoral scholars are hired as research assistants.

R: Doctoral scholars are given research training.

- A** Both A and R are true, but R is NOT the correct explanation of A.
- B** Both A and R are true, and R is the correct explanation of A
- C** A is true but R is false
- D** A is false but R is true.

129. In a survey of 300 students of a junior school, it was found that 45% students liked art class, 51% liked sports class, and 64% liked music class. Also, 29% liked art and sports classes both, 25% liked music and sports classes both, and 32% liked art and music classes both. 6% did not like any of the three classes. What is the number of students who like only one of the three classes?

- | | |
|----------|-----|
| A | 144 |
| B | 300 |
| C | 280 |
| D | 170 |

130. Consider the given statement and decide which of the given assumptions is/are practical with respect to the statement.

Statement:

Since banks are violating the loan lending rules, RBI has decided to impose 5-crore fines on these banks.

Assumptions:

- I. Banks have recently started expanding their branches.
- II. RBI takes strict actions against banks that violate the rules and regulation implemented by RBI.

- A** Either assumption I or II is practical.
- B** Both assumptions I and II are practical.
- C** Only assumption II is practical.
- D** Only assumption I is practical.

131. Read the given statements and conclusions carefully. Assuming that the information given in the statements is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the statements.

Statements:

All dogs are cats.

The cats that are not dogs are rats.

Conclusions:

- I. Some rats are cats.
- II. All cats are dogs.
- III. Every cat is either a dog or a rat

- A Only conclusions II and III follow.
- B Only conclusions I and II follow.
- C Only conclusions I and III follow
- D All conclusions, I, II and III, follow.

132. ' $P + Q$ ' means ' P is the brother of Q '.
 ' $P - Q$ ' means ' P is the sister of Q '.
 ' $P \times Q$ ' means ' P is the father of Q '.

Which of the following means ' C is the son of G '?

- A $G \times A - C + B$
- B $G - A \times C + B$
- C $A + G - B \times C$
- D $B - C + A \times G$

133. Read the given statements and conclusions carefully, and decide which of the conclusions logically follow(s) from the statements.

Statements:

No girl can dance.

Some girls are singers.

Conclusions:

I. Boys can dance.

II. Some singers can dance.

- A Only conclusion I follows.
- B Neither conclusion I nor II follows.
- C Both conclusions I and II follow.
- D Only conclusion II follows.

134. If

' $A \$ B$ ' means ' A is the son of B ',

' $A \# B$ ' means ' A is the sister of B ', and

' $A @ B$ ' means ' A is the father of B ',

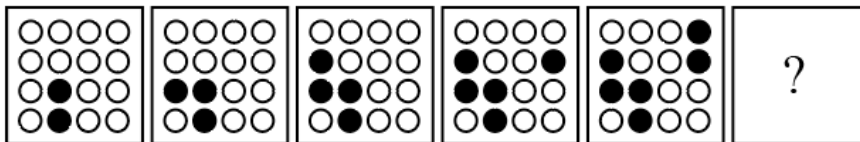

then which of the following will show the relationship that ' P is the daughter of Q '?

- A $P \$ Q @ R \# S$
- B $P \# S \$ Q @ R$
- C $Q \$ R @ S \# P$
- D $R @ S \# P \$ Q$

135. What is the angle between the hour hand and the minute hand of an analogue clock when the time is 5:40 p.m.?
- A 70°
 B 170°
 C 140°
 D 240°
136. Pointing to a photograph, a person said, "His mother is the wife of my father's only son". How is the speaker related to the person in the photograph?
- A Mother
 B Niece
 C Aunt
 D Sister-in-law

137. Select the figure from among the given options that can replace the question mark (?) in the following series?

- A
- B
- C

- AsT, cQv, EoX, ?, IkB

B WhS

D gMz

- A) Pallavi beat Rashmi and Vijaya only.

C) Simran did not come last in the marathon.

E) Rashmi completed the marathon in 63 minutes.

Who won the bronze medal?

B Rashmi

D Pallavi

- Statement:

Conclusions:

II. Details regarding a person's profession don't come under the purview of one's personal matter.

B Either conclusion I or II follows.

D Both conclusions I and II follow

- to the right of Chris. Abigail is sitting opposite to Fred and next to Brad. Douglas is second to the left of

Which two employees are sitting between Abigail and Elanor?

- A Brad and Harriet
- B Fred and Harriet
- C Gabriel and Harriet
- D Chris and Douglas

142. What was the day of the week on 14 August 2010?

- A Friday
- B Sunday
- C Saturday
- D Monday

TAKE FREE SRCC GBO MOCK TEST

WITH DETAILED SOLUTIONS AND ANALYSIS

143. Akash, Bisni, Charu, Dev, Elsa, Fiona and Gaurav sat for their high school examination and their scores were as follows:

- a. Bisni always scores more than Dev, who always scores more than Fiona.
- b. In any examination, if Charu scores the highest, Elsa scores the least, or if Akash scores the highest, Fiona or Gaurav scores the least.
- c. No two students get equal scores.

If Fiona and Akash are ranked 4th and 5th, respectively, which of the following can be true?

- A Charu is ranked 1st or 2nd
- B Elsa is ranked 2nd or 3rd
- C Gaurav is ranked 2nd or 3rd
- D Bisni is ranked 2nd or 4th

144. An electrical showroom sold televisions, air conditioners and washing machines in a month. It sold 20 air conditioners in the month of December 2020. In the same month, the number of washing machines sold was a quarter of the number of air conditioners sold. The number of televisions sold was the same as the number of air conditioners sold.

