## REASONING ABILITY

### Directions (Q1):

Read the given statements carefully and answer the question below.

**Statements:** M \* J % G \$ B # X @ L, S % U \$ N @ M

**Conclusions:**

I. S # L

II. J # U

III. G @ N

**Q1.** Which of the following conclusions follow(s)?

- (a) Only I follows
- (b) Only II follows
- (c) Only III follows
- (d) I and III follow
- (e) I and II follow

### Directions (Q2–Q4):

Study the following information carefully and answer the questions given below.

P@Q means P is married to Q

P#Q means P is parent of Q

P&Q means P is sibling of Q and both are of same gender

P\$Q means P is sibling of Q and both are of different gender

P+ means P is male

P\* means P is female

**Q2.** If J@F\*#T\$R, V@R+#B&A, F#Q#D is true and D is the only niece of T, then how is Q related to B?

- (a) Uncle
- (b) Aunt
- (c) Sister
- (d) Brother
- (e) Can't be determined

**Q3.** If  $J@F\#T\$R$ ,  $V@R+\#B\&A$ ,  $F\#Q\#D$ ,  $Q+@W\#N$  is true and D is only niece of T, then how is J related to N?

- (a) Grandfather
- (b) Grandmother
- (c) Grandson
- (d) Granddaughter
- (e) Can't be determined

**Q4.** If  $J@F\#T\$R$ ,  $V@R+\#B\&A$ ,  $F\#Q\#D$ ,  $Q+@W\#N$  is true and D is the only niece of T, then how many male members are in the family?

- (a) Three
- (b) Four
- (c) Five
- (d) Seven
- (e) Six

#### Directions (Q5–Q8):

Study the following information carefully and answer the questions given below.

Thirteen boxes of different colors are placed one above another in alphabetical order either from bottom or from top.

Each box contains a different number of toffees which is a multiple of 13. Maximum toffees in a box is 169.

There are equal number of boxes placed above as well as below J.

Two boxes are placed between box J and the Pink colored box.

Five boxes are placed between Pink and Yellow colored boxes.

The box which has 13 toffees is placed just below the Yellow colored box.

The Black colored box is placed just above the Red colored box and just below the box which has 169 toffees.

There are as many boxes placed above the Red colored box as below the box which has 13 toffees.

The White colored box is placed just above the box which has 65 toffees and just below the box which has 104 toffees.

There are as many boxes placed between the boxes which have 13 and 52 toffees as between the boxes which have 52 and 104 toffees.

Two boxes are placed between the Blue colored box (which doesn't have 13 toffees) and the Green colored box which is placed just below J.

### IBPS Practise Set - 08

### All Branch - Non Technical

**Q5.** If box F has 13 toffees, then which of the following is the Pink colored box?

- (a) M
- (b) Box which has 52 toffees
- (c) G
- (d) Box which has 169 toffees
- (e) Can't be determined

**Q6.** What is the sum of the toffees in the Blue and Green colored boxes?

- (a) 273
- (b) 156
- (c) 117
- (d) 65
- (e) Can't be determined

**Q7.** If M is the Yellow colored box and the sum of toffees in boxes O and D is equal to the sum of toffees in boxes H and L, then what is the difference between the toffees of box L and O?

- (a) 52
- (b) 78
- (c) 65
- (d) 91
- (e) Can't be determined

**Q8.** Which of the following colored boxes has 52 toffees?

- (a) Red
- (b) Pink
- (c) Blue
- (d) Green
- (e) None of these

**Q9.** Statement:

"The simplest and the most cost-effective way to upgrade your home – Exchange your old furniture and get 25% to 33% off on the new furniture." — An advertisement of a furniture company.

**Assumptions:**

- I. Nowadays, there is no demand for furniture products unless some attractive scheme is offered.
- II. Some customers always desire to have the best quality and do not bother either for cost or for convenience.
- III. Some customers want to keep their home up-to-date with reasonable cost and with fewer hassles.

- (c) Only III is implicit
- (d) I and II are implicit
- (e) None of these

**Q10.** Statement:

The situation of this area still continues to be tense and out of control. People are requested to be in their homes only.

**Assumptions:**

- I. There had been some serious incidents.
- II. People will not go to the office.
- III. Normalcy will be restored shortly.

