Live Leak - IBPS SO Mains Model Question Paper for IT Officer (Based on New Pattern)

Q 1. VoIP stands for-

- 1) Voice over Internet Protocol
- 2) Voice on Internet Protocol
- 3) Valid online Internet Protocol.
- 4) Voice over International Protocol
- 5) None of these

Q 2. Which of the following is/are type(s) of network?

- 1) WAN
- 2) PAN
- 3) LAN
- 4) MAN
- 5) All of these

Q 3. In SQL which of the following commands is mainly used to remove a user-defined object from a database?

- 1) Remove
- 2) Drop

testbook **PASS**

UNLIMITED TESTS

₹ **599**
PER YEAR

- 3) Delete
- 4) Erase
- 5) Rollback

Q 4. Consider the following encryption algorithms?

- I. Data Encryption Standard (DES)
- II. Advanced Encryption Standard (AES)
- III. Rivest Shamir Adleman (RSA)

Choose the option that correctly matches the given algorithms with the type of cryptography (public-key or private-key) utilised by them.

- 1) DES & AES: private-key; RSA: public-key
- 2) AES & RSA: private-key; DES: public-key
- 3) DES & RSA: private-key; AES: public-key
- 4) RSA: private-key; DES & AES: public-key
- 5) AES: private-key; DES & RSA: public-key

Q 5. Which of the following phases does not belong to the software development life cycle?

- 1) Testing
- 2) Maintenance
- 3) Marketing
- 4) Coding
- 5) None of these

**testbook****UNLIMITED TESTS

PER MONTH **testbook****BUY PASS ►**

Q 6. The full form of ISR is.

- 1) Information Service Request
- 2) Information Select Routine
- 3) Interrupt Service Routine
- 4) Information Service Routine
- 5) None of these

Q 7. In Oracle, which data type is used to store unstructured binary data?

- 1) INT
- 2) VARCHAR
- 3) DOUBLE
- 4) BLOB
- 5) None of these

Q 8. The hexadecimal number system is represented by the symbols _____ and the alphabets

- 1) 0-9, A-E
- 2) 0-9, A-F
- 3) 1-10, A-E
- 4) 1-10, A-F
- 5) None of these

Q 9. Which layer of the OSI model defines the language and syntax for programs?

- 1) Data link layer
- 2) Presentation layer
- 3) Application layer
- 4) Session layer
- 5) Transport layer

Q 10. Which of the following is not a secondary storage device?

- 1) Pen drive
- 2) Memory Stick
- 3) Random access memory
- 4) None of these

Q 11. UDP and TCP are categorised under the _____ layer of the OSI model.

- 1) physical
- 2) data link
- 3) application
- 4) transport
- 5) network

Q 12. In an ER diagram, what does an ellipse represent?

- 1) Entity set
- 2) Relation between the entity set
- 3) Attributes

**testbook****UNLIMITED TESTS
FOR ALL EXAMS****₹ 99**
PER MONTH **testbook****BUY PASS ►**

- 4) Link between the attributes and entity set
- 5) None of these

Q 13. We can connect a table to another table by using a _____.

- 1) Foreign key
- 2) Table key
- 3) Primary key
- 4) Unique key
- 5) None of these

Q 14. Which of the following topologies mainly use hub for interconnection of resources?

- 1) Ring topology
- 2) Bus topology
- 3) Tree topology
- 4) Star topology
- 5) Mesh topology

Q 15. Which communication mode allows both the sender and the receiver to transmit data at the same time over a single communication channel?

- 1) Simplex mode
- 2) Half - duplex mode
- 3) Full - duplex mode
- 4) Semi - duplex mode

**testbook****UNLIMITED TESTS

PER YEAR **testbook****BUY PASS ►**

5) None of these

Q 16. What is the SI unit of frequency?

- 1) Newton
- 2) Hertz
- 3) Watt
- 4) Hertz/second
- 5) None of these

Q 17. A certain company changed its name to International Business Machines Corporation (IBM) in 1924. What was it called before 1924?