- (A) The ratio of the different electrical items sold can be calculated.
- (B) The number of dishwashers sold can be found out.

Based on the given information, which of the following options is correct?

- A Only A can be determined.
- B Neither A nor B can be determined.
- C Only B can be determined.
- D Both A and B can be determined.

145. Nine students of the basketball team have to go out for an intercollege basketball competition. There are two school jeeps: red jeep and blue jeep, each of which can accommodate five students. However, the following conditions must be met:

- (i) Vishakha will always go in the red jeep but does not want Akash to travel with her.
- (ii) Two out of three students — Mahak, Riya and Dinesh — will be in one jeep.
- (iii) Chahat and Naina will always travel together in a jeep.
- (iv) If Anamika and Akash are in the same jeep, then Viraj will also be in the same jeep.
- (v) No jeep can have more than five students.

If Mahak and Riya are in the red jeep, how many different combinations of students can travel in the jeeps?

- A 5
- B 6
- C 7
- D 4

146. The JKF party was selecting the campaigning team that would manage their campaign during the coming elections. The team is to include two spokespersons, two content writers and two digital managers. The spokespersons may be chosen from Abhay, Bharti, Chhavi and Dhairya; the content writers may be chosen from Eklavya, Farah and Gauri; and the digital managers may be selected from Himanshu, Isha, Jayanti and Keshav.

The following conditions need to be kept in mind before selecting the team:

- (i) Neither Farah nor Jayanti can be selected if Abhay is selected.
- (ii) If Chhavi is selected, then Jayanti is definitely selected.
- (iii) Himanshu and Keshav will always be selected together.
- (iv) Isha and Keshav will never be selected together.

Which combination is acceptable?

- A Chhavi, Dhairya, Eklavya, Gauri, Farah, Isha
- B Abhay, Bharti, Eklavya, Gauri, Isha, Keshav
- C Abhay, Bharti, Eklavya, Farah, Himanshu, Isha
- D Bharti, Chhavi, Eklavya, Farah, Jayanti, Isha

147. In Karian village, truth-tellers always tell the truth and liars always tell lies. Harish approached three villagers, Hiri, Lange and Pora, and asked who among them was the liar.

Following were their replies:

Hiri: I always speak the truth.

Lange: Hiri does not speak the truth.

Pora: Lange does not tell lies.

If one of them is a liar but the other two tell the truth, who among them is the liar?

- A Pora
- B Hiri

- C Hiri or Lange
- D Lange or Pora

148. Anamika, Ankita, Vaishali and Litika play two instruments each, the guitar, tabla, piano and violin. Ankita and Vaishali do not play the piano. Anamika and Litika do not play the tabla. Violin is not played by Ankita and Litika.

Who plays the guitar if each instrument is played by only two girls?

- A Ankita and Litika
- B Anamika and Litika
- C Vaishali and Litika
- D Ankita and Vaishali

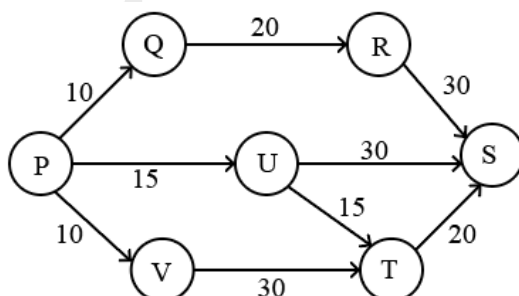

149. Among five people, Rakesh is one and half times taller than Tarun, and Shyam is one and half times taller than Karan. If Pawan is half the height of Shyam and twice the height of Rakesh, who is the tallest of them all?

- A Shyam
- B Pawan
- C Rakesh
- D Karan

150. An analogue clock shows 3:00 p.m. Through how many degrees will the hour hand rotate when the clock shows 10:00 p.m.?

- A 360°
- B 210°
- C 570°
- D 180°

151. 800 local trains run every day between P and S in one direction. Q, R, U, V and T are different junctions. The cost (in ₹) of travelling on the train between different stations is given on the arrows in the figure shown. Each train takes the least expensive route between P and S.

Which route will the first 400 trains take on any given day?

- A P-V-T-S
- B P-U-T-S
- C P-U-S
- D P-Q-R-S

Instructions [152 - 155]

The passage below is accompanied by a set of questions, Please choose the best answer to each question:

Comprehension:

The criteria for selecting an IT Head for a company are as given.

The candidate:

1. must be a Computer Science graduate with at least 60% marks.
2. must have secured at least 60% in the screening test.
3. must be between the age group of 25 to 35 years as on 1 January 2021.
4. should have a work experience of at least 5 years as an IT Administrator.

If a candidate fulfils criteria 1 and 4 but does not meet criteria 2 and 3 but is a Red Hat certified professional, then she/he should be referred to the HR Manager. If a candidate fulfils criteria 1 and 2 but does not meet criteria 3 and has worked as an IT Administrator for at least 1 year, she/he may be referred to the HR Head. Without any assumptions, based on the given criteria, you have to take a decision for candidates whose profiles have been given in the questions.