- (a) Only I is implicit
- (b) I and II are implicit
- (c) None is implicit
- (d) I and III are implicit
- (e) All are implicit

**Q11.** Statement: Should the consumption of aerated drinks be banned in India?

**Arguments:**

- I. Yes, this is the only way to reduce the risk of exposing people to some diseases.
- II. No, each individual should have the right to choose what he wants.
- III. No, there is no confirmed evidence that such products have adverse effects on the human body.
- IV. Yes, it is banned in many other countries also.

- (a) Only I is strong
- (b) I and II are strong
- (c) Only III is strong
- (d) I and IV are strong
- (e) All are strong

### Directions (Q12–Q14):

Study the following information carefully and answer the questions given below.

P@Q means P is East of Q and the distance between P and Q is either 4m or 15m

P#Q means P is West of Q and the distance between P and Q is either 7m or 18m

#### Directions (Q16–Q20):

Study the following information carefully and answer the questions given below.

Eleven seats are placed in a single row in which three seats are vacant. Persons sitting in these seats are facing North. No two vacant seats are placed adjacent to each other. Persons are of different ages. Seats are numbered 1 to 11 from West to East.

Note: Two persons sitting between P and Q doesn't mean that there are only two seats between them — there may be vacant seats.

Three persons sit between A and B. The person who is 32 years old sits immediately left of B. D and E are immediate neighbors of A whose seat number is less than 6. B is as many years older than H as younger than D. C sits 3rd to the left of A. One person sits between G and F who is 40 years old. Sum of the ages of D and G is 82. H sits immediately left of one of the vacant seats. The age of H is half the age of the person who sits at seat number 11. Persons whose ages are 26 and 28 years sit at odd numbered seats. D sits left of the person whose age is 22 years and right of the person whose age is 28 years. No vacant seat is between H and the person whose age is 22 years.

**Q16.** Who among the following sits at seat number 8?

- (a) No one
- (b) G
- (c) B
- (d) H
- (e) None of these

**Q17.** How many persons are sitting between the persons whose ages are 22 and 35 years?

- (a) Four
- (b) Two
- (c) Three
- (d) Five
- (e) None of these

**Q18.** In which of the following seats is the person whose age is 26 years sitting?

- (a) Seat number 3
- (b) Seat number 1
- (c) Seat number 5
- (d) Seat number 7
- (e) None of these

**Q19.** Which of the following is true regarding C?

- (a) C doesn't sit at seat number 1
- (b) One of the vacant seats is not adjacent to C
- (c) C's age is 22 years
- (d) Two persons are sitting between A and C
- (e) None is true

**Q20.** What is the age of the person who sits 2nd to the left of the person whose age is 26 years?

- (a) 28 years
- (b) 22 years
- (c) 40 years
- (d) 50 years
- (e) None of these

#### Directions (Q21–Q25):

Study the following information carefully and answer the questions given below.

Eight persons are working in three different cities i.e., Delhi, Pune, Hyderabad. At least two persons are working in a city. There are four married couples of two generations. The number of males and females are equal in each city.

Note: Married couples are not working in the same city. They have different designations i.e., GM, AGM, CEO, Manager, Assistant Manager, PO, Clerk, Sub Staff (in decreasing order of seniority — GM is the senior-most, Sub Staff is the junior-most).

Only three persons are senior to the only son of B. B doesn't work in Pune. E is the sister-in-law of G who is the junior-most person. H is the son-in-law of D, who is the immediate senior of A. F is the spouse of C and both are not working in Delhi. There are as many posts above the father-in-law of A as below the sibling of A. Only C and H are working in Hyderabad. Only PO and Sub Staff are working in Delhi. Spouse of E is not working in Delhi. G is the daughter-in-law of B who is the spouse of D. F is senior to H and junior to C.

#### Q26.

Statement: The Blue Whale Challenge is reportedly a suicide game in which the player is given certain tasks to complete over a period of 50 days and the final task leads him or her to commit suicide. Taking a serious view of the Blue Whale Challenge game, the Madras High Court directed the Central and Tamil Nadu governments to explore possibilities of banning it.

(I) The Bengal government is planning to introduce a separate chapter on “Responsible use of Internet” in school syllabus in view of regular reports of school children in the state becoming victims of deadly online games.

(II) The judges suggested to the state DGP and Home Secretary that severe warning be issued to those who shared the dangerous online game with others.