- 1) Computer Tabulators and recorders limited (CTR)
- 2) International Tabulating and Recording Company (ITR)
- 3) Computing Tabulating Recording Company (CTR)
- 4) Computing Tabulating Recording (CTR)
- 5) None of these

Q 18. Which is the correct place to write the main function in a program?

- 1) The first function in the program
- 2) The second function in the program
- 3) The last function in the program
- 4) Anywhere in the program
- 5) Before initialising the value of the variable

Q 19. Which of the following security protocols is used with IEEE 802.11a?

- 1) WEP
- 2) AES
- 3) DES
- 4) PPTP
- 5) SSL

Q 20. The CD-ROM is an example of_____.

- 1) Flash memory
- 2) Optical memory
- 3) Magnetic memory
- 4) Solid state drive
- 5) None of these

Q 21. A commonly used graphic format for the Web is

- 1) GIF
- 2) BMP
- 3) TXT
- 4) LMP
- 5) TIF

Q 22. Which of the following commands belongs to Transaction Control Language?

- 1) DROP

- 2) REVOKE
- 3) SAVEPOINT
- 4) TRUNCATE
- 5) None of these

Q 23. Which of the following SQL statement is used to change data in a database table?

- 1) UPDATE
- 2) INSERT
- 3) CREATE
- 4) TRUNCATE
- 5) None of these

Q 24. TCP is a _____ oriented protocol.

- 1) Data
- 2) Network
- 3) Sessions
- 4) Connection
- 5) Application

Q 25. An ODMR (on-demand mail relay) is a _____.

- 1) SMTP extension
- 2) SMTP protocol
- 3) SMTP network

Q 26. Magnetic Disk is an example of:

- 1) Register
- 2) Primary Storage Device
- 3) Dynamic Storage Device
- 4) Non-volatile Storage
- 5) None of These

Q 27. Which of the following algorithm can be used to efficiently calculate single source shortest paths in a Directed Acyclic Graph?

- 1) Dijkstra
- 2) Bellman-Ford
- 3) Topological Sort
- 4) Strongly Connected Component
- 5) None of these

Q 28. BIOS software is stored on a non-volatile ROM chip on the

_____.

- 1) Central processing unit
- 2) Motherboard
- 3) Hard Disk
- 4) CPU Cache

testbook **PASS**

5) None of these

Q 29. Gray code representation of 14 is_____.

- 1) 1010
- 2) 1100
- 3) 1001
- 4) 1110
- 5) 1101

Q 30. What does OCR stand for?

- 1) What does OCR stand for?
- 2) Optical Character Recognition
- 3) Operational Character Reader
- 4) Only Character Reader
- 5) Optical Comprehensive Research

Q 31. A stack is an abstract data type that works on the _____ property.

- 1) First In First Out (FIFO)
- 2) Last In First Out (LIFO)
- 3) First In Last Out (FILO)
- 4) First Come First Served (FCFS)
- 5) None of these

**testbook****UNLIMITED TESTS

Q 32. Which of the following data structure is used by Breadth First Search of Graph?

- 1) Array
- 2) Linked list
- 3) Pointer
- 4) Queue
- 5) None of these

Q 33. _____ do not reproduce by infecting other files nor self-replicate.

- 1) Trojan Horse
- 2) Blue c
- 3) Cho bed
- 4) Full hall
- 5) None of these

Q 34. Choose a disadvantage of Waterfall Model in software engineering.

- 1) It is not suitable for those projects where requirements are at a moderate to high risk of changing.
- 2) Its phases are not processed and completed one at a time.
- 3) It does not clearly defined stages.
- 4) It's very tough to manage due to the rigidity of the model. Each phase do not specific deliverables and a review process.
- 5) None of these

Q 35. Transport layer aggregates data from different applications into a single stream before passing it to_____.