- 152.** Himang was born on 18 February 1990 and is a Computer Science graduate with 68% marks. He has been working as an IT administrator for the last 6 years and secured 65% in the screening test. What decision would you take for Himang?
- A He is to be referred to the HR Manager.
 - B He is not to be appointed as the IT Head.
 - C He is to be referred to the HR Head
 - D He is to be appointed as the IT Head.
- 153.** Vandita was born on 21 October 1997 and is a Red Hat certified professional. She has scored 65% in B.Sc. Computer Science and 60% in the screening test. She has a work experience of two years in the IT department of a reputed company. What decision would you take for Vandita?
- A She is not to be appointed as the IT Head.
 - B She is to be referred to the HR Manager.
 - C She is to be referred to the HR Head.
 - D She is to be appointed as the IT Head.
- 154.** Pankaj, a Red Hat certified professional, has been working as an IT Administrator in a reputed organisation for the last three years. He was born on 8 July 1998, and secured 65% in both his graduation in Computer Science as well as in the screening test. What decision would you take for Pankaj?
- A He is to be referred to the HR Head.

- 
SRCC GBO Cracku's WhatsApp Group

- A** She is to be referred to the HR Manager.
- B** She is not to be appointed as the IT Head.
- C** She is to be appointed as the IT Head.
- D** She is to be referred to the HR Head.

B. No actor is an artist.

- 45/61

TAKE FREE SRCC GBO MOCK TEST

WITH DETAILED SOLUTIONS AND ANALYSIS

158. How many bicycles were sold in October 2020?

- A 8788
- B 4394
- C 2197
- D 6591

159. Read the given statements and conclusions carefully. Assuming that the information given in the statements is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the statements.

Statements:

All meteors are asteroids.

All planets are asteroids.

Conclusions:

I. Some planets are meteors.

II. No planet is a meteor.

- A Either conclusion I or II follows.
- B Only conclusion II follows.
- C Neither conclusion I nor II follows.
- D Only conclusion I follows

160. Consider the given statement and decide which of the given assumptions is/are correct.

Statement:

Students who waste paper will have to plant ten trees daily.

Assumptions:

I. There is a shortage of trees in the environment.

II. Unless students are taught the significance of trees, they will not stop paper wastage.

- A Neither assumption I nor II is correct.
- B Only assumption II is correct.
- C Both assumptions I and II are correct.
- D Only assumption I is correct.

Explanations

Verbal Ability

Data Interpretation

41. A

The number of cars produced by the company are as follows:

Production of vehicles by a company		
Year	Type - A	Type - B
2013	185000	200000
2014	250000	280000
2015	200000	225000
2016	315000	255000
2017	385000	270000
2018	450000	350000

Total number of Type B vehicles produced in 2013, 2014 and 2017 = $(200000 + 280000 + 270000) = 750000$

Total number of Type A vehicles produced in 2014, 2015 and 2018 = $(250000 + 200000 + 450000) = 900000$

Total number of Type B vehicles as a percentage of total number of Type A vehicles = $\frac{750000}{900000} \times 100 = 83.33\%$

Hence, total number of Type B vehicles is 83.33% of the total number of Type A vehicles.

∴ The required answer is A.

 VIDEO SOLUTION

42. C

The number of cars produced by the company are as follows:

Production of vehicles by a company		
Year	Type - A	Type - B
2013	185000	200000
2014	250000	280000
2015	200000	225000
2016	315000	255000
2017	385000	270000
2018	450000	350000

Total number of Type B vehicles produced in 2015, 2016 and 2017 = $(225000 + 255000 + 270000) = 750000$

Average number of Type B vehicles produced in 2015, 2016 and 2017 = $\frac{750000}{3} = 250000$

Number of vehicles of Type A produced in 2017 = 385000

Difference between the number of vehicles of Type A produced in 2017 and the average number of Type B vehicles produced = $385000 - 250000 = 135000$

$$\text{Percentage} = \frac{135000}{385000} \times 100 = 35.06\%$$

Hence, the average number of Type B vehicles produced in 2015, 2016 and 2017 is 35.06% less than the total number of Type A vehicles produced in 2017.

∴ The required answer is C.

[VIDEO SOLUTION](#)

43. D

The number of cars produced by the company are as follows:

Production of vehicles by a company		
Year	Type - A	Type - B
2013	185000	200000
2014	250000	280000
2015	200000	225000
2016	315000	255000
2017	385000	270000
2018	450000	350000

Total number of Type A vehicles produced in 2013, 2015 and 2016 = (185000 + 200000 + 315000) = 700000

90% of the total number of Type A vehicles produced = 700000 × 0.9 = 630000

Total number of Type B vehicles produced in 2014 and 2017 = (280000 + 270000) = 555000

Total number of Type B vehicles produced in 2015 and 2018 = (225000 + 350000) = 575000

Total number of Type B vehicles produced in 2015 and 2017 = (225000 + 270000) = 495000

Total number of Type B vehicles produced in 2014 and 2018 = (280000 + 350000) = 630000

Hence, Total number of Type A vehicles produced in 2013, 2015 and 2016 is equal to the total number of Type B vehicles produced in 2014 and 2018.

∴ The required answer is D.

[VIDEO SOLUTION](#)

44. D

The number of cars produced by the company are as follows:

Production of vehicles by a company		
Year	Type - A	Type - B
2013	185000	200000
2014	250000	280000
2015	200000	225000
2016	315000	255000
2017	385000	270000
2018	450000	350000

Total number of Type A vehicles produced in 2016 and 2017 = 315000 + 385000 = 700000

Total number of Type B vehicles produced in 2014 and 2018 = 280000 + 350000 = 630000

$$\text{Required ratio} = \frac{700000}{630000} = \frac{10}{9}$$

Hence, the total number of Type A vehicles produced in 2016 and 2017 is in the ratio of 10:9 with the total number of Type B vehicles produced in 2014 and 2018.