(III) The court stressed on the need for creating awareness among students against playing such “dangerous” online games in educational institutions. The bench also said monitoring should be intensified to prevent further spread of the game through sharing.

(IV) The state government will conduct workshops in different schools throughout the state to counsel students on the danger of playing games like Blue Whale either online or through mobile applications.

Which of the following will be the preventive course of action for reducing the impact of suicide game menace?

- (a) Only (III) and (IV)
- (b) Only (II) and (III)
- (c) Only (I) and (II)
- (d) All of the above
- (e) None of these

#### Q27.

Statement: Brushing off the recent two-month discord with China over Dokalam standoff, India displayed robust participation at the BRICS meeting in the Chinese port city of Xiamen. In their first substantive meeting post the 73-day Dokalam faceoff, Prime Minister Narendra Modi and Chinese President Xi Jinping held “constructive” talks during which it was reaffirmed that maintaining peace and tranquillity in the border areas was a pre-requisite for the development of India-China relations.

Which of the following can be inferred from the given statement?

(I) Prime Minister Narendra Modi and Chinese President Xi Jinping held their first substantive bilateral meeting at the BRICS meeting after the Dokalam standoff, which had strained ties between the two countries.

(II) Putting behind the Dokalam standoff, India and China today agreed on a “forward-looking” approach in their ties and to make more efforts to ensure that such incidents do not recur.

(III) Counter terrorism issues were taken up during the course of BRICS, which were discussed in this meeting between Modi and Xi Jinping.

- (a) Only I and II
- (b) Only II and III
- (c) Only I and III
- (d) All of the above
- (e) None of the above

**Q28.**

Statement: After the ministerial performance report and a series of meetings with BJP Chief Amit Shah, PM Modi on 5th July made major strategic changes to his Cabinet – 19 new ministers were inducted into the Government, while 5 were sacked. Government sources conceded that with 2019 Lok Sabha polls drawing near, the concern within the government was to ensure last-mile delivery of projects which was also a reason for this expansion.

Which of the following can be hypothesized from the given statement?

- (I) The Modi government has received criticism from the Opposition for its failures to meet its promises, particularly on job growth.
- (II) This Cabinet reshuffle and expansion can generally be categorized as tactical or strategic.
- (III) The makeover of the union cabinet shows the BJP has a clear eye on the coming 2019 Lok Sabha showdown.

- (a) Only (I) and (III)
- (b) Only (II) and (I)
- (c) Only (III) and (II)
- (d) Only (II)
- (e) None of these

**Directions (Q29–Q31):**

Study the following information carefully and answer the questions given below.

- (e) None of these

#### Directions (Q41–Q45):

Study the following data carefully and answer the questions accordingly.

Seven persons P, Q, R, S, T, U, and V belong to different states – Kerala, Gujarat, Assam, Odisha, Bihar, Punjab, and Haryana (not necessarily in the same order).

They work in different banks – SBI, Canara, ICICI, BOI, UCO, HDFC, and IDBI.

All information is not necessarily in the same order.

R works in SBI but does not belong to Gujarat.

The one who works in Canara belongs to Assam.

V works in BOI.

P belongs to Punjab.

S belongs to Bihar and works in UCO.

The one who belongs to Haryana works in IDBI.

Q belongs to Odisha but does not work in HDFC.

U does not belong to Kerala.

T belongs to Gujarat.

**Q41.** Who among the following works in ICICI bank?

- (a) Q
- (b) U
- (c) T
- (d) P
- (e) None of these

**Q42.** Who among the following belongs to Kerala?

- (a) Q
- (b) U
- (c) T
- (d) P
- (e) None of these

**Q43.** Which of the following combinations is true?

- (a) P – Punjab – HDFC
- (b) S – Bihar – UCO

#### QUANTITATIVE APTITUDE

##### Directions (Q46–Q50):

Given data is regarding three automatic toys on two types of movements: **Neck Movements (NM)** and **Hand Rotation (HR)**.

It starts recording from 9 AM onwards on 12 June. Each toy has different battery percentage and battery capacity.

##### Toy A:

Battery Capacity = 1500 units, Battery Percent = 80%

At every 4th NM and 3rd HR together, 1 unit of battery is consumed.

Toy A gets completely discharged at 11 AM.

##### Toy B:

Battery Capacity = 2000 units, Battery Percent = 75%

NM = 30/min, HR/min = 50% of NM/min of Toy A.