- 1) Network layer
- 2) Data link layer
- 3) Application layer
- 4) Physical layer
- 5) None of these

Q 36. A nibble and a byte respectively are of:

- 1) 4 and 8 bits
- 2) 8 and 16 bits
- 3) 10 and 20 bits
- 4) 16 and 8 bits
- 5) 32 and 8 bits

Q 37. Which of the following protocol is connectionless, low overhead and high speed?

- 1) ARP
- 2) TCP and ARP
- 3) ICMP
- 4) UDP
- 5) TCP

Q 38. What is document object model (DOM)?

- 1) Convention for representing and interacting with objects in java program.
- 2) Application programming interface
- 3) Architecture for create an object
- 4) Hierarchy of objects in ASP.NET
- 5) None of the mentioned

Q 39. _____ is the execution of a series of programs each on a set or "batch" of inputs, rather than a single input.

- 1) Batch gathering
- 2) Batch processing
- 3) Batch channeling
- 4) Batch networking
- 5) None of these

Q 40. Which one of the following is used as a synchronization tool in a multiprogramming environment?

- 1) Semaphore
- 2) Address bus
- 3) ICs
- 4) Logic gate
- 5) None of these

testbook **PASS**

Q 41. What is the sub-network number of a host with an IP address of 172.16.66.0/21?

- 1) 172.16.64.0
- 2) 172.16.48.0
- 3) 172.16.36.0
- 4) 172.16.0.0
- 5) None of these

Q 42. Which of the following is a common characteristic of HTTP and FTP?

- 1) Both run on top of TCP
- 2) Both are independent of Internet connection
- 3) Both uses two parallel TCP connections
- 4) Both A & B
- 5) None of these

Q 43. SNMP is a popular protocol for:

- 1) Network Management
- 2) Protocol Management
- 3) Wave Management
- 4) All of the above
- 5) None of these

**testbook****UNLIMITED TESTS

Q 47. Which of the following is not a concept of OOP?

- 1) Inheritance
- 2) Polymorphism
- 3) Encapsulation
- 4) Global variables
- 5) None of these

Q 48. In OSI network architecture, the dialogue control and token management are the responsibilities of:

- 1) Session layer
- 2) Network layer
- 3) Transport layer
- 4) Data link layer
- 5) None of these

Q 49. When you start up the computer the bootup storage at which the BIOS versions, manufacturer and data are displayed on the monitor is called_____.

- 1) Bootstrap
- 2) Power on self test (POST)
- 3) System configuration
- 4) Kernel loading

**testbook****UNLIMITED TESTS

PER MONTH **testbook****BUY PASS ►**

5) None of these

Q 50. Inverted page table scheme uses a _____ that contains an entry for each physical frame, not for each logical page.

- 1) Page table
- 2) Inverse table
- 3) Segmented table
- 4) Look table
- 5) None of the above

Q 51. Choose the syntactically incorrect statement:

- 1) /* Is /* this a valid */ comment */
- 2) for(;;);
- 3) return;
- 4) return(5+2);
- 5) All are correct.

Q 52. A constructor is called when:

- 1) An object is declared
- 2) A class is declared
- 3) An object is used
- 4) A class is used
- 5) None of these

**testbook****UNLIMITED TESTS

Q 53. The word _____ means the ability to take many forms.

- 1) Polymorphism
- 2) Overloader
- 3) Overrider
- 4) Aggregation
- 5) Generalization

Q 54. Which of the following is correct about a pure virtual function?

- 1) It has complete function body
- 2) It will never be called
- 3) It will be called only to delete an object
- 4) It is defined only in derived class
- 5) None of these

Q 55. _____ is a high speed cache used to hold recently referenced page table entries a part of paged virtual memory.

- 1) Translation look a side buffer
- 2) Segment table
- 3) Segmented page table
- 4) All of the above
- 5) None of the above

Q 56. TLB is a high speed cache used to hold recently referenced page table entries a part of paged virtual memory. Inverted page table scheme uses a

**testbook****UNLIMITED TESTS