∴ The required answer is D.

 VIDEO SOLUTION

45. A

The number of cars produced by the company are as follows:

Production of vehicles by a company		
Year	Type - A	Type - B
2013	185000	200000
2014	250000	280000
2015	200000	225000
2016	315000	255000
2017	385000	270000
2018	450000	350000

Number of Type A vehicles produced in 2015 = 200000

Number of Type A vehicles produced in 2016 = 315000

$$\text{Percentage increase} = \frac{(315000 - 200000)}{200000} \times 100 = \frac{115}{2}\% = 57.5\%$$

Number of Type A vehicles produced in 2018 = 450000

$$\text{Number of Type A vehicles produced in 2019} = 450000 \times (1 + 57.5\%) = 450000 \times 1.575 = 708750$$

Total number of Type A vehicles produced in 2019 (in thousands) = 708.75

∴ The required answer is A.

SRCC GBO CRASH COURSE

USE COUPON CODE **SRCCGBO** TO GET AN INSTANT DISCOUNT OF ₹500.

Quantitative Ability

81. C

This is a classic question from boats and streams, where you need to apply the equation of 'speed = distance/time'.

Given that the speed of the boat in still water is a kmph, and the speed of the current is b kmph.

$$\text{In the instance where the boat goes against the stream (resultant speed is } a-b\text{): } 0.5x = \frac{3x}{(a-b)}$$

$$\text{From this, } (a-b) = 6 \dots\dots\dots(1)$$

$$\text{In the instance where the boat goes along with the stream (resultant speed is } a+b\text{): } 0.3x = \frac{2.4x}{(a+b)}$$

$$\text{From this, } (a+b) = 8 \dots\dots\dots(2)$$

Using the two equations: $a=7$ and $b=1$

Hence, the value of $(a^2 + b^2)$ is 50.

82. **B**

The total number of possibilities the two dice can produce together is 36.

To have 9 as the sum on the two dice, the possible combinations are: (3,6)(6,3)(4,5)(5,4)

Hence, the probability is $4/36$, which is $1/9$.

83. **B**

To know the nature of roots, we need to find the discriminant of the equation.

The discriminant for this equation is $(-7)^2 - 4(2)(2)$, which is $49 - 16 = 35$.

Now, the discriminant is greater than zero, which means that the roots will be real and distinct. However, $\sqrt{35}$ is an irrational number, and hence the roots shall be real, unique, and irrational.

84. **B**

Here, we need to check the options and see which one has one element from A and the other from B in each pair, without having any pair with repetitions or elements from the same set.

Option A has (1,1) contravenes the principle discussed above, as it has two elements from set A.

Option B is correct, as it has one element each from the two sets, and there is no repetition as such.

Option C is incorrect, as the element '4' is repeated twice.

Option D is incorrect because of the same reason that was pointed out for Option A.

85. **A**

The ratio of milk and water in A is 4:5, and in B is 3:1

Let us assume that in A, the volume of milk and water is $4x$ and $5x$ (total volume is $9x$).

For B, the volume can be assumed as $3y$ and y (total volume is $4y$).

After mixing A and B, we get the ratio of milk and water as 3:2

This means, $\frac{(4x+3y)}{(5x+y)} = \frac{3}{2}$

From the above equation, we get $\frac{x}{y}$ as $\frac{3}{7}$

Hence, the volume of A becomes 27, and that of B becomes 28.

This makes the ratio of A and B as $\frac{27}{28}$.

86. **D**

It is said that two opposite sides of the quadrilateral are parallel.

So, it can be Square, Rhombus, Parallelogram, or Rectangle.

It is not square and rhombus because two adjacent sides are unequal(given).

It is not rectangle, because if it is rectangle the diagonal length will be $\sqrt{3^2 + 4^2} = 5$

So, it is a parallelogram.

We know that for a parallelogram $d_1^2 + d_2^2 = 2(a^2 + b^2)$.

$$d_1 = 1$$

$$a=3$$

$$b=4$$

$$1^2 + d_2^2 = 2(3^2 + 4^2).$$

$$1^2 + d_2^2 = 2(3^2 + 4^2). 1 + d_2^2 = 50 \Rightarrow d_2^2 = 49 \Rightarrow d_2 = 7.$$

The value of the expression $(800 + 7n - n^2)$ is $(800 + 7 * 7 - 7^2) = 800 + 49 - 49 = 800$

87. **A**

$\sqrt{16 + 2\sqrt{55}}$ can be seen as the square root of $16 + 2\sqrt{55}$

Now on observing $16 + 2\sqrt{55}$, we can see it as an expansion of $(a + b)^2$: a being $\sqrt{11}$ and b being $\sqrt{5}$.

Hence, we can rewrite the equation as $(\sqrt{11} + \sqrt{5})^2$, whose square root is $\sqrt{11} + \sqrt{5}$.

88. **B**

Let the sides of the triangle be AB, BC, and AC.

Each of the sides is made of radii of two circles. Let us assume that the radius of the three circles are x, y, and z.