At every 3rd NM and 2nd HR together, 1 unit of battery is consumed.

##### Toy C:

Battery Capacity = 120% of battery capacity of Toy B, Battery Percent = 60%

NM/min = NM/min of Toy A + 5, HR = 30/min.

At every 3rd NM and 2nd HR together, 1 unit of battery is consumed.

**Q46.** If Toy B & A had been charged completely (100%), then what would be the difference between time taken by both the toys to get discharged completely?

- (a) 50 min
- (b) 90 min
- (c) 0 min
- (d) 15 min
- (e) 10 min

**Q47.** What is the difference between total NM and HR of Toy C when the battery of Toy C gets completely discharged? (Consider available battery percent)

- (a) 1620
- (b) 1440
- (c) 1920
- (d) 1200
- (e) 1280

 Margdarshan Prep

**Q48.** If power consumed per NM of Toy B is 0.1 unit, then what is power consumed per HR of Toy B on that day?

- (a) 0.45 unit
- (b) 0.35 unit
- (c) 0.15 unit
- (d) 0.2 unit
- (e) 0.8 unit

**Q49.** Total number of NM/min of all the three toys together is what percent more than total number of HR/min of all the three toys together?

- (a) 63.5%
- (b) 52.25%
- (c) 46.5%
- (d) 48.25%
- (e) 43.75%

**Q50.** If Toy C would be 100% charged, then at what time will the battery of Toy C drain completely?

- (a) 11:30 AM
- (b) 11:45 AM
- (c) 11:35 AM
- (d) 11:40 AM
- (e) 11:50 AM

**Directions (Q51–Q55):**

The first bar graph shows total sales amount of three different companies in three different years, and the second bar graph shows the combined target sales amount of these three companies in these years.

#### Directions (Q56–Q60):

Given Pie Chart shows the number of total voters registered from 4 different villages.  
All registered voters from these four villages cast their votes.

Total Voters = Valid Voters + Invalid Voters

- (i) Total number of valid voters in village Z3 is one-third more than the difference of that from village Z1 & Z2.
- (ii) Difference of valid voters from village Z4 and Z2 is 480. Ratio of total voters from village Z2 and Z4 is 3:7 respectively.
- (iii) Total voters in village Z3 are more than that of Z2. Total invalid voters from all the villages together are 20% of total registered voters from all villages.

**Total Voters = Valid Voters + Invalid Voters**

**Q56.** What is the central angle corresponding to total voters in village Z2?

- (a) 72°
- (b) 54°
- (c) 60°
- (d) 75°
- (e) 66°

**Q57.** If there are 10800 registered voters in village Z2 of which 98% votes were valid, what can be the difference between valid and invalid votes from village Z4?

**Q78.**  $(x - 6)$  women worked for  $(y - 6)$  days and  $(x - 6)$  men worked for  $(y - 10)$  days. In what time will the remaining work be completed by  $(x - 6)$  children?

- (a)  $152\frac{2}{3}$  days
- (b)  $148\frac{1}{3}$  days
- (c) 145 days
- (d) 154 days
- (e) 158 days

#### Directions (Q79–Q80):

Read the following information carefully and answer the questions.

There are some students (male + female) in Class A and Class B in CCA School.

In Class A, females are 30% of total students of Class A.

In Class B, number of male and female students are equal.

Male students in Class B are thrice the number of female students of Class A.

**Q79.** If male students passed in Class A and Class B are in ratio 1:3 respectively and failed male students of both classes are equal, then total male students who passed from both classes together are what percent of total students of both classes?

- (a)  $9\frac{1}{11}\%$
- (b)  $11\frac{1}{9}\%$
- (c)  $14\frac{2}{7}\%$
- (d)  $8\frac{1}{3}\%$
- (e)  $6\frac{2}{3}\%$

**Q80.** If 10% of male students and 20% of female students from Class A left the school and male and female students in Class B increased by 25% and 30% respectively, then total male students of Class A and B together are approximately what percent of total students of both classes together?

- (a) 54%
- (b) 56%
- (c) 59%
- (d) 75%
- (e) 60%

#### ENGLISH LANGUAGE SECTION

##### Directions (81–83):

Read the following passage carefully and answer the questions that follow.