Hence,

$$x+y = 21 \dots\dots\dots(1)$$

$$y+z = 22 \dots\dots\dots(2)$$

$$z+x = 23 \dots\dots\dots(3)$$

$$\text{Now from equation 3, } z = 23 - x \dots\dots\dots(4)$$

$$\text{Substituting equation 4 in equation 2, we get } x - y = 1 \dots\dots\dots(5)$$

Using equation 1 and 5, we get $x = 11$, $y = 10$, and $z = 12$.

The smallest radius is 10 cm, and the area of that circle is $\pi 10^2$, which is approximately 314 cm^2

89. **B**

Let us take terms of GP as a, ar, ar^2

then the terms in AP will be ar, ar^2, a

$$\text{In that case, } ar^2 = \frac{(a+ar)}{2}$$

$$2ar^2 = a + ar$$

On simplifying the equation, we get $r = 1$ or $r = -1/2$

r can not be 1 as that will make each term of the GP same which will not make it an infinite GP, so we get $r = -1/2$

$\Rightarrow$ Also given that sum to infinite terms of the GP = 36

$$\frac{a}{1-r} = 36$$

plugging $r = -1/2$ we get

$$a = 54.$$

90. **D**

For the common roots, the first approach shall be to find the common points of the two equations and see if it is the root for both of them. If not, then solve the equations independently and check for the common root.

Using the first approach, $x^2 + 10x + 24 = x^2 + 14x + 48$, we get x as -6 for the common point.

On substituting this in each of the equations, we find that it is a root to both the equations, and hence the answer.

SRCC GBO Cracku's WhatsApp Group

Join Now

91. **A**

$\cos(x)$ is an even function, because $\cos(-x)$ has the same points that overlap with $\cos(x)$.

92. B

Let's designate x cm as the length of each side of rhombus ABCD. Its perimeter is $4x$ cm.

Thus, $4x = 40$, which leads to $x = \frac{40}{4} = 10$ cm.

In triangle ABC, L is the midpoint of side AB, and M is the midpoint of side BC, resulting in LM measuring 6 cm.

Applying the similarity criterion in triangles BLM and BAC, we get $\frac{BL}{BA} = \frac{LM}{AC}$

This simplifies to $\frac{BA}{2BA} = \frac{LM}{AC}$, which further simplifies to $1/2 = 6/AC$, leading to $AC = 12$ cm.

Hence, in triangle ABC, the sides are $a = 10$ cm, $b = 12$ cm, and $c = 10$ cm.

The semi-perimeter, s , is calculated as $(10+12+10)/2 = 16$

The area of triangle ABC is given by $\sqrt{s(s-a)(s-b)(s-c)}$, which equals $\sqrt{16 \times (16-10) \times (16-12) \times (16-10)}$, which further simplifies to $\sqrt{16 \times 6 \times 4 \times 6} = 48\text{cm}^2$

As the rhombus ABCD consists of two congruent triangles ABC, its area equals $2 \times \text{area of triangle ABC} = 2 \times 48\text{cm}^2$, resulting in 96cm^2 .

93. D

Since the two persons are traveling toward each other, their relative speed will be $(36+27)\text{kmph}$, which is 63kmph .

Now, they will meet at $t = \frac{84}{63}$ hours, which is $\frac{4}{3}$ hours.

Now, in $\frac{CA}{(CA-CB)}$, CA is the distance traveled at a speed of 36 kmph in ' t ' hours and CB is $(84-CA)$

In ' t ' hours, $CA = 36 \times \frac{4}{3}$, which is 48 km .

Similarly, $CB = 84 - 48 = 36\text{ km}$

Putting these values in $(CA/(CA - CB))$, we get the answer as 4 .

95. A

This is a special property with respect to an equilateral triangle, where its orthocentre and centroid coincide with each other.

Also, we know that the centroid divides the median in a ratio $2:1$. Hence, the orthocentre shall divide the median in the same ratio.

96. D

This is a direct relation: If the numbers are m and n , their product will equal the product of their LCM and HCF.

Applying the same in this question, $m \times n = 196 \times 7$

Putting this in the required expression, we get the answer as $\sqrt{196}$, which is 14 .

TAKE FREE SRCC GBO MOCK TEST

WITH DETAILED SOLUTIONS AND ANALYSIS

97. A

The direct method to solve the questions for non-negative integral solution is finding the value of

$$n + r - 1C_{r-1}$$

Here, $n = 14$ $r = 3$

Substituting the values, we get $16C_2$ which is 120 .

98. B

Let us assume that the area under maize and barley in the larger plot is $8x$ and $9x$.

Similarly, the area under maize and barley in the smaller part is $13y$ and $15y$.

It is given that the total area under maize and barley (taking both the plots) is in the ratio 29:33.

By this, we get that $\frac{8x+13y}{9x+15y} = \frac{29}{33}$

This is, $264x+429y=261x+435y$, making this as $3x=6y$, or $x=2y$

For the ratio of area under maize (larger plot) to area under barley in smaller plot, we shall substitute the values in $8x:15y$

The final ratio is $16y:15y$, or $16:15$.

100. **D**

Assume that the cost price of each of the articles as Rs.100. So, the total cost price is Rs.200.

The first article is sold at a profit of 30%, which makes its selling price as Rs.130.

The second article is sold at a loss of 20%, which makes its selling price as Rs.80.

The total selling price is Rs.210, while the total cost price is Rs.200.

Hence, profit% = $(10/200) \times 100$, which is 5%.

101. **D**

To solve such questions, it is always advisable to convert the number first into decimal (base 10) and then analyse the result.

As per the question, we have 624 in base 7. To convert it into decimal, we do: $6 \times 7^2 + 2 \times 7 + 4 \times 1$, which is 312.

This is exactly what we have in the question, which means that the number is 312 in base 10.

Hence, $10^2 = 100$

102. **A**

To find $\log_2(fog(64))$, we shall first find the value of $fog(64)$.

The value of $g(64)$: $\sqrt[3]{f(64)}$, where $f(64)$ is 8^9

The cube root of the following expression would be 8^3 , which is the value of $g(64)$.

Now, $fog(64)$ is $f(8^3)$, which is 8^{13} .

For the final result, $\log_2(8^{13})$, which is $\log_2(2^{39})$, or 39.

104. **D**

Observing the series shows that the difference between consecutive terms is in an AP. For instance: $3-1=2$, $7-3=4$, $13-7=6$ and so on.

Hence, the general term (when the difference of terms is in an AP) is represented by an^2+bn+c , where n is the number of that specific term in the series.

Putting $n=1$, we get $a+b+c=1$

Putting $n=2$, we get $4a+2b+c=3$

Putting $n=3$, we get $9a+3b+c=7$

On solving the three equations, $a=1$, $b=(-1)$, and $c=1$

To find the 12^{th} term, we shall put $n=12$ and substituting the values of a, b , and c in the equation an^2+bn+c , we get it as $144-12+1=133$

105. **D**

Let us assume the total work as 10 units.

Now, Akbar alone takes 10 days to complete the work, making his efficiency as 1 unit/day.

Babar takes 5 days to complete the same work, which means his efficiency is 2 units/day.

It is also given that Akbar, Babar, and Changez together take 2 days to complete the work, which means their combined efficiency is 5 units/day.

Therefore, Changez's efficiency would be 2 units/day (excluding Akbar and Babar from the combined efficiency).

Now, the amount shall be distributed to the three in the ratio of their efficiencies, which is 1:2:2 (Akbar, Babar, and Changez).]

This makes Changez's earning as 40 dinars out of the total 100 dinars.

106. A

Assume that the person traveled for 't' hours.

As per the question (extra distance because of increased speed), $12t - 10t = 20$, which implies that $t = 10$ hours.

Hence, the distance traveled by the person in 10 hours at the speed of 10 kmph shall be 100 km.

107. B

Let us assume that Shyaam does $3x$ units of work per day, while Ram does x units per day.

In 45 days of working together, they must have done work in the ratio of 3:1 as far as the units of work done are considered. Hence, the amount earned shall also be distributed in a similar ratio.

So out of Rs.13,500, Shyaam would have received $\left(\frac{3}{4}\right) \times 13500$ for 45 days of work, which is Rs.10,125 for 45 days or Rs.225 per day.

In 10 days, Shyaam would have earned Rs.2250.

108. B

In a 5 digit binary number set, there are five places _ _ _ _ _ , which shall be filled with 2 numbers (0 or 1).

Hence, for every place, we have two choices. For 5 places, we will have a total of 2^5 choices, making the total count as 32.

This means $n = 32$. Therefore, $2n = 64$.

109. B

$8 \left(1 + \frac{1}{2} + \frac{1}{4} + \dots + \infty\right)$ is an infinite GP (the expression under the brackets) with the first term being 1, and the common ratio being $\frac{1}{2}$ or 0.5.

For infinite GP with common ratio less than 1, the sum is $\frac{a}{(1-r)}$

Applying the same in this, we get the sum as $\frac{1}{(1-0.5)}$, which is 2.

Hence, the value of the entire expression is 8×2 , which is 16.

110. A

As per the question (assuming the proportionality quotient be 'k'): $x = k(y^2 + 4)$

Substituting the given values, $39 = k(9+4)$, which makes k as 3.

Now, the value of $\sqrt{y}$ when x is 60: $60 = 3(y^2 + 4)$

From the above equation, $y^2 = 16$, which makes y as 4 and the square root of y as 2.

111. C

On cross-multiplying, we get the equation: $x^2 = 2^{\frac{7}{2}} * 2^{\frac{1}{2}} * 3^{\frac{4}{2}}$

On solving the same, $x^2 = 2^4 * 3^2$

This gives the value of x as 4×3 which is 12.

112. A

Rearranging the inequation, we get $16y > -32$, or $y > -2$

This means the solution set for this inequation is $(-2, \infty)$

113. A

Out of the ten books, we need to have a case where a specific pair of two books is always there.

To solve this, the best way is to assume the two books as a single element. This leaves us with nine different elements, where one of them has two books in it.

To arrange nine different elements, we have $9!$ ways.

Now, it is important to note that the two books considered as a single element can be arranged within themselves as XY or YX (2 ways).

Therefore, we shall multiply the initial result by 2, which makes the total number of ways as $9! \times 2$.

114. B

The shortest method to solve this question is by finding the remainder when 315654 is divided by 11.

By doing so, we find that the remainder is 9, and adding 2 would make it divisible by 11.

115. D

Let us assume the lengths of the larger part of the bridge and the smaller part as mx and nx .