The inflation devil is back and at the wrong time. The 7.35% rise in consumer price inflation in December is a shocker even to those who were prepared for an elevated level of inflation in the backdrop of the rise in prices of food commodities in general, and the astronomical rise in the price of onions, in particular. The disturbing December print has set off fears over whether India is entering a period of slow growth accompanied by high inflation, in other words, stagflation.

Such fears have to be weighed against a few facts. First, the headline inflation number is driven mainly by food inflation at 14.12% — it was 10.01% in November and -2.65% in December 2018. While onion was the prime villain pushing up price inflation in vegetables to a huge 60.50% compared to December 2018, prices of other food items such as meat and fish (up 9.57%), milk (up 4.22%), eggs (up 8.79%) and some pulses were also on the upswing. These are largely seasonal rises in prices and are driven mainly by supply-side factors and will reverse once the supply shortfall is addressed.

Second, core inflation, which is the one that should be of concern, has only inched up marginally from 3.5% in November to 3.7% in December. That said, it would be worrisome indeed if core inflation were to shoot up or if food inflation does not cool down in the next couple of months.

The sharp jump in the CPI has queered the pitch for the Reserve Bank of India's monetary policy review in February. The central bank stood pat on rates in the December policy precisely due to fears of inflation and had even revised upwards its inflation projection for the second half of the fiscal to 4.7–5.1%. The December print is way above the monetary policy committee's (MPC) mandated limit of 6% (4% plus 2%) which means that a rate cut is pretty much off the table for now.

Yet, with growth sagging, there is pressure on the central bank to cut rates at least one more time to stimulate growth. It would be interesting to watch the deliberations of the MPC in February. While the market may be prepared to accept a standstill policy for now, any change in the RBI's stance from accommodative to neutral may not go down well. A lot would also depend on the fiscal arithmetic that would emerge from the budget to be presented on February 1.

Meanwhile, the government should engage all levers to address the supply-side issues that are behind the rise in food inflation. A calming down of food prices will help the bank do what the government and markets want — lower rates.

**Q81.** Which of the following can be inferred in context of the phrase “queered the pitch”, as highlighted in the passage?

(a) With inflation figures rising, it has become difficult to address the challenges now faced in

setting policy rates to sustain the growth of the Indian economy.

(b) The MPC is expected to announce a consecutive rate cut to boost economic activity amid benign inflation.

(c) Both (a) and (d)

(d) Owing to the steady rise of CPI inflation, RBI will have to face the challenge in its upcoming meeting, to decide whether to cut the policy rates or keep them unchanged.

(e) None of these

**Q82.** Which of the following situations can be related with **stagflation**, as mentioned in the passage?

(a) General decline in the prices of goods and services in an economy, which increases the purchasing power of money.

(b) Rising food prices caused by increased demand for agricultural commodities.

(c) An economy experiencing falling productivity along with workers becoming more inefficient, leading to increased costs and reduced output.

(d) None of these

(e) All of the given situations are correct

**Q83.** Which of the following is **not true** in context of the information given in the passage?

(a) The increase in core inflation has not been as high as the increase in CPI inflation.

(b) During the December monetary policy review, RBI had largely left the rates fluctuating.

(c) Addressing the issues that led to inflation in food commodities can marginally reduce the intensity of burden created by the current situation.

(d) Both (a) and (b)

(e) All are correct

### Directions (84–87):

Read the following passage carefully and answer the questions that follow.

For years, the government of Bhutan has enshrined **Gross National Happiness (GNH)** as its guiding light. Though national leaders had long eschewed traditional economic metrics like Gross Domestic Product (GDP) in favor of a more subjective understanding of development, in 2008, the country's constitution formally established that ensuring "a good quality of life for the people of Bhutan" would be its primary aim.

GNH would be the measure of the country's progress, quantified by a complicated index based on "areas of psychological well-being, cultural diversity and resilience, education, health, time use, good governance, community vitality, ecological diversity and resilience, and economic living standards."

 Margdarshan Prep

Sperling said economists and policymakers too often set their sights on certain goals—high GDP and low unemployment—that can disregard how people actually feel. To re-center economics in people’s lived experiences, he proposed the adoption of a different goal: **dignity**.

By Sperling’s criteria, America is failing on all three fronts. Even as unemployment hovers near a 50-year low, the U.S. lacks universal paid-family leave, bereavement leave, and a minimum wage above the poverty line. Millions work multiple jobs to make ends meet, and many students face crippling debt.