As per the question, $\frac{mx+nx}{nx} = 6 \times \frac{mx}{mx+nx}$

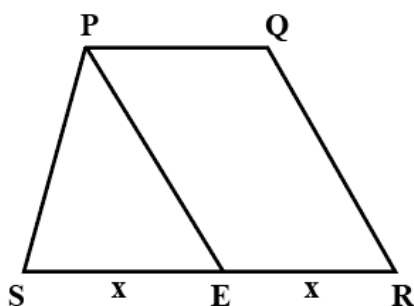

This means, $(m+n)^2 = 6mn$

Or, $m^2 + n^2 = 4mn$

Hence, the value of $m^2 + n^2 - 4mn = 0$, thereby making the value of $\sqrt{25 + mn(m^2 - 4mn + n^2)}$ as 5.

116. B

Here, the height of the parallelogram and the triangle are the same, and also the base is the same. This is because the question states that the PE divided SR into half.

The area of triangle is $\frac{1}{2} \times b \times h = \frac{1}{2} \times x \times h = 37 \Rightarrow xh = 74$.

Area of the PQRE is $b \times h = x \times h = 74$

The total area is $37 + 74 = 111 \text{ cm}^2$.

117. D

The line in question (slope 'a') is perpendicular to a straight line (slope 'b') joining (2, -3) and (4, 2). Hence, $a \times b = -1$

$b = \frac{5}{2}$, which makes $a = -\frac{2}{5}$

Hence, the equation of line with slope $-\frac{2}{5}$ is $y = -\frac{2}{5}x + 5$

118. A

Let 'a' be the radius of the bigger circle where A is its center, while 'b' is the radius of the smaller circle and B is its center.

's' is the distance between their circumference, and D is the distance between the two centers.

Hence, $D = a - (b+s)$

119. **D**

Let us assume that the total is 8 units (LCM of 2,4,8).

This means Tom does 4 units/hour, Suresh does 2 units/hour, and Adil does 1 unit/hour.

Now, Suresh's efficiency is increased and becomes $2n$ units/hour.

Due to this, they all complete the 8 units of work in less than 1 hour.

This means, $\frac{8}{5+2n} < 1$, or $n > 1.5$

The nearest integer is 2, making the value of $n^2 + 2$ as 6

120. **C**

To solve the equation, we shall first shift the 'x' in the base to RHS, which makes x^0 or 1.

Now, we will shift the '5' in the base to RHS, which becomes 5^1 or 5 as the value in RHS. Meanwhile, the LHS becomes $\sqrt{x+5} + \sqrt{x}$.

Now, $\sqrt{x+5} + \sqrt{x} = 5$.

The best way to proceed ahead is going through the options and substituting them in the equation. On doing so, we find out that $x=4$ would satisfy the equation and hence it is the correct answer.

Reasoning and Logical Ability

122. **B**

Since it is given that ONLY creative and innovative people can score high on the test, it is clear that anyone who scores high shall be both creative and innovative. If Rahul has scored high, he shall be both creative and innovative.

128. **A**

Both A and R are true, but A needs a reasoning that explains why doctoral fellows are hired as research assistants. However, R merely talks about research training being imparted in doctoral fellows.

135. **A**

The formula is: $\frac{11}{2} \times \text{hour} - 30 \times \text{minutes}$ for the angle.

Keeping hours as 5 and minutes as 40, we get the expression as $220 - 150$, which is 70 degrees.

136. **C**

The statement given is: "His mother is the wife of my father's only son."

1. "My father's only son" refers to the speaker himself because the speaker's father has only one son, which is the speaker.
2. "His mother" refers to the mother of the person in the photograph.

Putting it together, "His mother is the wife of my father's only son" means "The mother of the person in the photograph is married to my father's only son."

If the mother of the person in the photograph is married to the speaker, then the person in the photograph is the speaker's brother. Therefore, the speaker, being the brother's sister, is indeed the aunt of the person in the photograph.

Option C) is correct.

137. **A**

The circles are dotted in this pattern:

First, the dot just above the colored dot is filled.

Then, the dot just left of the colored dot is filled.

Then again, the dot just above the dot is filled, and this pattern continues.

So, in the final figure, a dot on the left side of the colored dot is filled.

Option A) is the correct answer.

138. **D**

The terms are AsT, cQv, EoX, ?, IkB

If you see the first term, that is AsT

First element is A, second element is s and third element is T.

If you see the second term, that is cQv

First element is c, second element is Q and third element is v.

We see that the first element of both terms follows a relation that is first term + 2

$A + 2 = c$ (Capital letter turns into the small letter and element is added by 2)

Similarly, for the second element, the relation is the first term - 2

$s - 2 = Q$ (small letter turns into the capital letter and element is subtracted by 2)

Similarly, for the third element, the relation is first term + 2

$T + 2 = v$ (Capital letter turns into small letter and element is added by 2)

So, the term after EoX will be

$E + 2 = g$

$o - 2 = M$

$X + 2 = z$

Thus, gMz is the correct answer.

140. **A**

Conclusion 1 is a restatement of the main statement, hence a valid conclusion.

Conclusion 2 introduced personal and professional details, which are not covered in the main statement. Hence, an invalid conclusion.

142. **C**

The day of the week on 14 August 2010 was Saturday. You can find out by using this approach-

You must definitely know what today's date and day are.

Thus, by going backwards, you can find the day of the week on 14th August 2010.

144. **A**

Let's analyze the given information:

1. 20 air conditioners were sold in December 2020.