Together, these factors add up to millions of Americans living without what Sperling defines as **economic dignity** — unable to provide a basic quality of life for themselves and their families. However, he argued that many are fighting for greater dignity through unionizing, higher minimum wage demands, better healthcare, and child-care policies.

“Happiness,” he emphasized, “is the end goal. So try asking why people are unhappy — and work from there.”

**Q84.** What is the author’s view regarding minimum wage policy as a measure of economic stability of a country?

- (a) None of the given statements is correct
- (b) American citizens have achieved a higher economic stability
- (c) GNP, as used in Bhutan, has been an inefficient and inaccurate way to assess economic stability
- (d) With minimum wages policy, Americans enjoy higher access of civil rights
- (e) The benefits achieved under GNP regimes are higher than those where governments have introduced minimum wage policy

**Q85.** What can be the possible inference drawn from the statement “**Happiness is the end goal**”, as highlighted in the passage?

- (a) Ensuring universal basic income will promote happiness within countries, which is the primary goal of every nation.
- (b) Dignity should not be framed as a metric to fulfill happiness.
- (c) The author has considered happiness as the highest priority and countries must find means to achieve it for overall development.
- (d) The GDP of a country must be given due attention to achieve the overall happiness of the citizens.
- (e) None is correct

**Q86.** What have been the measures suggested by Sperling to achieve economic dignity?

- (a) Giving due attention to health and childcare facilities within a country
- (b) Assurance of provision of basic necessities

 Margdarshan Prep

 Margdarshan Prep

 Margdarshan Prep

- (c) Higher amount of minimum wages must be ascertained
- (d) Both (a) and (b)
- (e) All of the above

**Q87.** The author is in line with:

- (a) Economists believe that GDP and higher per capita income are necessary for economic growth
- (b) Gross National Happiness and quality of life are necessary aims for any economy
- (c) Although GNH is premised on overall psychological well-being, the significance of governance is undermined
- (d) Developed nations have been successfully providing support for the unemployed but are still lagging in GNH
- (e) All are correct

#### Directions (88–91):

Read the following passage carefully and answer the questions that follow.

Conversations about flexible working have shifted. It's no longer enough for companies to offer employees the option to work from home or the office. Employees now want to **work from anywhere**.

According to a Polycom survey across 12 countries, nearly two-thirds of today's global workforce take advantage of the "anywhere working" model — a significant shift from just 14% in 2012.

However, companies express concerns such as lack of trust and the perception that employees are less productive when remote. Older workers (45–60 years) also fear that "working anywhere" will lead to longer hours and being "always connected."

To overcome these concerns, companies must ensure workers are measured by **output**, not hours worked (a problem called *presenteeism*). Countries like Brazil lead the pack here, with 80% of employees adopting remote work and 64% using video communication several times daily.

91% of respondents agreed that technology is key to improving relationships and teamwork — reinforcing that IT departments play a vital role by enabling video collaboration and secure remote operations.

**Q88.** Which of the following can be considered true in context of the passage?

- (a) Most employers feel that employees do not provide optimum output when working away from office.
- (b) Emphasis has been laid on the growing preference for remote working.
- (c) Provision of user-friendly technological ways of communication helps employers build better

relations with remote workers.

- (d) The IT department plays a large role in ensuring the efficient functioning of changing models of work preference.
- (e) All are correct

**Q89.** Which of the following statements can be inferred by the author's view of not giving too much importance to "presenteeism"?

- (a) Highly paid jobs can be highly pressurized too, demanding unhealthy amounts of overtime.
- (b) Businesses should use output numbers instead of time spent working to assess employees.
- (c) When it comes to work, we should value results over time spent.
- (d) Both (b) and (c)
- (e) None of these

**Q90.** Which of the following phrases could fit in the given blank to make the statement meaningful? "Countries like Brazil \_\_\_\_\_ here with 80% of employees adopting the anywhere working model."

- (a) are all and sundry
- (b) have a cup of Joe
- (c) go back to the drawing board
- (d) lead the pack
- (e) All are correct

**Q91.** Which of the following is opposite to **COLLABORATION**, as highlighted in the passage?

- (a) Unraveled
- (b) Cognizant
- (c) Confrontation
- (d) Denunciation
- (e) None of these

### Directions (92):

In the given question, three statements have been divided into four parts each. Identify the part(s) containing grammatical errors.