2. The number of washing machines sold was a quarter of the number of air conditioners sold, so it would be $(1/4) \times 20 = 5$ washing machines.
3. The number of televisions sold was the same as the number of air conditioners sold, which is 20 televisions.

We can find the ratio of the different electrical items sold:

- Air conditioners: 20
- Washing machines: 5
- Televisions: 20

Therefore, Statement A can be determined is correct.

We cannot determine the number of dishwashers sold based on the given information, Statement B can't be determined.

Thus, Option A) is the answer.

146. **D**

We will check each option and try to find any condition that makes it invalid; otherwise, that option can't be the answer.

The answer will be the option in which none of the conditions are invalid.

Option A) Chhavi, Dhairya, Eklavya, Gauri, Farah, Isha

We know from statement 2 that if Chhavi is selected, then Jayanti is definitely selected. But here, Jayanti is not selected, so this is incorrect.

Option B) Abhay, Bharti, Eklavya, Gauri, Isha, Keshav

We know from statement 3 that Himanshu and Keshav will always be selected together. But here, only Keshav is selected. Hence, this is incorrect.

Option C) Abhay, Bharti, Eklavya, Farah, Himanshu, Isha

We know from statement 3 that Himanshu and Keshav will always be selected together. But here, only Himanshu is selected. Hence, this is incorrect.

Option D) Bharti, Chhavi, Eklavya, Farah, Jayanti, Isha

All conditions are satisfied in this option.

Thus, Option D) is the correct answer.

147. **B**

Let us assume Lange is the Liar => The other two are truthful. But Pora's statement is a lie => Contradiction => Lange is not the Liar.

Let us assume Pora is the Liar => The other two are truthful. But Lange's statement is a lie => Contradiction => Pora is not the Liar.

=> When Hiri is the liar, we don't find any contradictions in the statements of the 3 people=> Hiri is the Liar.

148. **A**

Using the given conditions we can get a grid like this.

	Guitar	Tabla	Piano	Violin
Anamika				
Ankita				
Vaishali				
Litika				

We are told each girl plays two instruments => We know what Ankita and Litika will be playing.

	Guitar	Tabla	Piano	Violin
Anamika				
Ankita				
Vaishali				
Litika				

=> Guitar is played by Ankita and Litika.

149. **A**

Let us denote people by the first letter of their names.

=> Let's say the height of T is 'x' => Height of R is 1.5x

=> Let's say height of K is 'y' => Height of S is 1.5y

Given that Pawan is half the height of Shyam and twice the height of Rakesh

=> $1.5y/2 = 3x \Rightarrow y = 4x$

=> The heights of the people are R = 1.5x, T = x, S = 1.5y = 6x, K = 4x, P = 3x

=> S, i.e. Shyam is the tallest

=> Option-A

150. **B**

The hour hand moves through 7 hours.

If it covers 360 degrees in 12 hours, then in 7 hours, it will cover => $360/12 * 7 = 210$ degrees.

=> Option-B

156. **D**

We shall go on testing each of the options:

1. Some artists are dancers: Since some artists are actors and all actors are dancers, we know that the artists who are actors (who in turn are dancers) shall be dancers. Hence, the conclusion is valid.

2. No actor is an artist: This contradicts the first statement in the question. Hence, an invalid conclusion.

157. **C**

Let's take the number of bicycles sold in November to be x

September had twice the number of bicycles sold, so 2x bicycles were sold in September.

December and September had the same number of bicycles sold, so December also sold 2x bicycles.

October sold double that of December, so there were 4x bicycles sold in October.

The final data is:

September: 2x

October: 4x

November: x

December: 2x

The total number of bicycles sold was 9x

The percentage of bicycles sold in November would then be $\frac{1x}{9x} \times 100 = 11.11\%$

Therefore, Option C is the correct answer.

158. **A**

Let's take the number of bicycles sold in November to be x

September had twice the number of bicycles sold, so 2x bicycles were sold in September.

December and September had the same number of bicycles sold, so December also sold 2x bicycles.

October sold double that of December, so there were 4x bicycles sold in October.

The final data is:

September: $2x$

October: $4x$

November: x

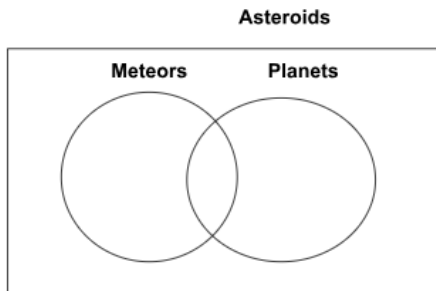

December: $2x$

we are given the value of x to be 2197 and are asked to find the value of $4x$

Which would be $4 \times 2197 = 8788$

Therefore, Option A is the correct answer.

159. **A**

Let's take a look at the conclusions:

(1) Some planets are meteors

This might or might not be true depending on whether the overlapping area of meteors and planets is empty.

(2) No planet is a meteor

This, too, might or might not be true depending on whether the meteors' overlapping areas have at least one element.

Looking at the statements together, if the overlapping area is empty, then conclusion 2 is true, and if it is not empty then conclusion 1 is true.

So, only one of the conclusions 1 and 2 can be true.

Therefore, option A is the correct answer.

160. **D**

The main statement talks about students wasting paper and the need to plant trees.

Hence, we can say that there is a shortage of trees as the students are made to plant them.

However, we cannot say that this will teach them the significance of paper. This might be a mere compensatory step. Hence, 1 is implicit, and 2 is not.
